(i) a stock option (other than an option meeting the requirements of section 1236 or which would meet such requirements if section 1236 applied to such option) held or granted by a dealer shall not be treated as meeting the requirements of such subparagraph unless such option is entered into in the normal course of the dealer's trade or business, and

(ii) the determination as to whether a sale would result in long-term capital gain or loss shall be made without regard to the rules of subsections (b) and (d) of section 1233 (as made applicable by reason of subsection (h)) '

(e) TECHNICAL AMENDMENT RELATING TO CERTAIN SHORT-TERM GOVERNMENT OBLIGA-TIONS.—Section 1232(a)(4)(A) (relating to certain short-term government obligations), as in effect before the amendments made by section 231(c)(4) of the Tax Equity and Fiscal Responsibility Act of 1982, and section 1232(a)(3)(A), as in effect after such amendments, are each amended by striking out "held less than 1 year".

(f) EFFECTIVE DATES .-

(1) In general.-Except as otherwise provided by this subsection, the amendments made by this section shall apply to sales and exchanges made after June 30, 1983.

CONFORMING AMENDMENTS. amendments made by subsection (b) shall

take effect on July 1, 1983. (3) CAPITAL LOSSES .-

(A) CONFORMING AMENDMENTS: TIMBER. ETC.—The amendments made by subsections (b) and (c) shall not apply with respect to losses on the sale or exchange of property held by the taxpayer on June 30, 1983.

(4) STRADDLES.—The amendments made by subsection (d) shall apply to any position which is part of a straddle (within the meaning of section 1092(c) of the Internal Revenue Code of 1954) held after June 30,

At the end of the second degree amendment add the following:

SEC. 2. CHARITABLE CONTRIBUTIONS OF CERTAIN ITEMS CREATED BY THE TAXPAYER AND OF MOTOR VEHICLE USE.

(a) In General.-Subsection (e) of section 170 of the Internal Revenue Code of 1954 (relating to certain contributions of ordinary income and capital gain property) is amended by adding at the end thereof the following new paragraph:

"(5) SPECIAL RULES FOR CERTAIN CONTRIBU-TIONS OF LITERARY, MUSICAL, OR ARTISTIC

COMPOSITIONS .-

(A) In general.-In the case of a qualified artistic charitable contribution-

(i) the amount of such contribution shall be the fair market value of the property contributed (determined at the time of such contribution), and

'(ii) no reduction in the amount of such contribution shall be made under subparagraph (A) or (B) of paragraph (1).

(B) QUALIFIED ARTISTIC CHARITABLE CON-TRIBUTION.—For purposes of this paragraph, the term 'qualified artistic charitable contribution' means a charitable contribution of any literary, musical, or artistic composition, any letter or memorandum, or similar property, but only if-

'(i) such property was created by the personal efforts of the taxpayer making such

contribution. (ii) the taxpaver—

"(I) has received a written appraisal of the fair market value of such property by a

person qualified to make such appraisal (other than the taxpayer, donee, or any related person (within the meaning of section 168(e)(4)(D))) which is made within 1 year of the date of such contribution, and

"(II) attaches to the taxpayer's income tax return for the taxable year in which such contribution was made a copy of such

appraisal

'(iii) the use of such property by the donee is related to the purpose or function constituting the basis for the donee's exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described under subsection (c)), and

"(iv) the taxpayer receives from the donee a written statement representing that the donee's use of the property will be in accordance with the provisions of clause (iii).

(C) PARAGRAPH NOT TO APPLY TO CERTAIN CONTRIBUTIONS BY PUBLIC OFFICIALS.—Subparagraph (A) shall not apply in the case of any charitable contribution of any letter. memorandum, or similar property which was written, prepared, or produced by or for an individual while such individual was an officer or employee of the United States or of any State (or political subdivision thereof) if the writing, preparation, or production of such property was related to, or arose out of, the performance of such individual's duties as such an officer or employee.

"(D) MAXIMUM DOLLAR LIMITATION .aggregate amount of qualified artistic charitable contributions allowable to any taxpayer as a deduction under subsection (a) for any taxable year shall not exceed 50 percent of the artistic adjusted gross income of the

taxpayer for such taxable year.

"(E) ARTISTIC ADJUSTED GROSS INCOME.— For purposes of this paragraph, the term 'artistic adjusted gross income' means that portion of the adjusted gross income of the taxpayer for the taxable year attributable to income from all property created by the taxpayer which is similar to the qualified artistic charitable contributions made by the taxpayer during the taxable year.

(b) TREATMENT OF EXCESS DEDUCTION FOR PURPOSES OF MINIMUM TAX.-Subparagraph (B) of section 55(e)(1) of such code (relating to alternative itemized deductions) is amended by inserting "determined without regard to section 170(e)(5)" after "deduc-

tions)"

(C) EXPENSES INCURRED IN USING A MOTOR VEHICLE FOR CHARITABLE PURPOSES -Paragraph (6) of section 170(f) of such Code (relating to disallowance of deduction and special rules) is amended to read as follows:

"(6) DEDUCTION FOR UNREIMBURSED EXPEND-

"(A) EXPENSES INCIDENT TO MOTOR VEHICLE USE.—The amount allowable as a deduction under subsection (a) with respect to unreimbursed out-of-pocket expenditures incurred by the taxpayer during the taxable year in operating any motor vehicle on behalf of an organization described in subsection (c) shall be equal to the lesser of—

"(i) the amount of such expenditures, or

"(ii) the product of-

"(I) 20 cents, multiplied by

"(II) the number of miles such motor vehicle was operated by the taxpayer on behalf of such organization during such tax-

able year.

(B) LOBBYING.-No deduction shall be allowed under this section for any out-ofpocket expenditure made by any person on behalf of an organization described in subsection (c) (other than an organization described in section 501(h)(5) (relating to

churches, etc.)) if the expenditure is made for the purpose of influencing legislation (within the meaning of section 501(c)(3))."

On page 10, line 15, strike out "(c)" and insert in lieu thereof "(d)".

(d) Effective Date.-The amendments made by this section shall apply to contributions made after December 31, 1982, in taxable years ending after such date.

Mr. SYMMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consider-

ation.

Mr. METZENBAUM. Mr. President,

a point of order.

The PRESIDING OFFICER. It is not in order for the Senator from Idaho to send an amendment to the desk as there are already two pending amendments.

Mr. DOLE. Mr. President, rather than pursue the amendment at this time, I wonder if the Senator from Idaho would let us try to resolve this between now and the morning.

Mr. SYMMS. Mr. President, I say to the distinguished chairman that that would be fine with me. I am surprised, knowing how fuel-efficient motorcycles are and that we have gone to great lengths to try to encourage multiple riderships of automobiles, that my good friend from Ohio would object to allowing people to ride a motorcycle on a highway they helped pay for. But if he wants to wait until morning, that is OK with me,

Mr. DOLE. Mr. President, the modification of the second-degree amendment does, in fact, add to the so-called artist amendment offered by the distinguished Senator from Montana.

That has been modified-

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Chamber. I would like to be able to see the manager of the bill as he proceeds.

Mr. DOLE. I thank the Senator. I

appreciate that.

That has been modified by amendments offered by the distinguished Presiding Officer, the Senator from Colorado, Senator Armstrong. I am not sure we are going to bring it up. I am just indicating we modified the amendment in that respect so there will not be anybody wondering what the modification was.

Mr. President, are there amendments that are noncontroversial? We are going to work out something with the Senator from Michigan, maybe lay his amendment down tonight, and we are trying to work out something with the Senator from Ala-

bama.

Mr. LEVIN. Mr. President, I am wondering on that score whether or not we will be able to work out a time agreement on my amendment.

Mr. DOLE. I certainly hope so, because we do not have much time after

we come in.

Mr. LEVIN. I wonder if we could work out, if the Senator from Kansas would agree, as soon as we lay it down,

a time agreement of perhaps 20 minutes on the amendment and 10 minutes on any motion to reconsider to make sure that it gets to a vote before cloture.

Mr. DOLE. If the majority leader might permit that, it may be we can debate it tonight. We are trying to work out something, if the Senator from Michigan will permit me to speak to the majority leader.

Mr. HUDDLESTON. Will the Sena-

tor from Kansas Yield?

Mr. DOLE. Yes.

Mr. HUDDLESON. Mr. President, I have an amendment that, as far as I know, is noncontroversial. The Senate passed the exact same language as part of the Immigration Act back in August by a very large vote. It would simply add to the bill the provision relating to the employment of illegal aliens, the sanctions contained therein. It complies with the intent of this bill and does in fact create a great many more-

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER (Mr. HEINZ). The Senator will suspend. The Senate is not in order.

The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, it creates a good many more job opportunities for the American people than the bill we are dealing with now. As far as I know, no one has changed their position on that legislation and very possibly it would not be controversial. I would be happy to present it tonight.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, my good friend from Kentucky has indicated some intention to offer an amendment having to do with the immigration laws. I am not certain exactly where I stand on that issue, but I do think we sort of owe it as a courtesy to those who have been involved in the immigration laws to at least give them an opportunity to know that this matter is before the body. Under those circumstances, just in order to protect their positions, I would think we should not take it up this evening and would have to object to laying aside the pending amendment.

Mr. HUDDLESTON. Mr. President, I would be happy to have some understanding to take it up tomorrow morn-

Mr. DOLE. Mr. President, if the Senator would yield, that is not an amendment to the title the Senator from Kansas has control of from the management standpoint. I think that would be an amendment-it may not be germane to any of the titles. Maybe it would fit anywhere, come to think of it. But I think I agree with the Senator from Ohio. Perhaps we could think about it while we sleep.

Mr. HUDDLESTON. Mr. President, I am not adverse to that. I think the Senate has spoken on this question. But I would be glad to have some opportunity to present it tomorrow if I could be assured of that or give us some time to discuss it tonight and lay it over until tomorrow.

Mr. METZENBAUM. I think Senator SIMPSON and Senator KENNEDY have devoted a lot of time to this subject and are far more knowledgeable than I am. I think, just out of courtesy, since it is totally off the subject of this bill and certainly legislation on it, I think we ought not to even lay aside the pending amendment until they have had a sufficient chance to express their views on it.

Mr. LEVIN. Mr. President, could the Senator use the mike? We were unable to hear him.

Mr. METZENBAUM. I said that since this is a subject totally extraneous to the matter before the Senate this evening and since it deals with our immigration laws and since Senator SIMPSON and Senator KENNEDY have tremendous amount of time in this session on this subject, it would appear to me that, out of courtesy, we ought to wait and give them an opportunity to know that the matter is being presented or some effort is being made to take it up before we agree to lay aside the pending amendment for the purposes of bringing this amendment to the floor. Therefore, I would object.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, a moment ago the Senator from Kansas modified his pending second degree amendment. I would like to take just a moment to explain the nature of the modification because I think it con-

tains a matter of interest to many Senators and perhaps to those beyond the Chamber.

The purpose of his modification, if I understand it correctly, is to incorporate into his amendment the substance and spirit of a proposal offered by the Senator from Montana (Mr. Baucus) relating to the deductibility of certain artistic contributions.

On the last day of the pre-election session, Senators will recall that I objected to considering this matter at that time and felt that it could benefit from additional study. The argument in favor of it basically is tha many local museums and libraries could benefit from the artistic, musical, painting, and sculpture contributions which would be made by artists if they could be given a tax deduction.

Certainly at a time in the history of our country when we want to encourage the preservation and enhancement

of our heritage in this respect, that is a very appealing notion. I had some concern that the proposal, as it was drawn at that point, was unnecessarily broad and might lead to some abuse.

Along with the Senator from Montana and the Senator from Alaska (Mr. Stevens), I have joined in encouraging the Senator from Kansas to offer this modification, but with an additional modification to spell out the fact that such artistic deduction would be limited to no more than 50 percent of the amount of income from artistic endeavors that might be earned by the person claiming the deduction. In other words, to make it absolutely clear we would not have a situation where somebody had income from the practice of law, oil wells, the sale of stock, or something else, and use an artistic contribution to shelter that income.

Moreover, at my request, as a part of the work product of the working group I have just mentioned, there was added to this compromise a provision which permits in the future persons engaged in charitable activity and using their automobiles in the conduct of that activity to get the same mileage deduction for the use of their automobile that persons engaged in business or commerce would be entitled to get.

All in all, I think it is a very worthwhile resolution of the problem. Having been constrained to object to the consideration of this matter a few weeks ago, I wanted to simply report that, with the cooperation of the Senators, we have succeeded, we think, in working out a very neatly balanced item.

Mr. METZENBAUM. Will the Senator yield?

Mr. ARMSTRONG. I will yield to the Senator from Montana first.

Mr. BAUCUS. The Senator has very aptly explained the modification. I want to thank the Senators from Kansas, Colorado, and Alaska for their efforts.

Mr. President, the purpose of the artists tax equity and donation amendment is to encourage and promote charitable donations of artistic and literary works to the depositories—libraries and museums—of our national heritage. The amendment achieves this objective by correcting an inequity in the Tax Code.

# BACKGROUND

Mr. President, in 1969, Congress amended the tax code to prevent political figures from taking tax deductions when donating their public papers to charitable institutions. That 1969 law also included artists and creators of literary works. In effect, the law said that the creator of a literary or artistic work could deduct only the value of the materials used in creating that work when donating it to a charitable institution.

However, the law does permit collectors of artistic works to deduct the full fair market value of the work when donating it to a charitable institution.

This inequity has resulted in a drastic decline in donations of works—many of unquestioned value and importance to the Nation's culture—to our libraries and museums.

This amendment would correct the inequity that exists between creators and collectors, and would encourage and promote donations to our Nation's cultural institutions.

# SUPPORTERS

The original bill from which the amendment is derived enjoys wide support. There are 26 cosponsors in the Senate alone. In addition, President Reagan's Task Force on the Arts and Humanities endorsed the change in the tax law embodied in the amendment in its report of October 1981. Finally, numerous libraries and museums across the country strongly support passage of this measure.

#### REVENUE EFFECT

Mr. President, the loss to the treasury of this bill is small—especially when measured against the importance of preserving works of our national heritage. According to both CBO and JTC, the amendment will cost less than \$5 million in 1983 and less than \$15 million annually thereafter.

#### THE QUESTION OF ABUSE

Mr. President, a few of my colleagues have raised the question of the potential for abuse that may exist with this legislation.

I beliee the risk of abuse is substantially limited by provisions in the amendment, and by mechanisms already in place. The amendment requires an independent appraisal; requires that the institution to which a work is being donated be donated in accordance with the related-use requirement; and the amendment subjects any amount deductible under it to the provisions of the alternative individual minimum income tax.

In addition, the IRS has several tools to reduce the risk of abuse. The IRS has an art advisory panel, which is working well and which has reduced the deductions allowable in a number of instances; the IRS computors raise a red flag whenever a large difference exists between the purchase price of a work and its value for deduction purposes; a red flag is also automatically raised whenever any return contains an art donation valued at \$20,000 or more. Finally, there are penalties in the law for fraudulent behavior, and there are limits on the amount an individual can deduct from his taxable income.

# CONCLUSION

This measure will rectify an inequity that has existed in the tax code for too long and would help reverse the decline in donations of creative works to nonprofit institutions that has occurred over the past decade. I urge support for this amendment, and thank my colleagues for their endeavors on its behalf.

IN SUPPORT OF ARTISTS TAX EQUITY AND DONATION ACT

Mr. SYMMS. Mr. President, I am pleased to lend my strong support for the amendment which would permit the creator of literary, musical, or artistic compositions to deduct as a charitable contribution the fair market value of original works donated to a nonprofit charitable institution or organization. Until 1969 the Internal Revenue Code allowed deductibility for such gifts, not only by collectors, but by the creators themselves.

Since the change in the law in 1969, artists poets, musicians, authors, and scientists have been denied market deductibility for gifts of their own compositions to nonprofit institutions. Only the intrinsic value of the basic materials used could be deducted. The result has been that artists, composers, and authors have ceased contributing valuable works of art, music, and letters. A great wealth of original works has now been lost from preservation by our Nation's archives, libraries, and museums. Only collectors have had the benefit of fair market value tax deductibility when making gifts of literary or artistic works.

The Subcommittee on Estate and Gift Taxation, which I chair, held hearings on this issue in November of 1981, and many notable artists and composers testified in support of legislation to restore this important tax incentive for the donation of materials and creative works to nonprofit institutions.

I am a cosponsor of S. 2225, the Artists Tax Equity and Donation Act of 1982, introduced by Senator Baucus to correct this tax rule which has denied fair treatment in deductibility for artistic works. I applaud and compliment Senator Baucus for his continued efforts to promote this measure, and urge my colleagues to join us in support.

Mr. ARMSTRONG. I am going to yield the floor but before I do I want to again acknowledge my appreciation to the Senator from Montana for being permitted the opportunity to work with him on this. I think we have arrived at a satisfactory compromise.

Several Sentors addressed the Chair. The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, since the matter came up about the contribution of art, manuscripts, and related thing, I think I should state I am opposed to the amendment. In my judgment, the amendment would create a

considerable tax loophole if it should become law.

For example, under this amendment, a person could give a painting or a manuscript and he could deduct the appraised value from his income.

Assuming that that person is one of these successful people who is in a 50-percent bracket and he gave something, let us say, appraised at \$100, that would be worth \$50 to him at the expense of Uncle Sam.

On the other hand, suppose he sold it. Well, 40 percent is a fair or not an unusual commission. So if he sold it for the same \$100 that would leave him \$60. He would owe tax at 50 percent rate, leaving him \$30 after tax. So to give it away it would cost Uncle Sam \$50 and the taxpayer would be richer because he saved this \$50 on taxes he otherwise would have paid.

If he had sold it, Mr. President, it would have been worth \$30 to him by the time he got through paying a commission and his taxes. He makes \$20 at Uncle Sam's expense by donating the art rather than by selling it. That is assuming that he is not doing what so often happens to these appraisals. It is not at all unusual for the appraisal to be 50 percent above the actual selling price.

This area of valuing gifts, paintings and works of art has been one of the areas of tax abuse for a great number of years. The Treasury has been very concerned about it for good reason.

Assuming that the appraisal of a work of art is 50 percent above what the artist could have sold it, and that is not unusual, then, Mr. President, if the artist donates the art with an appraisal of \$150, it would save him \$75 in taxes compared to \$30 he would have left if he had sold it and paid a 40-percent commission. Uncle Sam is paying the \$45 difference through this loophole.

Mr. STEVENS. Will the Senator yield on that one point?

Mr. LONG. I will yield for a question.

Mr. STEVENS. Does the Senator realize that the 50 percent is a limitation on the tax advantage? It is not the tax advantage. In other words, the limitation of the shelter is 50 percent of the income derived from selling similar art

I am afraid the Senator has the impression that this gives a 50-percent advantage by donating a work of art.

Mr. LONG. I am assuming he is, in a 50-percent tax bracket. If he is then the donation is worth 50 percent of the value which he states is the appraised price.

Mr. STEVENS. If the Senator will look at the amendment just agreed to, the maximum tax shelter is 50 percent of the income from the same line of business. By definition, there are few people in the 50-percent tax bracket not selling art.

Mr. LONG. That just makes it all the worse. Basically, what that means is that this is a tax loophole for the benefit of the rich, those who are making a lot of money. The little fellow on his way up, in the 20-percent tax bracket, would not get much benefit since it would not mean much to him. But for those who are making a lot of money in this endeavor by selling paintings, this could be very valuable to them because they would be in the 50-percent tax bracket. The 50percent tax limitation would not make any difference to them because they would have a lot of income from paintings they sold.

Mr. STEVENS. If the Senator will yield for one more comment, I come from an area where there is developing a very strong artist community, but they do not make a lot of money. The only place they can sell their paintings primarily is to people who live outside the State. This means that if they are making some money, if they want to donate some of their works of art to their local museums and their university, their alma mater, they can do it and there is some incentive to do it. Admiral Hedly, there is a tax advantage to people who are in the \$100,000 bracket selling their paintings, perhaps \$25,000 paintings. This means that the maximum tax shelter allowed would be \$50,000, assuming all \$100,000 of their adjusted gross income were attributable to artistic income. Therefore a \$25,000 painting donated to a museum would have a tax value to a donor in the 50 percent tax bracket of \$12,500. The maximum allowable shelter for 1 year would be \$50,000.

Those artists I refer to do not happen to be in the 50-percent bracket at \$100,000. I am sure the Senator would realize that. As a consequence, there is not the savings the Senator assumes in this amendment.

The Senator from Colorado has specifically limited it. We have been advised the maximum exposure is \$5 million in terms of loss to the Treasury annually over the way the Senator from Colorado has amended this proposal.

Mr. LONG. It does not make any difference to me whether the loophole is worth \$5 million, \$50 million, or \$100 million. A loophole is a loophole! When the loophole is one that benefits those in a high tax bracket and would not provide the same benefit to those not in a high tax bracket, then this makes it all the worse kind of a loophole, in the view of this Senator.

The Treasury is opposed to it and for good reason.

Mr. President, I have discussed this matter with people who know something about the subject matter. In my judgment, I should oppose the amendment and I do oppose the amendment for the reasons I have stated.

Mr. DOLE. Mr. President, I send another modification to the desk as a second-degree amendment. This is to so-called California utilities amendment. I send it for myself. Senator Packwood, Senator Cranston, and Senator HAYAKAWA.

The PRESIDING OFFICER (Mr. ARMSTRONG). The amendment will be so modified.

The amendment (UP No. 1457), as further modified, is as follows:

At the end of the amendment add the following:

SEC. TAX TREATMENT OF PUBLIC UTILITY PROPERTY.

(a) NORMALIZATION METHOD FOR PURPOSES OF DEPRECIATION.

(1) In general.—Paragraph (3) of section 168(e) of the Internal Revenue Code of 1954 (relating to special rule for certain public utility property) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC.-

'(i) In general.-One way in which the requirements of subparagraph (B) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of sub-

paragraph (B).

"(ii) Use of inconsistent estimates and projections.—The procedures and adjustments which are to be treated as inconsistent for purposes of clause (i) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under subparagraph (B)(ii) unless such estimate or projection is also used, for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.

"(iii) REGULATORY AUTHORITY.-The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of

clause (i)."

(2) AMENDMENT TO SECTION 167(1), Subparagraph (G) of section 167(1)(3) of such Code (defining normalization method of accounting) is amended by adding at the end thereof the following new sentence: "For purposes of this subparagraph, rules similar to the rules of section 168(e)(3)(C) shall apply.

(b) COMPUTATIONS FOR PURPOSES OF IN-VESTMENT CREDIT.—Subsection (f) of section 46 of such Code (relating to limitation in case of certain regulated companies) is amended by adding at the end thereof the

following new paragraph:

"(10) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC., FOR PURPOSES OF PARA-

GRAPHS (1) AND (2).—
"(A) IN GENERAL.—One way in which the requirements of paragraph (1) or (2) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of paragraph (1) or paragraph (2), as the case may be.

"(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of subparagraph (A) shall include any procedure or adjustment for ratemaking purposes which uses an esti-mate or projection of the taxpayer's qualified investment for purposes of the credit allowable by section 38 unless such estimate or projection is consistent with the estimates and projections of property which are used, for ratemaking purposes, with respect to the taxpayer's depreciation expense and rate base

"(C) REGULATORY AUTHORITY.-The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in subparagraph (B)) which are to treated as inconsistent for purpose of subparagraph (A).".

(c) EFFECTIVE DATES .-

(1) GENERAL RULE.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December

(2) SPECIAL RULE FOR PERIODS BEGINNING

BEFORE MARCH 1, 1980.

(A) In general.—Subject to the provisions of paragraphs (3) and (4), notwithstanding the provisions of section 167(l) and 46(f) of the Internal Revenue Code of 1954 and of any regulations prescribed by the Secretary of the Treasury (or his delegate) under such sections, the use for ratemaking purposes or for reflecting operating results in the taxpayer's regulated books of account, for any period before March 1, 1980, of—

(i) any estimates or projections relating to the amounts of the taxpayer's tax expense. depreciation expense, deferred tax reserve, credit allowable under section 38 of such

Code, or rate base, or

(ii) any adjustments to the taxpayer's rate of return,

shall not be treated as inconsistent with the requirements of subparagraph (G) of such section 167(l)(3) nor inconsistent with the requirements of paragraph (1) or (2) of such section 46(f), where such estimates or projections, or such rate or return adjustments, were included in a qualified order.

(B) QUALIFIED ORDER DEFINED .- For DUITposes of this subsection, the term "qualified

order" means an order-

(i) by a public utility commission which was entered before March 13, 1980.

(ii) which used the estimates, projections, or rate of return adjustments referred to in paragraph (1) subparagraph (A) to determine the amount of the rates to be collected by the taxpayer or the amount of a refund with respect to rates previously collected.

(iii) which ordered such rates to be collected or refunds to be made (whether or not such order actually was implemented or enforced).

(3) LIMITATIONS ON APPLICATION OF PARA-GRAPH (2).

(A) TAXPAYER MUST ENTER INTO CLOSING AGREEMENT BEFORE PARAGRAPH (2) APPLIES. Paragraph (2) shall not apply to any taxpayer unless, before the later of-

(i) July 1, 1983, or

(ii) 6 months after the refunds or rate reductions are actually made pursuant to a qualified order.

the taxpayer enters into a closing agreement (within the meaning of section 7121 of the Internal Revenue Code of 1954) which provides for the computation of the taxpayer's increased liability for tax described in subparagraph (B).

(B) COMPUTATION OF LIABILITY FOR TAX FOR TAXABLE YEARS REFLECTING REFUNDS, ETC. MADE.—In the case of any taxable year for which return filed by a taxpayer reflects a refund or rate reduction pursuant to a

qualified order, the closing agreement under subparagraph (A) shall provide that liability for tax of the taxpayer for such taxable year shall be increased by the excess of-

(i) such liability computed without regard to such refund of rate reduction, over

(ii) such liability computed with regard to such refund or reduction.

For purposes of this subparagraph, the term 'refund" shall include any credit allowed by the taxpayer under a qualified order but shall not include interest payable with respect to any refund under such order.

(4) SPECIAL RULES RELATING TO PAYMENT OF REFUNDS OR INTEREST BY THE UNITED STATES OR THE TAXAPAYER.-

(A) DELAY IN MAKING REFUNDS OR CRED-ITS .- No refund or credit of any overpayement of tax attributable to the provisions of paragraph (2) shall be made or allowed before October 1, 1983.

(B) No INTEREST PAYABLE BY UNITED STATES.—No interest shall be payable under section 6611 of the Internal Revenue Code of 1954 on any overpayment of tax which is attributable to the application of paragraph

(C) LIMITATION OF INTEREST IMPOSED ON TAXPAYER.-If the taxpayer timely enters into the closing agreement described in paragraph (3)(A), the last date prescribed for payment of the amount of any increase in tax liability by reason of such agreement shall, for purposes of section 6601 of such Code, be treated as the later of-

(i) June 30, 1983, or

(ii) the date described in paragraph (3)(A)(ii).

(5) No INFERENCE -The application of subparagraph (G) of section 167(1)(3) of the International Revenue Code of 1954, and the application of paragraphs (1) and (2) of section 46(f) of such Code, to taxable years beginning before January 1, 1980, shall be determined without any inference drawn from the amendments made by subsections (a) and (b) of this section or from the rules contained in paragraphs (2), (3), and (4). Nothing in the preceding sentence shall be construed to limit the relief provided by paragraphs (2), (3), and (4).

Mr. DOLE. Mr. President, we are going to work out something for the distinguished Senator from Michigan (Mr. Levin). I think we will capitulate part way to the Senator from Alabama. We are still checking. I promise the Senator we will not leave him empty-handed. We may just leave him but not empty handed. [Laughter.]

I know there is one other noncontroversial amendment we can dispose of.

The Senator from New Hampshire is here. I understand he has cleared this amendment all the way around. I ask unanimous consent that the pending amendments be temporarily set aside for the consideration of the amendment by the distinguished Senator from New Hampshire (Mr. HUMPHREY) and that no amendment to the amendments be in order.

The PRESIDING OFFICER. there objection? Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I am sorry that I did not hear the nature of the request.

Mr. DOLE. I asked unanimous consent that no amendment to the amendments be in order.

Mr. METZENBAUM. And what is the amendment that the Senator from New Hampshire is coming with, Mr. President?

Mr. HUMPHREY. It is an amendment that will insure that States like New Hampshire, which have no mass transit, will be able to spend fully their money on highway programs.

Mr. METZENBAUM. I did not hear

the Senator.

Mr. HUMPHREY. It is an amendment that will insure States which have no mass transit, such as my own, will be able to spend their mass transit funds fully on highway programs.

Mr. METZENBAUM. Is there anything in the amendment beyond that?

Mr. HUMPHREY. There is one minor point that permits my State or any State to spend mass transit funds for the acquisition of railroad rights-

To explain that, there are some railroad rights-of-way that my State wants to acquire to protect them so they will not be developed.

Mr. METZENBAUM. I have no ob-

jection.

The PRESIDING OFFICER. Without objection, the pending amend-ments are set aside and the Senator from New Hampshire is recognized.

UP AMENDMENT NO. 1471

(Purpose: To amend section 314(c))

Mr. HUMPHREY. Mr. President, I send an amendment to the desk on behalf of myself and my colleague (Mr. RUDMAN) and ask that it be considered.

The PRESIDING OFFICER. The

amendment will be stated.

The legislative clerk read as follows: The Senator from New Hampshire (Mr. HUMPHREY), for himself and Mr. RUDMAN, proposes an unprinted amendment numbered 1471

On page 134, in section 314(c)-

(1) after "United States Code" insert ", including the acquisition of railroad rights of way"; and

(2) by striking out the last sentence, and inserting in lieu thereof, "The Secretary shall not approve grants for highway projects in a state to the extent that grants used for such projects and for transit related projects in such state would exceed one half of one percent of the funds available under this section."

Mr. HUMPHREY. Mr. President, as the chairman of the Committee on Finance has pointed out, this amendment has been accepted by both sides of the aisle, by the chairman of the Banking Committee and the ranking member, and urge its acceptance.

Mr. SYMMS. will the Senator yield?

Mr. HUMPHREY. Yes.

Mr. SYMMS. I ask that the Senator

add my name as a cosponsor.

Mr. HUMPHREY, I ask unanimous consent that that be done, Mr. President.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. LEVIN. Will the Senator yield for a question?

Mr. HUMPHREY. Yes.

Mr. LEVIN. Does this change the amount of money going to any State? Mr. HUMPHREY. It does not.

Mr. LEVIN. I thank the Senator. Mr. GARN. Mr. President, will the Senator from New Hampshire yield?

Mr. HUMPHREY. Yes, Mr. Presi-

dent.

Mr. GARN. Mr. President, not only am I pleased to accept the amendment that the Senator from New Hampshire offers, but Senator RIEGLE is also willing to accept it. It is a good amendment. It gives States more flexibility in the use of funds that are already available to them. It is a good amendment, and I commend the Senator from New Hampshire for offering it.

Mr. HUMPHREY. I thank the Senator from Utah. I thank the Senator from Kansas in turn for his kind help in arranging for the acceptance of this

amendment.

Mr. President, I urge adoption of the

amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1471) was

agreed to.

Mr. DOLE. I move to reconsider the vote.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENTS NOS. 1456 AND 1457

(Subsequently numbered amendments Nos. 5598 and 5599.)

The PRESIDING OFFICER. The question recurs on the second-degree amendment of the Senator from

Mr. DOLE. Mr. President, we were hoping we might be able to dispose by a voice vote of an amendment that Senator Boschwitz, Senator Grass-LEY, and others have been working on. In the meantime, I understand Senator Sarbanes and Senator Chaffe may have a noncontroversial amendment.

Mr. METZENBAUM. I am looking at that amendment, Mr. President. I have not had a chance to look at it. I shall have to object to this. Boschwitz amendment has something on the truck fees. I have no objection.

The PRESIDING OFFICER. Does any Senator seek recognition?

Mr. DOLE. Mr. President, the amendment of the distinguished Senator from Minnesota has been cleared all the way around, along with the second-degree amendment of the Senator from Iowa

Mr. BOSCHWITZ, Yes, Mr. President, it has

Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER, It is not in order at this time.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendments be temporarily set aside for the consideration of the amendment to be offered by the distinguished Senator from Minnesota (Mr. Boschwitz) to be subject only to one amendment in the second degree to be offered by the distinguished Senator from Iowa (Mr. Grassley) and that no other amendments to the amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered. The second-degree amendment of the Senator from Kansas is set aside.

#### UP AMENDMENT NO. 1472

(Subsequently numbered amendment No. 5600.)

(Purpose: To lower the threshold weight subject to the vehicle parts tax and to lower the highway use tax)

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk on behalf of myself, Mr. Grassley, Mr. Jepsen, Mr. Melcher, Mr. Johnston, Mr. Symms, Mr. Huddleston, Mr. Abdnor, Mr. Baucus, Mrs. Hawkins, Mr. HELMS, Mr. D'AMATO, Mr. THUR-MOND, Mr. McClure, Mr. Armstrong, Mr. Levin, and Mr. Kasten.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Minnesota (Mr. Bosch-WITZ), for himself, Mr. Grassley, Mr. Jepsen, Mr. Melcher, Mr. Johnston, Mr. SYMMS, Mr. Huddleston, Mr. Abdnor, Mr. Baucus, Mrs. Hawkins, Mr. Helms, Mr. D'Amato, Mr. Thurmond, Mr. McClure, Mr. ARMSTRONG, Mr. LEVIN, and Mr. KASTEN, proposes an unprinted amendment numbered 1472

Strike out sections 112 and 113 of the bill and insert in lieu thereof the following: SEC. 112. EXCISE TAX ON HEAVY TRUCKS.

- (a) CHANGES IN EXISTING MANUFACTURERS EXCISE TAX .-
- (1) INCREASE IN THRESHOLD WEIGHTS .-Paragraph (2) of section 4061(a) (relating to exclusion for light-duty trucks, etc.) amended to read as follows:
- "(2) EXCLUSION FOR TRUCKS WITH GROSS VE-HICLE WEIGHT OF 33,000 POUNDS OR LESS, AND CERTAIN TRAILERS .-
- "(A) The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).
- "(B) The tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regulations prescribed by the Secretary)."
  - (2) THRESHOLD WEIGHT FOR PARTS.
- (A) In general.—Section 4061(b) (relating to tax on parts and accessories) is amended by adding at the end thereof the following new paragraph:

"(3) EXCLUSION FOR CERTAIN PARTS AND ACcessories.—No tax shall be imposed by paragraph (1) on any part or accessory which, as determined under regulations prescribed by the Secretary, is suitable for use. and ordinarily used on, or in connection with, a vehicle having a gross vehicle weight of 10,000 pounds or less.

(B) Conforming amendment.—Paragraph (1) of section 4061(b) is amended by striking out "paragraph (2)" and inserting in lieu thereof "paragraphs (2) and (3)".

(3) EXEMPTION OF CERTAIN RAIL TRAILERS AND VANS.-Subsection (a) of section 4063 (relating to exemptions for specified articles) is amended by adding at the end thereof the following new paragraph:

"(8) RAIL TRAILERS AND RAIL VANS .- The tax imposed under section 4061 shall not

apply in the case of-

"(A) any chassis or body of a trailer or semitrailer which is designed for use both as a highway vehicle and a railroad car, and

'(B) any parts or accessories designed primarily for use on or in connection with an article described in subparagraph (A).

For purposes of this paragraph, a piggyback trailer or semitrailer shall not be treated as designed for use as a railroad car.

(4) TERMINATION OF TAX.—Subsection (a) of section 4061 (relating to trucks, buses, tractors) is amended by adding at the end thereof the following new paragraph:

(3) TERMINATION.—The tax imposed by this subsection shall not apply on and after

April 1, 1983.".

EFFECTIVE DATE.—The amendments (5) made by this subsection shall take effect on the day after the date of the enactment of this Act.

(b) INCREASE IN PARTS TAX.

- (1) IN GENERAL.—Paragraph (1) of section 4061 (b) (relating to tax on parts and accessories) is amended by striking out "8 percent of the price for which so sold, except that on and after October 1, 1984, the rate shall be 5 percent" and insert in lieu thereof "10 percent of the price for which so sold, except that no tax shall be imposed under this paragraph on and after October 1, 1989'
- (2) COORDINATION WITH RETAIL SALES TAX.

(A) Subsection (e) of section 4221 (relating to certain tax-free sales) is amended by adding at the end thereof the following new

"(5) TRUCK PARTS AND ACCESSORIES.-Under regulations prescribed by the Secretary, the tax imposed by section 4061(b) shall not apply to any part or accesssory which is sold for resale by the purchaser on or in connection with the first retail sale by such purchaser of an article which is taxable under

section 4051.

(B) Paragraph (2) of section 6416(b) (relating to special cases in which tax payments considered overpayments) is amended-

(i) by striking out "or" at the end of subparagraph (M).

(ii) by striking out the period at end of subparagraph (N) and inserting in lieu thereof "; or", and

(iii) by inserting after subparagraph (N) the following new subparagraph:

"(C) resold on or in connection with the first retail sale of an article which was taxable under section 4051.".

(3) Effective Date.—The amendments made by this subsection shall take effect on

April 1, 1983.

(c) IMPOSITION OF RETAIL TAX ON SALE OF HEAVY TRUCKS AND TRAILERS.

(1) In general.—Chapter 31 is amended by adding at the end thereof the following new subchanter:

"SUBCHAPTER B-HEAVY TRUCKS AND TRAILERS

"Sec. 4051. Imposition of tax on heavy trucks and trailers sold at retail.

"Sec. 4052. Definitions and special rules.

"Sec. 4053. Exemptions.

"SEC. 4051. IMPOSITION OF TAX ON HEAVY TRUCKS AND TRAILERS SOLD AT RETAIL.

(a) IMPOSITION OF TAX.-

"(1) In general.—There is hereby imposed on the first retail sale of the following articles (including in each case parts or accessories sold on or in connection therewith or with the sale thereof) a tax of 12 percent of the amount for which the article is so sold:

"(A) Automobile truck chassis. "(B) Automobile truck bodies.

"(C) Truck trailer and semitrailer chassis. "(D) Truck trailer and semitrailer bodies.

"(E) Tractors of the kind chiefly used for highway transportation in combination with

a trailer or semitrailer.

"(2) Exclusion for trucks weighing 33,000 POUNDS OR LESS .- The tax imposed by paragraph (1) shall not apply to automobile truck chassis and automobile truck bodies, suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less (as determined under regulations prescribed by the Secretary).

(3) EXCLUSION FOR TRAILERS WEIGHING 26,000 POUNDS OR LESS .- The tax imposed by paragraph (1) shall not apply to truck trailer and semitrailer chassis and bodies, suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less (as determined under regula-

tions prescribed by the Secretary).

"(4) Sale of trucks, etc., treated as sale OF CHASSIS AND BODY .- For purposes of this subsection, a sale of an automobile truck or truck trailer or semitrailer shall be considered to be a sale of a chassis and of a body

described in paragraph (1).

"(b) TERMINATION.—On and after October 1, 1989, the taxes imposed by this section

shall not apply.

"(c) Transitional Rule.—In the case of any article taxable under subsection (a) on which tax was paid under section 4061(a), subsection (a) shall be applied by substituting '2 percent' for '12 percent'.

"SEC. 4052. DEFINITIONS AND SPECIAL RULES.

"(a) FIRST RETAIL SALE.—For purposes of this subchapter-

"(1) In GENERAL.—The term 'first retail sale' means the first sale, for a purpose other than for resale, after manufacture, production, or importation.

(2) LEASES CONSIDERED AS SALES.—Rules similar to the rules of section 4217 shall

apply.

"(3) USE TREATED AS SALE.—

"(A) In general.—If any person uses an article taxable under section 4051 before the first retail sale of such article, then such person shall be liable for tax under section 4051 in the same manner as if such article were sold at retail by him.

"(B) EXEMPT FOR USE IN FURTHER MANUFAC-TURE.—Subparagraph (A) shall not apply to use of an article as material in the manufacture or production of, or as a component part of, another article taxable under section 4051 to be manufactured or produced

by him.

"(C) COMPUTATION OF TAX.—In the case of any person made liable for tax by subparagraph (A), the tax shall be computed on the price at which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(b) DETERMINATION OF PRICE.-

"(1) In general.-In determining price for purposes of this subchapter-

"(A) there shall be included any charge incident to placing the article in condition ready for use,

"(B) there shall be excluded-

"(i) the amount of the tax imposed by this subchapter.

"(ii) if stated as a separate charge, the amount of any retail sales tax imposed by any State or political subdivision thereof or the District of Columbia, whether the liability for such tax is imposed on the vendor or vendee and

"(iii) the fair market value (including any tax imposed by section 4071) at retail of any tires (not inleuding any metal rim or rim

base), and

"(C) the price shall inlcude the value of any trade-in.

"(2) SALES NOT AT ARM'S LENGTH.-In the case of any article sold (otherwise than through an arm's-length transaction) at less than the fair market price, the tax under this subchapter shall be computed on the price for which similar articles are sold at retail in the ordinary course of trade, as determined by the Secretary.

"(c) CERTAIN COMBINATIONS NOT TREATED AS FURTHER MANUFACTURE.—For purposes of this subchapter (other than subsection (a)(3)(B)), a person shall not be treated as engaged in the manufacture of any article merely by reason of combining such article with an item described in section 4063(d).

"(d) CERTAIN OTHER RULES MADE APPLICA-BLE.-Under regulations prescribed by the Secretary, rules similar to the rules of-

"(1) subsections (c) and (d) of section 4216 (relating to partial payments),

"(2) subsection (f) of section 4216 (relating to certain trucks incorporating used components), and

"(3) section 4222 (relating to registration), shall apply for purposes of this subchapter.

"SEC. 4053. EXEMPTIONS.

"(a) EXEMPTION OF SPECIFIED ARTICLES. No tax shall be imposed under section 4051 on any article specified in subsection (a) of section 4063.

"(b) CERTAIN EXEMPTIONS MADE APPLICA-BLE.—The exemptions provided by section 4221(a) are hereby extended to the tax imposed by section 4051."

(2) TECHNICAL AND CONFORMING AMEND-

(A) Chapter 31 is amended by striking out the chapter heading and inserting in lieu thereof the following:

"Chapter 31—RETAIL EXCISE TAXES

"Subchapter A. Special fuels.
"Subchapter B. Heavy trucks and trailers.

"SUBCHAPTER A-SPECIAL FUELS".

(B) The table of chapters for subtitle D is amended by striking out the item relating to chapter 31 and inserting in lieu thereof the following new item:

'Chapter 31. Retail excise taxes."

(C) Paragraph (2) of section 6416(b), as amended by this Act, is amended by inserting "or under section 4051" after "section 4041(a)".

(D) Paragraph (1) of section 6416(a) is amended by striking out "chapter 31 (special fuels)" and inserting in lieu thereof "chapter 31 (relating to retail excise taxes)".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on April 1, 1983.

SEC. 113. HEAVY TRUCK USE TAX.

(a) INCREASE IN RATE OF TAX.-Subsection (a) of section 4481 (relating to imposition of tax) is amended to read as follows:

"(a) Imposition of Tax.—A tax is hereby imposed on the use of any highway motor vehicle which (together with the semitrailers and trailers customarily used in connection with highway motor vehicles of the same type as such highway motor vehicle) has a taxable gross weight of at least 33,000 pounds in an amount determined under the following table:

"If the taxable gross The amount of tax per

weight is: taxable period is:
Less than 55,000 pounds. \$80, plus \$10 for each 1,000 pounds or frac-tion thereof in excess

of 70,000 pounds

of 33,000 pounds.

At least 55,000 pounds \$300, plus \$20 for each but less than 70,000 1,000 pounds or frac-tion thereof in excess pounds.

but less than 80,000 pounds.

of 55,000 pounds. At least 70,000 pounds \$600, plus \$60 for each 1,000 pounds or frac-tion thereof in excess

80,000 pounds or more .... \$1,200. (b) EXEMPTION WHERE TRUCK USED FOR 5,000 MILES OR LESS ON PUBLIC HIGHWAYS .-Section 4483 (relating to exemptions from highway use tax) is amended by adding after subsection (c) thereof the following new subsection:

'(d) EXEMPTION FOR TRUCKS USED FOR 5,000 MILES OR LESS ON PUBLIC HIGHWAYS .-

(1) Suspension of Tax.-

"(A) In general.—If—
"(i) it is reasonable to expect that the use of any highway motor vehicle on public highways during any taxable period will be 5,000 miles or less, and

"(ii) the owner of such vehicle furnishes such information as the Secretary may by forms or regulations required with respect to the expected use of such vehicle.

then the collection of the tax imposed by section 4481 with respect to the use of such vehicle shall be suspended during the taxable period.

(B) SUSPENSION CEASES TO APPLY WHERE USE EXCEEDS 5,000 MILES.—Subparagraph (A) shall cease to apply with respect to any highway motor vehicle whenever the use of such vehicle on public highways during the taxable period exceeds 5,000 miles.

(2) EXEMPTION.-If-

"(A) the collection of the tax imposed by section 4481 with respect to any highway motor vehicle is suspended under paragraph

(1),
"(B) such vehicle is not used during the taxable period on public highways for more

than 5,000 miles, and

"(C) except as otherwise provided in regulations, the owner of such vehicle furnishes such information as the Secretary may require with respect to the use of such vehicle during the taxable period.

then no tax shall be imposed by section 4481 on the use of such vehicle for the taxable period.

"(3) REFUND WHERE TAX PAID AND VEHICLE NOT USED FOR MORE THAN 5,000 MILES.-If

"(A) the tax imposed by section 4481 is paid with respect to any highway motor vehicle for any taxable period, and

(B) the requirements of subparagraphs (B) and (C) of paragraph (2) are met with respect to such taxable period.

the amount of such tax shall be credited or refunded (without interest) to the person who paid such tax.

"(4) OWNER DEFINED .- For purposes of this subsection, the term 'owner' means, with respect to any highway motor vehicle, the person described in section 4481(b)."

(c) CLARIFICATION OF TRAILER CUSTOMARI-LY USED IN CONNECTION WITH HIGHWAY MOTOR VEHICLES .-

(1) In general.—Subsection (c) of section 4482 is amended by adding at the end thereof the following new paragraph:

"(5) CUSTOMARY USE.-A semitrailer or trailer shall be treated as customarily used in connection with a highway motor vehicle if such vehicle is equipped to tow such semitrailer or trailer."

(2) CONFORMING AMENDMENT.—The heading for subsection (c) of section 4482 is amended by inserting "and Special Rule" after "Definitions".

(d) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.—Section 4482 is amended by adding at the end thereof the following new subsection:

(d) SPECIAL RULE FOR TAXABLE PERIOD IN WHICH TERMINATION DATE OCCURS.-In the case of the taxable period which ends on September 30, 1989, the amount of the tax imposed by section 4481 with respect to any highway motor vehicle shall be determined by reducing each dollar amount in the table contained in section 4481(a) by 75 percent."

(e) EFFECTIVE DATE .-

(1) In general.-Except as otherwise provided in this subsection, the amendments made by this section shall take effect on January 1, 1984.

(2) SHORT TAXABLE PERIODS.—For purposes of subchapter D of chapter 36 of the Inter-

nal Revenue Code of 1954-(A) the period beginning on July 1, 1983,

and ending on December 31, 1983, (B) the period beginning on January 1,

1984, and ending on June 30, 1984, (C) the period beginning on July 1, 1984, and ending on December 31, 1984,

(D) the period beginning on January 1. 1985, and ending on June 30, 1985,

(E) the period beginning on July 1, 1985,

and ending on December 31, 1985, and (F) the period beginning on January 1. 1986, and ending on June 30, 1986.

shall each be treated as a taxable period.

(3) TRANSITIONAL RULE FOR FIRST SHORT PERIOD.-In the case of the taxable period beginning on July 1, 1983, the tax imposed by section 4481(a) of such Code with respect to the use of any highway motor vehicle shall be determined by substituting "\$1.50 for the taxable period" for "\$3.00 a year" in such section 4481(a).

(4) TRANSITIONAL RULE FOR SECOND SHORT PERIOD .- In the case of taxable periods beginning in calendar year 1984 the amount of the tax imposed by section 4481(a) of such Code (as amended by this section) on the use of any highway motor vehicle shall be an amount equal to the sum of-

(A) one-sixth of the amount of the tax imposed by such section (determined without regard to this paragraph), plus

(B) one dollar multiplied by the number of thousands of pounds (or fraction thereof) in the taxable gross weight of such vehicle (within the meaning of section 4482(b) of such Code), and

(5) TRANSITIONAL RULE FOR THE TAXABLE PERIOD BEGINNING ON JULY 1, 1984.-In the case of taxable periods beginning in calendar year 1985, the amount of the tax imposed by section 4481(a) of such Code (as amended by this section) on the use of any highway motor vehicle shall be an amount equal to the sum of-

(A) one-third of the amount of the tax imposed by such section (determined without regard to this paragraph), plus

(B) 50 cents multiplied by the number of thousands of pounds (or fraction thereof) in the taxable gross weight of such vehicle (within the meaning of section 4482(b) of such Code).

(6) TRANSITIONAL RULE FOR CERTAIN OWNERS FOR THE TAXABLE PERIOD BEGINNING ON JANUARY 1, 1986.-In the case of the taxable period beginning on January 1, 1986, the amount of the tax imposed by section 4481(a) of such Code (as amended by this section) on the use of any highway motor vehicle by any person other than an owneroperator shall be an amount equal to onehalf of the amount of the tax imposed by such section (determined without regard to this paragraph).

(7) APPLICATION OF 5,000 EXEMPTION IN CERTAIN TAXABLE PERIODS .- In the case of taxable periods beginning after December 31, 1983 and before July 1, 1986, subsection (d) of section 4483 of such Code as amended by this section, shall be applied by substituting "2,500" for "5,000" each place it appears.

(8) COORDINATION WITH INSTALLMENT PAY-MENT OF TAX .-

(A) The Secretary of the Treasury or his delegate shall by forms or regulation provide for appropriate adjustments in the application of section 6156 of such code with respect to the taxable periods referred to in paragraph (2).

(B) For purposes of subparagraph (A)-

(i) there shall be substituted for the table appearing in section 6156(a) of such Code the following table:

"If liability is incurred The number of installments shall be-

July, August, September, January, Febru-. arv. or March ..

(ii) in lieu of subsection (e) of such section 6156, section 6156 shall not apply to any liability for tax incurred in October, November, December, April, May, or June.

2".

(f) STUDY OF ALTERNATIVES TO TAX ON USE OF HEAVY TRUCKS .-

(1) In general.—The Secretary of Transportation (in consultation with the Secretary of the Treasury) shall conduct a study of-

(A) alternatives to the tax on heavy vehicles imposed by section 4481(a) of the Internal Revenue Code of 1954, and

(B) plans for improving the collecting and enforcement of such tax and alternatives to such tax.

(2) ALTERNATIVES INCLUDED.—The alternatives studied under paragraph (1) shall include taxes based either singly or in suitable combinations on vehicle size or configuration; vehicle weight, both registered and actual operating weight; and distance traveled. Plans for improving tax collection and enforcement shall, to the extent practical, provide for Federal and State cooperation in such activities.

(3) CONSULTATION WITH STATE OFFICIALS AND OTHER AFFECTED PARTIES.-The study required under subsection (a) shall be conducted in consultation with State officials. motor carriers, and other affected parties.

(4) REPORT.-Not later than January 1 1985, the Secretary of Transportation shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the study conducted under paragraph (1) together with such recommendations as he may deem advisable.

Mr. BOSCHWITZ. Mr. President, the intent of the 5-cents-per-gallon tax on gas is first to improve our crumbling roads, but at the same time rectify some of the current inequities among the heaviest users of our highways. All that, and the promise of creating jobs, some 320,000.

We are repairing roads, it is true. And to do that we will create some jobs, but in accomplishing these two, we may have unfairly hurt the trucking industry, which has had certain problems, as have many industries

during the recession.

To the trucker who is hauling the cement or equipment to build and repair these roads, this all may come as good news and bad news. The good news is that there will be some work. The bad news is that to underwrite this work, the trucker may be taxed out of business.

As part of the piece of legislation the Department of Transportation has wanted to correct some of the inequities in the way heavy-vehicle use taxes are levied. But as it stands, now, it is simply too much of a burden implemented too soon for the already-strapped trucking industry to bear.

Consider this, Mr. President:

In 1982, the trucking industry made only \$120 million in net profits on \$44 billion in sales. At only one-half of 1 percent, that is not good.

To pay for the new taxes, the trucking industry will pay an average of 3 to 3.5 percent of its operating budget—just to underwrite the new tax.

When you consider that 50 percent of that operating budget is labor, you realize that to absorb the new costs will require a 4- to 5-percent cut in labor.

When you consider that this is 8 or 10 times its net profit, that certainly

puts it at great jeopardy.

The recession has been hard not only on small businessmen but truckers as well, particularly small truckers.

Nobody is buying, nobody is shipping—and the trucker gets stuck in the middle. To levy such a sudden tax increase could place an almost unbearable strain on an already hard-pressed industry.

What's more, the industry is still recovering from the 1980 deregulation. Truckers can no longer pass through tax increases through the rate-making capabilities of the Interstate Commerce Commission.

In fact, rates have actually been dropping in some parts of the Nation.

I recognize that the Senate bill thus far has already tried to mitigate some of the more onerous aspects of the bill.

The Senate Finance Committee has allowed a heavy vehicle use exemption for vehicles that travel 5,000 miles or less on highways. It has also phased in

the tax until 1985, to lessen the immediate burden; and finally it has lowered the maximum tax from \$2,000 to \$1,600 annually.

Those changes, however, are not enough. In this amendment, I hope to:

Lower the tax even further, to \$1,200. That is less than half of what was originally proposed.

Extend the phase-in period to 1986; What is more, for independents with three trucks or fewer, that extension goes to 1987.

This entire bill is a good one. I think it is one of the best investments this Government can make. It will give us one of the quickest returns on investment of anything we do here in Washington.

Mr. President, I hope my amendment will make it even better.

Mr. President, this is an effort to stretch out the imposition of the use tax and also to reduce the maximum use tax to \$1,200. It extends the phase-in period to 1986. I believe my friend and colleague from Iowa has an amendment that will apply most specifically to the small truckers.

## UP AMENDMENT NO. 1473

Mr. GRASSLEY. Mr. President, I send to the desk a perfecting amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. Grassley), for himself, Mr. Boschwitz, Mr. Melcher, Mr. Levin, Mr. Thurmond, and Mr. Symms, proposes an unprinted amendment numbered 1473 to unprinted amendment numbered 1472.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Subsection (a) of section 112 of the matter proposed to be inserted is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

(5) EXEMPTION OF FARM EQUIPMENT USED IN TRANSPORTING LIVESTOCK.—Subsection (a) of section 4063 is amended by adding at the end thereof the following new paragraph:

"(9) FARM EQUIPMENT DESIGNED TO TRANS-PORT LIVESTOCK.—The taxes imposed by section 4061 shall not apply in the case of any truck body, trailer body, semitrailer body (or any part or accessory thereof) which is uniquely designed to transport livestock to and on farms."

Subsection (b) of section 113 of the matter proposed to be inserted is amended to read

as follows:

(b) EXEMPTION WHERE TRUCK USED FOR 5,000 MILES OR LESS ON PUBLIC HIGHWAYS; REFUND OR CREDIT FOR CESSATION OF USE.—Section 4483 (relating to exemptions from highway use tax) is amended by adding after subsection (c) thereof the following new subsections:

"(d) Exemption for Trucks Used for 5,000 Miles or Less on Public Highways.—

"(1) Suspension of tax.
"(A) In general.—If—

"(1) it is reasonable to expect that the use of any highway motor vehicle on public highways during any taxable period will be 5,000 miles or less, and

"(ii) the owner of such vehicle furnishes such information as the Secretary may by forms or regulations require with respect to

the expected use of such vehicle.

then the collection of the tax imposed by section 4481 with respect to the use of such vehicle shall be suspended during the taxable period.

"(B) SUSPENSION CEASES TO APPLY WHERE USE EXCEEDS 5,000 MILES.—Subparagraph (A) shall cease to apply with respect to any highway motor vehicle whenever the use of such vehicle on public highways during the taxable period exceeds 5,000 miles.

"(2) EXEMPTION.-If-

"(A) the collection of the tax imposed by section 4481 with respect to any highway motor vehicle is suspended under paragraph (1)

(1),
"(B) such vehicle is not used during the taxable period on public highways for more

than 5,000 miles, and

"(C) except as otherwise provided in regulations, the owner of such vehicle furnishes such information as the Secretary may require with respect to the use of such vehicle during the taxable period.

then no tax shall be imposed by section 4481 on the use of such vehicle for the taxable period.

"(3) REFUND WHERE TAX PAID AND VEHICLE NOT USED FOR MORE THAN 5,000 MILES.—If—

"(A) the tax imposed by section 4481 is paid with respect to any highway motor vehicle for any taxable period, and

"(B) the requirements of subparagraphs (B) and (C) of paragraph (2) are met with

respect to such taxable period,

the amount of such tax shall be credited or refunded (without interest) to the person who paid such tax.

"(4) OWNER DEFINED.—For purposes of this subsection, the term 'owner' means, with respect to any highway motor vehicle, the person described in section 4481(b).

"(e) Use-tax Refunds or Credit.-

"(1) ALLOWANCE OF REFUND OR CREDIT.-If

in any taxable period-

"(A)(i) a highway motor vehicle with respect to which the tax imposed by section 4481(a) has been paid ceases to be used on the highways in a manner which would cause imposition of such tax, and

"(ii) it is reasonable to expect such cessation will continue through the end of the

taxable period, or

"(B) the owner of any highway motor vehicle with respect to which the tax imposed by section 4481(a) for any taxable period has been paid transfers such vehicle to any person during such taxable year and the transferee of such vehicle—

transferee of such vehicle—
"(i) pays the tax imposed with respect to his use of such vehicle for the remainder of such taxable period, and certifies to the transferor that such payment has been

made, or

"(ii) certifies to the transferor that no tax is reasonably expected to be imposed under section 4481(a) with respect to the transferee's use during the remainder of such taxable period,

a refund or credit determined as provided in paragraph (2) shall be made by the Secretary.

"(2) AMOUNT OF REFUND.—The refund or credit shall be reckoned proportionately from the first day of the month following the month in which such cessation of use occurs to and including the last day in such taxable period.

"(3) Exception.—This provision shall not apply to any case to which subsection (d)

applies.

"(4) RULE AUTHORITY.—The Secretary is authorized to promulgate rules to carry out this subsection.".

Subsection (e) of section 113 of the matter proposed to be inserted is amended by redesignating paragraph (8) as paragraph (9) and by inserting after paragraph (7) the following new paragraph:

(8) SPECIAL TRANSITIONAL RULES FOR OWNER-OPERATORS.—

(A) In general.—In the case of taxable periods beginning in calendar year 1986—

(i) the amount of the tax imposed by section 4481(a) of such Code (as amended by this section) on the use of any highway motor vehicle by an owner-operator shall be an amount equal to the sum of—

(I) one-third of the amount of the tax imposed by such section (determined without

regard to this paragraph), plus

(II) 50 cents multiplied by the number of thousands of pounds (or fraction thereof) of the taxable gross weight of such vehicle (within the meaning of section 4482(b) of such Code), and

(ii) subsection (d) of section 4483 of such Code, as amended, shall be applied by substituting "2,500" for "5,000" each place it

appears.

(B) Taxable period beginning january 1, 1987.—In the case of the taxable period be-

ginning January 1, 1987-

(i) the smount of the tax imposed by section 4481(a) of such Code, as amended by this section, on the use of any highway motor vehicle by an owner-operator shall be equal to one-half of the amount of the tax imposed by such section (determined without regard to this paragraph), and

(ii) subsection (d) of section 4483 of such Code, as amended, shall be applied by substituting "2,500" for "5,000" each place it

appears.

(C) OWNER-OPERATOR.—For purposes of this paragraph, the term "owner-operator" means any person who owns and operates at any time during the taxable period no more than 3 highway motor vehicles with respect to which a tax is imposed by section 4481 of such Code for such taxable period.

(D) AGGREGATION OF VEHICLE OWNER-SHIPS.—For purposes of subparagraph (B), all highway motor vehicles with respect to which a tax is imposed by section 4481 of such Code which are owned by—

(i) any trade or business (whether or not incorporated) which is under common control with the taxpayer (within the meaning

of section 53(b)), or

(ii) any member of any controlled groups of corporations of which the taxpayer is a member, for any taxable period shall be treated as being owned by the taxpayer during such period. The Secretary shall prescribe regulations which provide attributable rules that take into account, in addition to the persons and entities described in the preceding sentence, taxpayers who own highway motor vehicles through partnerships, joint ventures, and corporations.

(E) CONTROLLED GROUPS OF CORPORA-TIONS.—The term "controlled groups of corporations" has the meaning given to such term by section 1563(a), except that(i) "more than 50 per cent" shall be substituted for "at least 80 percent" each place it appears in section 1563(a)(1), and

(ii) the determination shall be made without regard to subsections (a)(4) and

(e)(3)(C) of section 1563.

(F) HIGHWAY MOTOR VEHICLES.—The term "highway motor vehicles" has the meaning given to such term by section 4482(a) of such Code.".

Section 113 of the matter proposed to be inserted is amended by redesignating subsections (e) and (f) as subsections (f) and (g) and by inserting after subsection (d) the following new subsection:

and by inserting and lowing new subsection:

(e) Conforming Amendment.—Section 4481 is amended by striking out subsection

i).

Subsection (f) of section 113 of the matter proposed to be inserted, as redesignated, is amended—

(1) by striking out "and" and the end of subparagraph (E), and

(2) by inserting after subparagraph (F) the following new subparagraphs:

"(G) in the case of a highway motor vehicle owned by an owner-operator, the period beginning on July 1, 1986 and ending on December 31, 1986, and

"(H) in the case of a highway motor vehicle owned by an owner-operator, the period beginning on January 1, 1987 and ending on

June 30, 1978,"

Mr. GRASSLEY. This amendment also recognizes the concerns of a group within the trucking industry. These are the independent owner-operators. These individuals generally own one or two trucks and will suffer the most from the increase in heavy-vehicle-use taxes. In recognition of these concerns, this amendment will increase the phase-in period of the heavy-vehicle use taxes for independent owner-operator to 4 years.

In addition, this amendment will exempt truck trailers from the sales tax if they are primarily designed to carry livestock to and on the farm.

The last provision of this amendment addresses the inequitable situation of the imposition the heavy-vehicle use tax on trucks that have been sold or are no longer used on the highway. In these situations, this amendment will allow the payor of the heavy-vehicle use taxes to obtain a refund or credit for the payment of use taxes on a vehicle which he no longer owns or on a vehicle which will no longer be using the highways.

Mr. President, these amendments address current inequities in the highway user taxes and I hope my colleagues will join me in passing these

amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The

Senator from Kansas.

Mr. DOLE. Mr. President, let me commend the distinguished Senator from Iowa and indicate that this is a matter that has been a concern of the Senator from Iowa since prior to the hearings. We have been attempting through calls to Iowa and my own

State of Kansas through staff and personally to make certain we were offering some additional protection for so-called owner-operators, and particularly the smaller owner-operators.

We hope that the amendment Senator Grassley has offered will address

that question.

We know that there are still some concerns about the overall tax, particularly the user fees, but in my view with the amendment offered by Senator Grassley to the amendment of Senator Boschwitz and others, certainly our intent—and I think the Senator from Iowa would agree—was to be helpful. In my view, this will be helpful, and we are going to do the best we can to make certain we retain our position in the conference.

Mr. GRASSLEY. Will the Senator

yield?

Mr. DOLE. I yield.

Mr. GRASSLEY. I want to thank the Senator from Kansas for, over the period of the last week or 10 days, helping me to work on this problem. He has been very helpful in recognizing the problems of these small owner-operators. I think they are the people who have the least ability to pass on additional costs created by the bill because in many instances they operate under other firms' authority.

I want to thank the Senator very much for helping with this problem.

Mr. SYMMS. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. I would be happy to vield.

Mr. SYMMS. I join in the praise for the Senator from Minnesota and the Senator from Iowa in getting this amendment here. We have worked on this together. Our distinguished chairman from Kansas certainly has been very helpful to particularly those of us coming from States that are further out that count on truck transportation. I think this amendment will be very helpful to the passage of this bill and will be very helpful to this legislation and make it more fair and equitable in the distribution of these costs.

I thank the Senator.

Mr. LEVIN addressed the Chair.

Mr. DOLE. I yield first to the Senator from Montana who has been seek-

ing recognition.

Mr. MELCHER. I thank the Senator from Kansas for yielding to me. I want to express my pleasure in being able to join with the Senator from Minnesota and the Senator from Iowa in presenting to the Senate a combination of improvements for the trucking industry and particularly for the owner-operators of trucks. After all, as the bill was presented, though improved in the aspects of the Federal use tax, the burden on 80,000-pound trucks and even those that are not quite 80,000 was about 7½ times the current Federal use tax.

This is still high under the amendments that are offered, but there is more reason to it now. There is a more commonsense approach to it. It also has the advantage of having a longer stretch-out period before the \$1,200 amount has to be met.

I thank the Senator for yielding. Mr. LEVIN addressed the Chair. THE PRESIDING OFFICER. The

Senator from Michigan.

Mr. LEVIN. I simply want to commend my friends from Minnesota and Iowa for their amendments and ask unanimous consent that I be added as a cosponsor.

Mr. GRASSLEY. Mr. President, I appreciate the support of the Senator from Michigan. I also ask unanimous consent that the Senator from South Carolina (Mr. Thurmond) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. The amendment of the Senator from Iowa will eliminate some inequities currently in the highway user taxes. The amendment allows certain independent truck owner-operators to have an additional year before the heavy vehicle use tax is fully phased in.

In addition, the amendment will allow certain trailers which are primarily designed to carry livestock to be exempt from the new trailers tax in the Finance Committee bill. The amendment will also allow certain truck owners to obtain a refund or credit for taxes paid on a truck which is subsequently sold or will no longer be used on the highway.

Mr. President, the amendment of the Senator from Iowa has been adopted, is that correct?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Iowa.

The amendment (UP No. 1473) was agreed to.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The

Senator from Kansas.

Mr. DOLE. I should like to briefly state, before yielding to the Senator from New Mexico and the Senator from Rhode Island, that this amendment is in response to concerns that many of us had in the past couple of weeks concerning, first of all, getting the bill passed. I am not going to stand here and suggest that we have pleased everyone or maybe we have pleased anyone, because when you increase taxes substantially, as we do in this bill, rightly or wrongly, they are not going to be accepted with a great deal of enthusiasm. So we have had discussions with representatives of the trucking industry. We have tried to accommodate some of their concerns. It is my hope that the amendment offered by Senator Boschwitz and others and the second degree amendment of the Senator from Iowa and the Senator from Montana and the Senator from Michigan and others will address their concerns. This will reduce the maximum use tax that an 80,000-pound vehicle will be paying at the end of the phase-in period. It is more generous treatment than the House hill

The Senate Finance Committee. frankly, had been criticized by some in the media for being overgenerous with truckers. There will probably be criticism of any additional softening of the impact, but I suggest that the trucking industry is not in an economic boom period right now. They are also in the throes of a recession. They are not in a position to absorb additional costs at this time. That is why we have the phasein in our bill. That is why we also lower the maximum tax under the amendment offered this evening to \$1,200.

Mr. President, this amendment is in response to concerns that I and many of my colleagues have expressed about the impact of the immediate increase in the heavy vehicle use tax on the trucking industry. Many representa-tives of the trucking industry have met with me and other Members of this body and expressed a willingness to pay their fair share for needed highway improvements and bridge repair and maintenance. This amendment is a compromise between the trucker's willingness to pay their fair share and the economic problems the trucking industry is currently experi-

This amendment will reduce the maximum use tax that an 80,000 pound vehicle will be paying at the end of the phase-in period. The maximum use tax will be reduced from the Finance Committee's substitute of \$1,600 to \$1,200. In addition, the phase-in period will be increased from 21/2 years to 3 years. This amendment also modifies the parts and accessories tax. Under the Finance Committee substitute, parts and accessories of vehicles weighing less than 33,000 pounds would not be taxable. Under this amendment, parts and accessories for trucks weighing between 10,000 pounds and 33,000 pounds will be taxable. This amendment also reduces the parts and accessories tax from 12 percent in the Finance Committee bill to 10 percent.

Mr. President, I believe this amendment represents an excellent compromise between the position of the administration and that of the trucking industry. This amendment will gradually increase the heavy use taxes currently being paid by heavy trucks in recognition of the equitable allocation of user fees going into the highway trust fund. This amendment also recognizes the ability of the trucking industry to pay increased heavy use taxes and accommodates their economic concerns.

The PRESIDING OFFICER. The question is on the agreeing to the amendment of the Senator from Minnesota, as amended.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I, too, commend the distinguished Senators for the amendment and the additional amendment to the amendment.

I found that the overall proposal was rather acceptable in my State excepting for the rather exorbitant increase in truckers fees, and I commend both Senators and the distinguished Senator from Kansas for working this out. I think it is far more reasonable and makes the entire bill far more acceptable to the broad community that is paying under it. I understood over the long run you lose no money; is that correct?

Mr. DOLE. That is correct.

Mr. DOMENICI. I thank the Sena-

Mr. DOLE. Mr. President, before I fail to recognize him, probably the leader in this area has been the Senator from Idaho (Mr. Symms). He was working on this earlier this year. In fact, at one point we had a gas tax and were considering other exicise taxes in the so-called tax reform package, TEFRA, which means different things to different people. So certainly the record should indicate the Senator from Idaho has been in the forefront on this. He has been very helpful.

I am happy to be added as a cosponsor and also the Senator from Colorado (Mr. Armstrong) is a cosponsor of the amendment.

Mr. BOSCHWITZ. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota.

Mr. DOLE. Mr. President, I have been trying to contact the majority leader. The minority leader is in the Chamber. This is a rather substantial amendment. I do not want to preclude anyone having an opportunity to have a rollcall vote on the amendment.

I wonder if I might confer briefly with the Senator from Louisiana, the Senator from West Virginia, and the prime sponsors of the amendment.

Mr. President, I suggest the absence of a quorum.

Mr. CHAFEE. Mr. President, I was wondering pending the consideration of this measure whether I could move forward with another amendment.

The PRESIDING OFFICER. Does the Senator from Kansas withhold his request or does the Senator from Rhode Island ask unanimous consent that the quorum call be suspended?

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that we temporarily set aside the pending amendment, including the amendments of the Senator from Minnesota and the Senator from Iowa, and that for consideration of the amendment to be offered by the Senator from Maryland and the Senator from Rhode Island, and no amendment to the amendment to be in order.

The PRESIDING OFFICER. Is there objection to the request of the

Senator from Kansas?

Mr. BOSCHWITZ. Mr. President, reserving the right to object, am I not correct the amendment of the Senator from Iowa has already been adopted?

Mr. GRASSLEY. Yes.

Mr. DOLE. Excuse me. That is correct.

Mr. BOSCHWITZ. Mr. President, I understand that there was no objection to my amendment and I thought

it was going to go forward.

Mr. DOLE. There is no objection. It just seems to the Senator from Kansas that many, many Senators left the Chamber thinking there would be no more votes, thinking we would be only considering minor amendments. This is a very substantial amendment. I am assuming it is going to pass with an overwhelming vote. But I would not want to deprive some Senator who might go home of an opportunity to support such an outstanding amendment.

Mr. BOSCHWITZ. We certainly will be happy to add whatever Senator wishes to be added as cosponsor in the

morning.

All I have done all day is receive Senators who wanted to be added as cosponsors to the amendment and rather than leave the matter undone tonight I certainly wish to move the

adoption of the amendment.

Mr. LONG. Mr. President, I am not a cosponsor of the amendment, but I for one wish to vote for it. I believe there are other Senators who wish to vote on the amendment. I will vote for the Senator's amendment, but I wish that opportunity. I believe that we should vote on the Senator's amendment and those who want to be recorded in favor of it should have that opportunity. I should think tomorrow would be the time to do it since we have been told there will be no more rollcall votes this evening. I think the amendment will carry by a large margin. I intend to vote for it. But I think Senators should have the privilege of voting on it.

Mr. STEVENS. Mr. President, I see the distinguished minority leader is

here. We have made the announcement that there will be no further rollcall votes tonight. I would not want to see the precedent broken that once that has been agreed to by the majority and minority leaders that their words will not be kept.

I would be ready to have some kind of a consent setting a time certain for this vote to occur tomorrow morning prior to the rollcall vote on the cloture vote so it would not be caught up in a

matter of a cloture vote.

It would be my suggestion that we have a unanimous-consent request that this amendment be the pending business and there be a consent that the amendment would be voted on prior to the cloture vote but not set a specific time until we return in the morning.

Mr. DOLE. Mr. President, there is just one reservation I would have there, and we are going to lay it down if not tonight because of I think a desire to have a Record vote on this, the Senator from Michigan will be recognized under a time agreement to call up his amendment on unemployment compensation. I made that pledge to the Senator from Michigan.

Would that cause him any problem if we first vote on this tomorrow morn-

ing?

Mr. LEVIN. Mr. President, the only problem I would have is if we do not dispose of my amendment prior to cloture. If the distinguished Senator can arrange a unanimous-consent request to assure that my amendment will be disposed of prior to cloture, how he rearranges it to determine the rollcall on this is perfectly fine with me.

My own schedule, frankly, is I prefer that this be voted on first and mine be taken up tomorrow at 10:30 a.m. and then disposed of after a 20-minute time agreement prior to the cloture.

Mr. LONG. Mr. President, if I might suggest to the Senator perhaps we could vote on this amendment after we are in for about 15 minutes. That would help get Senators down here, frankly, and that would have Senators available here to hear the Senator from Michigan explain his amendment and hopefully we could then vote on the amendment of the Senator from Michigan after having voted on this.

Mr. BOSCHWITZ. Mr. President, will the Senator propound what he said, that it be made the pending business and that the vote be set for a

time certain without debate.

Mr. STEVENS. Mr. President, I wish to confer with the Senator from West Virginia and make certain where we are going here because we run into a problem having asked unanimous consent to set off that cloture vote and I do not think that will carry. I think there will be an objection. So I think we have to work out a time frame.

Again I ask the Senator from Kansas if the Senator will allow us to

set aside and let the Senator from Rhode Island proceed. I will confer with my good friend and see if we can get a solution which will not require unanimous consent in the morning.

Mr. METZENBAUM. Mr. President, I wish to ask for the yeas and nays on the second-degree amendment of the Senator from Kansas which is pending although I certainly do not intend to ask for a vote this evening, nor do I intend to ask for a vote at any time.

The PRESIDING OFFICER. The Chair will advise the Senator that the pending business is the amendment of the Senator from Minnesota (Mr. Boschwitz).

Mr. DOLE. We did agree to the second-degree amendment.

Mr. METZENBAUM. We did not agree to have the yeas and nays.

Mr. STEVENS. The Senator's request is for the second-degree amendment of the Senator from Kansas to the basic amendment be set aside. The yeas and nays have not yet been ordered. It has been modified twice now.

Mr. DOLE. The Senator does not

want it modified any more.

Mr. METZENBAUM. I am trying to make a good amendment that which is a bad amendment. If the Senator adds much more I might be forced to vote for it. I am trying to cut him off at the pass.

Mr. DOLE. I have no objection.

Mr. METZENBAUM. If the Senator from Texas has no objection and no one else does, I ask unanimous consent that I may be permitted to ask for the yeas and nays in connection with the second-degree amendment.

The PRESIDING OFFICER. Is there objection to the request of the

Senator from Ohio?

Mr. STEVENS. I object.
The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. I object until we can finish this conversation. I really do not know what the request was.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I wish to go home. I think we have one other noncontroversial amendment. That is the amendment of the Senator from Maryland and the Senator from Rhode Island. Then we have one of the Senator from New Mexico and the Senator from West Virginia.

I ask unanimous consent that the pending amendments be temporarily set aside for consideration of those two amendments and that no amendments to the amendments be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

## UP AMENDMENT NO. 1474

(Purpose: To include business development companies in the definition of regulated investment companies)

Mr. CHAFEE. Mr. President, I send to the desk an unprinted amendment on behalf of myself and the Senator from Maryland and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Rhode Island (Mr. CHAFEE) for himself and Mr. SARBANES proposes an unprinted amendment numbered

Mr. CHAFEE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment, insert the following new section: SEC. -. BUSINESS DEVELOPMENT COMPANIES.

(a) In General.-Subsection (a) of section 851 of the Internal Revenue Code of 1954 (defining regulated investment company) is

(1) by striking out "or" at the end of para-

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof . and

(3) by adding at the end thereof the fol-

lowing new paragraph:

"(3) which is a business development company within the meaning of section 2(a)(48) of the Investment Company Act of 1940, as amended (15 U.S.C. 80a-2(a)(48)).".

(b) Effective Date.—The amendments

made by this section shall apply to taxable years ending after the date of enactment of

this Act.

Mr. CHAFEE. Mr. President, this amendment would enable business development companies-in effect, venture capital companies-which are regulated under the Small Business Investment Incentive Act of 1980 to qualify for passthrough tax treatment. This would be the same tax treatment these organizations were previously entitled to when they were registered under the old Investment Company Act of 1940.

What happened was that changed the law in 1980 and inadvertently failed to change another section of the code dealing with the pass-

through provision.

Just like with a mutual fund, it would permit investment earnings to escape double taxation by passing them through the business development company (BDC) directly to the company's shareholders. As long as the BDC distributes at least 90 percent of its earnings, it will not be taxed on those earnings at the corporate level. Essentially, my amendment will conform the tax code to the changes Congress made in the securities law 2 years ago.

This amendment is noncontroversial and has bipartisan support. It was originally introduced in 1981 as S. 1304 by Senators Durenberger, Sarbanes, Baucus, and myself. It had hearings in the Senate Finance Committee and was supported by the Treasury.

It was marked up and reported by the Finance Committee without objection and passed by the Senate on December 16, 1981, as an amendment to H.R. 4717. That was a year ago, Mr. President. The same old things happen around here.

Unfortunately, during the conference it was dropped at the insistence of the Ways and Means Committee for reasons I am not exactly certain.

We believe they objected to so many Senate amendments-there may be other reasons-but in any event it is a good amendment and, as I mentioned, it has been cleared by those who have been interested.

#### PRESENT LAW

Under present law, a regulated investment company-commonly called a mutual fund or money market fund-is treated, in essence, as a conduit for tax purposes. This treatment is achieved by allowing a regulated investment company a deduction for dividends paid to its shareholders. Congress provided conduit treatment for regulated investment companies so that small investors could obtain the advantages of a diversified portfolio of investments and expert investment management without the imposition of a second level of tax generally applicable to corporations.

In order to qualify as a regulated investment company, several require-ments must be met. First, the company must distribute at least 90 percent its income. Second, the company must meet several tests designed to insure that most of its income is from passive sources and that its assets are diversified. Third, a regulated investment company must be a domestic corporation other than a personal holding company. Finally, it either must be registered with the Securities and Exchange Commission at all times during the taxable year as a management company or unit investment trust under the Investment Company Act of 1940, or it must be a common trust fund or similar fund which is not included in the term "common trust under the Internal Revenue Code and which is excluded by the Investment Company Act from the definition of investment company (Code sec. 851(a)). In order to register under the Investment Company Act of 1940, a corporation must have at least 100 stockholders or must be making or presently proposing to make a public offering-the public offering requirement.

Under these rules, a number of companies that provide capital and managerial assistance to small businesses have been able to register under the Investment Company Act because they have at least 100 stockholders or satisfy the public offering requirement and, as a result of this registration, have qualified as regulated investment

Under the Small Business Incentive Act of 1980 (Public Law 96-477), certain investment companies providing capital and management assistance to small businesses-called business development companies-may elect an alternative form of regulation specifically designed for these types of organizations in lieu of registering under the Investment Company Act. However, any business development company electing this alternative form of regulation would be prevented from qualifying as a regulated investment company because the company did not register under the Investment Company Act.

#### EXPLANATION OF THE PROPOSAL

The proposal would enable a "business development company" electing the alternative form of regulation under the Small Business Incentive Company Act of 1980 to qualify as a regulated investment company in those cases where the company could qualify for registration under the Investment Company Act. Thus, only companies which have at least 100 stockholders or which satisfy the public offering requirement could qualify as regulated investment companies.

The proposal was included as part of S. 1304. The proposal does not include another provision in S. 1304, which would have allowed all business development companies and small business investment companies to qualify as investment companies: regulated under the proposal, only business development companies with at least 100 stockholders or that satisfy the public offering requirement could qualify as regulated investment companies.

## EFFECTIVE DATE

The proposal would be effective for taxable years ending after the date of enactment.

## REVENUE EFFECT

The proposal would not have any effect on budget receipts.

Mr. President, I move its passage.

Mr. SARBANES. Mr. President, I am pleased to join with my colleague, the distinguished Senator from Rhode Island, in proposing this amendment.

I think, as many will recall, Congress, in an effort to encourage venture capital companies and small business investment companies, changed the regulatory scheme under which they operated, so that instead of operating under the Investment Company Act of 1940 they operated under the legislation of the Small Business Investment Incentive Act which we passed in 1980.

However, the tax code was not changed at the same time so that the pass-through tax treatment they were afforded when qualifying under the Investment Company Act was no longer available to them.

This amendment is designed to accomplish that and bring the tax treatment into conformity with the regulatory change. I think everyone agrees it is a commendable amendment in the effort to continue to encourage small business investment companies and venture capital companies, and I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode

Island.

The amendment (UP No. 1474) was

agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHAFEE. I move to lay that

motion on the table.

The motion to lay on the table was

agreed to.

Mr. CHAFEE. Mr. President, I do want to thank all those who have reviewed this and approved its passage. I think it is a significant step forward in the assistance to small business and the investment that goes with it.

The PRESIDING OFFICER. The question now recurs upon the Bosch-

witz amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment, plus the two pending amendments, be set aside for the Domenici amendment as well as the—

Mr. STEVENS. Mr. President, will the Senator withhold that, with the consent of my good friend from New Mexico? Will the Senator yield to me

for just one monent?

ORDER FOR THE RECOGNITION OF SENATOR GRASSLEY ON TOMORROW VITIATED

Mr. President, we have run into a problem tomorrow. I would like to ask the Senator from Iowa to cancel the special order he requested. I ask unanimous consent that the special order for the Senator from Iowa be vitiated.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. STEVENS. If it is agreeable with the Senator from West Virginia, I propose that the amendment of the Senator from Minnesota be the pending amendment when we come into session tomorrow and that the vote occur on the Boschwitz amendment at 10:15; that the vote on the amendment at that time be no longer than 15 minutes; and the Levin amendment follow that vote and the vote on the Levin amendment take place at 10:45, and it be 15 minutes, so there will be no necessity for disturbing the scheduled cloture vote.

Mr. DOLE. Mr. President, reserving

the right to object-

Mr. LEVIN. Mr. President, will the Senator yield? Will the Senator be able to include in that unanimous-consent request that the Levin-Specter, et al, amendment be disposed of prior to the motion on cloture being voted, notwithstanding rule XXII?

Mr. DOMENICI. Mr. President, reserving the right to object, I do not know what the Levin-Specter amend-

ment is all about. I cannot agree to that. In its original form it is extremely expensive. There may indeed be a point of order that lies against it. I would have no way of knowing that here tonight. I do not want to foul up anything.

Mr. STEVENS. I thought I was careful to say that the vote would occur on the Levin amendment with respect to that amendment, and I am not speaking to say it would not be subject to a point of order or a motion to table, but it would occur, action to dispose of the Levin amendment one way or the other would occur, at 10:45.

Mr. LEVIN. I was simply trying to avoid the possibility of a motion for reconsideration. I was not trying to preempt the Senator from New Mexico from filing or making a point

of order.

Mr. LONG. Mr. President, can we agree that the Levin amendment will not be amended? Has the Levin amendment been printed? Is it available now?

Mr. LEVIN. I have no objection.

Mr. LONG. Is the Levin amendment available?

Mr. LEVIN. Yes, it is at the desk.

Mr. LONG. I ask unanimous consent that the Levin amendment not be subject to amendment.

Mr. LEVIN. Would the Senator modify that—there is a possibility that I may want to slightly amend my own amendment.

The PRESIDING OFFICER. The Chair will request that the Senator from Alaska restate his unanimous-consent request, which has yet to be

agreed to.

Mr. STEVENS. Mr. President, I might state to the Chair the problem is stating to his request so that it is fair and not misleading because the Boschwitz amendment might be subject to a motion to reconsider, and if that took place it would eat up the time for the Levin amendment, and we would want to make sure Senator Levin has an opportunity for at least a vote on the amendment, even though he might not have time for debate on it.

So my request was that the Boschwitz amendment be the pending amendment when we resume consideration of this bill in the morning; that the vote in respect to the Boschwitz amendment take place at 10:15, and again we are not making any commitments as to whether it will be an up or down vote or a motion to table or anything else. I do not know whether there are any points of order that anybody would make. The vote on the Boschwitz amendment would take place at 10:15, the vote on the Levin amendment would take place at 10:45.

Mr. ROBERT C. BYRD. I was going to ask whether it would be possible to switch them and have a vote on Levin first and then we would have no prob-

lem of disposing of it if there is a motion to reconsider.

Mr. STEVENS. Mr. President, I will say I am informed there is a potential point of order against both amendments, and there is a feeling that because Members of the Senate have left and thought there was a 15-minute special order it would be unfair to schedule a vote before 10:15, so the request is under unanimous consent that the first vote will take place at 10:15 when that special order would have expired.

Mr. LEVIN. Mr. President, will the Senator from Alaska modify his unanimous-consent request to assure that there be at least 15 minutes on the Levin amendment, notwithstanding any prior orders or provisions of rule XXII? Could the Senator modify his unanimous-consent request to provide that there be at least 15 minutes of

debate on my amendment?

Mr. DOLE. Mr. President, will the

Senator from Alaska yield?

Mr. STEVENS. I yield. I think I should respond to the Senator from Michigan by saying that as I understand his request he wants at least 15 minutes of debate following disposition of the Boschwitz amendment. It is my understanding if the rollcall vote is commenced prior to that time that the quorum—before the vote would commence on the cloture motion, that would be completed; am I correct in that?

The PRESIDING OFFICER. Will the Senator restate his inquiry?

Mr. STEVENS. My inquiry was what time will the vote occur on the cloture motion tomorrow under the present order?

The PRESIDING OFFICER. Under rule XXII the live quorum will begin 1 hour after convening of the Senate tomorrow, and the cloture vote will follow that.

Mr. STEVENS. The Senator from Michigan wishes a guarantee of a 15-minute period of debate prior to commencing the vote on his amendment.

I say to my friend, again, that if there is not reconsideration to the Boschwitz amendment, there is going to be a 15-minute debate for the Levin amendment. I renew my request that the vote take place with respect to the Boschwitz amendment at 10:15 and that following that period the Levin amendment be laid down and that the vote in relation to the Levin amendment, whatever the motion may be, commence at 10:45.

Mr. SARBANES. Would the majority whip indicate what time the quorum call is to begin with relationship to the cloture motion?

Mr. STEVENS. Unless it is waived by unanimous consent, it must start at 11 o'clock.

Mr. SARBANES. I thought the Chair said it was at 10:45.

The PRESIDING OFFICER. The Chair understands the request of the Senator from Alaska to be that the quorum would occur at 11 o'clock notwithstanding the order of the Senate to reconvene at 9:45. Does the Chair correctly understand the Senator's request?

Mr. STEVENS. That is correct.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. LEVIN. Reserving the right to object.

Mr. DOLE. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Kansas.

Mr DOLE. Mr. President, we were not having any problem here until a few minutes ago. What we would like to do is to go ahead and take care of the amendment of the Senator from New Mexico. We also have to accommodate Senator Heflin, who has been waiting patiently. I promised we were going to accommodate him. I do not want to do it and I am not going to fight too hard in conference, but I made that promise. In addition, Senator Bradley indicated he wanted some consideration tomorrow morning of an amendment that will not be germane. and he wanted to bring that up before we got to the cloture vote.

I am afraid, if we lock in those who are here, we are going to lock out some who may not be here. I am perfectly willing to set aside the Boschwitz amendment and lay down the Levin amendment. Everybody else can go home but Senator Levin and myself, and we will debate it about 20 minutes, and we will vote on it in the morning. There will be as many here tonight as there will be in the morning.

Mr. LEVIN. Mr. President, I would want to be assured, as I indicated to the Senator, of at least 10 or 15 minutes of debate tomorrow. I made commitments to other cosponsors on both sides of the aisle to have a minute or two. I am wondering if the Senator could not consider possibly having the cloture vote at 11:15 instead of 11.

Mr. STEVENS. Mr. President, if the Senator from Kansas is suggesting that we consume all the debate on these amendments that are here that we are discussing now tonight and that, when we come back in, immediately after the leader time, there be a vote on the Levin amendment, which would be the one that would be pending, to be followed by a vote on the Boschwitz amendment, with no debate on either one and, in an attempt to be fair to those who have left, to leave some time prior to the commencement of that quorum call, there would be no objection on my part. I think the majority leader would not object. I ask my friend from West Virginia if he would have any objection. Mr. LEVIN. May I make a suggestion? Either we have 15 minutes on my amendment and then vote on it or that our quorum call begin at 11:15.

Mr. STEVENS. The Senator from Kansas is suggesting that you have the debate tonight and tomorrow morning start the vote on the amendment of the Senator from Michigan and the vote on Senator Boschwitz' amendment and we would have 30 minutes for those other routine matters that must occur, because, if cloture is invoked, those amendments would not be in order.

Mr. LEVIN. There are a number of cosponsors of this amendment on both sides of the aisle who want a minute or two. I am wondering if we could provide for 10 minutes of debate before the vote on my amendment tomorrow morning.

Mr. DOMENICI. Mr. President, I say to my good friend, the Senator from Michigan, that there is not any clearance unless they agree with him tonight that his amendment would come up before cloture. They are assuring him of that at this point in time. He does not have any assurance that he would get a vote before cloture but for this agreement.

Mr. LEVIN. That is correct. And there is no assurance that cloture would be voted unless we have an upor-down vote on this amendment, either, because there are many people who simply are not going to vote for cloture unless there is a disposition of this amendment. I am simply trying to inquire whether or not we cannot have 10 minutes of debate tomorrow morning before the vote on this because there are a number of Senators on both sides of the aisle who wanted to just comment for a minute or two on this amendment. It seems to me that 10 minutes could be accommodated before a vote on this amendment in the morning.

Mr. DOLE. The only question the Senator from Kansas has is there will be a motion to table the Senator's amendment, and if the motion to table fails, then I am not certain we could agree that the Senator would have an up-or-down vote before the cloture vote. It might fall because cloture came.

Mr. STEVENS. That was precisely the reason we were trying to schedule it loose, so other matters might not be shut off.

Mr. DOLE. I do not mind the 10 minutes debate as long as we have an understanding that if the motion to table failed, I do not believe that we should be locked in to an up-or-down vote.

Mr. THURMOND. Could we not have 10-minute votes?

Mr. STEVENS. Mr. President, we have no ability to do that at this time. Mr. METZENBAUM. Mr. President, I gather there was not too strong of a

feeling for a rollcall on the Boschwitz amendment. I wonder, perhaps, since no rollcall has been actually ordered in connection with it, and it seems it is going to pass overwhelmingly, if not unanimously, whether we can forgo the need for a rollcall vote on the Boschwitz amendment.

Mr. DOLE. The Senator is right. No one may want a rollcall. I think we should wait until morning, since many Senators went home. They might want to be on record for or against it. I think we may have indicated indirectly that we were only going to consider minor amendments. But we would like to take up the amendment of the Senator from New Mexico and the amendment of the Senator from Alabama and come back in the morning and take up the Levin amendment, give the Senator 10 minutes, and then if there is no request for a vote on the Boschwitz amendment-there is still a Dole amendment pending, too, that I would like to dispose of during that hour, a little technical amendment.

Mr. STEVENS. Mr. President, I withdraw my unanimous consent request.

The PRESIDING OFFICER. The question is on the Boschwitz amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that the amendment be temporarily set aside and we might move to the consideration of the amendment of the Senator from New Mexico, Senator Domenici, and that no amendment to the amendment be in order.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, but again I wish to renew my request for the yeas and nays in connection with the second-degree amendment of the Senator from Kansas.

The PRESIDING OFFICER. The Senator would require unanimous consent. Does he seek unanimous consent for this purpose?

Mr. METZENBAUM. I do seek unanimous consent for that purpose, but I am not certain why I need unanimous consent since the pending business is the second-degree amendment. It has not yet been set aside. The Senator from Kansas is asking for consent to do that.

The PRESIDING OFFICER. The Chair will advise the Senator from Ohio the pending business is the Boschwitz amendment.

Mr. METZENBAUM. I thought we just set that aside.

The PRESIDING OFFICER. The unanimous consent request is pending.

Mr. METZENBAUM. I ask unanimous consent that the yeas and nays be in order in connection with the second-degree amendment of the Senator from Kansas.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

Mr. BOSCHWITZ. Reserving the right to object. I withdraw my objection.

The PRESIDING OFFICER. Without objection, the Senator is permitted to request the yeas and nays.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that we might temporarily set aside the Dole amendment and the Boschwitz amendment and take up the amendment of the distinguished Senator from New Mexico and that no amendment to his amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from New Mexico is recognized.

#### UP AMENDMENT NO. 1475

(Purpose: To amend the Internal Revenue Code of 1954 to extend the affirmative commitment rule for the energy tax credit by two years)

Mr. DOMENICI. Mr. President, I send an amendment to the desk on behalf of myself, Senator Byrd of West Virginia, Senator McClure, Senator Armstrong, and Senator Wallop, and ask for its immediate consideration. I think this has been cleared by everyone.

I say to the Senator from Ohio, Senator METZENBAUM, that I wish to apologize. The first time I sent the amendment up for his approval it had a mistake in it that I did not understand. I told him what I thought it did. It did something else. I thank him for catching it. It is now precisely what we have all agreed upon.

About 5 years ago Congress created the energy tax credit, in part for synthetic fuel plants, but they had to have an affirmative commitment, on their engineering plans and design by the end of this year. We did not realize at the time that many of those plans and designs could not be completed by the end of 1982 through no fault of the building of those plants.

This amendment gives them until the end of 1984 to get their plans in. It does not change the energy credit percentage nor does it change the 1990 date by which the credit expires.

I thank the Senator for his cooperation.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. Do-MENICI), for himself, Mr. ROBERT C. BYRD, Mr. McClure, Mr. Armstrong, and Mr. WALLOP, proposes an unprinted amendment numbered 1475.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment insert:

(J) AFFIRMATIVE COMMITMENT RULE FOR SYNTHETIC FUEL.—Clause (iii) of section 46(a)(2)(C) of the Internal Revenue Code of 1954 (relating to longer period for certain long-term projects) is amended by adding at the end thereof the following new sentence: "In the case of property described in clauses (iii) or (v) of section 48(1)(3)(A), or property described in clause (v) of section 48(1)(2)(A), this clause shall be applied by substituting 'January 1, 1985' for 'January 1, 1983'."

Mr. ROBERT C. BYRD. Mr. President, I am delighted to cosponsor the amendment of the senior Senator from New Mexico.

This amendment extends for 2 years the affirmative commitment rule of the energy tax credit for coal gasification, liquification, and oil shale.

Under present law, the energy credits would have expired at the end of 1982 for such projects whose engineering plans have not been approved in a timely fashion by the synfuels corporation.

Rather than penalize these projects for delays beyond their control, this amendment would extend for 2 years the deadline so that they would continue to be eligible for the energy credits as they would have otherwise been under current law.

It would be shortsighted to allow a temporary decline in energy prices and the recession to terminate these projects when it will be only a matter of time before we are again faced with rising energy prices and shortages.

This amendment is an investment in this country's energy future.

I urge the Senate's adoption of this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The amendment (UP No. 1475) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

agreed to.

The PRESIDING OFFICER. The question now recurs on the Boschwitz amendment.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I suggest that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, we are trying to accommodate the Senator from Alabama. We find that we need to have the joint committee staff take a look at the amendment between now and 10 o'clock tomorrow mornig, if that is satisfactory to the Senator from Alabama, and then bring it back to us. We hope we can accommodate the Senator from Alabama at that time

In view of that, I wonder if there is any objection if we just quit. We still want to accommodate the Senator from Ohio, but we want to work it out. We have the amendment of Senator Levin, the amendment of Senator Bradley, the amendment of Senator Dixon and Senator Percy, and the Senator from Colorado has an amendment.

I might say to the acting majority leader I do not think we can work that out between now and the morning.

Mr. STEVENS. Mr. President, the Senator is exactly right. My request was not to change the time set for the beginning of the vote on cloture. It is obvious that if we are to accommodate people before that vote, some change has to be made.

If we just terminate consideration of this bill now until we return in the morning, the Boschwitz amendment is the pending amendment. I think we can see about lengthening the time that will be available then if we can get consent to do it. If not, we shall have to be as judicious as possible. I do not see anything else to do, because we cannot really make any decisions without a basic understanding whether it is going to be possible to change the cloture vote.

Mr. LONG. Mr. President, if the Senator will yield, may I suggest that we can vote on the Boschwitz amendment after we have voted on cloture. The Boschwitz amendment is a germane amendment.

Mr. BOSCHWITZ. If the Senator will yield, why do we not establish a time certain now to vote on my amendment inasmuch as it will be the pending business, 15 minutes after we come in?

Mr. STEVENS. I say to my good friend that that may be unfair if we take the time on an amendment that may be germane if it will squeeze out amendments on which there have been understandings reached here that some amendments that will not be germane will at least be able to be debated before the cloture vote and it may not be possible to vote on them after the cloture vote?

I urge my friend not to insist on a time certain. His amendment, we can assure him, is protected without regard to the outcome of cloture. Our problem is with the other amendments; we cannot make that guarantee.

I am advised, Mr. President, that my statement is in error, that that amendment was not filed within the time provided by the rules and would not be in order after cloture.

Mr. LONG. Mr. President, may I say to the Senator that I felt we should have a rollcall vote on the Boschwitz amendment. In view of the other problems involved, I shall not insist on that. If it will help solve the problem, I shall be willing to waive that.

Mr. DOLE. Why do we not just go home? When we get back in the morning, the majority leader will be here. The first order of business would be disposing of the Boschwitz amend-

ment.

Mr. STEVENS. If the Senator will permit me, we are accomplishing nothing here. I suggest we do the business we have to do, close down the Senate and return at the time which has already been established, which is 9:45.

Would the Chair state the order of business when we do resume in the

morning?

The PRESIDING OFFICER. Under the previous order, the Senate will convene at 9:45 a.m. Following that, there will be leadership time under the standing order. The vote on cloture will occur at 10:45. First would be a live quorum; following that, the vote on the cloture motion.

Mr. ROBERT C. BYRD. Mr. President, the statement of the majority leader, the understanding of the majority leader was that the live quorum would begin at 11 in accordance with a previous statement, notwithstanding the rule. That was his intention, because he had made that announcement. That was his intention to stick with that.

Mr. STEVENS. That was my understanding, also, Mr. President. I was building my time for him within that understanding, if the Chair will recall.

The PRESIDING OFFICER. The Chair can only inform the Senator that the order which has been entered

would prevail.

Mr. STEVENS. I do not intend to make the request to change it now. It was my understanding that we were all talking about 11 o'clock to commence the call for the cloture vote.

Did the Senator from Montana seek recognition? Did he request that I

yield?

Mr. MELCHER. Yes, Mr. President, will the majority whip yield the floor? Mr. STEVENS. May I ask my good

friend what the purpose is?

Mr. MELCHER. I want to make a statement before any more of the faithful leave the Chamber, particularly the chairman of the Committee on Finance. I would like to have his attention.

Mr. STEVENS. Mr. President, if the Senator does wish to make a statement, I shall be happy to yield the floor for him to make the statement.

Mr. MELCHER. I thank the Senator.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, rather than interjecting any objection to what unanimous-consent requests have been made, I withheld doing that because I note it takes sometime 15 minutes to unravel the objections, the reservations or objections. Rather than do that, I would like to take 3 minutes now to explain an amendment that I would like to modify if it will be acceptable to the managers of the bill.

It is an amendment proposed by myself and Senator DeConcini that deals with the transportation expenses of construction workers. This has been a long-standing argument.

Mr. STEVENS. Will the Senator yield to me for just one moment?

Mr. MELCHER. Yes, I yield.

Mr. STEVENS. I would like to listen to his statement and I will listen to his statement, but some people have to leave here in order to get back. They have further to drive than we do. Would the Senator suspend and permit the distinguished Democratic leader and me to conduct four items of routine business which must get done in order to go to the House?

Mr. MELCHER. Yes, Mr. President.

## WYOMING WILDERNESS ACT OF 1982

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar No. 841, which is S. 2118.

The PRESIDING OFFICER. Without objection, it is so ordered. The

clerk will state it.

The legislative clerk read as follows:
A bill (S. 2118) to designate certain national forest system lands in the State of Wyoming for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, to withdraw designated wilderness areas in Wyoming from minerals activity, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with an amendment.

To strike out all after the enacting clause, and insert the following:

# TABLE OF CONTENTS

TITLE I—SHORT TITLE, FINDINGS AND PURPOSES

Sec. 101. Short title.

Sec. 102. Declaration of findings and purposes.

TITLE II—ADDITIONS TO NATIONAL WILDERNESS PRESERVATION SYSTEM

Sec. 201. Designation of the Cloud Peak,
Popo Agie, Gros Ventre, Jedediah Smith and Laramie Peak
Wilderness areas, and the Du
Noir addition to the Washabie
Wilderness, the Corridor addition to the Teton Wilderness,
and the Glacier Primitive Area

addition to the Fitzpatrick Wilderness.

Sec. 202. Documentation of Wilderness boundaries.

Sec. 203. Application of the Wilderness Act of 1964.

## TITLE III—RELEASE OF LANDS FOR MULTIPLE USE MANAGEMENT

Sec. 301. Administrative and Congressional review of roadless areas.

Sec. 302. Release of lands not designated as wilderness.

TITLE IV—WITHDRAWAL OF DESIGNATED WILDERNESS AREAS FROM OPERATION OF MINING AND MINERAL LEASING LAWS

Sec. 401. Withdrawal of designated wilderness areas from mining and minerals activity.

#### TITLE V-ASSESSMENT OF MINERALS, PROHIBITION ON DRILLING

Sec. 501. Minerals Assessment activity. Sec. 502. Recommendations to Congress by the President.

# TITLE VI-MISCELLANEOUS PROVISIONS

Sec. 601. Grazing in wilderness areas. Sec. 602. State water allocation authority. Sec. 603. Prohibition on buffer zones.

TITLE I—SHORT TITLE, FINDINGS AND PURPOSES.

#### SHORT TITLE

SEC. 101. This Act may be cited as the "Wyoming Wilderness Act of 1982".

## DECLARATION OF FINDINGS AND PURPOSES

SEC. 102. (a) The Congress finds that-

(1) certain areas of undeveloped national forest lands in the State of Wyoming possess outstanding natural characteristics giving them high values as wilderness and will, if properly preserved, contribute as an enduring resource of wilderness for the benefit of the American people;

(2) review and evaluation of roadless and undeveloped lands in the national forest system of Wyoming have identified those areas which, on the basis of their landform, ecosystem, associated wildlife, and location, will help to fulfill the national forest system's share of a quality National Wilderness Preservation System; and

(3) review and evaluation of roadless and undeveloped lands in the national forest system in Wyoming have also identified those areas which should be available for multiple uses other than wilderness, subject to the Forest Service's land management planning process and the provisions of the Act.

(b) The purposes of this Act are to-

(1) designate certain national forest system lands in Wyoming for inclusion in the National Wilderness Preservation System in order to preserve the wilderness character of the land and to protect watersheds and wildlife habitat, preserve scenic and historic resources, and promote scientific research, primitive recreation, solitude, physical and mental challenge, and inspiration for the benefit of all of the American people;

(2) withdraw, subject to valid existing rights, National Wilderness Preservation System lands in the State of Wyoming, including those so designated by this Act, from operation of the general mining and mineral leasing laws in order to protect the physical characteristics and wilderness values which motivated the Congress to include these lands within the System:

(3) require appropriate inventory to assess and document the minerals potential of National Wilderness Preservation System lands in the State of Wyoming in order to

enhance the data base; and

(4) insure that certain national forest system lands in the State of Wyoming be made available for uses other than wilderness in accordance with applicable national forest laws and planning procedures and section 302 of this Act. Such lands may be managed for a wide variety of uses, depending on their unique characteristics, including but not limited to fish and wildlife protection and management, developed and undeveloped recreation, scenic enjoyment, preservation of natural characteristics, range management, timber harvesting, watershed and vegetation management, energy and minerals exploration and development, and other uses.

# TITLE II—ADDITIONS TO NATIONAL WILDERNESS PRESERVATION SYSTEM

DESIGNATION OF THE CLOUD PEAK, POPO AGIE, GROS VENTRE, JEDEDIAH SMITH, AND LARAMIE PEAK WILDERNESS AREAS, AND THE DUNOIR ADDITION TO THE WASHAKIE WILDENESS, THE CORRIDOR ADDITION TO THE TETON WILDERNESS, AND THE GLACIER PRIMITIVE AREA ADDITION TO THE FITZPATRICK WILDERNESS

SEC. 201. In furtherance of the purposes of the Wilderness Act (78 Stat. 890), the following national forest system lands in the State of Wyoming, comprising approximately six hundred and seventy-eight thousand four hundred and forty-nine acres and generally depicted on maps appropriately referenced, are hereby designated as wilderness, and, therefore, as components of the National Wilderness Preservation System:

(a) Certain lands in the Bighorn National Forest, which comprise approximately one hundred and fifty-seven thousand nine hundred acres, as generally depicted on a map entitled, "Cloud Peak Wilderness Area Proposal", numbered W-one and dated February 22, 1982, and which shall be known as the Cloud Peak Wilderness. The previous classification of the Cloud Peak Primitive

Area is hereby abolished.

(b) Certain lands in the Shoshone National Forest, which comprise approximately one hundred and one thousand nine hundred and ninety-one acres, as generally depicted on a map entitled, "Popo Agie Wilderness Area Proposal", numbered W-two and dated February 22, 1982, and which shall be known as the Popo Agie Wilderness. The previous classification of Popo Agie Primitive Area is hereby abolished.

(c) Certain lands in the Bridger-Teton National Forest, which comprise approximately two hundred and twenty-eight thousand five hundred and fifty acres, as generally depicted on a map entitled, "Gros Ventre Wilderness Area Proposal", numbered Wthree and dated February 22, 1982, and which shall be known as the Gros Ventre

Wilderness.

(d) Certain lands in the Targhee National Forest which comprise approximately one hundred and sixteen thousand eight hundred and fifty-five acres as generally depicted on a map entitled "Jedediah Smith Wilderness Area Proposal" numbered W-four and dated September 1982 and which shall be known as the Jedediah Smith Wilderness.

(e) Certain lands in the Medicine Bow National Forest, which comprise approximately twenty seven thousand and four hundred acres as generally depicted on a map entitled "Laramie Peak Wilderness Area Proposal" numbered W-five and dated September

1982 and which shall be known as the Laramie Peak Wilderness Area.

(f)(1) Certain lands in the Shoshone National Forest, which comprise approximately eleven thousand and one hundred acres, as generally depicted on a map entitled, "DuNoir Addition to the Washakie Wilderness Area Proposal", numbered W-six and dated September 1982 and which shall become a part of the Washakie Wilderness as designated by Public Law 92-476 (86 Stat.

(2) Within the area depicted as the special management unit on the map entitled, "Washakie Wilderness—Proposed", dated June 15, 1967, revised September 12, 1970, which is on file and available for public inspection in the Office of the Chief, Forest Service, Department of Agriculture, and roads that may be constructed for the purpose of timber harvesting or other authorized uses shall be used only for those uses and related administration and shall not be available for general public travel. The determination of authorized use shall consider the needs of the resident and migrating elk herds and other wildlife.

(3) Section 5 of Public Law 92-476 (86

Stat. 792) is hereby repealed.

(g) Certain lands in the Bridger-Teton National Forest, which comprise approximately twenty-eight thousand one hundred and fifty-six acres as generally depicted on a map entitled "Corridor Addition to the Teton Wilderness Area Proposal", numbered W-seven and dated September 1982 which shall become a part of the Teton Wilderness as designated by Public Law (88-577).

(h)(1) Certain lands in the Shoshone National Forest, which comprise approximately six thousand four hundred and ninety-seven acres, as generally depicted on a map entitled, "Glacier Addition to the Fitzpatrick Wilderness Area Proposal", numbered W-eight and dated September 1982 and which shall become a part of the Fitzpatrick Wilderness as designated by Public Law 94-557 and Public Law 94-567.

(2) Within the area described in section 201(h)(1), motorized access for administrative purposes and related activities as determined necessary by the Secretary for the trapping, transporting, and proper management of the area's big horn sheep population shall be allowed.

(3) The previous classification of the Whiskey Mountain Primitive Area is hereby abolished.

## LEGAL DESCRIPTION AND WILDERNESS BOUNDARIES

SEC. 202. As soon as practicable after the enactment of this Act, a map and a legal description of each wilderness area designated under section 201 shall be filed with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the House of Representatives, and each such map and description shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in each such legal description and map may be made. Each such map and legal description shall be on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture.

## APPLICATION OF THE WILDERNESS ACT OF 1964

SEC. 203. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary in accordance with the provisions of this Act

and the Wilderness Act, except that any reference in the provisions of the Wilderness Act to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

# TITLE III—RELEASE OF LANDS FOR MULTIPLE USE MANAGEMENT

ADMINISTRATIVE AND CONGRESSIONAL REVIEW
OF ROADLESS AREAS

SEC. 301. The Congress finds that-

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of national forest roadless areas in Wyoming and the environmental impacts associated with alternative allocations of such areas.

# RELEASE OF LANDS NOT DESIGNATED AS WILDERNESS

SEC. 302. (a) The Congress hereby determines and directs that, without passing on the question of the legal and factual sufficiency of the RARE II final environmental impact statement (dated January 1979) with respect to national forest lands in States other than Wyoming, such statement shall not be subject to judicial review with respect to national forest system lands in the State of Wyoming.

(b) national forest system lands in the

State of Wyoming-

(1) not identified by section 201 as additions to the National Wilderness Preservation System, or

(2) not heretofore designated by Act of Congress as components of the National Wilderness Preservation System, shall be managed for multiple uses other than wilderness, until and unless otherwise directed by an Act of Congress. Such lands shall be deemed, for purposes of all current and future land management plans which are approved before December 31, 2000, and which are required by the Forest Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, to have been given adequate consideration as to their suitability for inclusion in the National Wilderness Preservation System.

(c) Unless expressly authorized by Congress, the Department of Agriculture shall not conduct any further statewide roadless area reveiw and evaluation of national forest system lands in the State of Wyoming for the purpose of determining their suitability for inclusion in the National Wilder-

ness Preservation System.

TITLE IV—WITHDRAWAL OF DESIGNATED WILDERNESS AREAS FROM OPERATION OF THE MINING AND MINERAL LEASING LAWS

# WITHDRAWAL OF DESIGNATED WILDERNESS AREAS FROM MINING AND MINERALS ACTIVITY

Sec. 401. Notwithstanding any other provision of law, and subject to valid existing rights, lands within the national forest system in Wyoming which have previously been designated by Act of Congress for in-clusion in the National Wilderness Preservation System, and lands which are so designated by this Act, are hereby withdrawn from all forms of appropriation under the mining laws and from disposition under all laws pertaining to mineral and geothermal leasing and all amendments thereto. In the case of the lands referred to in the preceding sentence, for purposes of applying the provisions of section 4(d)(3) of the Wilderness Act, the date of enactment of this Act shall be substituted for the December 31,

1983, and the January 1, 1984, dates referred to in such provisions.

### TITLE V-ASSESSMENT OF MINERALS, PROHIBITION ON DRILLING

SEC. 501. (a) Subject to subsection 501(b) of this Act, and in furtherance of section 4(d)(2) of the Wilderness Act and the policies of the National Materials and Minerals Policy, Research and Development Act (94 Stat. 2305), the Secretary of the Interior shall continue to assess the minerals potential of National Wilderness Preservation System lands within the State of Wyoming in order to expand the data base with respect to the minerals potential of such lands.

(b) Notwithstanding any other provision of law and subject to valid existing rights, exploratory drilling within the boundaries of any congressionally designated unit of the National Wilderness Preservation System in the State of Wyoming for the purpose of assessing oil and gas potential is hereby prohibited.

# RECOMMENDATIONS TO CONGRESS BY THE PRESIDENT

SEC. 502. (a) At any time after the date of enactment of this Act, the President may transmit to the Congress a recommendation that minerals exploration, development, or extraction not permitted under the Wilderness Act and this Act shall be permitted in a specified area or areas within any Wyoming unit of the National Wilderness Preservation System. Notice of such transmittal shall be published in the Federal Register and shall be conveyed to the Governor of Wyoming.

(b) A recommendation may be transmitted to the Congress under subsection (a) if the President finds that, based on available information—

(1) there is an urgent national need for the minerals activity; and

(2) such national need outweighs the other public values of the wilderness lands involved and the potential adverse environmental impacts which are likely to result from the activity.

from the activity.

(c) Together with a recommendation, the President shall submit to the Congress—

 a report setting forth in detail the relevant factual background and the reasons for his findings and recommendations;

(2) statement of the conditions and stipulations which would govern the recommend-

ed activity; and

(3) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of that Act. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of such Act, the President may, if he deems it desirable, include such a statement in his transmittal to Congress.

(d) Any recommendation under this section shall take effect only upon enactment of a joint resolution approving such recommendation within the first period of one hundred and twenty calendar days of continuous session of Congress beginning on the date after the date of receipt by the Senate and House of Representatives of such recommendation. Any recommendation of the President submitted to the Congress under subsection (a) shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recommendation is submitted.

(e) For purposes of this section-

 continuity of session of Congress is broken only by an adjournment sine die;
 and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the onehundred-and-twenty-day calendar period.

(f)(1) This subsection is enacted by Congress—

(A) as an exercise of the rulemaking power of each House of Congress, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in the House in the case of resolutions described by paragraph (2) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as those relate to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

(2) For purposes of this section, the term

"resolution" means a joint resolution, the

(3) A resolution once introduced with respect to such application shall be referred to one or more committees (and all resolutions with respect to the same application shall be referred to the same committee or committees) by the President of the Senate or the Speaker of the House of Representa-

tives, as the case may be.

(4)(A) If any committee to which a resolution with respect to an application has been referred has not reported it at the end of sixty calendar days after its referral, it shall be in order to move either to discharge such committee from further consideration of such resolution or to discharge such committee from further consideration of any other resolution with respect to such application which has been referred to such committee.

(B) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same application) and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(C) If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same application.

(5)(A) When any committee has reported, or has been discharged from further consid-

eration of, the resolution, but in no case earlier than sixty days after the date of transmittal by the President of the application to the Congress, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

(B) Debate on the resolution shall be limited to not more than four hours. This time shall be divided equally between those favoring and those opposing such resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the resolution, shall not be in order, and it shall not be in order to move to reconsider the vote by which such resolution was agreed to or disagreed to, or, thereafter, within such one-hundred-and-twenty-day period, to consider any other resolution respecting the same application.

(6)(A) Motions to postpone, made with respect to the discharge from committee, or the consideration of a resolution and motions to proceed to the consideration of other business, shall be decided without

debate.

(B) Appeals from the decision of the Chair relating to the application of the rules to the procedures of the Senate or the House of Representatives relating to a resolution shall be decided without debate.

(7) If one House of the Congress (hereinafter referred to as the first House) receives from the other House a resolution under this section, then the following procedure applies:

(A) The resolution of the other House shall not be referred to a committee in the first House.

(B) The procedure with respect to the resolution of the first House or other resolutions of such House shall be the same as if no resolution from the other House had been received, but on any vote on final passage of a resolution of the first House, where the text of the resolution from the other House is identical, the resolution of the other House shall be automatically substituted for the resolution of the first House.

# TITLE VI-MISCELLANEOUS PROVISIONS

## GRAZING IN WILDERNESS AREAS

SEC. 601. The Secretary of Agriculture is directed to review all policies, practices, and regulations of the Department of Agriculture regarding livestock grazing in national forest wilderness areas in the State of Wyoming in order to ensure that such policies, practices, and regulations fully conform with and implement the intent of Congress regarding grazing in such areas, as such intent is expressed in the Wilderness Act.

## STATE WATER ALLOCATION AUTHORITY

SEC. 602. (a) As provided in section 4(d)(7) of the Wilderness Act, nothing in this Act shall constitute an express or implied claim or denial on the part of the Federal Government as to exemption from Wyoming water laws

(b) As provided in section 4(d)(8) of the Wilderness Act, nothing in this Act shall be construed as affecting the jurisdiction or responsibilities of the State of Wyoming with respect to wildlife and fish in the national forests in Wyoming.

## PROHIBITION ON BUFFER ZONES

SEC. 603. Congress does not intend that designation of wilderness areas in the State of Wyoming lead to the creation of protective perimeters or buffer zones around each wilderness area. The fact that nonwilderness activities or uses can be seen or heard from areas within the wilderness shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

Mr. STEVENS. I move that the Senate adopt the committee substitute to S. 2118.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a sub-

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## AMENDMENT OF CLAYTON ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 816.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved, That the bill from the Senate (S. 816) entitled "An Act to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause,

and insert:

That section 4 of the Clayton Act (15 U.S.C. 15) is amended-

(1) by striking out "That" and inserting in lieu thereof "(a) Except as provided in subsection (b)," and

(2) by adding at the end thereof the fol-

lowing new subsections:

"(b)(1) Except as provided in paragraph (2), any person who is a foreign state may not recover under subsection (a) an amount in excess of the actual damages sustained by it and the cost of suit, including a reasonable attorney's fee.

"(2) Paragraph (1) shall not apply to a

foreign state if-

"(A) such foreign state would be denied, under section 1605(a)(2) of title 28 of the United States Code, immunity in a case in which the action is based upon a commercial activity, or an act, that is the subject matter of its claim under this section;

"(B) such foreign state waives all defenses based upon or arising out of its status as a foreign state, to any claims brought against

it in the same action;

"(C) such foreign state engages primarily

in commercial activities; and

"(D) such foreign state does not function, with respect to the commercial activity, or the act, that is the subject matter of its claim under this section as a procurement entity for itself or for another foreign state. (c) For purposes of this section-

"(1) the term 'commercial activity' shall have the meaning given it in section 1603(d) of title 28, United States Code; and

"(2) the term 'foreign state' shall have the meaning given it in section 1603(a) of title 28, United States Code."

Amend the title so as to read: "An Act to amend the Clayton Act to modify the amount of damages payable to foreign states and instrumentalities of foreign states which sue for violations of the antitrust laws.".

Mr. STEVENS. I move that the Senate concur in the House amend-

The motion was agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FUNDING OF THE SELECT COM-MITTEE TO STUDY LAW EN-FORCEMENT UNDERCOVER AC-TIVITIES OF COMPONENTS OF THE DEPARTMENT OF JUSTICE

Mr. STEVENS. Mr. President, I send to the desk a resolution on behalf of Senators Mathias and Huddleston and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A Senate resolution (S. Res. 517) relating to funding of the Select Committee to Study Law Enforcement Undercover Activities of Components of the Department of Justice.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

• Mr. MATHIAS. Mr. President, when Senate Resolution 350 was enacted by the Senate creating the select committee, it called for the committee to submit its report by December 15, 1982, and to disband the staff by January 15, 1983. However, Senate Resolution 350 provided for paying expenses of the committee only through December 15, 1982. As presently written, the staff could not be paid between December 15 and January 15.

The resolution changes the date through which expenses can be paid to January 15, 1983. (This will not affect the overall budget limit of \$250,000.)

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 517) was agreed to as follows:

## S. RES. 517

Resolved, That the first sentence of section 7 of S. Res. 350, 97th Congress, agreed to March 25, 1982, is amended by striking out "December 15, 1982," and inserting in lieu thereof "January 15, 1983,".

Mr. STEVENS, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### S. 3105-MODIFICATION OF JUDI-CIAL DISTRICTS OF WEST VIR-GINIA

Mr. STEVENS. Mr. President, I yield the to distinguished Democratic leader.

Mr. ROBERT C. BYRD. Mr. President, the Senate has acted twice on legislation to modify the judicial districts of West Virginia. There was a technical error in the legislation that was passed. By virtue of the fact that one of the counties was moved from the northern to the southern district and the language which pertained to the holding of courts did not also make the necessary change in the naming of one of the cities, that would also have to be removed.

I introduce a bill at this time and ask unanimous consent that it may be considered as having been read the first and second times and the Senate proceed immediately to its consideration.

Mr. STEVENS. There is no objection to the consideration of this bill, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows: A bill (S. 3105) to modify the judicial districts of West Virginia.

There being no objection, the Senate proceeded to consider the bill (S. 3105), which was read the first time by title and the second time at length.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3105) was ordered to be engrossed for a third reading, read the third time, and passed as follows:

## S. 3105

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 129 of title 28, United States Code, is amended-

(1) in subsection (a) by—
(A) striking out ", Wirt, and Wood";

(B) inserting "Braxton," after "Berkeley,"

(C) inserting "Pocahontas" after "Pleasants,";

inserting "Webster, and" (D) after "Upshur"; and

(F) by striking out "Parkersburg,"; and

(2) in subsection (b) by-

(A) striking out tas," and "Webster,"; and "Wirt, (A) striking out "Braxton,", "Pocahon-

Wood," after "Wayne,"; and

(C) striking out "and Lewisburg." and inserting in lieu thereof "Lewisburg, and Parkersburg.".

SEC. 2. (a) The existing district judgeship for the Southern District of West Virginia, authorized by section 2 of the Act entitled "An Act to provide for the appointment of additional district and circuit judges and for other purposes", approved October 20, 1978 (92 Stat. 1632; 28 U.S.C. 133 note), shall, as of the date of enactment of this Act, be authorized under section 133 of title 28 of the United States Code as a district judgeship for the Northern District of West Virginia, and the incumbent of that office shall henceforth hold office under section 133, as amended by this Act.

(b) The existing district judgeship for the Northern and Southern Districts of West Virginia shall be authorized as the district judgeship for the Southern District.

SEC. 3. The table in section 133 of title 28, United States Code, is amended by striking out the following:

out the following.	
"West Virginia:	
"Northern	1
"Southern	3
"Northern and Southern	1"
and inserting in lieu thereof the follow	ing:
"West Virginia:	
"Northern	2
"Southern	4"

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1464—ADDITIONAL COSPONSOR

Mr. STEVENS. Mr. President, I ask unanimous consent that Senator Grassley be added as a cosponsor to the amendment offered by the Senator from Illinois (Mr. Dixon), which is amendment No. 1464.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I want to thank the distinguished Senator from Montana for his courtesy, and I yield the floor back to him.

## SURFACE TRANSPORTATION ACT OF 1982

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the proposal to rectify the situation where construction workers are not permitted to make legitimate deductions from their expenses incurred while working on the job away from home should be rectified. The amendment that Senator Deconcini and I have is not germane to the bill and would have to be offered prior to cloture. Although we have discussed this bill during the course of the evening, the opportunity has not been available to offer the amendment.

Treasury advises that while they have no estimate of any revenue loss,

there probably would be some. It is fair to say that Treasury knows of the problem.

The Internal Revenue Service knows of the problem and has some understanding that the problem should be addressed and that changes in the Internal Revenue Service rules should be made.

It is my proposal, Mr. President, if it is agreeable to the managers of the bill, that the amendment be modified to the form of a study requiring the Internal Revenue Service and Treasury Department to report back within 6 months, making recommendations for corrections and modifications in the statute so that the rules could be refined to allow for proper deductions of away-from-home expenses incurred by construction workers.

Mr. President, I make these comments at this time in the hope that this proposal will be acceptable to the managers of the bill and that it can be accepted prior to cloture in the morning.

Mr. STEVENS. I thank the Senator from Montana for his courtesy.

## MULTIPLE-LAUNCH ROCKET SYSTEM

Mr. PRYOR. Mr. President, the most important questions we need to consider on every defense program are whether we really need the system and how we can get the best product at the lowest price. We do in fact need the multiple launch rocket system-it is the kind of basic surface-to-surface system that responds to the real artillery requirement of the Army today. As to the quality and cost of the system, the present acquisition plan has produced a model of cost, schedule, and performance achievements. Therefore, I am pleased that the Appropriations Committee has amended the continuing resolution to allow continuation of the Army's procurement

The amendment would restore funds for advance multiyear procurement of the multiple-launch rocket system (MLRS) that were removed during consideration by the Appropriations Committee of the DOD bill and delete \$20 million that was added to begin work on a second source production facility.

The MLRS program has been recognized as one of the best managed programs in the Department of Defense. Both the Senate Armed Services Committee and the House Armed Services Committee commended the Army for its management of the MLRS program.

The General Accounting Office issued a report February 5, 1982, entitled "The Army's Multiple-Launch Rocket System Is Progressing Well and Merits Continued Support." GAO concluded that the rocket "has excellent potential for significantly increasing the Army's artillery capability."

It is on cost, on schedule, and is meeting all technical specifications. It

is the only major Army program that is showing a cost reduction in the selected acquisition reports. The costs have decreased by 12 percent between March and December 1981.

Moreover, Maj. Gen. Robert Moore, Commander of Army Missile Command was quoted in Aerospace Daily, September 24, 1982, as saying quite simply that MLRS is "the best weapon system I've got in my command. It is on time, on cost, and on schedule."

The Army's procurement plan is simple: Require a firm fixed-price proposal from Vought for the remaining production run, evaluate the proposal and award a multiyear contract only if the Army is satisfied that projected savings offer the best buy for the Government.

This program is an example of good procuremnt practices. First, the Government is protected by requiring a firm fixed-price contract. I urge greater use of such contracts.

Second, this program has had competition—a lot of it and it may have more. In 1976, five companies competed, two made the cutoff. From 1977 to 1980, these two companies competed and Vought won. Additionally, should Vought's multiyear proposal be unsatisfactory, a second-source competition would take place.

Thus, this has been a competitive procurement that has resulted in one supplier of the system—it has produced a winner of the competition.

Third, the Vought Corp. and its subcontractors have invested over \$50 million of private funds into a facility. Investments like this can protect and enhance our defense industrial base and serve a vital role in our economy.

Fourth, the cost comparison in this case strongly argues against a second source. Multiyear savings according to the Army amount to \$193 million.

I believe that the option of selecting a second-source producer should be retained while the Army considers Vought's offer for a multiyear contractual arrangement. The explicit threat of developing a second domestic source should provide the contractor with maximum incentives for offering the best possible price of MLRS. Appropriating the funds already authorized in long-lead funding for multiyear procurement will allow the Army to exercise either the multiyear or second-source option, depending on which proves to be most cost effective.

The competition for the MLRS program has already been completed and won. The winning contractor now deserves the opportunity to perform in accordance with the intent of the contract. The Army should be allowed to honor its commitment. Failure to do so would raise grave doubts in the future for contractors who had been willing to invest large sums of capital

on behalf of Department of Defense

Deleting the funds authorized to initiate a multiyear procurement strategy and appropriating funds to begin a second-source procurement for the MLRS would jeopardize one of the most successful major weapons programs in recent memory. The success the Vought Corp. has had with this program should be rewarded, not penalized. For the good of the Congress, the Army, and the country we must not force the Army to reject the option for the multiyear procurement of the presently successful MLRS program.

## MULTIPLE LAUNCH ROCKET SYSTEM

Mr. BUMPERS. Mr. President, I am pleased to announce that today the Appropriations Committee adopted my amendment to the continuing resolution to restore full funding for multiyear procurement of the multiple-launch rocket system (MLRS). Specifically, my amendment, as adopted, restores \$53.2 million for advance multiyear procurement of the system multiple-launch rocket (MLRS) that was stripped out during Appropriations the Committee markup of the fiscal year 1983 Department of Defense appropriation bill; and deletes \$20 million that was added by the Appropriations Committee to begin work on a directed second-source production facility. The House version of the fiscal year 1983 Defense appropriations bill includes \$53.2 million for the advance multiyear procurement option. The amendment, which was developed by myself and Senator Pryor, brings the Senate bill into line with the House bill and the Army's recommendation, and removes the MLRS as a potential issue for House-Senate conferees on the continuing resolution.

Passage of this amendment represents approval for the Army's MLRS procurement strategy and should insure that this important system will be produced in a manner that best meets the needs of the Army and the Nation. Three reasons for the unqualified success of the MLRS program have been the vigorous 4-year competition involving five contractors that led to the selection of a prime contractor; investment of more than \$50 million in private capital to build totally modern production facilities; DOD's insistence on fixed-price contracts. The results have been impressive. The cost of the MLRS actually decreased by 12 percent between March and December 1981, and the General Accounting Office has concluded that the MLRS "has excellent potential for significantly increasing the Army's artillery capabilty."

The MLRS program has been one of the few real success stories in the weapons procurement business in recent years. That is why it was selected as a candidate for multiyear procurement by the Department of Defense in 1981, and why funds to implement this approach were authorized for fiscal year 1983. The Army estimates savings in excess of \$100 million over a 5-year contract period by using the multiyear procurement strategy.

I believe the option of selecting a competitive second-source domestic producer should be retained while the Army considers the contractor's offer for a multiyear contractural arrangement. The alternative of developing a competitive second source should provide the contractor with maximum incentives for offering the best possible price for the MLRS. Restoring the \$53.2 million that has already been authorized and funding in the House will allow the Army to exercise either the multiyear or second source option, which ever is most cost effective.

Mr. President, a number of of Senators have taken a keen interest in this amendment and worked hard for its adoption. In particular, I would like to thank the following for their unwavering support: Senators Pryor, Bentsen, Exon, Bradley, Dodd, Specter, Warner, Thurmond, Leahy, Riegle, Nickles, and Dole.

Mr. President, I hope that the entire Senate will agree with me that the committee restoration of the funds previously authorized to initiate a multiyear procurement strategy, and deletion of the additional \$20 million to begin a directed second-source procurement for the MLRS, will guarantee the continued success of one of this Nation's most important weapons programs.

## NORTH CAROLINA HIGHWAY 32 BRIDGE

Mr. HELMS. Mr. President, I would like to call to the attention of the distinguished chairman of the Committee on Environment and Public Works, my distinguished colleague from Vermont, the condition of the North Carolina Highway 32 Bridge connecting Chowan and Washington Counties over the Albemarle Sound in North Carolina.

The bridge is 45 years old, and in a state of serious disrepair. I have here a report on the bridge that sets out in detail its condition and explains what repairs have begun and what other repairs are needed. I ask unanimous consent that it be printed in the Record at the conclusion of my remarks.

I call this bridge to the attention of the Senator from Vermont and my other colleagues on the Committee on Environment and Public Works in the hope that they will consider the condition of this bridge, and if possible include language in their report on this measure citing this bridge as one for which Federal assistance out of the bridge discretionary program should be provided.

Mr. STAFFORD. Mr. President, I would be delighted to examine this in

conference. I thank my good friend from North Carolina for calling this to my attention.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT ON N.C. 32 BRIDGE OVER ALBEMARLE SOUND, CHOWAN AND WASHINGTON COUN-TIES. JULY 1982

#### GENERAL INFORMATION

The Albemarle Sound Bridge was built in 1937 by the North Carolina State Highway Commission. The longest bridge in North Carolina, it is 3.45 miles in length and has a clear roadway width of 21'-11". The bridge, with the exception of the truss swing span, consists of a concrete deck on steel beams supported by timber piles. The bridge is not capable of supporting maximum legal vehicle weights and is posted to allow usage by single vehicles having a gross weight of no more than 20 tons and truck-tractor semitrailer vehicles having a gross weight of no more than 22 tons.

#### INSPECTION

An in-depth inspection of the bridge was conducted by the consulting firm of Greiner Engineering Sciences, Inc. in 1979. Prior to the inspection, the bridge was posted for a maximum gross weight of 23 tons for single vehicles and 27 tons for truck-tractor semitrailer vehicles. This inspection indicated the truss swing span to be in good condition but the remainder of the bridge was found to be in poor condition due to damaged timber piles and bracing. A limit of 9 tons gross weight was recommended, but this restriction was not posted. As a result, bridge maintenance personnel replaced 31 timber piles and repaired the timber cross bracing. The bridge was then posted single vehicle 20 tons and truck-tractor semitrailer vehicle 22 tons.

A reinspection above the waterline was conducted by the Bridge Maintenance Unit in November 1981. Repairs were recommended for two piles and other minor maintenance items considered normal for a bridge 45 years old. A second phase of this inspection included the under water and above water investigation of the last condition of the timber piles. This work has been conducted during the last several months and is now complete. This systematic inspection included the sounding of 1,296 piles below the waterline and 2,856 above the water. Two decayed piles were found below the water and, as a result of coring 389 piles above the waterline, 40 piles have been identified for replacement.

## MAINTENANCE

The replacement of the 40 piles began July 28, 1982 by our Bridge Maintenance Unit at an estimated cost of \$200,000. This work will take 30 to 45 working days, depending on the weather. One lane of traffic will be maintained during the working hours of 7:00 a.m. to 5:30 p.m. Monday through Thursday. Applications for oversize load permits will be advised of a width restriction during working hours. The current weight limit posting will be maintained during and upon the completion of the work.

The bridge will continue to be inspected at least annually. Our Department is committed to the maintenance required to keep the bridge open to traffic, with little, if any, further reduction in the current posted weight restrictions, until the bridge is replaced.

#### REPLACEMENT

This bridge was originally included for replacement in the 1979-1985 Transportation Improvement Program, subject to availability of funds. The bridge is scheduled for replacement in fiscal year 1984 in the 1982-1991 Transportation Improvement Program, provided sufficient funds are made available. The current estimated cost of the replacement is \$37.5 million.

Over the past several years, North Carolina has received an apportionment of approximately \$16 million per year in federalaid Bridge Replacement/Rehabilitation funds. These funds, plus twenty percent state matching monies, are to be used to replace deficient bridges throughout the State. With approximately 11,000 substandard bridges in North Carolina, the replacement of the Albermarle Sound structure using these funds would significantly neglect other statewide needs, Additional revenues must be identified to replace the NC 32 bridge.

Current federal highway legislation provides for \$200 million discretionary funds nationwide for high cost bridge replacement projects as identified by the Secretary of the U.S. Department of Tranportation. Two major bridges in North Carolina (the NC 32 Albemarle Sound Bridge and the US 421 Bridge over the Cape Fear River near Wilmington) qualify for these funds. To date, our efforts to obtain federal-aid discretionary bridge replacement funds have been tutile. To the best of our knowledge, the U.S. Department of Transportation has consistently allocated the available discretionary bridge funds to those bridges which have been noted in the Congressional legislative record as being eligible.

New multi-year federal-aid highway legislation is currently under consideration by the President and within committees in both Houses of Congress. We have been working with our legislative representatives in Washington to have two North Carolina bridges included in the legislative record. In fact, Congressman Walter Jones has been instrumental in having these bridges included in the report to accompany the House bill (H.R. 6211) currently under consideration by the House Committee on Public

Works and Transportation.

Apparently, time will not permit Congress to enact multi-year highway legislation before the beginning of the fiscal year, October 1, 1982. A one-year extension of the current bill is more likely. However, we must continue to pursue federal-aid discretionary bridge replacement funds for North Carolina through our Congressional delegation. Without these funds or a substantial increase in regular federal-aid bridge replacement funds in future multi-year highway legislation, the replacement of the Albemarle Sound Bridge is likely years away.

Local governments should continue their support and pursuit of funds for the replacement of the Albemarle Sound Bridge through their legislative representatives. Until additional funds become available, the Department of Transportation will continue to maintain the existing bridge to provide the best level of service possible for this vital link in the highway network of eastern

North Carolina.

ON SECTION 147—INNOVATIVE TECHNOLOGIES S. 3043

Mr. DECONCINI. Mr. President, I want to commend my colleague from West Virginia, Senator Randolph, and the Senate Committee on Environ-

ment and Public Works for including section 147, the innovative technologies provision, in this highway bill. Section 147 authorized the Secretary of Transportation to increase payments to States in cases where the States submit highway or bridge surfacing or restoration projects that utilize paying materials containing significant amounts of recycled materials.

This new statutory provision is long overdue and especially appropriate in the case of asphalt/rubber, which is produced by combining approximately 75 to 80 percent asphalt with 20 to 25 percent rubber recovered from recycled tires. For years, the State of Arizona and the city of Phoenix have successfully utilized asphalt/rubber to pave miles of our streets and highways. In each instance, the utilization of this material containing recycled rubber has proved exceptionally successful. In addition, the Federal Highway Administration has conducted 28 asphalt/rubber demonstration projects throughout the States-from Florida to Oregon, from Vermont to Wyoming and Washington-and just recently, at a Federal Highway Administration seminar in San Antonio, the Chief of that Agency's Demonstration Projects Division stated that, several years after the initial paving.

All of these projects are in good to excellent condition \* \* \*

Consequently, this Federal Highway Administration official concluded:

Projects involving asphalt/rubber chip seals and interlayers can be constructed without any significant difficulties.

Asphalt/rubber chip seals are more effective e than conventional chip seals in retarding the reflection of fatigue-type cracking in

asphalt pavements.

It is the opinion of this author that asphalt/rubber membranes offer viable alternatives to conventional materials for the rehabilitation of some asphaltic concrete pavements. Whenever an asphalt pavement exhibits moderate to severe fatigue-type cracking, serious consideration should be given to the use of an asphalt/rubber chip seal or interlayer. Under these circumstances, the asphalt/rubber treatment can be expected to control reflective cracking, minimize moisture penetration, and substantially extend the service life of the pavement.

Equally salutary recommendations and conclusions were contained in the "Eleven-Year Pavement Condition History of Asphalt/Rubber Seals" recently published by the city of Phoenix, Ariz. In Phoenix, asphalt/rubber was applied to 57 miles of severely cracked streets and roads during the period from 1971 through 1979. Those applications were periodically evaluated after 1971. The "Eleven-Year Condition History," published as a result of those evaluations, states:

RECOMMENDATIONS AND CONCLUSIONS

Asphalt/rubber has worked successfully in Phoenix....

Asphalt/rubber has virtually stopped maintenance costs, whereas the conventional chip seal only has reduced them. Thus a real value of the asphalt/rubber application with older roads is that it can eliminate maintenance costs...

Asphalt/rubber improves with time, whereas the conventional chip seal coats deteriorate. This has been proven several times where the asphalt/rubber molds itself to the pavement subgrade conditions. Potholes and cracks do not ravel or break, and when movement occurs in the pavement, the asphalt/rubber moves with it, without cracking....

The use of asphalt/rubber... will be continued because of its sound engineering properties, economic advantages and success as a surface for our streets, highways and airports.

In the final analysis, therefore, highway and bridge projects utilizing asphalt/rubber cost less, last longer, and ultimately save both the Federal and State governments large sums of money in maintenance expense.

In addition, the utilization of asphalt/rubber results in vitally important environmental benefits as follows:

#### 1. ENERGY CONSERVATION

Asphalt is manufactured directly from crude oil, so the substitution of rubber from recycled tires operates directly to conserve significant volumes of oil. Moreover, most tires in the United States are manufactured from synthetic rubber, which is also produced from crude oil. The recycling of this tire rubber in our highway surfaces thus serves to reuse the same oil employed in synthetic tire manufacture for two important purposes instead of just one.

## 2. HIGHWAY BEAUTIFICATION

Tires strewn along our highways which are piled high in junkyards near the highways are removed for reuse in highway surfacing materials.

# 3. ALLEVIATION OF SOLID WASTE DISPOSAL PROBLEMS AND COSTS

Roughly 240 million tires are discarded in the United States each year, and until now, only about 5 percent of that staggering volume is recycled. Old tires cannot be incinerated without creating serious air pollution problems, and they are among the most difficult and costly items of solid waste for landfill purposes. Consequently, the utilization of asphalt/rubber in highway construction serves to alleviate and, hopefully, eliminate all of these serious environmental problems.

Finally, of course, the supplemental grant program by provided section 147 of the bill now before the Senate is especially appropriate in the case of asphalt/rubber because, for years, taxes on new tires have contributed hundreds of millions of dollars each year to the highway trust fund. Last year, for example, the tax on tires raised \$685 million for the highway trust fund, and Secretary Drew Lewis of the Department of Transportation recent-

ly estimated that roughly \$715 million will be realized from tire taxes in fiscal year 1983. These same tires which produce these taxes are, sooner or later, discarded and they thereupon create impossible solid waste disposal problems for our highway system and cities and States throughout the Nation. Section 147 deals directly and effectively with this problem by di-recting the Secretary of Transportation to increase Federal payments to States which have the innovative foresight to utilize highway construction and rehabilitation funds derived from this legislation for projects built around significant utilization of asphalt/rubber paving materials.

Accordingly, although I am assured by members of the Senate Public Works Committee and staff members of that committee in charge of this legislation that section 147 was included in the bill by the committee principally for the purpose of authorizing the Secretary of Transportation to increase Federal payments to States that design and submit substantial proposed asphalt/rubber paving projects under this bill, I would like to clarify a few facts with Senator Randolph, the author of section 147 at

this time.

#### SECTION 147

Section 147 of the bill now before the Senate authorizes the Secretary of Transportation to increase the Federal payments by 5 percent for any projects submitted by State highway departments which provide for the use of highway and bridge surfacing, resurfacing or restoration substances produced from recycled materials. Would the author of section 147, my distinguished colleague from West Virginia, Senator RANDOLPH, state whether asphalt/rubber, produced in sub-stantial part from rubber recycled from discarded tires, is a highway and bridge surfacing, resurfacing, or restoration material within the meaning and scope of section 147, and thus, the type of "recycled material" or "asphalt additive" which, when included in a proposed State project, would make that State eligible for the increased Federal payment provided by section 147?

Mr. RANDOLPH. The answer is "yes". If section 147 is enacted, States submitting highway or bridge projects to the Secretary of Transportation which provide for significant utilization of asphalt/rubber would qualify for additional Federal assistance.

Mr. DECONCINI. I would like to be assured that section 147 will be administered by the Secretary of Transportation solely for the purpose of expending additional Federal funds to promote projects based on the utilization of genuine "recycled materials" or "asphalt additives" such as asphalt/rubber and any other similar product the Senator from West Virginia might

have in mind. In this respect, I believe it should be made clear that a State would not qualify for additional Federal assistance under section 147 by merely breaking up an existing road and utilizing part of the resulting debris as a road bed for a new or rehabilitated road. Could my colleague from West Virginia assure me that this is not the purpose of section 147, and that any such project would not qualify for additional Federal assistance under that section?

Mr. RANDOLPH. Clearly, section 147 is not intended to authorize the Secretary of Transportation to grant additional Federal assistance to any State which simply utilizes old highway materials in the manner described by the Senator from Arizona. In order to qualify for additional assistance under section 147, a State must present a project to the Secretary which involves significant utilization of a recycled material such as rubber derived from old tires, or an asphalt additive, such as an innovative mixture or compound which serves to harden asphalt or otherwise make it more durable for highway and bridge resurfacing purposes.

THE PAPAGO FREEWAY

Mr. DECONCINI. Mr. President, the committee, during its consideration of this new highway measure, focused considerable attention on the need to complete our Nation's Interstate System in a timely manner. While the bill before us increases the funds available for interstate construction, it does not, like its counterpart in the House, contain a discretionary section with additional money for uncompleted, high-cost interstate segments. Mr. Chairman, in my State of Arizona, as you well know, we still have a vital link in the interstate which is far from being completed. The I-10 Papago Feeeway, as it is called, will require virtually all of Arizona's Federal Highway apportionments to complete the project by 1990. This, of course, will place a severe burden on the State in terms of delays which will be caused other important highway projects in Arizona.

Mr. President, I would have like to have seen the committee adopt the administration's recommendations on the interstate program. However, I understand the budgetary constraints the committee has been under with all of the competing needs. The House has included a section authorizing discretionary funds for interstate construction. Mr. President, should a discretionary interstate construction program be adopted during the upcoming conference, I wonder if you would support and include language in the conference report assigning priority to the Papago Freeway.

Mr. STAFFORD. Senator you are correct that the House has approved an interstate discretionary program

and I am sure this topic will be one of considerable discussion during the conference between the two Houses. I understand the Senator from Arizona's concerns about the completion of the Papago Freeway and wish to assure him that should we end up with a discretionary program, I will support the inclusion of language in the conference report directing the Federal Highway Administration to give this important interstate project priority when allocating funds under that Section.

Mr. DECONCINI. Thank your very much, Mr. President.

Mr. RANDOLPH. Mr. President, I support the amendment offered by the capable chairman of the Committee on Environment and Public Works. Mr. STAFFORD, to add to H.R. 6211 the text of S. 3043 as reported by the Committee on Environment and Public Works. The amendment provides for a 5-year extension of the Federal-aid highway program. Funding is provided for continuation of the interstate construction program; primary, secondary, and urban roads; bridge replacement and rehabilitation; safety construction; and repair and rehabilitation of the Interstate System. Since its inception in 1956, the Federal-aid highway program as we know it today has been at the backbone of our transportation system. Under this program a substantial portion of the 42,500-mile National System of Interstate and Defense Highways has been completed. Billions of dollars in Federal and State funds have been spent to make this Nation's highways as modern and efficient as possible in moving the products of the farm, factory, and mine as well as provide mobility for the American people.

Without the authorizations contained in the amendment being offered, which is to be treated as original text for the purpose of further amendment, the Federal-aid highway program will be only authorized for fiscal year 1983 at the level of \$5.1 billion as provided in the bill passed prior to the election recess. This is substantially below the \$8.8 billion authorized for fiscal year 1982 and would be an unacceptable situation. States have developed long-range highway construction programs which require the Federal-aid program be reauthorized on a timely basis. This bill with its 5-year extension provides the assurances to the States that are needed to raise revenue to provide for the matching funds and plan highway projects on a long-term basis.

Mr. President, the Federal-Aid Highway Improvement Act of 1982 is legislation which is very important to the future of this Nation. Over the past decade the highway network of this country has begun to deteriorate. Many segments of our primary and

secondary roads are in horrendous condition, and portions of the Interstate System constructed during the early years of its authorization no longer meet serviceability levels for

which they were designed.

The amendment which we are considering today is identical to S. 3043, which was reported by the Environ-ment and Public Works Committee on December 8. This legislation authorizes \$12.2 billion for fiscal year 1983 and nearly \$70 billion over the 5 years of the bill for completion of our Interstate System, rehabilitation and reconstruction of those deteriorated intersegments, substantial and moneys for the primary, secondary, and urban systems to return these important roads to standard. This highway bill also addresses the growing need to upgrade our Nation's bridges.

Mr. President, the committee would not be bringing this important authorization bill to the floor at this time if it were not for two factors: First, the investment in our highway system has not been maintained at a level that is conducive to safe and efficient transportation. Second, a proposal has been made to raise the Federal gasoline tax by 5 cents per gallon. This bill reflects the emphasis which should be placed on our continuing Federal-aid highway program. Rehabilitation and reconstruction are the future and must be addressed in this legislation if our highway program is to continue to support economic viability and growth. In conjunction with expected increases in the highway trust fund, this bill, while providing funds to complete the Interstate System, places a great deal of emphasis on our rehabilitation and reconstruction needs. Substantial increases in investments are made in our existing roads.

Funding is substantially increased for the primary system and for rehabilitation of the Interstate System. In this regard, one important provision of the bill requires that at least 60 percent of those funds apportioned to the States for the primary, secondary, and urban road programs be used on rehabilitation and resurfacing projects, on existing highway facilities. While not strictly tying the hands of State highway departments, this section in the bill indicates the Federal interest in maintaining the serviceability of our

highway network.

Funding levels for the interstate repair and rehabilitation category are increased dramatically over current levels. The bill provides \$1.8 billion in fiscal year 1983, and this increases to \$3.4 billion for fiscal year 1987. A similar increase takes place under the bridge rehabilitation and replacement category.

Mr. President, while this bill is basically within the framework of the existing highway program, it has one provision which I think could be of

great benefit to the Federal highway construction program of this Nation. In recent years several new products have been developed for use in highway construction which could have great benefit. Under section 147 of the bill, States are urged, by providing a 5-percent increase in Federal share, to use innovative pavement materials in resurfacing and rehabilitation work. Many new products have been developed using recycled materials and other U.S. patented techniques to either reduce the cost of road construction or to provide greater life and durability for pavements.

Another provision adopted in committee relates to energy impacted roads. Upon a satisfactory State certification to the Secretary, the Federal share for primary and secondary routes can be increased from 75 to 85 percent if such routes have a substantial energy transportation use. This provision applies to coal and other natural resources as well as energy production equipment which must be

hauled over our roads.

Mr. President, a recent interpretation by the Federal Highway Administration on the application of the Davis-Bacon Act required that the committee amend the Federal-Aid Highway Act to make clear the application of this important statute. Under the bill as reported by the committee, workers who are engaged in the vital rebuilding of our Nation's highways and bridges off the Interstate System will be covered by Davis-Bacon Act provisions. Three-R work on the noninterstate program will no longer be excepted from coverage. We should continue to do everything in our power to insure that work is performed in the most productive and skilled manner possible. The application of Davis-Bacon will assure this result.

Many argue that if you cut wages down to the bare bones you will decrease the costs to the Government of construction such as we are consider-

ing today.

This argument is nonsense. This is not make-work bill; and one of its points is to provide jobs in the construction industry, which is devastated by unemployment. Its effect should not be to take advantage of workers who desperately need employment by offering them the minimum wage. We need to attract skilled, productive workers to these jobs and pay them a fair wage commensurate with these skills. This is exactly what Davis-Bacon accomplishes.

Moreover, paying the minimum wage can easily cost the Government in the long-run. It is clear that well trained, skilled workers will be able to complete a project much more quickly and efficiently than workers with little construction experience. There is no advantage in employing someone at

a few dollars an hour less if they take twice as long to finish the job.

Skilled, experienced workers are also much more likely to do a high-quality job. Using poorly trained workers can and will lead to quality problems. While there might be some small initial savings as a result of paying below the prevailing wage rate, these savings will be quickly wiped out if there is faulty performance of the work in the first place. And we are not dealing with the building of a family driveway in this bill. We are talking about the rebuilding of bridges and interstate highways which is difficult and complicated construction. It must be done correctly. Davis-Bacon insures that reliable contractors who pay the local wage rate will be awarded Government construction projects. For this reason I urge you to continue Davis-Bacon coverage for rebuilding of the Nation's highways and bridges.

Mr. President, possibly the most important aspect of this bill is its job-creation effects. With current unemployment well over acceptable levels, and with construction industry unemployment even higher, the creation of jobs cannot be overlooked. This bill creates 170,000 direct jobs for the construction industry and will provide an additional 150,000 indirect jobs. While these numbers are not substantial with respect to the total number of Americans who are unemployed, it is a beginning and an important step in reducing unemployment.

Mr. President, I urge expeditious action in the Senate on this legislation including the gasoline tax increase. This bill is highly important to the long-term economic well-being of this country. I urge my colleagues to give it careful and favorable consideration.

### NEW CHALLENGES IN INTERNATIONAL TRADE

Mr. PERCY. Mr. President, last month the trade ministers of Western countries met in Switzerland at the first GATT Ministerial in 9 years. This meeting to discuss mutual international trade concerns was promoted by our own Government many, many months ago as a way to move the world economy forward in a new round of trade barrier reductions.

That meeting in Switzerland did not live up to the expectations that we had for it earlier this year. The trade ministers were able to issue a communique that basically held the international trading system as we know it together. Ambassador Brock said at the close of the session that "overall, the results might earn a grade of 'C.' It could stretch to a 'C+', but only time and future action will tell."

The world recession is placing great strains on the international trading system. For the United States, the recession has now lasted a bit longer than the 1974-75 recession, making it the longest downturn since World War II. Not only is the recession severe here at home; it is also hitting our major trading partners and the underdeveloped world. That makes it different from other postwar recessions, too. In the past when our economy was down, Europe and Japan were up and they had a positive effect on our own recovery. Of course the reverse was true, too, when their economies were sluggish.

The hallmarks of this recession have put in question the very fundamentals of the international trading system as it has emerged in the past 30 years. As Ambassador Brock said in Geneva, "in these times it would have been easy to fall back—to regress from prior achievement. We did not make this mistake. There was a strong and obvious desire to move ahead. We have

done so."

Mr. President, moving ahead and not backward is essential to the economic well-being of not only the United States but also the entire Free World. The importance of retaining the basics of our trading system and building anew upon those strengths was forcefully and eloquently outlined this fall by Robert H. Malott, chairman and chief executive officer for FMC Corp.

On October 14, Mr. Malott addressed the American Graduate School of International Management in Phoenix, Ariz. His speech, entitled "New Challenges in International Trade," outlines five major problems that require immediate attention.

Lack of respect for industrial property rights;

Escalation of credit wars; Tax subsidies on export sales; Predatory manipulation of foreign exchange rates; and

Fair market access.

Some of these matters were on the table at the GATT Ministerial meeting; others await discussion in other forums. The solution to all of these is critical to the future prosperity of the United States, our major trading partners and the underdeveloped countries. I commend Bob Malott's address to my colleagues and ask unanimous consent that it be printed in the Record.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

New Challenges in International Trade (By Robert H. Malott, Chairman and Chief Executive Officer, FMC Corp.)

The economic challenges we faced as we entered the 1980's loom increasingly large. Developing countries are struggling to manage foreign debt loads, protectionist pressures are on the increase, and everywhere countries are trying to dispel their economic woes by expanding exports, limiting imports, and passing local content legislation. It is a sobering and disturbing picture.

If there's one overriding issue in world trade today, it seems to me it is the question of the relevance of the general agreement of tariffs and trade. When GATT was established in 1947, the United States was supreme in technology, management skills, and productive capacity. The other major industrialized countries were still recovering from the devastation of World War II, and what we now call the developing countries were primarily struggling for political independence. Since that time, the structure of the World economy has changed dramatically-although the U.S. remains the single largest exporter in the world we have dropped to second place in the critrical area of manufactured goods, and developed and developing countries have become stiff competitors for both our domestic and export

In most of the post-war period, GATT served us well. Through three rounds of trade negotiations, it succeeded in progressively reducing traiffs to a minimum among the industrialized trading nations. But GATT may have been a victim of its own Now that import duties have success. become almost negligible in many cases, we have moved into the more subtle and complex arena of non-tariff barriers-including export subsidies, import licensing requirements, and local content rules—to name just a few. These are the barriers which are responsible for distorting current trade rela-tionships. These are the barriers which today impede the development of economically sound trade patterns. And these are the barriers which create the increasingly vindictive political issues that interfere with normal relations between nations.

The issue we must face squarely is this: can GATT handle the realities of today? Can it handle the tough problems of nontariff barriers? Or do we need new, more comprehensive guidelines on which to base future international trade?

With this issue in mind, I'd like to address five problems in international trade that ur-

gently require solutions.

The first problem concerns the increasing lack of respect for industrial property rights in the international marketplace. In the 1950's, the United States possessed most of the world's technology and controlled the majority of its patents. But since that time, new technology has been transferred out of this country and has become common knowledge throughout the world. Much of this technology transfer has occurred through joint-venture or licensing arrangements, but recently there's been an alarming and expanding disrespect for patent agreements and an increase in surreptitious transfers.

FMC has had to combat this problem with a state-owned enterprise in Hungary that was selling in Brazil a counterfeit version of our pesticide, Furadan. Although we have a valid patent in Brazil for our product, it has taken five years of litigation to stop imports of the Hungarian product into that country.

Many developing countries do not belong to the 1883 Paris Convention on Industrial Property Rights, the convention which binds member countries to respect one another's patents. Many that do belong want to change the rules so they can obtain immediate and cost-free access to developed country technology, in the United Nations, where the Paris codes are being revised, developing country governments have been pressing for agreements which would allow them to seize patented technology and give it to their own domestic firms if multina-

tional patent owners did not exercise their patent rights within a set time period—perhaps as little as 30 months!

Should the developing countries succeed in this effort, they may well impede technology development and transfer throughout the world. For if the industrialized countries have no ability to protect their patents, they will have less incentive to spend money on R&D and, in the long run, will have less technology to transfer.

Recently, FMC has been working with Senator Danforth to amend the U.S. Trade Act of 1974 to give U.S. companies greater recourse against violators of U.S. patent rigths. Under this amendment, the President would have powers to raise tariffs, impose quotas, or even revoke most-favored nation status. We believe this change in legislation would be an important first step in preventing other countries from pirating the technology that U.S. firms have worked so long and hard to develop.

In another, more subtle invasion of property rights, a former common market commissioner by the name of Vredeling has proposed a plan to the European Parliament which would require multinational companies operating in Europe to share their long-term strategic plans with their labor unions. It would be absurd to try to operate a business effectively if all long-range strategies were laid bare to the competition.

Surprisingly, this issue is expected to come to a vote shortly in the EEC Parliament, and only the British have indicated they would veto it. Issues like this are appearing with incrasing frequency in the debates of the EEC, the deliberations of the United Nations and the economic concessions demanded by the less developed countries.

A second major problem is the recent escalation of credit wars, as industrial countries resort to subsidized financing packages to stimulate exports. Over the past decade, trade officials from major exporting countries have admittedly made some effort to curb the problem through negotiations leading to "gentlemen's agreements" on export credits.

But isn't it a bit naive to assume that countries which depend on trade for 20 to 40 percent of their gross national product can avoid domestic political pressures that support aggressive export efforts? Won't these pressures make gentlemen's agreements difficult to enforce?

Let me pose an alternative. We might consider establishing a new international export credit agency to enforce common rules on export financing, much as the IMF, supported by its enormous financial resources, oversees international monetary practices. If all major trading nations agreed to abide by the same export credit rules, export financing would no longer be the determining factor in international buy/sell decisions.

Certainly the status quo is not acceptable—the current export credit war is irrational, costly, and leads to serious misallocation of resources. It must be stopped.

The third major problem concerns tax subsidies on export sales. Like export credits, tax subsidies create enormous distortions to international trade. They are particularly insidious because they are so difficult to identify, measure and verify with accuracy.

The industrial countries are wasting an enormous amount of time, energy, and money just to stalemate each other's export subsidies. Shouldn't we devote our efforts

instead to reaching an understanding on common standards for export tax relief?

A fourth area of concern is the increasingly predatory manipulation of foreign exchange rates. In 1971, when the U.S. went off the gold standard, the world officially switched from fixed to floating exchange rates. But floating rates have turned out to be more an illusion than a reality—most nations have endeavored to manage their floats very carefully. The manipulation is not overt but is often hidden in a maze of capital or financial market controls.

Japan, in my judgment, is a prime example. The Japanese have been able to keep the value of the yen artificially low. At present, the yen is trading at the depressed level of about 265 to the dollar, when most experts agree it should be trading between 180 and 200 to the dollar if, in fact, the rate reflected market conditions. This managed float strongly encourages Japanese exports and discourages imports. Not surprisingly, Japan's trade surplus with the United States is expected to reach \$20 billion this year—or almost half America's projected trade deficit with the entire world in 1982.

One possible solution might be to broaden the scope of the International Monetary Fund to include explicit authority over exchange rate manipulation. The Fund's member countries could give the IMF the power to impose appropriate sanctions on nations which did not allow their currencies to move freely in response to underlying market forces.

The fifth and last item on my agenda, is the exceedingly tough issue of assuring fair market access. It seems that most countries in the world today hope to export their way to economic salvation. It should be obvious that they cannot all succeed as exporters if no one is willing to be an importer.

The U.S. represents the biggest import market in the world and, by and large, we've made this great asset available to our trading partners with relatively few restrictions. But we're at the point now where we can't continue giving foreign producers unfettered access to our markets unless we gain equivalent access to theirs.

The market barriers American producers face overseas come in many guises. For instance, they may be told their products don't meet local specifications or consumer tastes. Or, they may be told their products don't meet domestic safety standards even if they have passed international standards accepted by the importing country. In other cases, they may have to comply with restrictive licensing requirements or agree to manufacture a certain percentage of their product in the importing country. All of these restrictions severely limit the ability of U.S. companies to penetrate foreign markets.

Japan has been particularly effective in restricting access to its markets. Let me recount the experience of FMC and other American companies in marketing soda ash, the principal ingredient in manufacturing glass. Although U.S. producers of soda ash have had a substantial cost advantage over Japanese producers, they've been restricted for the past 10 years to only 5 percent of the Japanese market. If U.S. producers could compete head-to-head with the Japanese manufacturers, it's been estimated that they could capture up to 40 percent of the Japanese soda ash market.

In the case of soda ash, there are no problems with product quality, reliability, or distribution capability—factors which the Japanese have traditionally used to explain the failure of foreign goods to penetrate their

markets. Nor is there a problem in meeting specifications for the home market, a requirement Japan often invokes, since soda ash is a commodity chemical with universal properties. It is a clear case of import restrictions to protect Japanese producers.

We're a country that truly believes in open markets and the free entry of goods, but our trading partners must know that we are no longer willing to tolerate one-way streets. Free access to all markets of the world must be an unending objective as we seek better guidelines for international trade.

In summary:

The protection of industrial property rights

An armistice in export credit wars

The elimination of competition in tax subsidies

The control of exchange rate manipulation

And, above all, the assurance of fair access to world markets

. . . are five international trade challenges we must confront successfully during the 1980's.

I opened my remarks by questioning whether GATT is capable of effectively addressing issues as tough as these. By asking the question, I don't mean to suggest the answer is "no," but it is apparent that changes must be made, either within the structure of the GATT or as a supplement to the agreement, to address the changes that have taken place in international trade over the last 35 years.

A drift away from a free trading system could close off the longest era of prosperity the world has ever known. But free international trade faces its greatest challenge since World War II, as neither we, nor any other nation, have yet eliminated the lure of protectionist responses to increasingly severe problems.

The stakes are enormous. In my judgment, we must develop broader, more comprehensive guidelines to address the complex realities of international trade today and prepare for the challenges of tomorrow. Just as there is no shortage of challenges . . . I am confident there will be no shortage of creative solutions.

FILING THE FINAL REPORT OF THE SELECT COMMITTEE TO STUDY LAW ENFORCEMENT UNDERCOVER ACTIVITIES OF COMPONENTS OF THE DE-PARTMENT OF JUSTICE

Mr. MATHIAS. Mr. President, this being the 15th of December, it is a day which, under Senate Resolution 350, the Select Committee To Study Law Enforcement Undercover Activities of Components of the Department of Justice will file a report before the end of this session.

I ask unanimous consent that the full version of the report, including citation to confidential documents, and other sensitive materials, be filed with the Office of National Security Information, simultaneously with the filing with the Secretary of the Senate, and that this full version not be released except to members of the select committee, until further order of the Senate; and

That the chairman and vice chairman of the select committee be authorized to take all actions subsequent to December 15, 1982, which are necessary to complete the mission of the select committee, including but not limited to the following:

First, to arrange for the subsequent printing and distribution of the public version of the select committee's final report:

Second, to approve editorial corrections to the text of the final report; and

Third, to provide for the proper disposition of confidential documents furnished to the select committee by components of the Department of Justice for use in the select committee's investigation.

The PRESIDING OFFICER. Without objection, it is so ordered.

# RETIREMENT OF JOSEPH D. GIORDANO

Mr. KENNEDY. Mr. President, the end of this session of Congress marks the retirement of one of the Senate's most dedicated and conscientious aides, a man who has served us with great loyalty for the past 15 years and who has won the admiration and friendship of all of us in this Chamber, Mr. Joseph D. Giordano.

Actually, I first met Joe in the early sixties, before his Senate years, when he served on the White House staff in the Office of Transportation and Communications. He had worked there since the initial years of the Truman administration, assisting in the arrangements for Presidential travel at home and overseas. Joe's pleasant manner and his genius for detail immediately caught the eye of President Kennedy. They established a close working relationship—and an equally close friendship-that lasted throughout the Kennedy administration. My brother Jack always gave Joe great credit for the success of his meetings with foreign leaders, and Joe himself won wide praise in the White House for his skillful work and loyal service to the President.

The friendship that began between Joe and our family in those years continued strong after President Kennedy's death. Joe worked closely with Evelyn Lincoln at the National Archives in assembling the President's papers for the Kennedy Library. In 1967, Joe moved to the Senate, where he became the office manager for Senator Robert Kennedy. After Bob's death, Joe stayed on in the Senate, working in the office of the Sergeant at Arms, helping all of us here with his same unique brand of skill, good nature, and commitment.

Now, as Joe leaves the Senate, I want to wish him a long and happy retirement with his wife Josephine, and

his sons Richard and Mario. I congratulate Joe for his remarkable career in public service. As much as any person I know, Joe has lived up to the standard that President Kennedy set in his inaugural address, when he said, "Ask not what your country can do for you—ask what you can do for your country." Joe Giordano has served the Senate and his country well, and he has earned the respect and affection of all of us.

## OIL AND GAS LEASING OFF THE CALIFORNIA COAST

Mr. CRANSTON. Mr. President, yesterday, when H.R. 7356, the Interior appropriations bill, was on the floor, I explained why the Senate committee language in section 107 regarding oil and gas leasing off the California coast was so potentially devastating to that area. At that time I pointed out that the Senate language which is similar to that which was included in the Interior appropriations bill last year no longer offers protection to those environmentally sensitive areas of the northern and central California coasts. It does not protect those areas because they are not included in the upcoming lease sale No. 73 proposed by Secretary Watt.

Both my colleague from California (Mr. HAYAKAWA) and I strongly support the amendment adopted by the House of Representatives in this year's Interior appropriations bill which bans oil and gas leasing on a carefully chosen portion of the Outer Continental Shelf off the California coast.

Senator HAYAKAWA and I are not alone in our desire to protect this portion of the California coast. Local officials, fishing interests, tourist representatives, and lovers of wildlife and the outdoors in many areas outside of California are adament in their support of the House position. California citizens who would feel a direct impact are joined in their preference for the House language by others who value an orderly procedure in the development of our Outer Continental Shelf resources with proper attention paid to consistency with the State's federally approved coastal plans.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

OFFICE OF THE GOVERNOR, Salem Oreg., December 9, 1982. Re U.S. Department of Interior appropria-

tions bill support for House prohibition on the use of funds for northern and central California OCS leasing activities, section 107 of H.R. 7356.

Hon. James McClure,

U.S. Senate,

Washington, D.C.

DEAR SENATOR MCCLURE: I support the provision which was recently passed by the full U.S. House of Representatives (HR 7356, Section 107) which prohibits federal

offshore oil and gas leasing from Row N808 of the Universal Transverse Mercator Grid System northward to the Oregon border. I urge you to adopt that language in the Joint Conference Committee.

While I favor increased domestic production and development of the nation's needed energy resources, I maintain a serious concern about the pace which offshore leasing might assume. The proposed northern and central California OCS leasing area for Sale 73 is ten times the area covered by the previous OCS Lease Sale 53. I am concerned about the adverse impacts that this leasing may have on Oregon's marine fisheries and tourism industries. It should also be noted that House language in no way affects leasing within the Point Arguello field, and that the area north of Row N808 is already the subject of litigation.

During the tentative tract selection for Sale 73, the U.S. Department of Interior ignored Oregon's good faith participation in the OCS leasing process. The enormous size of the planning area and the statistical methods adopted by the DOI have discounted the legitimate concerns of this state, the commercial fishing industry and other organizations. It was DOI's failure to properly recognize these concerns which required the State of Oregon to challenge this leasing program. Oregon's case will be heard this month before the United States Court of Appeals for the District of Columbia Circuit. The House language is a service to the federal taxpayer because it will prevent the expenditure of funds by the DOI to implement an OCS program which is certain to be overturned by the Circuit Court.

Sincerely, Victor Atiyeh,

Governor.

CALIFORNIA GILLNETTERS ASSOCIATION, San Pedro, Calif., December 9, 1982. Hon. S. I. Hayakawa, Dirksen Senate Office Building, Washinoton. D.C.

Dear Senator Hayakawa: The California Gillnetters Association represents commercial fishermen operating offshore the central and southern California coast. On behalf of our members, we respectfully request your support for the language passed in the House version of the Interior appropriations bill that prohibits Interior from conducting any new lease sales offshore California north of Pismo Beach.

Based on information we have received today from Washington, Senator McClure of Idaho has re-written the Interior appropriations bill without benefit of either subcommittee or full committee mark-up. The revisions made by the Senator from Idaho to the House language pertaining to off-shore California will effectively open up the entire California coastline for drilling should it be adopted. The risks posed to California's fishing industry from oil drilling north of Pismo Beach at this time are simply too great and should be opposed.

We urge your opposition to Senator McClure's revisions and any other effort to modify the House language to permit lease sales north of Pismo Beach. Thank you.

Sincerely,

TONY WEST, Vice President, CGA. Senator Mark O. Hatfield, Chairman, Senate Appropriations Committee, U.S. Capitol,

Representative SIDNEY R. YATES,

Chairman, House Interior Appropriation Subcommittee, U.S. Capitol.

We the undersigned State and private participants in the U.S. Department of the Interior OCS Policy Committee wish to convey to the Congress our support of the OCS leasing restrictions specified in the House version of the Interior appropriations bill. We urge the Senate to concur with the House version. The House version would provide time for the resolution of procedural and policy issues including presale Federal consistency reviews as envisioned by the drafters of the CZMA, to be concluded free from undue pressure of additional OCS

We support the need for the comprehensive OCS leasing program, as defined in the 1978 OCS Lands Acts Amendments, which provides a proper balance of risks and benefits among the various regions. We are also prepared to work cooperatively with the DOI and the industry to develop such a program

We urge the Congress to support us in this effort by adopting an appropriations bill which contains the House passed language regarding central and northern California and Mid-Atlantic offshore lease sales.

Bill Van Dyke, Alabama; Gary D. Midkoff, California; Joseph Belanger,
Connecticut; Morice O. Rinkel, Florida; Charles Colgan, Maine; Katrina
Van Dusen, Massachusetts; Mark Chittum, New Hampshire; David Kensey,
New Jersey; Greg Sovas, New York;
Bob Bailey, Oregon; Arthur Socolow,
Pennsylvania; Patricia L. Jerman,
South Carolina; Joseph R. Williams,
Washington.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

### EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGE FROM THE HOUSE

At 2:14 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7072) making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending Sep-

tember 30, 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 19, 34, 45, 55, 60, and 67 to the bill, and agrees thereto; and it agrees to the amendments of the Senate numbered 14, 37, and 70 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. Yates, Mr. Murtha, Mr. DICKS, Mr. AUCOIN, Mr. RATCHFORD, WHITTEN, Mr. McDade, Mr. REGULA, Mr. LOEFFLER, and Mr. CONTE as managers of the conference on the part of the House.

The message further announced that the House agrees to the amendments of the Senate numbered 2 and 3 to the amendment of the House to the bill (S. 625) to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes, and that the House agrees to the amendment of the Senate to the amendment of the House numbered 1. with an emendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills, each with an amendment, in which it requests the concurrence of the Senate:

S. 1501. An act entitled the "Educational

Mining Act of 1982"; and S. 1661. An act to authorize the Secretary of the Interior to acquire certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa, and for other purposes.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 7154. An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes.

## HOUSE BILLS REFERRED

The following bills, received from the House of Representatives were read twice by unanimous consent, and referred as follows:

H.R. 5906. An act to amend title III of the Outer Continental Shelf Lands Act Amendments of 1978 to clarify provisions relating to claims, financial responsibility, and civil penalties, to the Committee on Environment and Public Works.

H.R. 6120. An act to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984; to the Committee on Energy and Natural Resources.

H.R. 7154. An act to amend the Federal rules of civil procedure with respect to cer-

tain service of process by mail, and for other purposes; to the Committee on the Judici-

## ENROLLED BILLS PRESENTED

The Secretary reported that on today, December 15, 1382, he had presented to the President of the United States the following enrolled bills:

S. 1444. An act to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes:

S. 1681. An act to designate the southern Nevada water project the "Robert B. Griffith Project":

S. 1894. An act to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes:

S. 2034. An act to designate the lock and dam known as the Jones Bluff Lock and Dam, located on the Alabama River, as the "Robert F. Henry Lock and Dam" and

S. 2710. An act to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Indiana.

#### REPORTS OF COMMITTEES

The following reports of committees were submitted:

> By Mr. PERCY, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

S. Con. Res. 46. Concurrent resolution expressing the sense of the Congress with regard to the mutual security efforts of the United States and Japan.

By Mr. HUDDLESTON:

Final report of the Select Committee to Study Undercover Activities of Components of the Department of Justice (Rept. No. 97-682).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, and the Committee on Rules and Administration, without amendment:

S. Res. 503. Resolution to establish the

U.S. Senate Productivity Award.
By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

By Mr. COHEN, from the Select Committee on Indian Affairs, with amendments:

S. 2998. A bill to declare that the United States holds certain lands in trust for the Las Vegas Paiute Tribe (Rept. No. 97-683).

By Mr. COHEN, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

H.R. 4496. An act to grant Federal recognition to the Texas Band of Kickapoo Indians; to classify the status of the members of the band; to provide trust lands to the band; and for other purposes (Rept. No. 97-684).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Richard Fairbanks, of the District of Co-lumbia, for the rank of Ambassador while serving as Special Adviser to the Secretary

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Richard Fairbanks.

Post: Ambassador.

Contributions, amount, date, and donee: 1. Self: \$490, 1981, Republican National Committee; \$250, 1980, George Bush.

2. Spouse: None.

3. Children and spouses names: None.

Parents names: Richard M. Fairbanks: \$10,000, 1981, Republican National Committee; \$50, 1981, BIPAC; \$100, 1981, Jesse Helms' Congressional Committee; \$1,000, 1981, Senator Richard Lugar; \$1,000, 1981, Republican Senate Inner Circle; \$500, 1981, Senate/House Dinner (George Bush, speaker); \$200, 1981, Senator Barry Goldwater; \$100, 1981, Black Silent Majority; \$50, 1981, Republican National Committee; \$200, 1981, Senator John Heinz; \$50, 1981, NCPAC; \$50, 1981, Sam Carnen for Congress; \$25, 1981, Jeffrey Bell; \$50, 1981, GOPAC; \$50, 1981, NCPAC; \$50, 1981, Congressman Ron Paul; \$30, 1981, GOP Victory Fund, Indiana; \$100, 1981, Andy Jacobs; \$100, 1981, Congressman John Myers; \$100, 1982, Friends of Richard Lugar; \$200, 1982, Steve Goldsmith Committee; \$800, 1982, Senator Richard Lugar; \$500, 1982, Indiana Republican State Committee; \$200, 1982, People for John Heinz; \$100, 1982, Mike Carroll for Congress Committee; \$50, 1982, GOPAC; \$50, 1982, National Republican Senatorial Comm.; \$50, 1982, Committee to Elect Allison Fahrer; \$50, 1982, Ed Davidson Campaign Fund; \$50, 1982, Van Napta for Congress; \$50, 1982, Congressman Dan Crane; \$45, 1982, Republican National Committee; \$50, 1982, Tom Evans '82; \$200, 1982, Steve Goldsmith Committee; \$100, 1982, Friends of Orin Hatch; \$50, 1982, Comm. to Elect Frank McNamara; \$100, 1982, Indiana Republican State Committee; \$50, 1982, Ray Shamie for Senate; \$50, 1982, Republican National Committee; and \$50, 1982, Friends of Orin Hatch.

5. Grandparents names: None.

6. Brothers and spouses names: Anthony Fairbanks, \$200, May 1980, George Bush.

7. Sisters and spouses names: None. By Mr. PERCY, from the Committee on Foreign Relations:

Paul D. Wolfowitz, of the District of Columbia, to be an Assistant Secretary of State.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' committee to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

George W. Douglas, of Texas, to be a Federal Trade Commissioner for the term of 7 years from September 26, 1982;

Diane Kay Morales, of Texas, to be a Member of the Civil Aeronautics Board for the term of 6 years expiring December 31,

(The above nominations were reported from the Committee on Commerce, Science, and Transportation with the Recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STEVENS:

S. 3103. A bill to amend section 1304(e) of title 5, United States Code; considered and passed.

By Mr. PERCY (for himself and Mr. DIXON)

S. 3104. A bill entitled "Imported Liquefied Natural Gas Policy Act of 1982"; to the Committee on Energy and Natural Re-

By Mr. ROBERT C. BYRD (for him-

self and Mr. RANDOLPH): S. 3105. A bill to modify the judicial districts of West Virginia, and for other pur-

poses; considered and passed.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

> By Mr. GRASSLEY (for himself, Mr. HUDDLESTON. DOLE. Mr. D'AMATO, Mr. CHILES, Mr. JEPSEN and Mr. DIXON):

S. Res. 516. Resolution expressing the sense of the Senate on urging Presidential action pursuant to section 103 of the Revenue Act of 1971, 26 U.S.C., section 48(a)(7)(D) to disqualify certain Japanesemanufactured, numerically controlled machine tools from the United States investment tax credit; to the Committee on Fi-

By Mr. STEVENS (for Mr. MATHIAS): S. Res. 517. Resolution relating to funding of the Select Committee To Study Law Enforcement Undercover Activities of Components of the Department of Justice: considered and agreed to.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY (for himself and Mr. Dixon):

S. 3104. A bill entitled the "Imported Liquefied Natural Gas Policy Act of 1982"; to the Committee on Energy and Natural Resources.

IMPORTED LIQUEFIED NATURAL GAS POLICY ACT OF 1982

• Mr. PERCY. Mr. President, I rise today on behalf of myself and my able colleague, Senator Alan Dixon, to raise an issue of paramount concern to our Illinois constituents, and to citizens in many of our neighboring States. I have long been a supporter of a free marketplace in energy. Sometimes, this means higher prices. But other times, it means lower prices. That is particularly true here. Rather than have our consumers pay artifically high prices for natural gas, it is time to let market conditions work to their advantage.

As we all know, we are faced with a sluggish economy, and sluggish demand for natural gas. Low-priced domestic gas supplies are not being sold. At the same time, consumers are paying immense prices for new, expensive supplies of natural gas, sometimes from exotic sources. Why? Because Government regulations have discouraged cost-cutting efficiencies, and enabled pipelines and others to simply pass extra costs on to consumers.

In normal economic times, would be foolish enough. But in a time of recession and high unemployment, it is an outrage. And when these unreasonably high energy prices are targeted upon exactly those parts of the United States-like central Illinois and southern Michigan-that are the hardest hit economically, it is a disaster. What do we say to an unemployed factory worker in Decatur or Peoria who sees his natural gas bill rise by 60 percent in less than 1 year? What we say is that we are not going to stand for it.

That is why Senator Dixon and I are introducing the Imported Liquefied Natural Gas Policy Act of 1982. This bill would curb what I consider to be one of the most bizarre elements of our over-regulated energy marketplace. At a time when low-cost American gas goes wanting, American consumers may have to pay truly extraordinery sums for super-high-cost im-

ported liquefied gas.

In the late 1970's, as ever-rising prices for imported energy began pummeling our economy and draining our Nation's wealth, we reached a consensus that it was often worthwhile to pay a premium for domestic fuel if it could help cut back on our imports. But in natural gas, we have turned this argument on its head. We may have to pay a premium for imported fuel and cut back on our domestic production.

It is as though we were asking-no, not asking, forcing-Americans to purchase foreign cars which are no better than American cars, but which cost three times as much. This just doesn't make any sense, from any standpoint.

Let us look at the dollars and cents of the liquefied natural gas (LNG) issue. LNG consumers will have to pay about \$7 per MCF after regasification, and that does not even include the pipeline transmission and local distribution costs. Illinois ratepayers and other consumers could have to pay as much as \$9 per MCF. The most common replacement fuel for gas, No. 6 fuel oil, sells for roughly \$4.50 for the same energy content, according to recent Government figures.

Anything more than this is an unfair price of LNG. Even this price is higher than the \$2 or \$3 per MCF gas now available from many American wells. But it does offer a sensible middle ground, a benchmark around which serious negotiations can begin between buyers and sellers of LNG in the world market

For LNG sales to continue, it may be that imports should be discounted. For year after year, U.S. buyers have had to pay price premiums or escalators for LNG. We have even seen supplies cut off to American purchasers who refused to pay premiums not called for in the original contracts. It is time to put the shoe on the other foot. Now that markets are soft, prices are declining, and domestic supplies are abundant, it is time to negotiate prices of imported energy downward.

The need for renegotiation extends not just to LNG. Continental sources of imported natural gas are also priced way above available domestic gas. It is time for these prices to move down, too. Some of the parties involved in these contracts have raised the need for lowering these prices, but we would like to see some results soon. Our trading partners have to realize that we will not stand idly by if Illinois consumers have to pay more than fair market value for any gas imports. The bill Senator Dixon and I are introducing today does not address continental gas, but we are looking into the matter.

The Imported Liquefied Natural Gas Policy Act of 1982 would limit the maximum lawful price on regasified LNG to the price of its most common replacement fuel, No. 6 fuel oil. Presently, the FERC and the Secretary of Energy have authority to allow only a reasonable rate for LNG-a rate that should reflect prevailing market conditions, not just the proposed cost of bringing LNG to market. The Percy-Dixon bill would strengthen their hand. Any price higher than the 90day average price for No. 6 fuel oilover the most recent period for which data are available-would, by statute, not be reasonable.

In fact, the FERC and the Secretary of Energy may find that the reasonable price for LNG is even less than the price of No. 6 fuel oil. If so, we would support their decision to allow only a lower price to be charged for LNG. What we are looking for, and what our constituents should pay, is nothing more and nothing less than a fair-market-value price for this gas. We have simply identified No. 6 fuel oil as an upper limit for what is a fairmarket value.

We encourage LNG buyers and sellers to use the time before this bill is passed to renegotiate prices to freemarket levels. After enactment of the Percy-Dixon bill, LNG could be sold at above free-market levels only if alternative domestic supplies to the market served are not available at or below the proposed price, only if the source of supply is reasonably secure, and only if the import agreement includes a provision for reducing quantities or prices if market circumstances change. If any part of the United States does not have lower-priced domestic gas available to replace LNG imports, it can continue to receive higher-priced LNG under our bill

I want to make clear to my colleagues that this bill is an effort to move toward, not away from, a free energy marketplace. Senator Dixon and I are simply trying to correct the consequences of costly, uneconomic decisions resulting from an overregulated marketplace for natural gas. In a free market, no one would have ever imported this LNG in the first place—and if anyone had, no one downstream would have bought it.

I also want to make clear that I continue to support efforts to develop new energy supply technologies, including supplemental gas resources, as long as those projects make economic sense or public support for other reasons. We have a long way to go before we solve our long-term energy supply problems, and we cannot turn our backs on promising technologies with high capital costs. But we must go into these projects selectively, with our eyes open. If, for whatever reason, we consider it in the public interest to press on with a risky or uneconomic project, we should not expect a relatively small number of ratepayers to bail it out if it runs into trouble.

I further want to make clear that I am a strong supporter of free trade and the inviolability, except in extreme circumstances, of contracts made between trading partners. From the beginning, all persons involved in the LNG trade knew or should have known that U.S. administrative agencies—and the Congress—will only allow interstate LNG shipments to take place if prices are fair and make reasonable economic sense. The history of the LNG trade-including the history of negotiations surrounding the imports heading into Illinoisshow unmistakably that price has always been open to dicussion. Up to now, prices have always been pushed upward, never downward. All that the Percy-Dixon bill does is make sure that prices can be renegotiated downward as well as upward.

In the context of the Senate's consideration of other natural gas issues, Senator Dixon and I urge our colleagues to give careful review to this matter.

## ADDITIONAL COSPONSORS

S. 1939

At the request of Mr. GOLDWATER, the name of the Senator from Florida (Mrs. Hawkins) was added as a cosponsor of S. 1939, a bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases.

5 2585

At the request of Mr. Cranston, the names of the Senator from Virginia (Mr. Warner), the Senator from Missouri (Mr. Eagleton), the Senator from Arkansas (Mr. Pryor), and the Senator from Alabama (Mr. Denton) were added as cosponsors of S. 2585, a bill to provide that the Armed Forces shall pay benefits to surviving spouses and dependent children of certain members of the Armed Forces who die from service-connected disabilities in the amounts that would have been provided under the Social Security Act for amendments made by the Omnibus Budget Reconciliation Act of 1981.

S. 2707

At the request of Mr. Percy, the name of the Senator from Michigan (Mr. Riegle) was added as a cosponsor of S. 2707, a bill to amend section 474 of the Internal Revenue Code of 1954 to provide that small businesses with average annual gross receipts not in excess of \$10,000,000 may elect to use one inventory pool.

S. 3017

At the request of Mr. Percy, the name of the Senator from Pennsylvania (Mr. Heinz) was added as a cosponsor of S. 3017, a bill to provide for the temporary duty-free treatment of certain needlecraft display models, and for other purposes.

S. 3042

At the request of Mr. Exon, the name of the Senator from Kansas (Mrs. Kassebaum) was added as a cosponsor of S. 3042, a bill to establish the annual rate of pay for Members of Congress at the rate of pay paid for Members on September 30, 1982, and for other purposes.

S. 3065

At the request of Mr. Pryor, the names of the Senator from Arkansas (Mr. Bumpers), and the Senator from North Dakota (Mr. Andrews) were added as cosponsors of S. 3065, a bill to establish in the Department of State the position of Under Secretary of State for Agricultural Affairs.

S. 3074

At the request of Mr. Huddleston, the name of the Senator from Arkansas (Mr. Pryor) was added as a cosponsor of S. 3074, a bill entitled the "Agricultural Act of 1982."

SENATE JOINT RESOLUTION 263

At the request of Mr. Thurmond, the name of the Senator from Massachusetts (Mr. Tsongas) was added as a cosponsor of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. Denton, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor for Senate Joint Resolution 265, a joint

resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 46

At the request of Mr. Percy, his name, and the names of the Senator from California (Mr. Hayakawa), and the Senator from Ohio (Mr. Glenn) were added as cosponsors of Senate Concurrent Resolution 46, a concurrent resolution expressing the sense of the Congress with regard to the mutual security efforts of the United States and Japan.

AMENDMENT NO. 3632

At the request of Mr. Cranston, the name of the Senator from Massachusetts (Mr. Kennedy) was added as a cosponsor of amendment No. 3632 intended to be proposed to H.R. 5203, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act.

AMENDMENT NO. 5006

At the request of Mr. Sarbanes, the name of the Senator from New York (Mr. Moynihan) was added as a cosponsor of amendment No. 5006 intended to be proposed to H.R. 6211, a bill to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

SENATE RESOLUTON 516—RESO-LUTION RELATING TO JAPA-NESE-MANUFACTURED NU-MERICALLY CONTROLLED MA-CHINE TOOLS

Mr. GRASSLEY (for himself, Mr. Dole, Mr. Huddleston, Mr. D'Amato, Mr. Chiles, Mr. Jepsen, and Mr. Dixon) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 516

Whereas the Government of Japan has selected the United States high-technology industry in numerically controlled machine tools for domination through unfair trade practices; and

Whereas the Petition to the President submitted by Houdaille Industries, Inc., on May 3, 1982, thoroughly documents continuing anticompetitive cartel policies and practices, including the financing of a machine-tool cartel with multi-billion dollar off-budget subsidies earned from bicycle- and motorcyle-race wagering, employed by the Government of Japan to further its industry-targeting goals; and

Whereas as a consequence of the discriminatory acts and policies of the Government of Japan, including its tolerance of an international machine-tool cartel, the Government of Japan has unjustifiably restricted United States commerce in numerically-controlled machining centers and punching machines. Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States should exercise immediately his authority under Section 103 of the Revenue Act of 1971, 26 U.S.C. §48(a)(7)(D), to issue an Executive Order disqualifying Japanese-manufactured, numerically-controlled machining centers and punching machines from the United States investment tax credit until the Government of Japan provides persuasive evidence to the President of the United States that these and other unfair and discriminatory acts and policies unjustifiably restricting United States commerce have ceased.

• Mr. GRASSLY. Mr. President, on May 3, 1982, Houdaille Industries, Inc., filed a petition to the President asking that he act under section 103 of the Revenue Act of 1971 to deny the investment tax credit to Japanese-made, numerically controlled, machining centers and punching machines.

The Houdaille petition and subsequent submissions by Houdaille, including original Japanese laws and other Japanese Government papers, document the creation of a cartel among Japanese machine-tool manufacturers by the Japanese Government as well as its continuing support of this cartel. The Japanese Government provides a wide variety of concessionary, low-interest loans, tax abatement devices, and direct subsidies, both on-budget and off-budget, including nearly \$1 billion a year from bicycle- and motorcycle-race wagering. Japan also fails to enforce its own antimonopoly law against the cartel. These actions, taken together, constitute the "discriminatory or other acts (including tolerance of international cartels) or policies unjustifiably re-stricting United States commerce" set forth in seciton 103 as the criterion for Presidential action.

As a result of these unfair practices and because the U.S. machine-tool companies are forced to compete with the Japanese Government rather than with private enterprises, the Japanese share of the United States numerically controlled machining center market rose from 3.7 percent in 1976 to nearly 60 percent today. Japan's share of the numerically controlled punching machine market rose from 4.7 percent in 1976 to 46 percent today. In both cases the Japanese market share is continuing to rise dramatically. During the same period the market shares of other foreign producers changed very little.

If this accelerating Japanese penetration by unfair means of vital U.S. markets is not checked, the Japanese will completely control these high-technology markets and industries within a few years. This will bankrupt U.S. machine-tool companies and throw their skilled employees out of work. Ironically, the investment tax credit was restored in 1971 as a "job development credit" to increase employment in the United States, not the export of United States jobs to Japan.

A Japanese takeover in our hightechnology machine-tool industry will put our defense preparedness and, indeed, our entire industrial economy in Japanese hands because these numerically controlled machine-tools are essential to weapons production and the manufacture of nearly all other industrial machines.

On July 27, 1982, I wrote to the President bringing the Houdaille petition to his attention and urging him to give serious consideration to the use of section 48(a)(7)(D) of the Internal Revenue Code as an effective option to protect our producers and insure our future competitiveness. On an earlier occasion in 1980, I joined with a number of Senators still here, includ-Senators Kassebaum, TOWER, BENTSEN, METZENBAUM, and GLENN, in bringing to the President's attention his authority under section 48(a)(7)(D) "to deny eligibility for investment tax credit to articles manufactured or produced in a country which is unjustifiably restricting United States commerce." The urgent need for such action in response to Japan is clear

My resolution expresses the sense of the Senate that the President immediately exercise his authority to disqualify Japanese-made, numerically controlled, machining centers and punching machines from the investment tax credit. This remedy is appropriate because it will penalize the unfair practices without closing the U.S. market to Japanese machine tools. It will send a clear signal to the Japanese that our patience in tolerating unfair trade practices is not limitless. It will give Japan a chance to take self-corrective action to relieve itself of the sanction. Although the action urged upon the President is deliberately confined to a narrow set of two products, Japan will not fail to perceive that if it persists in broader discrimination restricting U.S. commerce, the President has ample authority to broaden the application of this

Previous resolutions, such as Senate Resolution 462, urging the Japanese to take voluntary action to restore fair and free competition have not produced a satisfactory response. This petition gives the President an opportunity to shift from talk to action by taking one precise, firm step with real teeth to express our Nation's deep concern that free and open competition in international trade must be a two-way street. There is no reason why U.S. taxpayers should be obliged to continue adding their tax dollars to the extraordinarily generous subsidies already provided to its industry by the Government of Japan, especially, when the result is the export of American jobs to Japan.

# AMENDMENTS SUBMITTED FOR PRINTING

## SURFACE TRANSPORTATION ACT OF 1982

AMENDMENTS NOS. 5013 AND 5014

(Ordered to be printed and to lie on the table.)

Mr. RIEGLE (for himself and Mr. Bradley) submitted two amendments intended to be proposed by them to the amendment No. 4998 proposed by Mr. Baker to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

AMENDMENTS NOS. 5015 THROUGH 5017

(Ordered to be printed and to lie on the table.)

Mr. DOMENICI submitted three amendments intended to be proposed by him to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5018

(Ordered to be printed and to lie on the table.)

Mr. DURENBERGER submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211 supra.

#### AMENDMENT NO. 5019

(Ordered to be printed and to lie on the table.)

Mr. HEFLIN (for himself, Mr. Ranpolph, and Mr. Riegle) submitted an amendment intended to be proposed by them to the bill H.R. 6211 supra.

## AMENDMENT NO. 5020

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211 supra.

## AMENDMENT NO. 5021

(Ordered to be printed and to lie on the table.)

Mr. SASSER submitted an amendment intended to be proposed by him to the bill H.R. 6211 supra.

AMENDMENTS NOS. 5022 THROUGH 5025

(Ordered to be printed and to lie on the table.)

Mr. DIXON (for himself and Mr. Percy) submitted four amendments intended to be proposed by them to the bill H.R. 6211 supra.

AMENDMENTS NOS. 5026 THROUGH 5029

(Ordered to be printed and to lie on the table.)

Mr. DIXON (for himself, Mr. Percy, Mr. Kennedy, Mr. Moynihan, Mr. Dodd, and Mr. DeConcini) submitted an amendment intended to be proposed by them to the bill H.R. 6211 supra.

AMENDMENTS NOS. 5030 THROUGH 5033

(Ordered to be printed and to lie on the table.)

Mr. PRYOR submitted four amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5034 THROUGH 5040 (Ordered to be printed and to lie on

the table.)

Mr. HUMPHREY submitted seven amendments intended to be proposed by him to amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5041 AND 5042

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NOS. 5043 AND 5044

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS submitted two amendments intended to be proposed by him to amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5045

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself, Mr. Symms, Mr. Randolph, and Mr. Bentsen submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5046 THROUGH 5049

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself and Mr. Randolph) submitted four amendments intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5050 AND 5051

(Ordered to be printed and to lie on the table.)

Mr. LEVIN (for himself, Mr. Specter, Mr. Robert C. Byrd, Mr. Dixon, Mr. Riegle, Mr. Kennedy, Mr. Moynihan, Mr. Cannon, Mr. Heinz, Mr. Proxmire, Mr. Packwood, and Mr. Bradley) submitted two amendments intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5052 AND 5053

(Ordered to be printed and to lie on the table.)

Mr. LEVIN submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5054

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for himself, Mr. Heinz, Mr. Durenberger, Mr. Bradley, Mr. Cohen, Mr. Moynihan, Mr. Riegle, Mr. Specter, Mr. Tsongas, Mr. Mitchell, Mr. Roth, Mr. Grassley, Mr. Packwood, Mr. Heflin, Mr. Percy, and Mr. Eagleton) submitted an amendment intended to be proposed by them to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5055

(Ordered to be printed and to lie on the table.)

Mr. RIEGLE submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, subra.

AMENDMENT NO. 5056

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5057 AND 5058

(Ordered to be printed and to lie on the table.)

Mr. SPECTER submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5059

(Ordered to be printed and to lie on the table.)

Mr. DURENBERGER submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5060 AND 5061

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted two amendments intended to be proposed by him to the amendment No. 4998 submitted by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5062

(Ordered to be printed and to lie on the table.)

Mr. WALLOP submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5063 THROUGH 5076 (Ordered to be printed and to lie on

the table.)

Mr. MOYNIHAN submitted 14 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5077 THROUGH 5122 (Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 46 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5123 THROUGH 5146

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted 24 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5147 THROUGH 5170 (Ordered to be printed and to lie on

(Ordered to be printed and to lie of the table.)

Mr. NICKLES submitted 24 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5171 THROUGH 5173

(Ordered to be printed and to lie on the table.)

Mr. BOREN submitted 3 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5174

(Ordered to be printed and to lie on the table.)

Mr. BOREN submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5175

(Ordered to be printed and to lie on the table.)

Mr. NICKELS submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5176

(Ordered to be printed and to lie on the table.)

Mr. MITCHELL submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NO. 5177

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5178

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5179

(Ordered to be printed and to lie on the table.)

Mr. SYMMS submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5180

(Ordered to be printed and to lie on the table.)

Mr. ROBERT C. BYRD submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5181

(Ordered to be printed and to lie on the table.)

Mr. NICKLES submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5182

(Ordered to be printed and to lie on the table.)

amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5183

(Ordered to be printed and to lie on the table.)

Mr. PRYOR submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5184 THROUGH 5187

(Ordered to be printed and to lie on the table.)

TSONGAS submitted four Mr. amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5188 AND 5189 (Ordered to be printed and to lie on

the table.)

Mr. SYMMS submitted two amendments intended to be proposed by him to the amendment No. 4988 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5190 THROUGH 5195

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS submitted amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. BAKER to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5196

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS submitted amendment intended to be proposed by him to the bill H.R. 6211, supra.

## AMENDMENT NO. 5197

(Ordered to be printed and to lie on the table.)

Mr. PRYOR submitted an amendment intended to be proposed by him to the amendment No. 4988 proposed by Mr. Baker to the bill H.R. 6211, supra.

## AMENDMENT NO. 5198

(Ordered to be printed and to lie on the table.)

Mr. HAYAKAWA submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

## AMENDMENT NO. 5199

(Ordered to be printed and to lie on the table.)

Mr. QUAYLE submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5200 THROUGH 5209

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted 10 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

## AMENDMENTS NOS. 5210 AND 5211

(Ordered to be printed and to lie on the table.)

Mr. DODD submitted two amendments intended to be proposed by him to the amendment No. 4998 proposed

CRANSTON submitted an by Mr. Baker to the bill H.R. 6211,

AMENDMENTS NOS. 5212 THROUGH 5217 (Ordered to be printed and to lie on the table.)

Mr. SPECTER submitted six amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5218 THROUGH 5356 (Ordered to be printed and to lie on

the table.)

Mr. METZENBAUM submitted 139 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. BAKER to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5357

(Ordered to be printed and to lie on

the table.)

Mr. HUDDLESTON (for himself and Mr. Boschwitz) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5358 THROUGH 5372 (Ordered to be printed and to lie on

the table.)

Mr. HUMPHREY submitted amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5373 AND 5374

(Ordered to be printed and to lie on the table.)

Mr. PERCY (for himself and Mr. DIXON) submitted two amendments intended to be proposed by them to the bill H.R. 6211, supra.

## AMENDMENTS NOS. 5375 AND 5376

(Ordered to be printed and to lie on the table.)

Mr. PERCY submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

## AMENDMENT NO. 5377

(Ordered to be printed and to lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENTS NOS. 5378 AND 5379

(Ordered to be printed and to lie on the table.)

Mr. MURKOWSKI submitted two amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. BAKER to the bill H.R. 6211, supra.

## AMENDMENT NO. 5380

(Ordered to be printed and to lie on the table.)

Mr. FORD submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

## AMENDMENT NO. 5381

(Ordered to be printed and to lie on the table.)

Mr. FORD (for himself, Mr. Dixon, and Mr. Heinz) submitted an amendment intended to be proposed by them to the bill H.R. 6211, supra.

## AMENDMENT NO. 5382

(Ordered to be printed and to lie on the table.)

Mr. FORD (for himself, Mr. DIXON, and Mr. Heinz) submitted an amendment intended to be proposed by them to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211. supra.

## AMENDMENTS NOS. 5383 THROUGH 5398

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted 16 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

#### AMENDMENT NO. 5399

(Ordered to be printed and to lie on the table.)

Mr. DECONCINI submitted amendment intended to be proposed by him to the bill H.R. 6211, supra.

## SINGLE FAMILY HOUSING PRODUCTION

• Mr. DECONCINI. Mr. President. Today I am introducing an amendment to the Federal Aid to Highway Improvement Act of 1982, H.R. 6211 which will encourage and support single-family housing production in this country, while at the same time creating jobs in the private sector. My amendment would result in mortgage assistance to more the 140,000 potential homebuyers nationwide at a cost of \$2 billion. This is at a substantially less cost to the Government than similar programs passed by this Congress earlier this year. Passage of my amendment will achieve two desirable goals: First, it will make the American dream of homeownership a reality for tens of thousands of Americans who might otherwise be unable to purchase a home; and second, it will provide new jobs to an industry suffering from high unemployment without simply creating make-work jobs.

Specifically, my amendment would assist homebuyers whose income is below 130 percent of the area median income, and would be graduated into those below 115 percent of the area median income and those with incomes between 116 percent and 130 percent of the area median income. For families with incomes less than 115 percent of the area median income, mortgage assistance would be available to reduce the interest rate by up to 6 percentage points below the market rate for a period of 7 years, but in no case would the interest rate be subsidized below 81/2 percent. Those families with incomes between 116 percent and 130 percent could receive the same assistance for a period of 5 years at a rate as low as 4 percentage points below the market rate, but in no case would the interest rate be subsidized below 9 percent. Furthermore, qualifying families would be required to make a downpayment of at least 3 percent and contribute at least 25 percent of their monthly income toward the mortgage payment. The maximum mortgage amount that would qualify

under my amendment could not exceed the maximum that may be insured under FHA 203(b) programs. This figure ranges from \$67,500 to \$90,000 in some very high cost areas.

Let me give you an example of who it is we are trying to help with this amendment. The typical qualified recipient of this mortgage assistance would be a first time homebuyer with a family income of less than \$23,000 purchasing a home for \$67,500. As anyone who has priced homes recently will recognize, we are not talking about "dream homes" or high-priced condominiums. In the Washington, D.C., area, the highest qualifying mortgage would be \$74,900. That will not buy a lot for a family of four. But it would be a beginning and that is what my amendment attempts to be.

AMENDMENT NOS. 5400 AND 4401

(Ordered to be printed and to lie on the table.)

Mr. PERCY submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5402

(Ordered to be printed and to lie on the table.)

Mr. WALLOP submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5403

(Ordered to be printed and to lie on the table.)

Mr. McCLURE submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211,

AMENDMENT NOS. 5404 THROUGH 5589

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 186 amendments intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5590

(Ordered to be printed and to lie on the table.)

Mr. HUDDLESTON submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NOS. 5591 AND 5592

(Ordered to be printed and to lie on the table.)

Mr. MATSUNAGA submitted two amendments intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5593

(Ordered to be printed and to lie on the table.)

Mr. BRADLEY submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5594

(Ordered to be printed and to lie on the table.)

Mr. D'AMATO submitted an amendment intended to be proposed by him

to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5595

(Ordered to be printed and to lie on the table.)

Mr. GARN submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211 supra.

AMENDMENT NO. 5596

(Ordered to be printed and to lie on the table.)

Mr. BRADLEY submitted an amendment intended to be proposed by him to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211, supra.

AMENDMENT NO. 5597

(Ordered to be printed and to lie on the table.)

Mr. HEFLIN submitted an amendment intended to be proposed by him to the bill H.R. 6211, supra.

AMENDMENT NO. 5598

(Ordered to be printed.)

Mr. DOLE proposed an amendment to the amendment No. 4998 proposed by Mr. Baker to the bill H.R. 6211,

AMENDMENT NO. 5599

(Ordered to be printed.)

Mr. DOLE proposed an amendment to his amendment No. 5598 to the bill H.R. 6211, supra.

AMENDMENT NO. 5600 (Ordered to be printed.)

Mr. BOSCHWITZ (for himself, Mr. Grassley, Mr. Jepsen, Mr. Melcher, Mr. Helms, Mr. Johnston, Mr. Symms, Mr. Huddleston, Mr. Abdnor, Mr. Baucus, Mrs. Hawkins, Mr. D'Amato, Mr. Thurmond, and Mr. McClure) proposed an amendment to the bill H.R. 6211, supra.

## ADDITIONAL STATEMENTS

THE FIRST ANNIVERSARY OF THE IMPOSITION OF MARTIAL LAW IN POLAND

• Mr. HEINZ. Mr. President, Monday marked the first anniversary of the imposition of martial law in Poland. To commemorate this tragic event, a ceremony was held on the Capitol Grounds to show the solidarity between the American people and their Polish brethren who have had to endure the hardships of severe limitations on personal freedoms and economic deprivation.

Today, I want to inform my colleagues that my commitment to help end the plight of our friends and relatives in Poland is as strong as it was when martial law was first imposed. I am sure that I speak for many of my colleagues when I emphasize that our efforts to aid those who seek social progress and democratic change will

not yield until they have achieved their goals. The struggle for freedom is one all Americans support, whenever and wherever it occurs.

Last year at this time, the military regime of Poland, with the best wishes of the Soviet Union, brutally seized the Polish nation and shocked the world by imposing martial law. Subsequent to this heinous act, we have witnessed the incarceration of hundreds, including the leader of the Solidarity trade union movement Lech Walesa. Fortunately, the repression has subsided somewhat and after months of detention, Mr. Walesa and most others have been freed. But this does not mean the struggle has ended. We must continue to make it known that we will not tolerate the actions of the hard liners in the Polish Government who would seek every opportunity to take advantage of personal freedoms and condone the use of repressive government measures to silence its outraged citizens.

The Senate has gone on record a number of times condemning those that would relish the imposition and continuation of strict social controls on press, speech, and all other expressions of freedom. I believe that this is important and that we should keep up the pressure. I am confident that our Polish friends hear of our actions and our prayers. At the very least, our words provide feelings of support and caring which are necessary ingredients for those attempting to obtain difficult goals. Helping to keep the faith and spirit of the Polish people high as they endure the constant harshness of internment, is a moral responsibility that we must not shirk. We must continue to voice our objections.

Poland has been in a state of crisis ever since the iron fist of Soviet domination first gripped Eastern Europe at the end of the Second World War. In their own way, the Soviets have inspired this most recent repression in Poland. And let us not be mistaken, Poland remains in crisis today. The situation is complex: The hope for freedom and economic recovery for its people is clouded by continued limitations on its citizens; the need for effective actions by Western nations seems thwarted by allied disarray.

There is no simple solutions to ending the oppression that our friends and relatives in Poland have had to live with, but I believe that it is through the tireless efforts of groups and organizations like the Polish American Congress, that we can defeat the enemy. The gathering of food, medicine, medical supplies, and clothing, to be sent to the needy in Poland will be a very welcome blessing. Furthermore, the participation of citizens from across this Nation typifies the sensitivity of Americans to the Polish cause and should serve as an inspira-

tion to Poles to keep up the fight. I believe that working together, our hope for democratic reforms in a nation that has known few, will become a reality.

## WESTERN LOANS TO THIRD WORLD NATIONS

• Mr. EAST. Mr President, Howard Ruff's "Financial Survival Report" of December 13, 1982, contains a provocative article on Western loans to Third World nations. I ask that the attached article be printed in the Record.

The article follows:

## DEBT REPUDIATION

The headlines of the last several months, articles in this letter, and general subscriber nervousness have caused one question to pop up over and over again in the War Room. Will Mexico (or someone else) repudiate their debt to the American banks, bringing down the banking system? Will the U.S. repudiate its mountain of national debt?

If so, how will this affect you and me? Can some investments help us ride out the storm?

Given my reputation as a Gloomy Gus, my answer may come as a bit of a surprise, but I can make one unequivocal statement: There is no chance that the U.S. Government will "repudiate" its debt by declaring its inability or unwillingness to repay either interest or principal.

There is also next to no chance that any foreign government or large foreign bank guaranteed by a foreign government will repudiate its debt by refusing to pay back interest and principal.

Before you relax too much, however, wait until you hear what they will do. Let's start with some of the "new math" fundamentals of public debt.

In our last issue we published the "smoking gun" statement by Frank Morris, President of the Federal Reserve Bank of Boston and a member of the Federal Open Market Committee, that the Fed would not permit a financial panic and that its "lender of last resort" role would take precedence over any money supply targets in the event of such crisis.

A new "smoking gun" is found in a statement by Walter Wriston, Chairman of New York City Bank.

"There are few recorded instances in history of government—any government—actually getting out of debt. Certainly in an era of \$100 billion deficits, no one lending money to our government by buying a Treasury bill expects that it will be paid at maturity in any way except by our government's selling a new bill of like amount.

"If we had a truth-in-government act comparable to the truth-in-advertising law, every note issued by the Treasury would be obliged to include a sentence stating: 'This note will be redeemed with the proceeds from an identical note which will be sold to the public when this one comes due.'"

Debts owed by sovereign nations are never paid off in cash. They don't have to be. Interest is paid and they are just "rolled over"... replaced by new loans. Wriston said countries have "problems of liquidity, not insolvency."

The banks know there is no intention to ever repay these loans, and they don't care. All they are interested in is being able to carry them as "good" assets on the balance sheet . . . interest paid current. They don't care whether or not that loan is ultimately "repaid" with money which must be reloaned to go back to work, or by a rescued "good asset" loan on the balance sheet which is earning current interest. It's all the same to them. Cash is just paper representing debt anyway. So is a loan. Cash earns no profits—loans do. As long as the loans pay interest, that's cool.

If a nation is edging toward default on a major loan, there are many relatively simple solutions. The only catch is that they are all inflationary. The ball can be kept in the air for a long, long time, but the ultimate price to be paid is the inflationary destruction of our currency, and I have no doubt that the bankers even have a strategy for profiting from that.

Here are some default avoidance steps.

 Rollover. Renew the notes as they come due. Except during recessions, this is generally done in an orderly way with little notice or panic.

2. The Federal Reserve Buys Up the Debt of Foreign Countries. The Monetary Control Act of 1980 gave the Fed the power to monetize the debt" of foreign companies or of private institutions whose debt is guaranteed by the government of a foreign country. If Brazil or Mexico can't pay their principal and interest when due to the New York banks, the Fed can literally print money or grant credits, using that foreign debt as security, then re-route the money to the lending bank to make current interest and principal payments. The President did this when he offered Brazil \$1.2 billion in "short-term" help.

Those powers which the Fed swore on a stack of Bibles that they would never use when challenged prior to the passage of the 1980 bill, have been used to purchase the debt of 26 countries.

The net effect is that your money is now backed by debt of 26 countries, some of which don't look too sound to me.

Our money, which was once backed by gold, is now mostly backed by U.S. Treasury debt securities. The Fed couldn't print new money unless new bonds, notes or bills are issued. Where I use to long for the good old days of the gold standard, now I long for the good old days when our money was backed by good ol' American notes, bonds, or bills, rather than the debt of deadbeat countries.

3. International lending organizations. The neatest raids on the American Treasury and the purchasing power of the American consumer are the huge loans that are being made to international lending organizations such as the IMF (International Monetary Fund) or the World Bank. Money is appropriated by the U.S. Congress for these institutions at little or no interest. In an age of deficits, every such dollar, of course, has to be printed and is inflationary. This money is then re-loaned to the deadbeat country which then makes payments to the American banks, and those about-to-default loans are now "good" income earning assets.

Because the IMF or World Bank can sometimes be too slow in a fast moving crisis, Donald Regan, Secretary of the Treasury, has proposed the creation of a "faster loan-disbursing agency" to keep a sinking debt ship afloat while IMF loans are being approved.

Our proposed rescue of Yugoslavia is a wonderfully illustrative case in point.

The Administration is proposing a \$1 billion international effort to help Yugoslavia through its "current financial bind."

\$1 billion is a gross understatement of the ultimate need, but, what the hell, it's a start. To show how bottomless that pit might be, one official said, "No firm figure has been set. One of the problems is determining how much is needed."

Secretary of State George Schultz cabled the Yugoslavs saying, "There is an urgent need for some timely U.S. and allied government financial assistance . . . without prejudging the amount or nature of the assistance . . . to help Yugoslavia through the first half of 1983. . . ."

The Yugoslavs will have to refinance \$4.9 billion to \$5.4 billion in 1983.

Yugoslavia's external debt currently totals about \$20 billion.

It sickens me that when we are faced with a \$200 billion deficit at home, we don't even question a bail-out of Yugoslavia, while we are cutting back on food stamps, student loans, pensions, and struggling to keep Social Security afloat.

The knee-jerk excuse is, "to keep Yugoslavia from sliding closer into the Soviet orbit."

That is so much buffalo chips!! The real purpose is to make sure that the banks will be able to carry the Yugoslavian loans on the books as "good loans."

This isn't a Yugoslavian bail-out, it's an American bank bail-out. That's why no nation will be allowed to default on its debts. The word "default" has been erased from the international financial dictionary.

Next week, I'll continue this subject by dealing with the question, will Uncle Sam ever declare bankruptcy?

## DAVID USHER, FOUNDER OF MARINE POLLUTION CONTROL COMPANY

• Mr. RIEGLE. Mr. President, a recent article in the Detroit Free Press profiled a growing worldwide company in Michigan, and its founder, David Usher.

Marine Pollution Control Co. is uniquely the product of the innovative genius of David Usher. Its principal function is to respond to oil and dangerous chemical spills throughout the world. He was one of the first people to concentrate on the problems of major oil tanker disasters, such as the Torrey Canyon, and he is recognized, within the industry, as the preeminent expert on the containment and removal of oil and chemical spills.

We frequently lose sight of the fact that pollution control laws have created many new business opportunities. Marine Pollution Control Co. is a living example that responsible pollution regulations can be good business.

I applaud Dave Usher's genius, energies, and desire to cope effectively and rapidly with the hazards posed by the increasing maritime shipments of oil and chemicals.

I ask that the article be printed in the Record at this point, and I commend it to my colleagues as a true illustration of the adage of where a need exists, someone will come along to fill it.

The article follows:

[From the Detroit Free Press, Dec. 9, 1982] WHEN THE WATERS ARE TROUBLED, HE CLEANS

## (By Tom Walsh)

David Usher calls Southfield home, but he's not there much.

He has an apartment in London and offices in Scotland and Seattle. Most times, he probably can be found at the site of a dangerous oil or chemical spill.

Usher, 52, is a troubleshooter, perhaps the world's foremost authority on prevention and cleanup of oil and chemical spills.

In 1967, he founded Marine Pollution Control in Detroit, the first spill cleanup company on the Great Lakes. Six years later he helped organize the Spill Control Association, which he heads today.

"We're like gypsies," Usher says, "We move our equipment all over the world, wherever the action is."

It's a lifestyle that suits the son of Rusimmigrants, who very nearly devoted his life to producing jazz records instead of cleaning up oil spills.

'My dad started a company (Usher Oil Co.) to reclaim salvaged oil in Detroit and I started working for him when I was 12,' Usher says.

'So I had an early background in oil.

"But my mother was very musical and I got interested in jazz.

'I produced a jazz concert in 1946 (at age 16) and a friend and I decided to go into the record business in 1948. In 1951, I got together with Dizzy Gillespie and we had our own label, called DG Records, for a couple vears

In the 1950s, Usher returned to the family oil business, but then was drawn back to jazz and went to Chicago from 1958-60, where he produced records for Bess Bonier.

Ramsey Lewis and other jazz artists.
"Then my dad got pretty sick and I came

He entered the spill cleanup business in the wake of the 1967 wreck of the Tory Canyon off the east coast of Britain.

That was the first of the very large crude oil carriers to go down and it dramatically brought world attention to the problem of oil spills," Usher says. "As I read about that, I found myself second-guessing how they were going about the cleanup."

Shortly afterward, in August 1967, there was an oil spill on the Rouge River, near the

Ford steel plant.

'I was known around the waterfront as a problem-solving guy and I had a background in oil salvage, so somebody over at Ford called me.

'I went down, told them what I thought they needed, got the resources and we cleaned up that spill in seven days and

eights night, working round the clock.
"Four days later, I got a check for \$18,000 and I said to myself, if I get paid in full four days after the job's done, I've got to get into this business.

Several months later, Usher started Marine Pollution Control.

Since then, Usher has overseen clean-up of dozens of spills on the Great Lakes, in

Mexico, Greece and the Orient.

At first, Usher's company was involved primarily in cleaning spills rather than preventing them.

But that changed in 1973, when the Sidney Smith turned on its side in the St. Clair River.

"She was sitting on her side, with about 45,000 gallons of oil in her tanks. The U.S. Coast Guard had been working for two years to find a good way to pump cargo off stricken vessels so it didn't become a spill.

"Well, the Coast Guard came out there with this new equipment they spent \$5 million to develop. And they didn't have a feel for it. It didn't work.

'I decided at that point to put my attention into building systems to do recovery

from distressed vessels."

Marine Pollution Control now has highcapacity pumping systems and crews stationed in Aberdeen, Scotland, and in Seattle, New Orleans, Tampa and Philadelphia. Usher recently returned from Holland,

where he reached an agreement to merge with an international competitor and thus expand his operations to Singapore and other locations.

The emphasis has changed from the rly days," he says. "It used to be we early days," worked mainly on oil spills. Now about 75 percent of our work is with hazardous chemicals.

'And that's a whole different ball game. Outfitting a guy to clean up oil spills costs maybe \$3,000. For a chemical spill, it's more like \$20,000 to \$25,000, and it takes a different breed of cat to do that work.

This work is so satisfying," he says. "It's a lot better than fighting a war and it gets

the same juices flowing.
"I wouldn't have it any other way," he says of his always-on-the-move lifestyle. "... I dig what I'm doing.".

## CLINCH RIVER-OUT OF FUEL

 Mr. HUMPHREY, Mr. President, on November 30, and December 6 and 7, I entered into the RECORD material concerning the high costs of constructing and operating the Clinch River breeder reactor project. Today I would like to examine a new difficulty with the project-by the Department of Energy's (DOE's) own accounts there is not enough plutonium available to fuel it.

The first indication that there would be difficulty fueling the project came last year in March in testimony Dr. Charles Gilbert, Acting Deputy Assistant Secretary for Nuclear Materials gave before a House Armed Services Committee hearing. At that time Dr. Gilbert stated that DOE probably would run short of fuel-grade plutonium by the late 1980's.

Rather than use all of this lower purity plutonium to fuel Clinch River and other breeder work, DOE is now blending it with very pure super-grade plutonium to produce materials suitable for modernizing our aging nuclear

weapons force.

If Clinch River is to stay on track and stay within current cost estimates, though, DOE must begin fueling the reactor in 1987 with an immense amount of plutonium. Indeed, through 1996 when the reactor is supposed to be sold, the project will require 10,296 kilograms of plutonium. This amount, if blended with super-grade plutonium, could produce from between 2,500 to 5,000 warheads and would go a long way to relieve the current pressure to build a new military production reactor under a crash deadline, as recently reported in the Washington Post.

Clinch River's supporters insist that the plutonium is readily available. In

its latest report on Clinch River, though, the General Accounting Office (GAO) concludes otherwise. The GAO examined four possibilities-taking the plutonium from the military stockpile and trying to return it from material bred in Clinch River, reprocessing light water reactor spent fuel in a commercial facility, reprocessing light water reactor fuel at military facilities, and buying foreign plutonium. None of these options, according to GAO, will be able to provide plutonium early enough to meet DOE's Clinch River fueling schedule. Indeed, Ken Davis, former Deputy Secretary of Energy said as much on September 9, 1982 when he testified before the Senate Subcommittee on Energy, Nuclear Proliferation and Governmental Processes. He emphasized that we do not have enough plutonium stockpiled to run Clinch River if it is built.

DOE's Assistant Secretary for Nuclear Energy and Deputy Assistant Secretary for Breeder Reactor Programs, though, gloss over this point. in their latest breeder publication "National Breeder Reactor Program Rationale and Clinch River Project Facts" they talk about returning plutonium to the military stockpile even though this cannot be done without a breeder reprocessing plant, the completion of which is at least another decade away.

This omission is disturbing. Dr. Gilbert's testimony, the pertinent sections of GAO's latest report on Clinch River and DOE's "National Breeder Reactor Program Rationale Clinch River Project Facts," and the Washington Post article on the need for an additional military production reactor make it clear that a serious fueling problem exists. Mr. President, I ask that the texts of these materials be printed in the RECORD.

The material follows:

Fuel-grade plutonium is required for blending with higher purity plutonium to produce more weapon-grade material, the breeder program including the Clinch River Breeder Reactor (CRBR), and for basic research and development programs, primarily the Fast Flux Test Facility. A potential fuel-grade plutonium shortage may occur in the late 1980s based on the current projected supply and demand situation. As indicated in the chart, even with the PUREX plant processing of plutonium from N Reactor fuel, DOE would not have sufficient supplies of fuel-grade plutonium required to support all these programs. The CRBR requirements shown in the chart are based on startup of the reactor in 1988. If that schedule is to be maintained, it will be necessary either to decrease requirements for the other two noted programs or to attempt to find an alternative source of pluto-

REPORT BY THE COMPTROLLER GENERAL OF THE UNITED STATES

COST AND SOURCE OF PLUTONIUM UNCERTAIN DOE's Office of Nuclear Material Production, which is under the Assistant Secretary for Defense Programs, is responsible for meeting the Government's plutonium requirements. Defense program officials are unable at this time to identify the specific source or cost of plutonium needed to fuel the CRBR's demonstration operations. Instead, these officials believe that, based on the current CRBR schedule with initial criticality in September 1989, a decision on the source of plutonium for the CRBR will not be required until 1986. At that time, they expect to have definitive plutonium cost estimates

DOE's defense programs officials said that the plutonium needed for the CRBR can be provided from a number of different sources, including defense programs activities, reprocessed lightwater reactor spent fuel, and/or foreign sources. According to these officials, the costs associated with each of these sources not only vary widely, but also in some cases, are highly speculative

Currently, the only domestic source of plutonium is from DOE's defense programs activities-either existing plutonium inventories, future production, or a combination of both. Depending on whether the plutonium is taken from existing inventories or from production, the value of the plutonium needed for the 5-year CRBR demonstration could range from \$143 million to \$1.2 bil-

Defense program officials point out, however, that they expect the quantity of plutonium supplied the CRBR will eventually be returned to the defense program. In their view, the only cost to the Government and CRBR would be the cost associated with reprocessing the spent fuel assemblies as the necessary step in recovering the plutonium. Based on defense programs officials' estimates, such reprocessing would cost from \$196 million to \$261 million for the 5-year demonstration period.

This approach does not recognize that a provision in the NRC Authorization Bill for fiscal year 1982 and 1983 (H.R. 2330), now under consideration by the House/Senate Joint Conference Committee might have a substantial impact on the planned transfer of plutonium produced by the CRBR to defense program uses. This bill would prohibit the use of plutonium from NRC-licensed facilities in the manufacture of nuclear explosives. CRBR will be an NRC-licensed facility. Defense program officials feel, however, that this provision will have little impact on the return of defense-supplied plutonium. They believe that if the fuel supplied to CRBR was produced at a defense facility, the fuel returned from CRBR still should considered as plutonium produced at a defense facility. We have not, as part of this review, analyzed the legality of DOE's position concerning the return of CRBR plutonium for defense purposes.

According to defense program officials, the plutonium for CRBR could also be obtained from reprocessed light-water reactor spent fuel assemblies. These officials estithat plutonium obtained this could range in cost from \$15 per gram to \$35 per gram. That cost range, however, is extremely speculative. It is based on DOE's preliminary estimates of prices they think could be negotiated for domestic reprocessing services.

In this regard, a commercial capability to reprocess light-water reactor spent fuel does not now exist in this country. Although several reprocessing facilities are being considered, no decision has been made, and it is unclear whether those facilities could be

available to meet the CRBR project schedule and plutonium requirements. DOE's existing defense program reprocessing facilities cannot recover plutonium from breeder fuel assemblies because of physical and chemical process limitations. DOE has requested \$5.6 million for conceptual design efforts to modify one of its reprocessing facilities to enable it to reprocess spent fuel from light water reactors, the Fast Flux Test Facility 1 and the CRBR. DOE's preliminary estimates indicate the modification could be operational by fiscal year 1989 if the project is authorized by the Congress.

Another option under consideration includes a demonstration size fuel reprocessing facility. DOE's Consolidated Fuel Reprocessing Program is a comprehensive, centrally managed program for all U.S. fuel reprocessing research and development. Accordng to DOE's Director of Nuclear Research and Development, Oak Ridge Operations Office, since 1976, the focal project for reprocessing research and development has been DOE's "Hot Experimental Facility." In June 1981, a conceptual design study for the Hot Experimental Facility was completed. This facility, however, does not have congressional authorization nor has it received construction funding. The Director estimates it would require about 10 years from start of construction to achieve normal operations.

Finally, defense program officials state that needed plutonium could be acquired from foreign sources. They add, however, that this would involve high-level policy decisions and sensitive, direct country-to-country negotiations. DOE officials told us that no negotiations are underway to acquire plutonium for CRBR from foreign sources nor are any related cost estimates currently

DEPARTMENT OF ENERGY: CLINCH RIVER FUEL

The Clinch River fuel is a mixture of the oxides of uranium and plutonium. The uranium and plutonium required for fuel for the Clinch River project is to be supplied by the Department of Energy (DOE).

The uranium will come from the depleted uranium in DOE's stockpiles. This depleted uranium is the waste from the enrichment process: natural uranium contains 0.7 percent uranium-235, which is enriched leaving the depleted uranium. DOE currently has 24,000 cylinders, each containing 10 to 14 tons of depleted uranium, in storage at vari-

ous locations.

DOE's Defense Programs is responsible for meeting the Government plutonium requirements. That office has traditionally provided plutonium at no charge to DOE's breeder program. The CRBRP currently plans to obtain plutonium from DOE's stockpiles. The amount of plutonium that will be used as fuel in Clinch River during the 5-year demonstration period is about 6.2 million grams of plutonium. This plutonium will be drawn from DOE's stockpile between 1987 and 1993. Because there will not be any net loss of plutonium and because DOE will retain possession of the plutonium, it is inappropriate to include plutonium as an element of the cost estimate.

The Clinch River powerplant will produce about 430 kilograms of plutonium more than it uses during the 5-year demonstration period. However, DOE has not elected to take credit for the value of this plutonium in the Clinch River cost estimate.

There are no firm plans at this time with respect to reprocessing Clinch River fuel assemblies. A number of alternative possibilities are being considered including the Demonstration Reprocessing Plant.

[From the Washington Post, Nov. 20, 1982] NEW ATOM PLANT FOR WEAPONS MATERIAL URGED

(By Milton R. Benjamin)

A Department of Energy advisory panel has recommended construction of a \$4 billion nuclear reactor at the Savannah River Plant in South Carolina to produce the tritium needed to increase the nation's stockpile of hydrogen warheads, it was learned yesterday.

The proposed government plant-a larger, higher-powered version of existing reactors at Savannah River that produce all the plutonium and tritium used in America's nuclear weapons-would be the first new reactor built for the U.S. military program in more than two decades.

The advisory panel, which submitted its classified report Monday to Energy Secretary Donald P. Hodel, said that after evaluating the adequacy of future supplies of tritium and plutonium, it agreed with earlier studies that concluded a new production reactor is needed "to assure an adequate supply of strategic nuclear materials in the 1990s and beyond."

The increased need for tritium, a radioactive gas used in thermonuclear weapons, stems in part from U.S. plans to build thousands of new warheads for the MX, Trident and cruise missiles. It also is needed for the neutron warheads that will replace older tactical atomic warheads. In addition, because the isotope decays, the tritium in existing warheads periodically must be replenished

Hodel, whose department is in charge of all of the facilities that produce materials for nuclear weapons, is expected to act on the panel's recommendation by March 1, an Energy Department spokesman said vesterday.

If Hodel approves the recommendation, funds for initial plannning would be added to the Energy Department's fiscal budget request, a source said. If funds are approved, construction of the reactor would begin in 1985.

In recommending construction of the ZEPHWR (zero electric power heavy-water reactor) at the Savarnah River Plant, the special advisory panel headed by former atomic energy commissioner T. Keith Glennan passed over all six reactor types and three alternative sites that had been proposed by the Energy Department.

These included a proposal that the Energy Department take over a partially completed commercial atomic power plant in Washington, where the utility spent \$804 million before terminating construction, and convert this reactor to the production of

plutonium and tritium.

The panel said it decided this proposal involving the Washington Public Power Supply System (WPPSS) reactor was the leas desirable because of "the potential for adverse public perception of converting a plant designed for commercial production of electricity to production of weapons materi-

The advisory group also cited concern "over use of commercial technology to

<sup>1</sup> The Fast Flux Test Facility is the LMFBR test reactor built for testing fuels, materials, and components. It has no capability of generating electricity nor is it intended to demonstrate the breeding of

produce weapons material" in strongly advising against construction of a pressurized light-water reactor that would be virtually identical to many of the atomic power plants operating in this country and overseas.

The panel also rejected the option of constructing the new tritium production reactor at the Nevada nuclear weapons test site, noting that the underground tests conducted there raised "safety questions" involving earthquakes.

Glennan said in a telephone interview yesterday the panel felt constructing a new reactor similar to those that have been operating at the Savannah River Plant since the 1950s was the best way to meet the objective of producing needed materials on a timely basis

"Essentially, you have a reactor that has been proven over many, many years, and the Savannah River Plant is operated by an enormously reliable contractor, Du Pont," Glennan said. "Those factors played a

major part in our decision."

Of the five production reactors built by Du Pont at the Savannah River Plant in the 1950s, three produce plutonium and tritium for the weapons program, and a fourth—which was shut down in 1968—is being refurbished and is scheduled to be put back into operation next September. The fifth was shut down in 1964, and there are no plans to reactivate it.

The panel said if the administration decided it was essential that the new production reactor generate as a byproduct electricity that could be sold to a local utility, it still would recommend that such a slant be built at the Savannah River Plant site and that it be similar to the reactors already operating

there.

The group said if the administration felt it was "essential" that the nation's entire production of tritium for hydrogen warheads not be concentrated at one location, it would recommend that a replacement for the aging N-reactor be built at Hanford, Wash.

The Hanford Reservation was the site of all the plutonium production for America's atomic weapons program during the 1940s. At one point, nine production reactors were operating there. But all have been shut down for over a decade except for the N-reactor, which in recent years has been largely used to produce fuel-grade plutonium for the Energy Department's breeder research program.

# WHERE DOES TAIWAN GO FROM HERE?

(By request of Mr. Baker, the following statement was ordered to be printed in the Record:)

Mr. GOLDWATER. Mr. President, for reasons known only to those who will come forth when we are gone, the United States has been rather consistent in the manufacturing of foreign policy disasters. Probably the most significant of these, and certainly significant in today's world, was the recognition of the People's Republic of China. Here is a country completely dedicated to the destruction of freedom everywhere, a country which has allowed the massacre of some 50 million people. The Red Chinese Government stands for everything that the United States is opposed to and yet, for reasons known only to themselves, a series of Presidents of the United States has seen fit to crawl in bed with this backward, decadent, Communist nation and ignore the one friend we have always had, the Nationalist Government on the island of Taiwan.

Probably the best piece written on this in some months is one written by Ramon Myers, who is a Senior Fellow at the Hoover Institution on War and Peace. He has cogently expressed the feelings of those of us who have bitterly opposed the recognition of the People's Republic of China and has expressed the reasons why we should never have gotten into this foolish position. I think it would be of benefit to my colleagues to read his thoughts, and I, therefore, ask that this article be printed in the Record.

The article follows:

## Where Does Taiwan Go From Here? (By Ramon H. Myers)

Will Taiwan reunify with China? Will it continue to prosper but remain isolated in the international world? Or will Taiwan adopt a different political style and declare itself an independent state without any representation on the Chinese Mainland?

Although the United States recognizes that there is only one China and that the People's Republic of China (PRC) represents China and Taiwan (The Republic of China, ROC), in reality there are two sovereign Chinese states. Since 1949, both of these states have claimed to represent China, and they still compete to determine which state will legitimately represent all the people on both sides of the Taiwan Straits.

It is highly improbable that The Republic of China will negotiate with China in the foreseeable future. Taiwan's leaders remember only too well their previous contacts with the Communists Party. When the Nationalist and Communists conferred in 1937 and again in 1946, they made some agreements. As a consequence of their skillful maneuvers, the Communist Party greatly expanded its area of control, and by 1947 had gained military equivalence with the Nationalists. By 1949 the contest was over, and since then the Nationalists have not trusted the Communists.

Can Taiwan continue to modernize and remain independent of communist rule? The answer is "yes" due to at least five factors

working in her favor.

First, a new international environment has emerged since 1945. This multi-system nations world has legitimized that more than one state may be created from the same country, as exemplified by the two Germanies, the two Koreas, and the two Chinas. Many states have an ambiguous relationship with the ROC, but formally recognize the PRC. This relationship is possible because private or national organizations have been created to conduct relations with the ROC.

Second, the ROC leadership offers an ideology which provides the theoretical basis for its successful economic policies. Their ideology also embraces Neo-Confucian values which are still the cultural beliefs of the Chinese.

Third, more and more Chinese living outside these two Chinese states now look toward Taiwan as the hope for the Chinese people. Recent commentary about both

states has been very favorable about development in the ROC, but cyncial and critical about the recent reforms in China. If Chinese intellectual support for the ROC grows, this powerful voice can help the ROC in its struggle for survival.

Fourth, the institutions and policies on Taiwan over the past thirty years have become routinized through law. Just as economic modernization has been shaped by respect for the law, political change has become regularized. Elections are held regularly. Last November, candidates competed in elections for the provincial assembly, city council, and country offices. The Nationalist Party candidates and the opposition candidates, who call themselves the non-party or Tang-wai, scored enough wins to claim victory for their side. Government leaders are increasingly cosmopolitan in outlook, educated abroad, and most hold Ph.D. degrees. Taiwan's public media provides criticism that is becoming more sophisticated and tol-erant of internal dissent. Government leaders and politicians are criticized if their performance is found lacking.

Finally, the ROC's future might very well be ensured by the inability of China's polity to remain unified. The population of China, numbering over one billion, is poor and demoralized after thirty years of socialist failures. If dissatisfaction spreads in the ranks of the military, party, and bureacuracy, and if new disaffected regional coalition groups emerge to challenge the center, China will

disintegrate into warring states.

Yet, predictions are apt to fail because they ignore the unexpected. What are some unexpected factors which might shape the future of the ROC? Current developments within China itself will certainly be signifi-cant. After their failure to have talks with Taiwan's leaders, Beijing's leaders in late 1981 began to press the United States not to sell any weapons to Taiwan. Taiwan had asked for the advanced F-16s or the less sophisticated F-5Gs, but our administration hoped to strike a deal with Beijing by selling less sophisticated jet aircraft to Taiwan and then asking China to criticize Soviet meddling in Poland. Beijing's response was to castigate Washington for selling Taiwan the weapons and to say nothing about Moscow. Since then, both countries have tried to find a formula which would allow the United States to sell weapons to the ROC as allowed under the U.S.-Taiwan Relations Act and for Beijing to be assured that after a limited time period of about three to five years, such sales would be terminated.

Recently, several parallel developments have taken place. After Soviet Politburo member Tikhonov called for resuming the talks broken off between Moscow and Beijing three years ago, the Chinese received delegates from the French Communist party, sent three economists to Moscow to confer with the chief of the Soviet planning commission, and listened to Brezhnev's announcement to resume talks. The foreign ministry in Beijing also sent notes to the major Western governments demanding they break ties with the ROC. States like Canada, Japan, and West Germany have non-official offices in Taipei and conduct considerable trade with the ROC. The meaning of these new developments becomes apparent when seen in historical perspective.

During the past three years, China's leaders have frequently urged Taipei to hold talks and various contacts such as sending scholars to Beijing, allowing postal commu-

nication between separated family members, and scheduling meetings between representatives of both sides. Beijing's leaders have also proposed that Taiwan can become an autonomous province with it leaders assuming major political positions in the PRC government. All these overtures have been resuffed by the ROC. Late last year, Beijing's leaders finally abandoned this idea and

leaders finally abandoned this idea and adopted a new strategy.

The new strategy is to isolate the ROC and weaken its defenses. If China can succeed in terminating U.S. arms sales to Taiwan and force other countries to sever their relations with Taipei, the ROC would become isolated economically and weakened militarily. Presently, only Saudi Arabia, the Republic of South Korea, and about twenty developing countries diplomatically recognize the ROC. Yet, the ROC still conducts trade and cultural relations with countries without diplomatic relations. Beijing's new strategy is clearly designed to eliminate such relations with Taiwan.

If the United States agrees to Beijing's terms, and other countries sever all ties with the ROC, Taiwan's future prospects will be very bleak indeed. What should the United States do, and what will be the likely response of other countries to Beijing's

recent demands?
Washington should be firm with Beijing, declare its intention to live by the U.S.-Taiwan Relations Act, and have friendly relations with China. If Beijing's leaders do downgrade those relations, no serious consequences will follow, and it's doubtful Beijing will take such drastic steps. Even if that were to happen, the United States certainly could conduct all business with the PRC through a charge d'affaires instead of an ambassador.

While Beijing might succeed in achieving some normalization with the Soviet Union, this step is not going to change the balance of power in northeast Asia. It will involve little more than slightly expanded trade and some exchange of people. In addition, other countries are greatly dependent upon trade with the ROC, and the current depressed international economic market discourages those states from severing trade relations with the ROC. Beijing wants to trade with these same states, so it is unlikely that she will choose to downgrade relations with all states that still trade with Taiwan.

There is, however, another difficulty which might engulf Taiwan and precipitate political instability there: the problem of leadership succession. Chiang Ching-kuo has, at most, only five to eight years to remain in power. If the political institutions in the ROC function properly, a successor will be elected, a cabinet will be named, and Nationalist governance will continue. But if some snag develops, disturbances could be provoked by perceived irregularities in the political process.

political process.

In conclusion, Taiwan's future can be influenced by American foreign policy. If any American administration presses the ROC's leader to confer with Beijing's leaders and terminate arms sales to the ROC, that island state will be placed in great jeopardy. Is China so important to the United States that our leaders should accede to such demands from Beijing? For the U.S. to base its entire Asian policy upon China's interests would be irresponsible for our Asian friends, and not in our own best interests.

There are four major arguments usually given for China's importance to the U.S. All four are actually based on myth.

First myth: China serves as an important counter-weight to block Soviet expansion-

ism. Since 1978, Soviet influence in Afghanistan and Vietnam has increased, and its military buildup in the northeast of Asia has expanded. The Soviets have perceived a budding Sino-American alliance and have responded by trying to extend their influence in Asia.

Second myth: China draws a huge number of Soviet troops and armor to its northern frontier, thus relieving tremendous pressure on NATO's flank. On the contrary, most of that recent buildup came from garrisons deep in the Soviet Union, and any relaxation of Sino-Soviet border tensions would merely mean returning those forces to their former or present data.

former garrison duty.

Third myth: China will become a powerful modern state within several decades.

China's current economic troubles are legion. Her leaders will be fortunate in the next few years if they can keep the country unified and prevent it from disintegrating into a number of warring regions or small

Fourth myth: China can be depended upon to become a firm ally and friend of the United States. We have no assurance that this Marxist-Leninist-Maoist leadership can be trusted because China's leadership has always viewed the world as being divided into three camps: the competing superpowers of the U.S. and U.S.S.R., the developed countries, and the underdeveloped countries. In opting for an alliance with the U.S. against the Soviet Union, China's leaders have merely applied the old united-front strategy and could change that alliance at any time.

If the United States will enforce the U.S.-Taiwan Relations Act while negotiating firmly with China, we should be able to prudently develop friendly ties with China. We could also expand our economic and cultural relations with the ROC. The two Chinese states alone can resolve their differences, so our role should be to provide the environment for a peaceful resolution of their differences.

# LESSONS FROM THE FALKLANDS CAMPAIGN

(By request of Mr. Baker, the following statement was ordered to be printed in the Record:)

Mr. GOLDWATER. Mr. President, it was my extreme pleasure and honor to have had lunch while at the air show in England with the Lord of the Admiralty. I asked him for a paper, when the paper was completed, on the lessons they learned from the Falkland war. I have received a paper, written by Air Vice Marshal Stewart Menaul covering this subject and because it is of such vital importance to our military, the students of military, and because we are in a period of transition now in some of our concepts of different aspects of warfare, I believe my colleagues would enjoy reading this. I ask that it be printed in the RECORD.

The paper follows:

LESSONS FROM THE FALKLANDS CAMPAIGN
(By Air Vice-Marshal Stewart Menaul)

The invasion of the Falkland Islands and South Georgia by Argentine forces on 2 April 1982, took the British Government completely by surprise, despite indications from various sources that such action was

contemplated by the ruling junta in Buenos Aires. When confirmation was received that land, sea and air forces had begun an invasion of the Falkland Islands and South Georgia the reaction of the British Government was swift and decisive. The first ships of a Task Force led by the aircraft carrier HMS Hermes were hastily assembled and set sail for the South Atlantic on 5 April to be joined in succeeding weeks by an armada of upwards of one hundred ships amd involving some 30.000 men.

The course of the successful campaign is too well known to need re-stating here and on 14 June the enemy surrendered. The land battle had lasted just three weeks. The battle at sea never materialized once the cruiser General Belgrano had been sunk by a British submarine. From that moment the Argentine naval command decided not to risk committing their fleet to action and as a result not a single ship of the Argentine navy ventured out of port for the duration of the war. There were no prolonged antisubmarine warfare (ASW) operations such as must be expected in the North Atlantic in any future conflict with the Soviet Union. But the combination of submarines, surface ships and aircraft remains the most effective anti-submarine tactic so far devised.

#### THE BATTLE FOR CONTROL OF THE AIR SPACE

Before attempting to assess the effectiveness of British weapon systems in the battle for control of the air space over and around the Falklands, it is necessary to look briefly at the attack capability the enemy was able to mount against the Task Force. Since no Argentine naval forces were involved, the burden of responsibility fell on the Argentine air force, with some assistance from the naval air arm operating from shore bases and not from the Carrier Vienticinco de Mayo. The total air strike capability available to the Argentines has been variously estimated at between 145 and 150 aircraft including nine Canberra bombers, 68 Skyhawk A-4P/Q, 20 Mirage IIE/IAI Nesher, 45 Pucara, Six Super Etendard supported by maritime and transport aircraft and helicopters. Their armaments consisted mainly of 500 and 1,000 lb iron bombs, 30mm cannon and rockets. The Super Etendards had about six or seven AM-39 Exocet missiles. The Mirages, with supersonic capability, were designed primarily for the interceptor role and on some occasions were employed as escorts to the Skyhawks, though they were also capable of undertaking an attack role.

Many of the aircraft in the Argentine air force inventory were 20 years old and did not have modern target acquisition and attack systems. They did not operate at night and appeared to have a very limited bad weather capability. They carried no electronic countermeasures equipment and their tactics were confined to low-level, freefall bomb and cannon attacks reminiscent of World War II. The Mirages were equipped with air-to-air missiles but they rarely engaged the Harriers in air-to-air combat. The sheer courage of the aircrews rather than the effectiveness of their equipment accounted in large measure for the successes achieved by the Argentinian air force and naval air arm.

## THE EXOCET ATTACKS

At the start of the war, it was estimated that apart from their 6 or 7 AM-39 Exocet missiles, they also had a supply of AM-38 ship-launched missiles but they did not use them. Two Exocets were fired at HMS Shef-

field one of which struck her and she was destroyed. HMS Glamorgan was struck by an Exocet fired from a coastal defence site near Port Stanley and was fortunate to survive. The container ship Atlantic Conveyor was struck by an Exocet fired from a Super Etendard and sank. At least two other Exocets were fired but did not hit their targets either because they were diverted by chaff or they suffered mal-functioning of the guidance system. This represents a high attrition rate in British ships for an economical expenditure of relatively low-cost missiles, especially as none of the launching aircraft were shot down.

#### ARGENTINE BOMB FAILURES

A feature of the air attacks by Argentine aircraft was the number of bombs which failed to explode even though they hit their targets. Others which did explode fell harmlessly into the sea, mainly because of poor aiming by the aircrews who often were more concerned with evading the defences than with accurate bombing. The bombs were 500 and 1,000 lb iron bombs of United States origin, some of them more than 13 years old. Such bombs may be fused nose or tail or both. They can be fitted with instantaneous or time delay fuzes to explode on impact or after penetrating the target, which would make the task of bomb disposal teams more difficult. Normally the fuzing system is so designed that the bomb is not live until after it leaves the aircraft. An arming vane is fitted which rotates as the bomb falls towards its target and activates the fuzing system. If the bomb is released from too low an altitude too close to the target the arming vanes will not have time to activate the fuzing system and the bomb will not explode even though it hits the target.

#### SHIP DEFENCES OF THE BRITISH TASK FORCE

The primary defences of the Task Force were the carrier-based Sea Harrier FRS 1 aircraft. They were modified to undertake a strike role as well as their interceptor and reconnaissance role for which the Blue Fox radar installed in the nose provides for airborne interception and air-to-surface search and strike. Only 20 Sea Harriers were available initially and were deployed on the two carriers HMS Invincible and HMS Hermes. This force was later augmented by eight Sea Harriers and 14 Harrier GR3 ground attack aircraft. The most outstanding deficiency the lack of airborne early warning (AEW) equipment which made the task of winning the battle for control of the air space that much more difficult. The Task Force had to rely almost totally on the ship's radars to give warning of approaching enemy aircraft and as they usually approached at very low level the warning time was reduced to a minimum.

For the air defence role, the Sea Harriers were equipped with AIM-9L Sidewinder heat-seeking air-to-air missiles and 30mm cannon. They were also equipped with chaff dispensers, tail warning radar and flare dispensers against infrared missiles. For the ground attack role, the Sea Harriers had iron free-fall bombs, cluster bombs and 30mm cannon. A number of attacks were carried out against the airfields at Goose Green and Port Stanley, with varying degrees of success, in which five Harriers were lost to ground fire. This represents an attrition rate which could not have been sustained for very long with the limited number of aircraft available. Since such atacks involved overflying the target on each occasion, there can be no doubt that the Ar-

gentine ground forces would have become more proficient in the use of the defence systems available to them and Harrier losses would have escalated.

#### SHIP MISSILES

Ships of the Task Force were armed with a variety of surface-to-air missiles and guns. Destroyers like the T-42 Sheffield had Sea Dart and 4.5 in. guns, frigates like the T-22 Broadsword had Seawolf, the Glamorgan had Seaslug and Seacat, other frigates had Seacat. This means that only two frigates had defences against Exocet missiles or very low-flying aircraft, since Sea Dart is primarily designed for defence against medium level attack but with some capability against low-flying aircraft. Lack of airborne early warning compelled the commander of the Task Force to deploy destroyers on radar picket duty some miles away from the other ships of the Task Force. HMS Sheffield was on such duty when she was hit by an Exocet AM-39 air-launched missile. She did not know what hit her and had no warning of the attack. No electronic counter-measures were used against the missile's radar guidance system nor was chaff dispensed, although it was used on other occasions with varying degrees of success. But it was the iron bombs dropped from very lowflying aircraft that did most of the damage to many ships of the Task Force. Most of the surface-to-air missile defences claimed successes and had all the ships been equipped with effective defences against high and low-flying aircraft and sea-skimming missiles the casualties in ships and men in the Task Force would in all probability have been much lower. Surface ships are vulnerable as the defences with which they are equipped.

#### ISRAELI OPERATIONS IN THE LEBANON

Before examining the lessons from the Falklands operations and the improvements needed in British weapons systems, it is appropriate to examine the Israeli operations which took place at the same time as the battle for the Falklands, with particular emphasis on the air battle.

Before launching their main attack in Lebanon, the Israelis decided to neutralize the Syrian air force which posed a real threat to their advancing forces. This involved the destruction of Syrian SAM-6 missiles deployed in the Bekaa valley, the command and control centres and as much as possible of the Syrian air force and its ground control interception centres. The plan was relatively simple but brilliantly executed. The Israelis first flew remotely piloted vehicles (RPV) over the valley, tempting the Syrians to use their acquisition radars to track the RPVs before launching the SAM-6s to shoot them down. In doing the RPVs monitored the frequencies being used by the SAM sites and transmitted them back to the Israeli air bases where attack aircraft armed with anti-radiation missiles, Shrike and Wolf, were waiting to take off and attack the sites. A Gruman E-2C surveillance and control aircraft operating off the Lebanese coast was able to observe Syrian aircraft taking off from their bases and to alert the Israeli F-15s flying top cover for the attacking F-4 Phantoms and F-16s. The attacks on the SAM sites were highly successful and in the air battles which followed, the Israeli air force claimed to have shot down 49 MIG-21 and MIG-23 Syrian fighters without loss to themselves. In the week that followed, the Syrian losses mounted to 86 for the loss of one Israeli Skyhawk shot down by a SAM-7 missile,

and two helicopters. Electronic countermeasures played a vital role in these operations.

The Israelis were equipped with the most modern weapons including the Maverick stand-off air-to-ground missiles, GBU-15 glide bombs, cluster bombs, AIM-9L Sidewinder missiles and infrared decoy dispensers. They had the most modern aircraft in the F-15 and F-16 and demonstrated impressively that defence suppression is a primary requirement before launching an attack on heavily defended targets. Iron bombs are still useful when the defences have been neutralized, but overflying heavily defended targets at low level, dropping freefall bombs, will in future invite a high attrition rate. Electronic countermeasures used so effectively to jam Syrian GCI communications, and defence suppression weapons must be included in the inventory of all modern air forces.

## MODERNIZATION OF BRITISH SHIP AND AIR DEFENCES

All the ships and aircraft lost in the Falklands campaign are to be replaced. But it is not just a question of replacing destroyers, frigates and Harriers, they must in future have modern, effective defences against modern attack systems which the Task Force did not have. The Sea Harriers performed exceptionally well, accounting for 27 aircraft shot down with no losses to them-selves in air-to-air combat. Each of the ship's SAM missiles also performed well within the limitations imposed on them. Sea Dart claimed eight enemy aircraft de-stroyed, Seawolf five, Sea Cat six. An unknown number of enemy aircraft may well have been hit and damaged. Ground-based Rapiers claimed 13 and Blowpipe eight enemy aircraft. Machine gun and small arms fire may also have accounted for damage to aircraft sufficient to prevent them from reaching their home bases.

The most serious deficiency, lack of airborne early warning, has already been made good by the installation of a Searchwater surveillance radar in a Sea King helicopter and deployed on board HMS Illustrious, the new carrier now off the Falklands to replace the Invincible. Ships engaged in operations anywhere on the oceans of the world must in future have airborne early warning of aircraft or missile attack, especially missiles such as Exocet. Had British ships of the Task Force been equipped with both Sea Dart and Seawolf and more effective passive and active electronic countermeasures, the casualties would have been lighter.

A further improvement in ship defences has been made in HMS Illustrious by fitting American Vulcan/Phalanx multi-bar relled gun system capable of firing 3,000-4,000 rounds of 20mm cannon per minute. The rounds are made of depleted uranium which is very dense and, therefore, more effective in penetrating the skins of aircraft or missiles than lead rounds. More effective countermeasures are needed, involving an integrated ECM system to provide protection against radar-guided missiles, infrared seekers and laser-guided missiles. Essentially such a system must have greater range for passive measures, including chaff, and for active jammers. A system known as Shield currently under development by the Plessey company will help to fill the gap in electronic countermeasures.

The Sea Harriers which performed so well in the interceptor role should have longer range radar and short range AIM-9L Sidewinder missiles supplemented with longer

range missiles such as Skyflash. If the United States navy had been operating in similar conditions to the Falklands cam-paign, they would have had E-2C aircraft on continuous patrol and F-14 interceptors equipped with Phoenix long-range missiles capable of engaging six enemy targets at ranges of 100 miles and with a look-down, shoot-down capability. The F-4 Phantoms soon to be deployed to the Falklands will have a much better capability and Buccaneers deployed in the strike role will eventually have the new British anti-ship missile, Sea Eagle, which will have a stand-off range greater than Exocet, greater reliability and be capable of evading or defeating countermeasures. It will also be fitted to Nimrod maritime aircraft.

Ground attack aircraft must in future have stand-off missiles and rely less on overflying defended targets to deliver free-fall bombs or unguided missiles. The Harrier GR3 and its successor the GR5 employed in the close support role will invite a high attrition rate if they are not equipped with weapons such as Maverick. The BL 755 cluster bomb for use against tanks will be highly vulnerable to Soviet organic air defence including SAM-4, SAM-6, SAM-8, SAM-9 and SAM-10 as well as ZSU-23-4 AA guns which accompany Soviet armoured divisions. There must be some doubt, too, about the efficacy of the JP-233 anti-airfield weapons which require the delivery aircraft to overfly the target. Fitting them to expensive aircraft such as the Tornado may prove to be costly by comparison with stand-off weapons. Cluster bombs and 1,000 lb iron bombs were not effective against the airfield at Port Stanley and served to emphasize that last war weapons and last war tactics will not be good enough in a future war in Europe against the most heavily armed nation in the world.

The land battle was primarily an infantry battle with artillery and mortar support, but the helicopter once more proved its worth as a versatile vehicle in many roles, not least the evacuation of the wounded. The cross-country mobility of British troops was outstanding. The men fit, disciplined, determined and well led. Their vehicles, Scorpion light tanks with 76mm guns, Scimitars with 33mm cannon, Samson recovery vehicles and 105mm light guns, performed well in very difficult terrain. The land battle did not last long enough to provide sufficient opportunity for ground forces to test their NATO role of initial delaying, defensive tactics, but years of training and NATO exercises enabled a force outnumbered nearly 2:1 to carry out an amphibious landing at the end of 8,000 miles of ocean, with inadequate airpower and to defeat an occupying force with minimum losses. The total casualties in dead numbered some 250, less than half the losses suffered by RAF Bomber Command in a single night raid on a German city in 1944.

provide a rapid deployment joint task force (RDJTF) more quickly and more efficiently than was thought possible. It was used well beyond the NATO area of responsibility and without help from any other power in the mobilization of the force or the conduct of operations. At the height of the campaign just before the surrender of the Argentine forces, the British Task Force had at sea 26 warships, 15 fleet auxiliaries, 42 merchant ships, 52 fixed-wing aircraft and 136 helicopters. There were more at Ascension

island, the only intermediate base available

LESSONS FOR NATO

Britain has demonstrated her ability to

to the force in the 8,000 miles from home bases. The strategic importance of Ascension island, the Falklands and South Georgia in the South Atlantic is on a par with Diego Garcia in the Indian Ocean. Other NATO countries should surely be able to form a similar contribution, though perhaps smaller, for use in assisting the United States RDJTF in keeping open the oceans of the world, particularly the oil routes from the Gulf

In a European land battle, NATO land and air forces must make wider use of electronic countermeasures. Defence suppression systems such as the United States Wild Weasel F-4 Phantoms and F-111 aircraft must be increased in number and the need for precision, stand-off weapons in the ground attack role must now be recognized. New anti-tank weapons with semi-automatic seekers such as Wasp and Skeet are needed to replace wire-guided missiles that have given excellent service in many countries for more than a decade and will still be effective for some years to come, but a new generation of anti-tank missiles is available and should be introduced into the NATO inventories as soon as possible.

The Israeli operations in Lebanon demonstrated the superiority of United States equipment over that supplied to client states by the Soviet Union. The West has the technological skills to keep ahead of the Soviet Union in every aspect of the military art. It simply requires the political will to ensure that we do. It will cost money, but looking at the weapons systems used by the Israelis and the tactics adopted by them particularly in the air battle, it could be said that in the Falklands campaign Britain was fighting yesterday's war while in Lebanon the Israelis were fighting tomorrow's.

The Falklands campaign was well planned and brilliantly executed when all the odds seemed to be against a successful operation to re-possess the islands. Firm decisions and unwavering determination at the very top set the pattern for the successes that were to come. It was a race against time and the elements in which sheer professional skill overcame the disadvantages under which the Task Force had to operate. Many lessons have been learned and some have already been put into practice, but more remains to be done. One lesson above all others, however, is applicable to the nations of the Free World. It is that failure to deter aggression invariably exacts a heavy price for the restoration of the status quo.

## KIDNAPPING OF THE DAUGH-TER OF THE PRESIDENT OF HONDURAS

Mr. HELMS. Mr. President, I think Senators may recall the visit to the Senate by Dr. Roberto Suazo Cordova earlier this year during his state visit to Washington. Dr. Suazo, who was elected just a year ago, has quickly earned the esteem and appreciation of freedom-loving people throughout the Americas. Not only is he a fine, Christian gentleman, whose humility and dedication to his people illuminate every facet of his life, he is also a firm supporter of freedom for his people and for the countries of his region, and a strong and faithful ally of the United States.

Mr. President, Honduras is strategically located on the borders of Guate-

mala, El Salvador, and Nicaragua, and has managed to escape the degree of violence which has plagued those countries. But the terrorist left has come to recognize Dr. Suazo as a major obstacle in their plan to destabilize and ultimately take over Central America. He has been firm in his dealings with the Salvadoran revolutionaries who have tried to bring their terror into his country. He has been unswerving in his condemnation of what he calls that cancer that the Sandinistas are trying to spread throughout Central America. And he has been most hospitable and supportive of the policies of the United States, which are based on our hopes for a community of free and democratic nations in Central America.

Mr. President, for a long time, the terrorist left has felt that it could bypass Honduras for the moment; but that time has now passed. Yesterday, in Guatemala City, the daughter of Dr. Suazo Cordova was kidnaped by leftist terrorists. This young lady, named Xiomara, has been studying medicine, the career her father followed before entering politics, in Guatemala City.

Earlier this year, when I represented President Reagan at Dr. Suazo's inauguration in Tegucigalpa, I met this fine young lady. The fact that international terrorists have now made her a pawn in the game of subversion and revolution is reprehensible, and must be condemned by every supporter of the democratic process, by everyone who loves liberty.

The terrorist group who kidnaped Miss Suazo has not yet identified themselves; they have insisted, however, that the media throughout Central America and Mexico be ready to publish their list of propaganda demands later this week. If the media fail to make themselves available, the terrorists threaten to kill their hostage.

Mr. President, later this week, I will have occasion to discuss this matter again. At this moment, however I would like to call on my colleagues to join me in a condemnation of this act of wanton cowardice and criminality, and to let the world community know that no faction, no interest anywhere in the free and civilized world can condone this kind of depravity. I would also like to make a personal request: Dr. Suazo is a good, gentle and dedicated man. This must be a very trying time for him, and he would want to know that he is not alone. Please keep him in your thoughts and prayers, and let us all pray that his daughter will be released without harm, and that the perpetrators of this crime will realize that it is utter folly to think that their cause can be helped by such actions.

## A COMING BOOM FOR AMERICA?

 Mr. SYMMS. Mr. President, on December 7, I placed an article in the RECORD on the issue of limited resources. Inadvertently, portions of the article and the name of the author, Allan Brownfeld, were omitted. I apologize to Mr. Brownfeld and ask that an edited text of his original article be printed in the RECORD today.

The article referred to follows:

## A COMING BOOM FOR AMERICA? (By Allan C. Brownfeld)

The prophets of doom and gloom are many. In widely published studies such as "Limits To Growth" and "Global 2000," dark picture is painted of a future which has exhausted the world's food and resources. Advocates of a "no-growth" philosophy warn that we must lower our sights and prepare for a declining standard of living. They say that Americans and others in the industrialized Western world have been "selfish," and have been using more than "their share" of the world's minerals, energy and food.

Herman Kahn, chairman and director of research at the Hudson Institute, sharply disagrees. In a new book, "The Coming Boom," Simon and Schuster, 1982, he her-Coming alds a new period of American prosperity and predicts, in spite of the present economic recession, a major economic upturn and revitalization which will renew our traditional values, our status and influence, and

our pride in ourselves.

If economic growth has slowed in recent days (Kahn declares) it has not been because of a lack of resources, or over-populabut because of self-imposed "social limits" such as the demands of environmentalists and ecologists and the increasing burden of taxation and government regulation. We have taxed initiative and subsidized indolence-insuring that we would get more of the latter than of the former.

The policies of the Reagan Administration, Kahn believes, are pointing the country in the proper direction for an economic revival. He notes that, "... the president has the opportunity to forge the most important new coalition in fifty years-the free market/free enterprise economic conservatives, the 'strong America' defense/national security/foreign policy conservatives, and the 'traditional values' social conservatives. The potential for a new political coalition has existed since the mid-1960s, but because the process was greatly disrupted by Vietnam and, more significantly, by Watergate, the New Deal/Great Society coalition originally put together by Franklin D. Roosevelt in the early 1930s and sustained by Presidents Truman, Kennedy, and Johnson continued to hold together and to dominate American politics until President Reagan's election. Many of the political forces which kept that coalition going for fifty years are the same ones that make the new conservative coalition possible."

Two out of three Americans polled in recent years believe that their grandchildren will not live as well as they do. If America is to change course, writes Kahn, it is important to "re-establish an ideology of progress. Ideologies are important in themselves. They emphasize values and attitudes; they contain a theory of the past, a theory that both legitimizes the present and inspires a dream for the future. . . They help shape responses to current issues,

often providing the energy and motivation needed to make those responses effective.

There is no reason for there not to be continued economic growth and progress, Kahn states. He argues that there will be a great expansion of non-OPEC sources of gaseous and liquid fuels from conventional and unconventional sources.

A new era of prosperity can be ours, Kahn declares, if we restore the proper incentive structure of the marketplace. He urges, for example, deregulation of the energy industry and of society and industry in general, noting that, ". . . the basic standard for government intervention should be that the burden of proof of need of intervention be on the government. Unless it makes a very good case, it should not become involved."

Over the next 20 years, if we pursue proper economic policies, Kahn believes the national income will double. "Barring some perverse combination of bad luck and bad management," he writes, "the average American's real income will triple by the

year 2033.

This is an optimistic book and should be read carefully by all those who are prepared to accept the idea that "downward mobiliis somehow inevitable. There is a way to reverse current trends-and Herman Kahn points to them in this timely and important book.

## WHAT ABOUT OUR FARMERS?

HELMS. Mr. throughout the lengthy debate on this proposal to raise gas and other excise taxes, I have heard precious little said about how this regressive tax will affect America's farmers. I can assure you, Mr. President, the effects will be severe.

Farmers use more gasoline than any other sector of our economy. If farmers do not have gasoline, Americaindeed, the world-does not eat. If farmers have to pay more for gasoline because of this tax, their incomes will suffer.

We are well aware of the low prices our farmers are receiving in the marketplace. This is due, in part, to their inability to pass through increased costs of production to consumers. The often cited example that a loaf of bread contains only about 4 cents worth of wheat clearly defines the magnitude of this situation.

This tax increase, if enacted, would result in a dramatic rise in the cost of transporting crops to market. Will this increase be passed along to consumers in the form of higher food prices, or back to the farmers in the form of reduced crop prices? Historically, farmers have borne the brunt of such increases.

Tax increases stifle economic growth

in all segments of our economy. If this bill should pass, our farmers would be asked to bear a disproportionate and unfair burden. It would result in lower farm prices, and it will prove disastrous to our already struggling farm economy.

Our farmers have endured hard times for several years. We must not add to the burdens.

Mr. President, the American Farm Bureau Federation on behalf of America's farmers, has expressed strong opposition to the gasoline tax increase. They know what its effects would be. On November 17, in a letter to President Reagan, Mr. Robert Delano, president of the American Farm Bureau Federation, outlined his organization's position in opposition to the proposed tax increase. I urge my colleagues to examine Mr. Delano's suggestions carefully. They are profound. He stresses that our first priority should be to cut domestic spending. And how right he is.

Despite what we have been hearing from the big-city newspaper editors, Federal spending has not been cut. It continues to grow at an amazing rate. So does the deficit. Taxes have already been raised, so our only alternative is

to cut Federal spending.

Yet here we are about to increase the heavy tax burden American citizens already bear. This will not help our economy, Mr. President, and it will be particularly harmful to our farm-

Mr. Delano makes other good suggestions, Mr. President, but I will not take up the Senate's time by discussing each of them. I do, however, urge my colleagues to give them careful consideration, and I ask that Mr. Delano's letter be printed in the RECORD at the conclusion on my remarks.

I would also like to call to the attention of my colleagues an editorial that will appear in the upcoming edition of Farm Bureau News. I recommend it to my colleagues, as well, and I ask that it be printed in the RECORD.

The editorial follows:

AMERICAN FARM BUREAU FEDERATION, Washington, D.C., November 17, 1982. President RONALD REAGAN, The White House,

Washington, D.C.

DEAR MR. PRESIDENT: We note that you are giving serious consideration to the pro-posal put forward by the Secretary of Transportation for a five-cent increase in the federal excise tax on motor fuel and other highway-user taxes.

Farm Bureau favors deeper cuts in federal spending as the first priority. We continue to support the tax reductions already enacted. These measures will restore taxpayer and consumer confidence in long-term eco-

nomic recovery

We agree with you that any kind of pumppriming or make-work program would signal back to business-as-usual in economic policy. thwart long-term economic recovery and ultimately revive the inflationary spiral. We support a three-year freeze on all entitlement cost of living increases and fundamental reform of these programs in order to get control of federal spending.

We have indicated in the past that we would accept a reasonable increase in the federal fuel tax, considering the deteriorating condition of the nation's highways and bridges: but that acceptance would be sub-

ject to the following conditions:

1. No portion of the increase should be diverted to public transit or any other nonhighway purpose. The fuel and other motor vehicle taxes are user fees, paid by highway users. To divert any part of the proceeds away from the Highway Trust Fund would be a breach of the trust and unacceptable to Farm Bureau members.

 States should be asked to continue to participate in the funding at current levels.
 We suggest that an increase of three

cents would be reasonable, representing a 75 percent increase in the user fees paid into

the Highway Trust Fund.

We further suggest that if your Administration and the Congress are looking for other sources of funds to spend on public works, repeal of the Davis-Bacon Act would save up to \$2 billion a year. Those in Congress who are pushing hard for a "jobs program" should be given an opportunity to choose between continuation of this outmoded and costly statute and the funding of a public works program.

Sincerely.

ROBERT B. DELANO, President.

# FARM BUREAU NEWS—GAS TAX ISN'T WHAT IT SEEMS!

That "Gas Tax" increase of 125 percent that is being steamrollered through Congress at the behest of the Reagan Administration and the aid of the Democratic leadership is being produced by the lame ducks

and is strictly for the birds!

When Secretary Drew Lewis last year began his campaign to increase the current four-cent-a-gallon federal motor fuel tax by five cents and to divert one cent of the increase from highways and bridges to subsidies for public transit, Farm Bureau-and others interested in preserving the integrity of the Highway Trust Fund-said nothing doing! And so did Ronald Reagan! Curiously, the Lewis proposal is like one that had been promoted for several years by Representative Jim Howard of New Jersey, chairman of the House Public Works and Transportation Committee. Howard has long advocated the concept of a "surface transpor-tation" act and in effect changing the Highway Trust Fund to a surface transportation trust fund.

Whereas the President speaks about this tax as a "user fee"—which it has been since the days of President Eisenhower—it will no longer be the case if enacted. How can it be a user fee when one fifth of the new proceeds will not be spent to benefit the high-

way users who will be paying the bill?
While this is bad enough, we are really faced with a bill that goes far beyond an unprecedented increase in the fuel tax. This tax bill has been used to rewrite the Highway Act. It provides for numerous changes in a wide range of taxes, including unconscionable increases in excise taxes and use taxes on the larger trucks and the tires and other parts and accessories used on such trucks.

But, the mislabeling of this legislation goes even further. This bill has been sold as a move to ameliorate the nation's serious unemployment situation. There is precious little evidence that the net result will be an increase in employment and absolutely no indication that the increased tax funds can be used quickly enough to have any effect on the current problem.

In fact, the chairman of the President's Council of Economic Advisors indicated that the net result of the many tax increases provided in this legislation could reduce available jobs—not increase them!

available jobs—not increase them!

This legislation will have a devastating impact on truck transportation because of

higher costs. While this situation may bring delight to the railroad companies, it doesn't to agriculture! Agriculture depends heavily on truck transportation—both to and from the farms and ranches. In the end, farmers will pay dearly in lower prices for their commodities due to higher costs of transportation.

There are some in the Administration and on Capitol Hill who have assumed that farmers and ranchers would not be much affected by these tax increases, due to the refund still provided on fuel not used on highways. This is a short-sighted and skewered perception, as only a portion of the fuel farmers buy is eligible for the refund and since farmers are adversely affected by increase truck transportation costs. It also needs to be pointed out that a large number of farmers—at least 25,000—are owners of the larger trucks on which the excise taxes and user taxes are to be greatly increased.

But there's more. Not content with all of the other massive changes that are wrapped up in this so-called 5-cent gas tax increase, the Congress—in its infinite wisdom—is about to broaden the coverage of the Davis-Bacon Act (prevailing wage law) to all of the expenditures in this legislation for highways and bridges. If this is enacted, it will increase costs by at least 20 percent—a lot less bang for the buck! In the House, Representative Stenholm of Texas offered an amendment to waiver Davis-Bacon for purposes of this bill; but was voted down. Representative Howard's substitute included the extension and broadening of Davis-Bacon coverage.

To the handful of steadfast Senate members who blew the whistle on this legislation and opened its contents to full public view, the entire country owes a debt of gratitude.

Yes, Farm Bureau could accept a reasonable increase in the federal fuel tax limited for highway and bridge purposes; but as now written it has no choice but to vigorously oppose this legislation.

### THE UNITED NATIONS RESOLU-TION ON THE FALKLAND IS-LANDS

• Mr. HELMS. Mr. President, on November 4 the United States supported in the United Nations General Assembly a realistic diplomatic initiative intended to put a just end to the conflict in the South Atlantic. The resolution, passed by a vote of 90 to 12, urges Britain and Argentina to resume negotiations in order to find as soon as possible a peaceful solution to the soereignty dispute of the Falkland Islands. One week later, the Organization of American States passed a similar resolution.

The United Nations resolution reaffirmed the priniples of the United Ntions Charter concerning nonuse of force in international relations. So in supporting this measure, we assume a shared responsibility for preventing the use of force in the future.

Mr. President, it is apparent that the United Nations and the international community recognize the right Argentina has to a fair hearing—something at least one member of the United Nations allowed to slip from view recently, provoking the tragic events that

took place in the South Atlantic earlier this year.

I congratulate Ambassador Jeane Kirkpatrick for her sound judgment in pleading for a calm and rational U.S. posture concerning this tragic war that occurred between two of our allies. I am convinced that this war could have been prevented had the United States adhered to the policy which Ambassador Kirkpatrick urged all along.

Mr. President, I believe that the U.S. vote for the negotiations resolution should create a better atmosphere for our relations with all of our Latin American neighbors who have become increasingly alienated from the United States due to our catastrophic policy during the Falkland Islands crisis. A healthier atmosphere is certainly needed. Latin nations lamented the U.S. switch in midconflict from neutrality to outright support of Britain. It confirmed their fears that when in need they could not count on Washington despite all the alliance rhetoric of the Rio treaty.

One by one our South American neighbors are showing signs of alienating themselves from us. Colombia's new President, Belesario Betancur, has been sending Washington a strong message of Latin dismay by calling for a hemispheric summit meeting excluding the United States. Venezuela is sending signals by backing Mexico's demands for peace talks between El Salvador's Government and insurgent forces. Our role in the passage of the U.N. resolution was a constructive effort to overcome this alienation. I believe that President Reagan's trip to Latin America this month may have mended some of these faltering friendships.

Mr. President, I would review some of my statements at the time of the fighting in the South Atlantic. On April 29, I said that the United States should seek to help to resolve peacefully British and Argentine concerns, and that it was imperative for the United States to take an evenhanded role in the controversy. On April 30, Secretary Haig made a crucial statement in support of Britain. And just 12 hours after Secretary Haig's statement British forces opened fire on Argentine positions. It is clear that the tilt" toward Britain lessened chances of a peaceful solution.

Mr. President, on May 3 I warned that it would indeed be a mistake to continue to permit the use of military force by the British fleet in the southern waters of our hemisphere. I would also mention that on May 27 I called on President Reagan to insist on a cease-fire so that we might bring the two nations together to the negotiation table. On June 7, I stood in this Chamber and pointed out that while Secretary Haig failed to forge strong

ties with the anti-Communist Latin American nations, Ambassador Jeane Kirkpatrick had remained firm and acted wisely in her desire that the United States be an impartial mediator.

Mr. President, the American delegation's "yes" vote on November 4 is a move toward healing a rift in Washington's relations with Latin America. I might add that the resolution contains no threat to Britain's vital interests. The U.S. vote was a gesture well received by the Latin nations.

Finally, Mr. President, I would point out that the United Nations resolution does not legally prejudice the position of either Argentina or the United Kingdom and it does, in fact, open the way toward negotiations in good faith

without any preordained result. Had we stayed firm throughout the crisis, and insisted that the dispute be settled by discussion and not by force, I doubt there would have been such a tragic conflict. Mr. President, I believe this should be a lesson to us once and for all, so that we never again alienate ourselves from our friends as we did during the Falkland Islands war. I believe that the United Nations resolution, as well as the Organization of American States resolution, serves as a basis for negotiation to close this unhappy chapter and move forward once again toward peace, understanding, and development in this hemisphere.

Mr. President, I applaud the distinguished U.S. Ambassador to the United Nations and her courage to vote in favor of a resolution that is

most welcome.

I believe that it is worthwhile to look at this resolution. The resolution takes into account the existence of a de facto cessation of hostilities in the South Atlantic and the intention of not resuming them expressed by the parties. Perhaps more importantly, the document reaffirms the need that the parties take duty into account the interests of the population of the islands.

Finally, it should be emphasized that the 90 nations in support of this initiative are calling for the United Kingdom and Argentina to resume negotiations in order to find as soon as possible a peaceful solution to the sovereignty dispute.

Mr. President, I ask that the entire text of the General Assembly resolution be printed in the Record.

The text follows:

# RESOLUTION

(1) Requests the Governments of Argentina and of the United Kingdom of Great Britain and Northern Ireland to resume negotiations in order to find as soon as possible a peaceful solution to the sovereignty dispute relating to the question of the Falkland Islands (Malvinas).

(2) Requests the Secretary General, on the basis of this resolution, to undertake a renewed mission of good offices in order to assist the parties in complying with the request made in paragraph 1 above taking adequate measures with that aim.

(3) Requests the Secretary-General to submit a report to the General Assembly at its thirty-eighth session on the progress made in the implementation of this resolution

(4) Decides to include in the provisional agenda of its thirty-eighth session the item entitled "question of the Falkland Islands (Malvinas)."

Having considered the question of the Falkland Islands (Malvinas).

Realizing that the maintenance of colonial situation is incompatible with the United Nations ideal of universal peace,

Recalling its resolutions 1514(XV) of 14 December 1960, 2065(XX) of 16 December 1965, 3160(XXVIII) of 14 December 1973 and 31/49 of 1 December 1976,

Recalling further Security Council Resolutions 502 (1982) of 3 April 1982 and 505

(1952) of 26 May 1982,

Taking into account the existence of a de facto cessation of hostilities in the South Atlantic and the intention of not resuming them expressed by the parties.

Reaffirming the need that the parties take duly into account the interests of the population of the islands in accordance with resolution 3065(XX) of the General Assembly

Reaffirming the principles of the charter on the nonuse of force or the threat of the use of force in international relations and on the peaceful settlement of international disputes.

# THE HARD TRUTHS OF THE BREZHNEV LEGACY

• Mr. GARN. Mr. President, I would like to take this opportunity to bring to the attention of my colleagues an article by Mr. W. Bruce Weinrod, director of foreign policy and defense studies at the Heritage Foundation. Mr. Weinrod's article, "The Hard Truths of the Brezhnev Legacy," provides us with a sobering and panoramic view of Soviet foreign and defense policies during the rule of Leonid Brezhnev. It is not a very pretty picture, but rather a grim portrayal of international realities.

Before we all become nostalgic about the Brezhnev legacy and begin to set for ourselves false hopes for the program of his successor, we should ponder the views expressed so well by

Mr. Weinrod.

Mr. President, I ask that Mr. Weinrod's article be printed in the RECORD.
The article follows:

THE HARD TRUTHS OF THE BREZHNEV LEGACY
(By W. Bruce Weinrod)

The death of Leonid Brezhnev is already producing an assortment of favorable reminiscences, as well as hopeful expectations for the course of future U.S.-Soviet relations: we hear Jimmy Carter fondly recalling Brezhnev's fervent desire for world peace and Cyrus Vance stating that Brezhnev's greatest legacy is his arms control efforts.

Do these and other similar generally sypathetic comments about the Brezhnev era reflect the actual Soviet record under Brezhnev? This question is critical, for how it is answered will influence the U.S. approach to dealing with the USSR in the immediate post-Brezhnev era. The U.S. will be ill-served by romanticizing and distorting the Brezhnev legacy.

A pluralistic world was completely unacceptable to Brezhnev. The most dramatic demonstration of this is the "Brezhnev Doctrine" of 1968. Brezhnev used this to justify the Soviet invasion of Czechoslovakia in 1968, the invasion of Afghanistan in 1979 and the suppression of Polish liberties in 1981. This is part of the Brezhnev legacy.

Just in the past decade, the Soviets have added 733 nuclear-capable missiles (land, sea and air) and have increased their warhead supply by over 4,000. Since SALT I and the start of the so-called detente era, when the strategic equation was supposed to be stabilized, the Soviets have added, among others: several hundred later model SS-11 rockets, over 800 SS-18s, SS-19s and SS-20s; over 50 nuclear subs with about 2,000 nuclear warheads; and over 150 Backfire intercontinental bombers. Despite the well-publicized "Brezhnev freeze," in which he announced in March 1982 that the Soviets would stop further deployment of SS-20s targeted on Western Europe, deployment has continued.

The Soviets and their Warsaw Pact satellites also have continued to increase what already was conventional weapon superiority over the West. In all, the Soviet Union is spending roughly 40 percent more on military outlays than is the United States. And Moscow is allocating roughly 12 percent to 15 percent of its GNP to military spending; the U.S., even with current spending hikes. is only at about 6 percent of GNP. From 1971 to 1981, the USSR outspent the U.S. militarily by around \$400 billion. During the past decade, Brezhnev added 10,000 new heavy and medium tanks, 8,000 pieces of artillery and 765 combat aircraft. Just since Reagan took office, the Soviets have added 2,000 tanks, 1,350 fighters and fighter-bombers, and 4,500 fighting vehicles. This is an unavoidable hard truth of the Brezhnev legacy.

Not only did Brezhnev snuff budding liberty and pluralism in Eastern Europe, he also provided substantial aid to terrorists trying to disrupt Turkey's pro-democratic and pro-Western government, and has continued attempts to exploit Iran's instability. While Americans were being held hostage, Brezhnev continued to fan anti-American fervor in Iran.

In Asia, the Soviets financed and encouraged the North Vietnamese invasion of the South, in violation of the peace agreement of 1973, and now is financially underwriting the Vietnamese occupation of Cambodia.

In the Middle East, the Soviets encouraged Nasser's blockade of Israel in 1967, which precipitated the Six-Day War, and subsequently supported the Arabs in the 1973 war. A Soviet-supported coup in 1978 in South Yemen has made that nation a protectorate of the Russians, and the Soviets have transferred large amounts of arms to both sides in the Iran-Iraq war, encouraging instability in that region.

In Africa, the Soviets under Brezhnev have aided the most radical and destabilizing groups, including the African National Congress and SWAPO. Moscow is aiding the Polisario guerrillas fighting against America's ally, Morocco. Further south, the Soviets brought the Cubans into Angola. Closer to the U.S., Brezhnev continually sought to violate the understanding ending the Cuban missile crisis by trying to expand the Soviet submarine base at Cienfuegos.

The Brezhnev legacy is pockmarked by Soviet treaty violations. Experts can cite continuing Soviet violations of the SALT I Treaty—supposedly a symbol of Brezhnev's commitment of arms control. Moscow trains and supports terrorists from the PLO to Libya to the attempted assassin of Pope John Paul II. The Brezhnev legacy is filled with unremitting domestic repression as well

What then are the hard truths of the Brezhnev legacy? The answer: unremitting efforts to gain advantage at the expense of the U.S. and the Free World and an unyielding hostility to pluralistic societies.

Can the future bring improvements in U.S.-Soviet relations? Perhaps Moscow's new leadership will seek to relax world tensions. U.S. policy, however, cannot be based upon hopes that have often proved illusory in the past.

The hard truths, learned from painful experience, teach that the U.S. should continue to pressure the Soviets, forcing them to make difficult choices in terms of foreign involvement and the allocation of resources. If Moscow decides to move toward genuine peace, Washington will know it soon

Unless and until the Soviets alter their course in a meaningful way, such as allowing independent trade unions in Poland, or permitting a genuinely independent government in Afghanistan, conciliatory gestures from the United States are inappropriate. The fundamental fact is that it is the realities of the Soviet Union and not the individuals who develop policies which govern U.S. decisions. The burden must be on Moscow's new leaders to prove that they are not the heirs to the Brezhnev legacy.

## TRANSPORTATION INFRASTRUC-TURE NEEDS IN WESTERN CITIES

• Mr. DECONCINI. Mr. President, while this body is debating legislation that makes sweeping changes to Federal highway programs, I believe it is appropriate for the Members to consider the unique transportation problems facing rapid growth cities, particularly those in the West, and the effects this legislation may have on them. A report was recently prepared by the city of Tucson, Ariz., that clearly points to the revenue shortfalls facing growing cities, like Tucson, when it comes to meeting increasing transportation needs. I think my colleagues should have the opportunity to review the text of this report and I request that the attached report be printed in the RECORD.

The report follows:

#### RAPID GROWTH WESTERN CITIES: TRANSPORTATION INFRASTRUCTURE NEEDS

Subject: The costs of transportation in rapid growth western cities and the biases in federal assistance criteria which exclude rapid growth western cities from receiving an equitable share from federal assistance programs.

## OVERVIEW

The problems of certain northern and northeastern cities do not have to be ignored in order to acknowledge the problems of rapid growth western cities.

Rapid growth western cities are confronted with the same financial burdens of pro-

viding a balanced multi-modal transportation system as are faced by northeastern cities; rapid growth western cities are also struggling to obtain monies to finance the high cost of capital improvements needed by a more rapidly growing population.

The magnitude of transportation problems in rapid growth western cities has been systematically underestimated by federal statistics, creating biases in federal funding assistance criteria which tend to favor cities in the north and northeast.

Rapid growth western cities, through annexation, include a much larger proportion of their urban population area than do northeastern cities. The transportation well-being of the larger, metropolitan rapid growth western cities tends to mask or dilute the transportation problems which in many respects are identical to the problems of the northeastern cities.

A comparison of 13 rapid growth western cities (Houston, San Antonio, Phoenix, Tucson, Albuquerque, Denver, Salt Lake City, Portland, Austin, Corpus Christi, Dallas, Fort Worth, El Paso) and 10 cities listed by the U.S. Treasury as "high fiscal strain" cities does not support assumptions that rapid growth western cities have fewer transportation needs or have more resources to cope with transportation problems than other cities.

Federal assistance for transportation system related improvements should be allocated to all urban municipalities in some rational way that reflects their real needs and the magnitude of those needs.

#### SUMMARY

This report has been prepared as background for the rapid growth western cities' participation in the development of new criteria for federal funding of transportation. The report presents two closely related perspectives on the problem. First, it offers sets of comparable statistics on the rates and patterns of growth of operating expenditures and revenues, and an analysis of the enormous capital improvement requirements needed to cope with the rapid population growth in the western cities.

The second part of the report presents analyses of the recent rates of population growth, income growth, transportation growth, and financial problems of a sample of 13 rapid growth western cities; and 10 cities, mostly in the north and northeast, which have been identified by the U.S. Treasury as undergoing "high fiscal strain". The purpose of the comparison is to show the bias embodied in federal eligibility criteria, such as those in the transportation federal aid programs, when they are applied to the rapid growth western cities. The comparison supports the contention that rapid growth western cities are suffering from inadequate funding to solve their growing transportation problems. The stereotypes of the "Rapid Growth Western Cities Pro-sperty" and "North and Northeastern Cities Distress" are simply not relevant to dealing with urban transportation problems.

Using Tucson as a model, the following principal observations or conclusions emerge from the report. Three of these observations and conclusions, with some deviations, also apply to other rapid growth western cities.

1. Tucson's population growth since 1960 has been very erratic, ranging from 2,500 to 26,900 per year. The irregularity and virtual unpredictability of such growth creates severe problems in planning, preparing, and accommodating such growth.

2. The City of Tucson while having considerable growth has grown less rapidly than the unincorporated area of the Tucson metropolitan area (Pima County). As a result, the City has been forced to increase transportation services more rapidly than its own population is growing. The result has been high rates of increase in the per capita expenditures of city government.

3. Although the population of the City of Tucson increased approximately 2.2 percent per year from 1971 to 1978, the compound average increase in "real" total expenditures per capita has been 10.0 percent per year. These figures are in "real" terms, i.e., they represent increases over and above the rate of inflation. These are costs related to the rate and pattern of Tucson's population growth.

4. Present assistance to the City of Tucson from federal sources has been irregular in recent years and has been at a rate which is less than the probable rate of local inflation. The City has been forced to finance growing shares of its transportation expenditures from local revenues. The unstable federal assistance from year to year has not been comparable to the cost of rapid growth.

5. Cities like Tucson are threatened by misconceptions bred by the "Sunbelt-Frostbelt" debate which are fed by statistics which are clearly biased against showing the true magnitude of rapid growth western cities urban transportation problems.

6. Tucson finances a large part of its expenditures from its own local sources (53 percent in 1978) and dedicates a large portion of its expenditures to capital outlays. On the average, the rapid growth western cities raise a significantly greater percentage of their revenues from local sources and devote a much greater portion of their expenditures to capital outlays than the "high strain" cities.

7. The solution to the problem of the costs of population growth will come only when it becomes recognized that the absorption of the population growth causes severe financial problems and is a problem whose cause and whose solution lie beyond the realm of the financial capacity of local government.

THE COSTS OF RAPID GROWTH AND THE BIASES IN FEDERAL ASSISTANCE CRITERIA WHICH EX-CLUDE RAPID GROWTH WESTERN CITIES

The City of Tucson, Arizona, a comparable rapid growth western city, is now being asked by the nation to absorb a rapidly increasing proportion of the nation's population. The current residents of the City of Tucson are being asked to plan for continued rapid growth and to finance much of the capital improvements which that growth will require and to absorb many of the costs of population growth without specific federal assistance.

The problems which that rapid growth is causing for Tucson and other western cities are not very well understood outside of their area. It appears that the lack of understanding reflects, among other things, the myths of "Sunbelt Prosperity". It has been suggested, especially by concerned public officials in the northeastern cities, that investment, jobs, and people are flowing to the rapid growth western areas at rates which are so great that they threaten to undermine the economic foundations of the regions or of the cities from which the exodus is taking place. Recent research by the Department of Commerce suggests that the changes do not reflect large-scale out-

migration of firms,1 but the myth of a growing, prosperous, problem-free "Sunbelt" persists

Even if the notion of renewed prosperity may be accurate for the rapid growth western area as a whole, it clearly does not reflect the financial and transportation picture of rapid growth western cities relative to their sister cities in the north and northeast, the magnitude of transportation problems in rapid growth cities has been systematically underestimated by the federal government statistics used to compare cities in different parts of the country. Federal government attention has tended to focus upon the short-term problems of cities with fi-nancial crises apparently related in recent years to migration to the "Sunbelt". The financial crises of those cities are real, and they warrant federal attention. But the financial burdens on the rapid growth cities are equally real, though different in nature.

In this report we document several of the key issues with respect to the under-estimated costs of rapid growth, the biases in federal assistance criteria, and the basis for some of the misconceptions about "Sunbelt" growth which threaten to create future financial crises in the rapid growth western cities unless the need for continued and expanded federal assistance is recognized for

#### cities such as Tucson.

#### 1. Population growth in Tucson as an example

The population of Pima County, the Tucson Standard Metropolitan Statistical Area (SMSA) which encompasses (according to the Census Bureau) all of the "functional" city, including suburban areas and city-oriented rural areas, has increased by 224,000 people (82 percent) from 1960 through January 1979. That results in an average annual growth of 12,400 persons or a compound average rate of 3.4 percent per year. In reality, the first and, perhaps, most acute problem presented by that growth is its irregularity and unpredictability

Annual growth over the past 18 years has ranged from as little as 2,500 to as much as 26,900! In Figure 1 one can see the great unevenness which has characterized Tucson's growth. Predicting, preparing for, and accommodating such irregular changes in population have presented Tucson with a chal-lenge which we frankly believe has been badly underestimated outside of this area. Tucson only has a limited ability to affect the rate of immigration. Yet every person who arrives in Tucson has a legal right to utilize Tucson's public services, transportation systems, and other infrastructure. As a result, the local government must provide for the greatest feasible future immigration in its planning of capital improvements, otherwise long-time residents will be deprived of adequate services when the population grows rapidly.

The growth of the Tucson SMSA (Pima County) does not necessarily reflect the population growth of the City of Tucson. In fact, the 1970-75 rate of growth for Pima County was 5.0 percent per year, according to the Census Bureau, whereas City of Tucson grew by 2.7 percent per year. And this constitutes the second problem which population growth presents to the City of Tucson. As the hub of the metropolitan area, the City of Tucson must supply public services such as the roads, police services,

differences between growth in the City and population growth in the metropolitan area also present probtends to publicize the growth of the metropolitan area much more than the growth of the City. As a result, the national image of "prosperity" and "boom" depends much more on the experience of the whole county than on the experience of the City proper.

## 2. The recent costs of growth in Tucson

In just the last eight years, the population of the City of Tucson has increased by approximately 51,200 persons, for an average annual compound rate of growth of 2.2 percent. Total operating expenditures of the City have increased by 10.0 percent per year on a constant-dollar per capita basis! Table 1 presents details on these patterns of city government expenditure. The numbers in Table 1 permit us to answer questions such as: Are those increased expenditures primarily based on "welfare" or "community services" programs? Are they primarily related to special problems of Tucson such as water supply? Are they merely a reflection of inflation? Or do "minimum city services" show different patterns? The answer to all those questions is a resounding "No"!

If the rapid growth western cities toward which much of the nation's population is now moving were regions abundant in all the resources needed to support the additional population, it might be appropriate to encourage that migration, as a reflection of the personal preferences and the freedom to move which are protected by the Constitution

The problems of transportation development in rapid growth western cities, the costs of solving the problems, and the immediate financial burden which anticipated population growth is now creating for all residents of rapid growth western cities (long-time residents as well as recent arrivals) offer an excellent example of the local consequences of national population movements which require far more recognition at the federal level than they have received

until now. How much of the increase in transportation costs is attributable to population growth? In the most general sense one could suggest that "most" of it is; for the fundamental problem is that past population and economic growth has pushed the rapid growth western cities area into an imbalance with respect to transportation, and new growth simply worsens that. More realistically, one can note that the per capita revenue required by the transportation system is dominated by the capital improvements component. Capital costs have represented roughly 51 percent of total costs over the past six years, but they will rise to 53 percent by 1985. An increase of \$2.5 million per year is necessary just to finance the extension of the transportation system to new areas of annexation and the expansion of the system as a whole to provide adequate multi-modal transportation system for residents of rapid growth western cities

These costs of population growth constitute a considerable burden upon the present residents of the rapid growth western cities which can be associated most closely with the fact that the rapid growth western cities must provide a mode of transportation to all who choose to live there in the future. They are not costs which the rapid growth western cities can easily pass on to newly-arrived citizens, and they do not represent costs which can be postponed. They are the costs of survival in the face of heavy population growth.

#### 3. Does current Federal assistance provide a solution?

It has often been suggested in discussions of federal assistance to cities that rapidlygrowing cities already receive disproportionate shares of federal assistance through general revenue sharing and other programs supposedly "biased" toward them. The experience of Tucson in recent years suggests that the local tax effort has brought increasing real revenue per capita, but that revenue per capita from federal sources has not even kept pace with inflation over the past six years.

The prospects in Washington these days suggest that unless Congress improves its understanding of the problems facing rapid growth western cities, larger shares of limited federal funds for transportation development will be shifted away from rapidlygrowing cities or away from cities with problems comparable to those of rapid growth western cities and will be given to northern and northeastern cities which are experiencing very real problems of their own. This shift in the allocation of resources seems to reflect misconceptions of the magnitude of the problems of rapid growth western cities and may be based on systematic biases in the statistics available on cities.

Federal government statistics on cities tend to be biased for one, simple, straightforward, but overwhelmingly significant reason: most major northern and northeastern "core" cities include within their administrative boundaries relatively small proportions of their complete urban areas; most of the rapid growth western cities have tended to be able to annex areas of peripheral growth and hence, they include relatively large proportions of their complete urban areas. Comparison of infrastructure conditions or other measures of transportation conditions between the "core" cities of metropolitan areas in the north and northeast and the "core" cities of the rapid growth western cities introduces an enormous "diluting" problem which biases the comparisons against the rapid growth western cities. Specifically, it will take significantly worst transportation conditions in rapid growth western cities to yield a measure of the problem comparable to the measure found in the artificially-limited core-city of a northeastern or northern urban area.

In order to demonstrate the basis for the bias, we have developed a series of statistics on two samples of cities, one representing the northern and northeastern cities which the federal government has recognized as having problems, and one sample representing rapid growth western cities. The first sample consists of ten cities listed by the U.S. Treasury Department as having the highest level of "fiscal strain" among the 48 largest cities of the nation because of population growth, economic growth, changes in tax revenues, etc.2 The second sample con-

public administration, water and sanitation for all of the population which works, shops, or visits Tucson regularly, but the City's ability to tax or to charge for those services is limited with respect to those who live outside the city limits.

<sup>&#</sup>x27;See Carol L. Jusenius and Larry C. Ledebur, "Documenting the 'Decline' of the North," U.S. Department of Commerce, Economic Development Research Report, June 1978.

<sup>&</sup>lt;sup>2</sup> See U.S. Department of the Treasury, Office of State and Local Finance, "Report on the Fiscal Impact of the Economic Stimulus Package on 48 Large Urban Governments," Washington, D.C., January 23, 1978.

sists of the 10 cities in Arizona, New Mexico, and Texas which had over 200,000 population in 1975. The cities in the two samples and their recent population characteristics are given in Table 4.

The rapid growth western cities (Tucson, Albuquerque, Austin, Corpus Christi, Dallas, Fort Worth, El Paso, Houston, Phoenix, San Antonio, Denver, Salt Lake City, Portland) had an average rate of population growth from 1970 to 1975 of only 1.3 percent per year. How could this be? Aren't "Sunbelt" cities booming? "Sunbelt" metropolitan areas were, in fact, booming. The SMSA's of which these 13 cities comprised the "core" cities grew at more than 3 percent per year from 1970 to 1975, but not the cities themselves. And that may create for these cities the worst of many worlds. The population of the metro areas in almost every case grew very rapidly over this period, generating rapid increases in the need for transportation services in the core city. But the rate of growth of the taxpaying core-city population was considerably less than that of the metro area in almost every case. The average difference was 1.6 percent per year or less than half the rate of the metro areas. Three of the ten "core" cities has large population declines, despite the fact that their metropolitan areas were growing rapidly overall.

The ten "high strain" cities (Boston, Buffalo, Chicago, Cleveland, Detroit, New Orleands, New York, Newark, Philadelphia and St. Louis) had an average negative rate of production growth of -1.9 percent per year from 1970 to 1975. Nine of the ten also were classified among the economically "most distressed" in a separate study of 174 cities by the Urban Institute.3 In all ten cases, the metropolitan areas either lost less population or had positive population growth over the same period.

Several further facts become clear from Table 4 which are not consistent with simplified notions of rapid growth western cities boom and which suggest strongly the potential of rapid growth western cities. First, rapid growth western cities encompass nearly twice the proportion of the metropolitan area population found in the "high strain" cities. second, every rapid growth western city was actively annexing peripheral areas between 1970 and 1974, but only one out of the ten "northern" cities annexed territory. Despite the active annex-

ation, significant growth occured outside the cities in rapid growth western cities metro areas, with Tucson showing the greatest difference (3 percent per year) between city growth and metro area growth.

The implications of these relative population trends are clear. Much of the population settling in the rapid growth western cities is locating itself outside of the core cities despite active annexation programs. This implies continued high capital improvements costs which must be borne disproportionately by the residents of the core cities because the users of the facilities reside beyond much of the city's fiscal jurisdiction.

One implication, in fact, which emerges from these data is that core cities in the north and northeast have a common set of problems and a common set of opponents: the wealthy suburbs of the northern and northeastern cities. Rapid growth western cities are ruled illegible for federal assistance programs because their problems have been statistically diluted by annexation. The residents of the wealthier portions of those cities are therefore expected to solve the transportation problems which suburban areas in the north and northeast have avoided by defensive incorporation. To the extent that federal eligibility criteria shift funds toward the core cities which cannot annex and away from core cities which can annex, they are subsidizing the affluent suburbs of northern and northeastern metro areas at the cost of taxpayers in rapid growth western cities. Or, in other words, the federal assistance permits residents of affluent northern suburbs to pay less of the cost of transportation services from which they benefit in the core of their metro area than they would have to pay if they lived in the annexed areas of rapid growth western

### 5. How general are Tucson's problems?

A comparison of the revenue and expenditure pattern across the 23 cities in the sample suggests that Tucson's difficulties in financing the capital improvements and the bias in availability of federal revenues may be quite general among rapid growth western cities. Table 7 presents comparable additional data on the finances of the rapid growth western cities and the ten "high strain" cities, predominately in the north and northeast.

One can see immediately in Table 7 that the rapid growth western cities have been required to spend nearly twice as much (27.2 percent) of their total expenditures on capital improvements than the "high strain" cities (15.1 percent) and that they generate locally more than 10 percent more of their revenue, on the average (68.4 percent), that the "high strain" cities (58.1 percent). One also sees that there is wide enough variation within groups of cities to suggest, once again, that categorical distinctions among groups of cities are of limited usefulness. Tucson is more similar to Philadelphia, New Orleans, or Boston that it is to Dallas or Albuquerque according to these fiscal measures.

More importantly, it is essential to realize that if cities in the areas of the country toward which the population is moving are not provided with federal assistance in coping with the "up-front" capital costs of growth, they will be unable to absorb continued population growth without curtailing present levels of transportation services to their citizens, increasing tax levels and user charges in ways which will inevitably fall most harshly on their citizens, and creating grossly inequitable conditions for those who have long resided in their areas. It is not necessary to deny the problems of the northern and northeastern cities in order to demonstrate the problems of the rapid growth cities. It is necessary, however, to make certain that the majority of the new federal assistance which becomes available to urban government is allocated in ways which recognize the specific problems of the rapid growth western cities and which are allocated on the basis of criteria which are not inherently biased against rapid growth western cities.

The rapid growth western cities recommended that any new gas tax or user fee that is imposed upon the purchase of motor fuel contain a provision in its distribution formula to earmark a certain amount to equal not less than 20 percent (1 cent out of 5 cents) for the rapid growth western cities. The cities have a demonstrated need, increased population, increased land area that must be serviced, increased traffic rates and most important is that in the past 5 years these cities have increased significantly the amount of local share they are spending for transportation.

The time to provide the funds for infrastructure maintenance, preservation, and construction is now, before our current system falls into the state of disrepair that many of the north and northeastern areas have allowed their systems to reach. Also, the time to provide funds for new construction to the rapid growth western cities areas is now, before the areas get completely inundated with the continuing population growth and we arrive at a situation where it will take us the rest of the next century to rectify.

### ANDROPOV MAKES OVERTURES TO ALBANIA

• Mr. HELMS. Mr. President, recent news accounts report that the new Soviet leader Yuri Andropov is seeking to end the 22-year rift between the Soviet Union and Albania.

In the short period of time since the succession of the former KGB chief to the leading position in the U.S.S.R., the Soviets have launched political and psychological offensives to undermine the West's will to resist Soviet aggression. Predictably, Andropov is fishing in the troubled areas between NATO and the Warsaw Pact bloc. It is also noteworthy that the Albania initiative is parallel to similar initiatives with the People's Republic of China.

But it is not surprising that Andropov, as one of the few top Soviet officials to have visited Albania and Yugoslavia in the past, has already launched a political and psychological offensive aimed at the reincorporation of Albania into the Soviet Empire.

Mr. President, I would like to invite my colleagues' attention to the current situation in Albania. The Hoxha regime in Albania, the most rigid of all Communist tyrannies, is in a state of internal convulsion, reflecting the total political, economic, and social bankruptcy of the regime.

The Albania nation yearns for freedom and national independence. It is in America's strategic interest to help prevent a Soviet reoccupation of Albania and it is our moral duty to help the Albanian people to rid themselves once and for all of communism in their country. On a per capita basis, Albania has the largest number of political prisoners in the world. It is the only country in the world that has closed every single house of worship within its borders.

It is reassuring, Mr. President, to know that the Albanian people have not given up. The Albanian nationalist resistance, both at home and abroad, have never ceased in their struggle for freedom. Rallied around their King in exile, His Majesty King Leka I of the Albanians, Albanians are united as never before in their determination to end the Communist oppression of their ancient nation. Trusting in God, their nation, and their King, the Albanians know that they can again become a free nation.

All countries in the Free World should stand together with the Albanian freedon fighters during this crucial time. The United States has a special interest in this regard, since the Albanian nation has given many of its sons and daughters to our Nation as immigrants over many years. Further-more, devout Muslim countries in the Free World should also especially support the efforts of the Albanian people to become free, for Albania is the only predominantly Muslim nation Europe.

Mr. President, I would like to take this opportunity to wish the Albanian people at home and abroad the courage and strength to win their just and noble fight against the Godless oppressors of their nation.

Mr. President, I ask that two articles, both published on November 30, one from the New York Times and one from the Washington Post, dealing with the Andropov overtures be printed in the RECORD at the conclusion of my remarks.

The articles follow:

[From the Washington Post, Nov. 30, 1982] ANDROPOV SPEECH CITED: SOVIET OFFER TO ALBANIA SEEKS END TO 22-YEAR RIFT

(By Dusko Doder)

Moscow, November 29.—The Soviet Union made its strongest and most direct appeal to the Communist leaders of Albania today, proposing "honest, equal and mutually ben-eficial", cooperation to end the 22-year old breach between them.

The offer was linked directly to the new Soviet leader, Yuri Andropov by the authoritative Communist Party newspaper Pravda. It said Andropov had Albania in mind when he spoke of his "sincere wish" to develop and improve relations with all socialist

countries.

Although Andropov made no direct reference to Albania in his Nov. 22 speech he said "mutual good will, respect for each other's legitimate interests and common concerns for the interests of socialism and peace should prompt correct solutions also where appropriate trust and mutal understanding are still lacking for various reasons

Relations between the two former allies were broken in November 1960 when Albnian leader Enver Hoxha last visited Moscow. According to an official Albanian account of the visit, Hoxha bitterly quarreled with Nikita Khrushchev, the Soviet leader at the time, and Mikhail Suslov, the Kremlin's chief ideologist.

The Albanians refused to even shake hands with their Soviet hosts and immediately left a Soviet government residence house in Lenin Hills to sleep at their embassy here for fear they would be poisoned according to the account.

The Albanians, according to the account, also refused to fly aboard an airliner to Al-

bania and instead went by train.

The same account mentions that the Albanian leadership prior to meeting Khrushchev and Suslov had a reasonably friendly meeting with Andropov, who at the time served as chief of the Soviet Central Committee's department for relations with other Communist countries. Andropov is one of the few Soviets who have actually visited Albania.

The two countries broke diplomatic relations in early 1961 over ideological differences and what Albanians claimed to be Moscow's interference in their internal affairs. The strongly Stalinist Hoxha them allied his country with China.

China was Albania's only ally from then

until 1978, when the two fell out over Peking's policy toward the United States

tiny, strategically located Balkan country sandwiched between Greece and Yugoslavia has since kept itself isolated from the outside world.

Hoxha, 74, who has ruled Albania's 2.7 million people for 38 years, frequently has made news by bloody purges of the party leadership. Virtually all top leaders over the previous three decades have been executed on charges of having worked for the intelligence services of the United States, the

Soviet Union and Yugoslavia.

Most recently, Defense Minister Kadri
Hasbia disappeared under mysterious circumstances. He was the brother-in-law of Mehmet Shehu, former primer minister and Hoxha's closest associate for more than three decades. Shehu was reported to have

been executed. A number of relatives of Hasbia and Shehu are reported to be in jail on conspiracy charges.

Today's overture to the Albanian leadership made no mention of Hoxha. The Pravda article marking Albania's national day, in contrast to previous such commentaries, refrained from criticizing the leadership and spoke in glowing terms about the struggle of Albanian Communist partisans against Nazi Germany and Italy in World War II.

The only critical reference spoke of the Albanian leadership "at the beginning of the 1960s" as having adopted a policy of "terminating political, economic and cultural relations" with the Soviet Union and other socialist countries.

The present state of relations, Pravda said, is not in the interest of either country and is harming "the work of socialism and the anti-imperialist struggle."

The breach in relations, however, had deprived Moscow of access to Albania's Adriatic ports at Durress and Vlora, something that the Soviet military is eager to regain.

Although Moscow has made periodic overtures to Albania, today's Pravada article is the strongest to date as it links it directly to

Andropov's appeal.

While this is in line with Moscow's current policy, including its gradual rapprochement with China, the Soviets apparently believe that Albania's economic difficulties and political turmoil give hopes for an eventual improvement in relations with the small Balkan country. Given Hoxha's age, the Russians apparently also believe that future Albanian leaders may be more ready to resume ties.

Along with the Pravada article, the Soviet media today blossomed with reports about Albania. The news agency Tass reported that the Albanian-Soviet Friendship Society, a largely dormant body, today held a meeting to commemorate the Albanian national day.

[From the New York Times, Nov. 30, 1982] KREMLIN OVERTURE TO ALBANIANS SEEN

WARM PRAVDA TONE ON NATIONAL DAY IS RELATED TO A RECENT COMMENT BY ANDROPOV (By John F. Burns)

Moscow, November 29.-Pravda, Soviet party newspaper, today marked Albania's national day with an unusually warm article.

Although the paper has printed similar articles in previous years, the commentary today was notable for its emphasis on the importance the Soviet Union attaches to improved ties with Albania, which has lived in diplomatic isolation since it broke with China five years ago, and for the link the paper made between the overture and the

new Soviet leader, Yuri V. Andropov.
Pravda recalled that Mr. Andropov had affirmed the Kremlin's concern for "the further strengthening of the great community of socialist countries" in a speech at Leonid I. Brezhnev's funeral two weeks ago. The paper noted that Mr. Andropov had also of-fered a fresh start in relations with any country that displayed the same desire and was prepared to work on the basis of equity and cooperation.

As in the bid to improve relations with China, although to a lesser degree, the effort to entice Albania reflects strategic as well as political considerations. Mr. Andropov's speeches have implied that the Soviet leaders see new opportunities for ending the schism in the Communist world that has undermined Soviet foreign policy.

STRATEGIC CONSIDERATIONS SEEN

In the case of Albania, with a strategic coastline on the Adriatic Sea and a common border with Greece, a member of the Western alliance, this interest is compounded.

The problem for the Kremlin is that the Albanians, up to now, have shown no sign of responding to the overtures. Only two months ago, a meeting commemorating the 40th aniversary of the founding of the Albanian party was told by Ramiz Alia, a Polit-buro member, that Albanian hostility toward the superpowers, meaning the Soviet Union and the United States, was "clear-cut, unwavering and consistent.

"We do not have, nor will we ever maintain, relations of whatever kind and nature

with them," Mr. Alia said.

Soviet efforts to mend ties have been made periodically since 1964, three years after Albania forced the original rupture for what were stated then to be ideological rea-

The Pravda article today praised Albania's achievements under Communism and, by comparison with a similar article last year, it played down Albanian responsibility for 1961 break. Today's article spoke of meeting here to commemorate the Albanian anniversary and a series of publications by Soviet scholars on Albania's history, linguistics and ethnography.

## REV. ESAIAS F. LEE, SR., RETIRES

Mr. RIEGLE. Mr. President, a distinguished citizen of Inkster, Mich., will soon retire as minister of the Springhill Baptist Church. The Reverend Esaias F. Lee, Sr., has served as minister of this church since 1946, but has been active in the church since his earliest days.

He has been an integral force in the development of Inkster, serving on the board of education as trustee, treasurer, secretary, and a 6-year term as its president. During his tenure on the board, he was a driving force behind the building of five schools, expanding the full range of educational services, and hiring the first black high school principal in the State of Michigan.

Reverend Lee is truly dedicated to the enhancement of his community. He served as the first Boy Scout leader in Inkster in 1934, and has remained active in youth programs throughout his life. He spent 31 successful years with the Ford Motor Co. until his retirement in 1971. He established the first chapter of the NAACP in Inkster in 1936, and remains active in that organization today.

In all ways, Reverend Lee has devoted his life to the people of Inkster, but his central focus has always been his church. He has extended the spirit of his ministry to all facets of life in Inkster, and I truly believe that its citizens know and appreciate all that he has given.

Mr. President, I wish Reverend Lee all the best in his retirement, and know that he will continue to be the community citizen that has been his trademark throughout his career.

CONVERSION OF ABANDONED BUILDINGS INTO EMERGENCY SHELTERS FOR HOMELESS AMERICANS

 Mr. DODD. Mr. President, yesterday I introduced S. 3097, a bill to assist private groups who wish to convert abandoned buildings into emergency shelters for homeless Americans.

This morning, the Subcommittee on Housing and Community Development of the House Committee on Banking, Finance and Urban Affairs held a much-needed hearing on the plight of increasing numbers of our citizens driven to the streets by unemployment and cutbacks in social services. The Honorable Ted L. Wilson, mayor of Salt Lake City, presented eloquent testimony describing the predicament of homeless people in his State.

Mayor Wilson pointed out that 10 percent of the homeless in his city are families, primarily single parents caring for several children. These parents can provide no other shelter from the elements for their children than tents, cars, and railway sidings. The despair of these families, a despair they share with single adults who have no homes, is tremendous.

At the conclusion of his testimony, Mayor Wilson left the subcommittee with a key question: whether we will teach those homeless children in Salt Lake City and in other cities across the Nation that we are a society that cares enough to help them now when they need it most.

Mr. President, surely these younger Americans are not to blame for the high rate of unemployment which has forced their parents to seek jobs in distant cities, leaving them without any place to live. Their parents are not to blame either.

I commend Mayor Wilson for all he is doing in Salt Lake City to aid homeless children and adults and ask that the text of his testimony be printed in the Record. I ask that following this testimony, an article from today's New York Times outlining the tragic circumstances of increasing numbers of homeless in Denver, Phoenix, and New York City, also be printed in the Record.

The material follows:

STATEMENT OF HON. TED L. WILSON, MAYOR, SALT LAKE CITY

Mr. Chairman and members of the subcommittee, I am Ted Wilson, mayor of Salt Lake City. I appear before you today on behalf of the U.S. Conference of mayors and appreciate the opportunity to testify about the problems confronting local communities resulting from the dramatic increase in the number of homeless people in America. The problems are now particularly acute as the national recession and high unemployment continue into the winter. Earlier this year in Salt Lake City, a man who was sleeping in the back of a pickup truck froze to death. Families are now living in cars, and women and children are wandering the streets in below freezing temperatures.

There is no question that there has been a tremendous increase in the number of homeless people in Salt Lake City during the last two to three years. Based on the information reported to my office by local law enforcement and social agencies, the number of homeless people has more than doubled during the past year alone. There are now more than one thousand homeless people in Salt Lake City. This may not sound like many people, but they constitute a tremendous number for a city that traditionally has not had more than two to three hundred homeless people at a given time. There are also many more homeless women and children than we have ever seen before. Approximately eighty percent of the homeless people are single males, ten percent single females, and ten percent families usually consisting of a single parent and several children.

Public, charitable, and religious organizations began reporting last winter that they could no longer provide emergency assistance for anywhere near the number of people who were requesting aid. In response to this crisis, I appointed a task force on homelessness, composed of knowledgeable individuals representing various segments of our community, to analyze the situation and recommend policy initiatives to meet the basic needs of the homeless.

The task force found that the majority of homeless individuals in our area could not be categorized in terms of the conventional notions pertaining to transients and vagrants. Rather, it discovered that the most significant characteristic of the increasing number of homeless people was their recent unemployment. Most of the homeless people we see today were hard working and productive citizens not long ago, and more than anything else they want to work again. They are responsible individuals who have become the victims of harsh and insensitive economic policies over which they have no control.

The task force also found that many of the homeless people in Salt Lake City were coming from the urban areas in the industial heartland of the country where unemployment was most severe. A large number of these people reported that stories about energy development in the overthrust belt induced them to come to the intermountain west looking for jobs. Utah, like other Sun belt States, has also received considerable national publicity as an economically dynamic State with numerous social, cultural, and recreational amenities. Salt Lake City is also the crossroads of the West; it is the major urban and transportation hub between Denver and the west coast. In short, many socially and economically disadvantaged people throughout the country have looked at the intermountain west as good place to find jobs and put their lives back together again. Salt Lake City is the central metropolitan area through which they pass enroute to their desired destinations and to which they return when their hopes and money fade away.

I also want to emphasize that although Utah has a lower level of unemployment than the large industrial States, unemployment in Utah has increased dramatically during the last year; it is now well over eight and one-half percent. Combined with our mall population—less than one and one-half million people in the entire State—this means that there are very few available jobs. It also means that an ever increasing number of our homeless people are residents of our own State. Like the Nation as a

whole, we are also experiencing the consequences of the national recession.

Confronted with these problems, Salt Lake Cty has tried to be responsive in meeting the basic needs of the homeless without encouraging an influx of the destitute which would exacerbate the situation and overwhelm our efforts. Like other municipal governments, our budgetary constraints have tightened considerably over the last four or five years, nevertheless, we have committed \$85,000 of this year's community development block grant funds for emergency housing. We have also doubled the city's appropriation to the rescue mission, a local relief agency, from \$700 to \$1,400 a month. This is in addition to \$40,000 that we contributed to the rescue mission last year to rehabilitate its facility. The Salt Lake City Housing Authority has also made a four unit complex available to traveler's aid for emergency housing. The city has further committed \$19,375 to traveler's aid to rehabilitate the units and \$8,750 for operational expenses. The city has also allocated \$18,800 to the housing outreach rental program and \$21,275 to the housing authority to assist low income and displaced families find affordable housing. These efforts have been made despite the fact that Utah law gives no social service responsibilities to cities.

As a result of the findings of my task force on homelessness and other public and private efforts, the State of Utah has recently made a surplus State building available to be used for housing homeless people this winter. The Salt Lake City redevelopment agency has also made a fourplex available for the same purpose. Both of these facilities, which will be opening their doors this week, will be managed by a coalition of private, charitable and religious organiza-tions in our community. The State, county, and city are also in the process of providing a modest level of funding to supplement the numerous contributions that are now being made by businesses and private individuals throughout our community to operate the facilities. In short, we are doing everything that we can to prevent people from suffering, or even possibly dying on our streets, because they lack adequate shelter or food.

We are working hard to meet our responsibility in Sale Lake City, but I am fearful that we may also be creating what I call a 'blinking light" effect. I am concerned that if only a handful of communities are able to meet the basic needs of the homeless while the vast majority of others are able to do relatively little, those communities that are responsive will become neon lights beckoning the destitute from across the country to come to them for help. There have been numerous documented cases of municipalities from surrounding States which are less able to help and have purchased bus tickets to send the homeless people in their jurisdictions to Salt Lake City. I am sure this is also happening to other communities that have been particularly sensitive to the needs of the homeless.

I believe that unless the Federal Government provides some minimal assistance to assure that basic needs are met across the country, every community will fear becoming part of the blinking light syndrome. I emphasize, however, that the primary responsibility for the care of the homeless should remain with State and local governments in conjunction with the efforts of private, charitable, and religious organizations. I am not asking the Federal Government to establish a new program or to bail out State and local governments. Rather, I am sug-

gesting that the Federal Government exercise its authority and provide sufficient funding to achieve a degree of equity among the States and localities and to assure that the most fundamental needs of homeless people are met. After all, when national economic conditions cause people to be desperate and to leave their homes in search of jobs, then we have a Federal problem and the Federal Government has a responsibilty to provide its fair share of the solution.

The problems we are facing in Salt Lake City exists this winter in cities across the nation. On November 22, 1982, my fellow mayor, Ernest N. Morial of New Orleans, who chairs the Conference's Health, Education, Employment and Human Services Committee, convened an emergency meeting of the committee on emergency service needs in cities. That committee heard from a variety of city health and human services officials and from representatives of the Nation's major service organizations, including the United Way of America, National Council of Churches, U.S. Catholic Conference, and the Volunteers of America. The mayors drafted a five-point plan to help avert a disasterous winter for those in need. The plan calls for:

An increased supply of surplus commodities to soup kitchens and other institutional feeding sites by the U.S. Department of Agriculture.

2. An emergency appropriation during the lame duck session of \$500 million for use this winter in cities. Funds would be available to meet emergency needs such as food, shelter, heat, medical care, or clothing.

3. Immediate congessional consideration of ways to provide health insurance to re-

cently unemployed people.

4. Provision of funds to rehabilitate structures as emergency shelters. An amendment to the housing and community development act could provide new money for a grant program to municipalities and non-profit organizations for the rehabilitation of existing structures into emergency shelters. The use of funds would be restricted to physical repairs and utility costs.

5. Action in the lame duck session to stimulate job creation at the local level through immediate increases in funding of repair of streets, bridges, sewer and water systems.

Just last week Coleman Young, Mayor of

Detroit and President of the Conference of Mayors, declared a state of emergency and a survival program in his city to prevent the starvation and freezing of destitute city residents. Later in the week at a large national meeting of Mayors and business leaders, the vice chairman of Atlantic Richfield, Edward M. Benson, echoed Mayor Young's serious concern. Mr. Benson acknowledged that cities face urgent needs for emergency aid and said that the private sector should share in the responsibility to meet the need. Clearly emergency help is needed from all sections of our society and no one sector of level of government can or should bear the burden of emergency relief alone.

During the cold winter of the recession, we all need to show some care and concern for the less fortunate members of our society who are paying the real price of fighting inflation through unemployment. We need to show compassion for the victims of harsh economic policies aimed at balancing the budget and lowering the Federal deficit on the backs of the working people. There has been no time in the last forty years when the public policies of this country have been more insensitive to the human needs of the less fortunate members of our society. As

Mayor, I will do all that I can to help the homeless people in my city. However, I assure you that there are limits to the resources of State and local governments as well as the efforts of private, charitable, and religious organizations. As a top priority, I believe that we need to do all that we can to assure that there is a job for every person who is willing to work in this country. There is no greater destructive force of the individual, family and social values we cherish as a nation than unemployment.

As we go into the winter of our national discontent and as we approach the Christmas season we must search our hearts and find a place for the homeless. They are uspeople like us searching for basic work, searching for a new lease on life, searching for someone who will care. Unfortunately, their children often go with them and, in the process, learn lessons about the real quality of our society. Will we teach those children we are a people who care? or, will we sit idly by cur own warm hearths casting pity but doing nothing?

HOMELESS CRISSCROSS U.S., UNTIL THEIR CARS AND THEIR DREAMS BREAK DOWN (By Iver Peterson)

Denver. Dec. 14.—Across the country, in church shelters, abandoned buildings, in broken-down cars with license plates from faraway, the tide of homeless Americans is rising.

They are the victims of darkened factories in the industrial Middle West, of cuts in welfare benefits that force them out of tenements in Chicago, of the renovation of old transient hotels on Manhattan's Upper West Side. They are migrant tobacco workers stranded in Springfield, Mass., and idled lumbermen who have lost their houses in the Northwest.

And they make up a swelling tribe of nomads, victims of an often-broken dream that a job, a home in time for Christmas, awaits them at the next city, if only they

could get there.

"The problem is dire and it is getting worse," said Robert M. Hayes, head of the National Coalition for the Homeless in New York. "We've seen estimates that there are between a half million to two million homeless people in the country, but the number is irrelevant because whatever the number is, it is perfectly clear that the need is far greater than the help that is available."

On Wednesday, the first Congressional hearing on homelessness in America since the Depression will be held by the House Subcommittee on Housing and Economic

Development.

Officials say there may be 36,000 homeless men and women and 20,000 homeless children on the streets of New York City alone, where the lack of affordable housing has greatly contributed to the problem. In one case on Long Island, Mr. Hayes says, the father became disabled and lost his income, forcing the family to live in a pickup truck at a shopping mall.

Mr. Hayes's group went to court last month in an attempt to force Nassau County to provide emergency shelter for homeless families, as it succeeded in doing in New York City. The city uses five or six hotels to house families who have lost their homes to fire. Armories, opened two winters ago for families whose homes had no heat, have become part of the shelter system.

The alleys and rail yards of major cities have long harbored destitute men, the hobos and derelicts that have long influenced the public's perception of homeless-

But church and welfare workers are now talking about the "new poor" and the "new homeless." The officials say that while many of the homeless stay put in the communities where they once knew better times, an increasing number are taking to the road.

"These are families who had been fairly stable in their jobs and skills, people who may have been moving up an employee ladder and seemed to be heading somewhere," said Les Jones, head of the Denver

Traveler's Aid office.

"They could be auto assemblers or steel workers or service workers used to fairly good pay who lost their jobs in the recession," he said. "At first they stayed at home, eating into their resources, waiting for the job to come back, and finally, when their money is almost all gone, they pile into the car and head for someplace else, for out here, looking for, hoping for, the \$10-\$12 an hour job they had before."

But, Mr. Jones said, those jobs are not here either, or in Tucson, Oklahoma City, Houston, or any of the other western cities that have lured men and women in boom times. New migrants are met by scarce minimum-wage jobs, hard-to-find and expensive housing, and few government services.

## 'LOOK AT WHERE WE ARE NOW'

"If you can believe it," said James Thom, lately of Ely, Minn., "last August we owned our own house and a service station on the busiest intersection in town. Owned them both, and look at where we are now."

Now the only thing Mr. Thoms owns is the broken-down 1957 Chevrolet school bus parked behind the St. Vincent de Paul church center in Denver's Hispanic neighborhood.

The bus is their home. In it Mr. Thom and his wife, Bonnie Sue, and their children, 18-month-old Nicholas and six-year-old Jessics shiver through the deepening winter nights and while away the pale mountain days trying to find the money to buy the gas and transmission parts that would get them to Tucson and the jobs they believe they can find there.

The Thoms are victims of the industrial recession. Ely lies in the Minne sota Iron Range, and as the economy slowed down, demand for steel faltered. Ely's six iron mines, along with many others on the Range, shut down. A lot of Ely businesses, including Mr. Thom's filling station, were forced to close too. "A laid-off miner isn't driving to work anymore and he sure isn't buying much gas," Mr. Thom said.

## 'WE WANT TO GET MOVING ON'

"We heard all about the jobs there were in Colorado and Arizona," added Mrs. Thom, who had just returned from an unsuccessful attempt to get free government surplus cheese. "But if the jobs are here, we sure can't see them. That's why we want to get moving on, only"—she smiled ruefully—"we can't do that either."

Dan Hancock, who had a factory job in Newark until last year, said: "The way we get by is I go behind the supermarkets where they throw away a lot of good fruit and vegetables, and I can get the stuff right out of the garbage dumpsters. If you get the right spices, I can make potato soup taste like clam chowder."

When he lost his job, he drifted to Texas, looking for work. There was none, but he met and married his wife, Sue. With her daughter Donna they moved to California, then to North Dakota, where a janitor's job lasted until this summer, and then to a car-

nival job in Clackamas County, Ore., outside Portland.

But then the carnival closed for the winter, and the Hancocks live in a Portland hotel that has been made into a shelter for the homeless. They scrounge for food and worry about finding shoes for Donna who, because of their traveling, has not yet started school.

#### THEY'RE CRYING AND FRUSTRATED

"The problem is unbelievable," said Bill Lewis, housing director for Northwest Pilot Project Inc., a community service group. "Not a day goes by that I don't get a call from someone being evicted because of running out of rent.

And in Phoenix, Peggy Gearan, director of the St. Vincent de Paul Transient Aid Program, said: "It's gotten to crisis proportions. These people are going from California to Florida and from Florida to California, and they all pass through here, just like ants, moving all the time.

Ninety-two percent of the calls Mrs. Gearan gets come from stranded families, she said. "We pay for fixing up their cars, put in gas, and get them moving as fast as we can."

Phoenix has taken one of most adamant stances against transients. At one point it closed all its public shelters and only recently, under pressure, allowed one to open.

#### UNWELCOME IN PHOENIX

The city also passed a law making it a misdemeanor to lie down in public. It has declared garbage public property, making it illegal to pick through it, and there have been proposals to spray the dumpsters with kerosene, making the refuse inedible, to discourage foraging.

courage foraging.

The attitude is not unique to Phoenix.
"The Bums Are Back," said a leaflet handed out by merchants near Chicago's People's Church, a shelter for the homeless.

Terry Sharp, of the Good Samaritan Shelter here, defended his homelesss people. "We don't know and we don't ask what they've done in the past," he said. "If you're cold and hungry you get helped, but I suppose might find some guys who started missing on their support payments and are running from that. But not much else."

## CRIMES AND SUFFERING CHILDREN

Indeed, if crimes are committed, they are against the homeless. A young woman sleeping under a bridge here in town was found murdered last summer. Edward Langley, who said he has put 100,000 miles on his 1968 Rambler since he and his family left Michigan a year ago, said, "Getting your car broken into and vandalized is something you get used to when people know you're from out of state and have no place to go. They just figure we're bums anybody can pick on."

And the children suffer and not just from the lack of school or homes, or from the candy and sweetened cereals that seem to be a staple of charity donations at many shelters. They also suffer from the neglect of parents too preoccupied with their plight to care for them properly.

Holly Reed, seven months old, was one of those children. Last Monday she froze to death while sleeping in the car she lived in with her mother and father in the streets of Denver.

# EXPLANATION OF VOTES

Mr. ROBERT C. BYRD. Mr. President, with respect to the amendment

yesterday dealing with natural gas pricing and contractual issues, I voted in favor of tabling a provision which would have had the effect of abrogating many natural gas supply contracts. It seemed evident that the confusion and the flood of litigation that would have followed in the wake of such a proposal made it an unworkable and impractical approach to a problem facing West Virginia's residential and industrial gas customers.

Further, gas producers in West Virginia and other States need the assurance that the legal contracts they hold will not be arbitrarily overturned.

West Virginia gas consumers face rising natural prices despite a decrease in demand for gas. The crippling depression in my region of the country makes it very difficult for gas consumers to keep up with increasing gas

For that reason, I voted against a motion to table a provision that was intended to hold some natural gas prices at current levels for the next 2 years

Consumers in West Virginia deserve to have a chance for some relief from rapidly escalating gas bills. While the effectiveness of the proposal to hold some gas prices steady may be questionable in the short run, a deeper discussion of this proposal is warranted.

I cosponsored the Exon-McClure resolution dealing with natural gas prices, supply contracts, and low-income energy assistance. The resolution clearly expresses the will of the Senate that the Federal Energy Regulatory Commission use its full statutory authority to examine the effects of so-called take-or-pay contracts on gas producers, distributors, and consumers. I have exchanged correspondence with FERC Chairman Butler on this issue. He informs me that FERC is engaged in a detailed study of this complex contractual issue.

The resolution reemphasizes to the FERC that the Senate expects the Agency to take steps to prevent unfair and unreasonable burdens from being loaded onto gas consumers. Our long-term goal should be to encourage an adequate supply of natural gas at prices that are fair to both producers

and consumers.

The resolution also expresses the sense of the Senate that the lowincome energy assistance program should be funded at the highest possible level from available appropriations. People faced with rising gas bills, rising food and shelter prices, and the prospect of a cold winter, need and deserve help. Since food is an absolute necessity, some elderly and lowincome people have been forced into a choice of "heat or eat." This program, which the Congress has defended from several recent attempts at significant funding reduction, is necessary for the fundamental well-being of our most unfortunate citizens.

## RECESS UNTIL 9:45 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, the Senate, at 1:43 a.m., recessed until Thursday, December 16, 1982, 9:45 a.m.

#### NOMINATIONS

Executive nominations received by the Senate, December 15, 1982:

#### DEPARTMENT OF DEFENSE

Thomas Edward Cooper, of Virginia, to be an Assistant Secretary of the Air Force, vice Alton Gold Keel, Jr., resigned.

#### IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert Charles Kingston, 012-22-3429, U.S. Army.

#### IN THE NAVY

The following-named chief warrant officers, W-3 to be appointed permanent chief warrant officer, W-2, in the U.S. Navy, subject to qualification therefor as provided by law:

The following-named Navy enlisted candi-

# EXTENSIONS OF REMARKS

AIR FORCE ASSOCIATION SPEAKS OUT ON AMERICA'S DEFENSE NEEDS

# HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. KEMP. Mr. Speaker, recently the delegates to the Air Force Association national convention unanimously adopted a strong statement on the threat, the need to rebuild our deterrent posture, and the misguided campaign to "freeze" all development, testing, and production of nuclear weapons. In its new statement of policy, AFA states:

The central factor that would keep the U.S.S.R. from provoking nuclear war is the prospect of losing. Thus, there is no more commanding peace-keeping task than to develop the forces and capabilities to convince the Soviets that they cannot win.

The statement of policy of the 180,000-member Air Force Association is designed to give voice to the objectives of the association and to support armed strength, adequate to maintain the security and peace of the United States and the free world.

Mr. Speaker, I ask that the AFA statement of policy be printed in its entirety and I commend this thoughtful paper to my colleagues.

THE FANTASY OF SIMPLISTIC SOLUTIONS

The Soviet threat is real. It is not a fantasy contrived by fearmongers or arms merchants. It results from the most awesome war machine in history. The Soviet war machine is the product of a single-minded ideology spawned by force, committed to force, and brandishing force domestically and externally to perpetuate an insecure, morally hollow system of imperial power. And the war machine is growing.

Military power remains the principal instrument available to the Soviet dictatorship for extending the system's frontiers and to save it from internal dissension and disintegration. An ever-increasing share of the Soviet Union's gross national product—estimated to reach about twenty percent in this decade—is being lavished on military expansion while the standard of living of the Soviet people stagnates, and its economy foundate.

The evidence that the Soviet Union and its Warsaw Pact outmans, outguns, and, in the military sector, outproduces the United States and its allies is incontrovertible. There is a tendency to dismiss this fact with the claim that military superiority in the nuclear age is meaningless. Such a contention is a dangerous delusion and is contrary to logic and history. It disregards, to this nation's peril, the words and deeds of the

to logic and history. It disregards, to this nation's peril, the words and deeds of the Soviet leadership that spell out a doctrine geared to winning whatever type of wars the USSR gets into—be they conventional,

chemical, or nuclear—and to use military superiority in a politically coercive fashion. The dismissal of the importance of the growing Soviet military power only serves those who hold that defense investments should be determined by economic conditions and scaled to social spending rather than be determined by the character and size of the threat.

Soviet military power continues to grow in all fields. In the past, this growth has not been affected by variations in the pace of the US defense effort. Since the mid-1960s, the Soviets have nearly doubled real defense spending and more than doubled military research and development. In short, when we built, they built; when we stopped, they built.

They have increased their intercontinental nuclear delivery vehicles nearly sixfold; that, coupled with improved accuracy, makes those weapons a major threat to US and allied security. The number of nuclear warheads carried by the Soviet ICBM force is now more than twice the US total, and some of the Soviet warheads are more accurate than the best in the US inventory.

They have more than tripled the number of their theater and battlefield nuclear weapons. They outproduce the US in tactical fighters by a ratio of better than two and a half to one. The Soviet Navy, in a remarkably short time, has become a huge, heavily armed, powerful fleet encompassing nuclear-powered surface ships, the world's largest submarine force, and, now, aircraft carriers. The Soviet ground forces also have significant advantages in armored vehicles, tactical defenses, and active military manower.

The Soviet force modernization program combines the historic emphasis of producing large quantities of military equipment with comprehensive qualitative improvements. The US and its allies, therefore, cannot count on offsetting these increasing quantitative deficiencies with greater technological sophistication. The Soviet boast that the military balance has shifted in their favor "once and for all and irrevocably" is about to become a reality unless America and the free world make a sustained commitment to rebuild their defenses. The fragile advantage of the US and its allies in tactics, training, and technology must be exploited to the utmost.

Nowhere is revitalization more urgent than in nuclear deterrence capabilities. The Soviets are designing their strategic nuclear forces so they can win a nuclear war. The central factor that would keep the USSR from provoking nuclear war is the prospect of losing. Thus, there is no more commanding peacekeeping task than to develop the forces and capabilities to convince the Soviets that they cannot win. Further, the American people must not lose sight of the fact that what constitutes—or does not constitute—a credible US deterrent is determined by the perceptions of the Soviet leadership and not by ideals expressed by many American and international groups.

Americans should be concerned that domestic and international groups promoting simplistically an immediate nuclear freeze are achieving ends diametrically opposed to their own professed goals of nuclear stabili-

ty and arms reduction. The rhetoric of the campaign to stop immediately the modernization of nuclear weapons—and against their "first use"—is based on twisted arguments, and feeds the public's fear of nuclear war in order to capitalize on it. The campaign's propagandists, at home and abroad, have shifted the focus of the discussion from deterrence of all forms of war and military aggression to the horrors only of nuclear war, and are hiding the burgeoning growth in Soviet nuclear weapons behind misrepresentations of US responses to that growth.

The Air Force Association believes a nuclear freeze today is simply not in the national or the free world's best interest. It would leave us with a permanently weakened deterrent posture. It would perpetuate the very vulnerabilities and inadequacies we are making great efforts to overcome. It would decrease strategic stability and grant the Soviets, without incentive to reciprocate, their major objectives in the START (Strategic Arms Reduction Talks) and Intermediate-Range Nuclear Force negotiations. The US properly seeks a long-term, mutual, and verifiable nuclear freeze at equal and sharply reduced levels of forces.

It is important for the American people to understand clearly that no negotiations can change the fact, or disregard, that this country and the USSR—by the latter's choice—are ideological and geopolitical adversaries. We negoiate from vastily different premises of morality, political philosophy, and standards of right and wrong. Therfore, the US can no more negotiate from a position of weakness than it can deter through inferiority. There is a clear-cut need to modernize aging and increasingly vulnerable nuclear strategic systems. The nuclear freeze movement disregards the fact that the current strategic nuclear force balance is destabilizing and will, if not corrected, increase the likelihood of nuclear war. This Association believes there is a right way to achieve equal and sharply reduced levels of forces, to curb the so-called "arms race," enhance deterrence and stability, and lower the destructive potential between the superpowers. The Administration has found the right way.

The Administration's five-pronged strategic force modernization program provides fundamental leverage for equitable arms reduction; it does not move the world toward nuclear war but away from it. The MX ICBM, the B-1B, the Trident D-5 SLBM (sea-launched ballistic missile), an improved, survivable command and control system and revitalized strategic defenses are needed not only to counter current Soviet force levels but also at the reduced levels envisioned with the US START proposal. With reduced numbers of warheads, survivability and effectiveness become even more critical than with a larger force. The nation must not forget that deterrence is a product of capability and credibility. If either is low, so is deterrence.

The combined effect of the strategic force modernization program will be that this nation's nuclear forces could survive Soviet first strikes and retaliate. Such a condition will reduce sharply Soviet temptation to use their nuclear weapons for blackmail and lift from the US National Command Authorities the terrible burden of either using the strategic nuclear forces at once or surrendering. The present hair-trigger posture that encourages Soviet nuclear adventurism is incompatible with effective deterrence.

Modernization of the strategic nuclear forces alone is not enough. In the view of this Association, strategic modernization must be coupled with other long-standing needs of our armed forces that are essential for proper balance. These include continued improvements in the readiness and staying power as well as modernization of the general-purpose forces, enhancement of the mobility and airlift capabilities, and expansion and modernization of tactical forces. The strong common denominator of all these programs must be improved warfighting capability. This requires strengthened readiness and sustainability, intensified realistic training, refined tactics, increased flying hours, and improved pay and benefits of men and women serving in the Armed Forces. In this context, the nation must safeguard the centrally decisive element of continuity and advantage in its defense posture-well-trained and dedicated people serving in the Air Force and the other ser-

The Air Force Association applauds increasing recognition of the total, joint character of national defense and concerted efforts to avoid separate and parochial approaches that waste scarce resources and do not produce the defensive strengths this nation requires. The individual services exist to provide national security through harmonious, streamlined interaction and mutual reinforcement. No service fights alone. They must plan and exercise together, just as they would fight—jointly and shoulder-to-shoulder with our allies.

The overriding requirement of our times is to retain the consensus on building a strong national defense, forged by a recognition of the mounting Soviet threat, and to maintain the momentum of the programs that are essential to this goal. The Defense budgets, as drafted by the Administration for this and subsequent years, represent an essential step toward achieving this longterm objective. They must be supported. To enhance public understanding of the importance of national defense to our nation's freedom and survival, AFA advocates a deliberate program of education in military history and science in American schools and colleges.

If we as a nation—in concert with cur allies—remain steadfast in the pursuit of a prudent national security policy, we might, one day, convince the leadership of the Soviet Union to abandon imperialism, and instead seek the legitimacy that only comes from the consent of the governed. Until then, we must not forget that war comes not when the forces of freedom are strong but when they are weak. It is at these times that tyrants are tempted. We must not tempt them.

SOVIET WATCH: SURVEYING THE BREZHNEV LEGACY

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

 Mr. FIELDS. Mr. Speaker, I enter the following material into the RECORD for the benefit of our colleagues.

[From the Washington Times]
SURVEYING THE BREZHNEV LEGACY
(By W. Bruce Weinrod)

The death of Leonid Brezhnev is already producing an assortment of favorable reminiscences, as well as hopeful expectations for the course of future U.S.-Soviet relations: we hear Jimmy Carter fondly recalling Brezhnev's fervent desire for world peace and Cyrus Vance stating that Brezhnev's greatest legacy is his arms control efforts.

Do these and other similar generally sympathetic comments about the Brezhnev era reflect the actual Soviet record under Brezhnev? This question is critical, for how it is answered will influence the U.S. approach to dealing with the U.S.S.R. in the immediate post-Brezhnev era. The U.S. will be ill-served by romanticizing and distorting the Brezhnev legacy.

A pluralistic world was completely unacceptable to Brezhnev. The most dramatic demonstration of this is the "Brezhnev Doctrine" of 1968. Brezhnev used this to justify the Soviet invasion of Czechoslovakia in 1968, the invasion of Afghanistan in 1979 and the suppression of Polish liberties in 1981. This is part of the Brezhnev legacy.

Just in the past decade, the Soviets have added 733 nuclear-capable missiles (land, sea and air) and have increased their warhead supply by over 4,000. Since SALT I and the start of the so-called detente era, when the strategic equation was supposed to be stabilized, the Soviets have added, among others: several hundred later model SS-11 rockets, over 800 SS-18s, SS-19s and SS-20s; over 50 nuclear subs with about 2,000 nuclear warheads; and over 150 Backfire intercontinental bombers. Despite the well-publi-"Brezhnev freeze," which he announced in March 1982 that the Soviets would stop further deployment of SS-20s targeted on Western Europe, deployment has continued.

The Soviets and their Warsaw Pact satellites also have continued to increase what already was conventional weapon superiority over the West. In all, the Soviet union is spending roughly 40 percent more on military outlays than is the United States. And Moscow is allocating roughly 12 to 15 percent of its GNP to military spending; the U.S., even with current spending hikes, is only at about 6 percent of GNP.

only at about 6 percent of GNP.
From 1971 to 1981, the U.S.S.R. outspent the U.S. militarily by around \$400 billion. During the past decade, Brezhnev added 10,000 new heavy and medium tanks, 8,000 pieces of artillery and 765 combat aircraft. Just since Reagan took office, the Soviets have added 2,000 tanks, 1,350 fighters and fighterbombers, and 4,500 fighting vehicles. This is an unavoidable hard truth of the Brezhnev legacy.

Not only did Brezhnev snuff budding liberty and pluralism in Eastern Europe, he also provided substantial aid to terrorists trying to disrupt Turkey's pro-democratic and pro-Western government, and has con-

tinued attempts to exploit Iran's instability. While Americans were being held hostage, Brezhnev continued to fan anti-American fervor in Iran.

In Asia, the Soviets financed and encouraged the North Vietnamese invasion of the Sout, in violation of the peace agreement of 1973h, and now is financially inderwriting the Vietnamese occupation of Cambodia.

In the Middle East, the Soviets encouraged Nasser's blockade of Israel in 1967, which precipitated the Six-Day War, and subsequently supported the Arabs in the 1973 war. A Soviet-supported coup in 1978 in South Yemen has made that nation a protectorate of the Russians, and the Soviets have transferred large amounts of arms to both sides in the Iran-Iraq war, encouraging instability in that region.

In Africa, the Soviets under Brezhnev have aided the most radical and destabilizing groups, including the African National Congress and SWAPO. Moscow is aiding the Polisario guerrillas fighting against America's ally, Morocco. Further south, the Soviets brought the Cubans into Angola. Closer to the U.S., Brezhnev continually sought to violate the understanding ending the Cuban missile crisis by trying to expand the Soviet submarine base at Clenfuegos.

The Brezhnev legacy is pockmarked by Soviet treaty violations. Experts can cite continuing Soviet violations of the SALT I Treaty—supposedly a symbol of Brezhnev's commitment to arms control. Moscow trains and supports terrorists from the PLO to Libya to the attempted assassin of Pope John Paul II. The Brezhnev legacy is filled with unremitting domestic repression as well.

What then are the hard truths of the Brezhnev legacy? The answer: unremitting efforts to gain advantage at the expense of the U.S. and the Free World and an unyielding hostility to pluralistic societies.

Can the future bring improvements in U.S.-Soviet relations? Perhaps Moscow's new leadership will seek to relax world tensions. U.S. policy, however, cannot be based upon hopes that have often proved illusory in the past.

The hard truths, learned from painful experience, teach that the U.S. should continue to pressure the Soviets, forcing them to make difficult choices in terms of foreign involvement and the allocation of resources. If Moscow decides to move toward genuine peace, Washington will know it soon enough.

Unless and until the Soviets alter their course in a meaningful way, such as allowing independent trade unions in Poland, or permitting a genuinely independent government in Afghanistan, conciliatory gestures from the United States are inappropriate. The fundamental fact is that it is the realities of the Soviet Union and not the individuals who develop policies which govern U.S. decisions. The burden must be on Moscow's new leaders to prove that they are not the heirs to the Brezhnev legacy.

## TOBY MOFFETT

# HON. ROMANO MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 14, 1982

 Mr. MAZZOLI. Mr. Speaker, I would like to pay tribute to a respectavenues of interest.

SHIRLEY CHISHOLM

# HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

• Mr. BIAGGI. Mr. Speaker, as many of us know all too well, when this session of Congress concludes we will be saying farewell to a number of our colleagues. In my judgment there are none who have served with more distinction than the retiring Member from the 12th Congressional District of Brooklyn. N.Y.. SHIRLEY CHISHOLM.

SHIRLEY CHISHOLM and I were elected to Congress the exact same year—1968—so I, therefore, have more knowledge and appreciation of her than do some of my other colleagues. Shirley Chisholm, is a lifelong native of Brooklyn, which is the largest borough of New York City. She was a product of Brooklyn public schools, of Brooklyn College and received her masters degree at Columbia University. She is also the proud holder of 15 honorary degrees.

Shirley and I did serve together on the House Education and Labor Committee and I was constantly in respect of her commitment to the cause of improving the quality of education for the children of this Nation—especially those from our home city of New York. Even after she left the committee to become a member of the Rules Committee, Shirley continued to be active in the affairs of the committee through testifying at hearings and developing amendments to various bills which were introduced either in committee or on the House floor.

Shirley did shine in the national limelight on many occasions during her career in the Congress but no time any brighter than when she ran for President of the United States in the year 1972. Her candidacy may not have succeeded in the electoral sense—but it made a positive impact on many people in this Nation who saw the gentlewoman from Brooklyn as a champion for the poor and needy of our Nation and brought their plight to national attention.

While it is true that SHIRLEY CHISHOLM is retiring from the House of Representatives, few of us who know her believe it to be anything more than a transitional retirement. A woman of her dynamism and energy simply must find a new forum to channel and project her talents. I know either she will find the new forum or it will find her.

one finds it difficult to effectively measure an individual Member's contribution to the House. Yet we all know those who have impacted on the House—Shirley Chisholm clearly was a Member who impacted on the House and the Nation as well. She was a woman of compassion, commitment,

and above all—competency. On many occasions she functioned as the conscience of this House.

I will miss my dear friend Shirley, but of course wish her well in any and all future endeavors she may have planned. I express warm regards to her husband Arthur and I am sure he looks forward to having more time to spend with his remarkable wife.

# PHOTOVOLTAICS: LOSING OUR GOLDEN OPPORTUNITY

# HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

Mr. HARKIN. Mr. Speaker, through incredible shortsightedness, our Nation is losing an opportunity to be the world leader in an important and growing industry that will mean jobs and increased energy independence.

Until recently, our Nation led the world in photovoltaic energy, the process of directly turning sunlight into electric energy. However, under pressure from this administration which wants to completely stop all funding for solar energy research, the Congress has sharply reduced the funding of many valuable projects.

At the same time, Japan, France, Germany, and many other countries have been rapidly increasing their efforts. In those countries, businesses are getting a great deal of help from their governments. In the United States, there is less help, and the tax benefits that they now enjoy are under attack.

We have just started to see the building of photovoltaic facilities designed to be a real part of the electric grid in California. This is an industry that we can expect to expand by more than 50-fold by the end of this century. The market will develop. The question is, how much of the market will be based in the United States? Is this going to be another area like video recorders where all of the parts are made in Japan and imported, or will it be an industry which will provide jobs in the United States?

I believe this is an area where we must change our course. We must provide the photovoltaic industry with the backing it needs.

As a member of the Energy Development and Applications Subcommittee of the House Science and Technology Committee which authorizes the research funds in this area, I have always been a strong proponent of solar energy. I plan to increase my efforts to make a strong and vibrant solar industry a reality in the United States. I would like to place an article into the Record from the December 12 Washington Post concerning a hearing

# HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. PEPPER. Mr. Speaker, we all know how moving it can be to see a painting, or read a poem, or hear a song that catches our mood and touches our hearts. It is a rare gift of the woman or man who possesses the talent to evoke from within us our hidden emotions by their art. I consider myself to be fortunate in counting such creative people among the friends I have in Frank and Pete Loconto of my district in Miami. The Loconto brothers have written and performed some songs which I shall never forget. One of them was a beautiful melody honoring my late beloved wife, Mildred, and me. Such a thoughtful contribution to her memory is invaluable to me and there are many other folks whose lives have been enriched by the artistic talents of the Locontos.

This past August, I was fortunate to be in attendance at the 1982 Convention of the International Platform Association at which my friend Frank performed a tribute to that great American writer, Lowell Thomas. The lyrics to that song were written by another man possessed of great talent, Mr. Robert Thompson of Boca Raton, Fla. The music was composed by Frank Loconto himself. So that my colleagues can better appreciate the artistic genius of these talented men, I include here the words of their song:

## TRIBUTE TO LOWELL THOMAS

There was a man we all once knew
As close as any friend
We knew him through the radio
And by the books he penned
With Lawrence of Arabia
He rode the golden sands
And gave us memories to keep
Of far and distant lands.
From Timbuktu to the frozen north
He travelled far and wide
He brought his adventure to our lives
He was our special guide
So long—his voice we still can hear
It was his special phrase

We say it now to you, dear Lowell

We'll miss you all these days.

chaired by Congressman BERKLEY BEDELL on this subject.

CUTBACKS IN INVESTMENT SEEN THREATENING LEAD U.S. HOLDS IN SOLAR CELLS

(By Martha M. Hamilton)

The United States is in danger of blowing its early lead in the emerging worldwide market for solar cell production, according to a study by the Worldwatch Institute, a nonprofit research organization that analyzes global problems.

Oil companies have been the largest source of new capital for the industry in recent years, according to Christopher Flavin, author of the report on the photovoltaics industry. Three solar cell firms that are wholly or partly owned by oil companies (Solarex, Arco Solar and Solar Power Corp.) had 80 percent of the worldwide market for

photovoltaics in 1981.

But while "U.S. firms still have the most advanced solar cell technology, their share

of the market fell from 80 percent in 1980 to 55 percent in 1982," said Flavin. "Competition is intensifying, and the number of companies continues to grow rapidly, particularly in the Third World via joint ventures with European and American companies," he wrote. "Obviously, early leadership will not necessarily translate into lasting strength in this rapidly evolving industry.

The report predicts that solar photovoltaics, or solar cells that directly convert sunlight into electricity, may become "one of the most rapidly expanding energy sources-and one of the biggest growth industries-of the late 20th century.'

Flavin notes that production has grown at a rate of more than 50 percent annually for the last five years and that the price of production has dropped while the efficiency of solar cells have increased. Although they are "still not economic for widespread use, continuing reductions in price will make photovoltaics cost-effective for an increasing range of markets, he said.

Solar cells are now used to power satellites and to provide electricity in remote areas not connected to standard power grids, he

noted.

"Clearly, there are large profits to be made in this industry," Flavin said at a press conference last week. He said that France, Italy, West Germany and Japan have aggressive photovoltaic industries. Japan has even begun to produce solar-powered calculators, toys and watches, he noted.
"I am afraid America may lose out in the

competition for this vast market," said Rep. Berkley Bedell (D-Iowa), chairman of a House Small Business subcommittee that held hearings on the industry last week.

"I am afraid that other nations are going to run us out of the international market using our own technology . . . that U.S. jobs and U.S. exports will be transferred overseas to our competitors because of this administration's failure to recognize and foster the tremendous potential of our photovoltaic energy industry," Bedell said. am afraid that our foreign competitors will eventually beat out our own domestic industry for the lion's share of the market right here in the U.S."

The Worldwatch Institute report also faulted the Reagan administration. "The United States has traditionally had the largest government program in photovoltaics, but the tide has turned, with the Reagan administration slashing the photovoltaics budget from \$150 million in 1980 to about \$50 million in 1983," the report said.

Meanwhile, it noted, the European Economic Community and Japan have been increasing support for the budding industry. Japan's photovoltaics budget has risen more than 140 percent in two years to more than \$30 million, the report said. "Including indirect government support, it is only slightly smaller than that of the U.S. program."

## A TRIBUTE TO CONGRESSMAN GARY LEE

# HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

• Mr. COURTER. Mr. Speaker, in my 4 years in Congress, I have had the fortune of working with many able statesmen and some truly exceptional individuals.

My colleague from New York, GARY LEE, is one such person. His warm and friendly manner reveals a caring person genuinely concerned about the welfare of his constituents and his

fellow man.

He began his career as a schoolteacher, and later became director of scholarships and financial aid at Cornell University. GARY LEE spent many years in local politics in Tompkins County handling the grassroots, everyday responsibilities that keep communities across America running smoothly and functioning efficiently. As an assemblyman, GARY worked to promote the interests of his fellow New Yorkers on the State level. These years of hard, productive, and I am sure rewarding work laid the foundation for Gary's career in Congress.

In the day-to-day workings of this body, GARY's patience for legislative detail made him an invaluable asset in committee assignments. For instance, his legislation on the Transportation Subcommittee helped save the Nation's short-line railroads from impossible competition against the larger railroad industry. He has consistently maintained a low-key profile without a lot of fanfare and notoriety; but GARY was always there when the situation called for direction and a sense of commitment.

GARY LEE epitomizes the ideal of a fine statesman and a true American. I, for one, have been very fortunate to know and work with him. On behalf of his many friends and colleagues, we wish him the best of luck in his new endeavor, and we will sorely miss him in this Chamber.

## THE PEOPLE'S PARADISE

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its highminded idealism. They religiously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dys-

It is for them that the following glimpse of reality is provided.

[From the Lincoln Review, Summer 1982]

THE XEROX MACHINE (By Ilya Suslov)

One of the first items that intrigued me when I came to America was the Xerox machine. I was at the post office and saw the machine there for the first time. A man put in a printed sheet of paper, deposited five cents, and the machine produced a perfect copy. I was dumbfounded! What is this anyway? In this way anyone can make a copy of anything! Print anything one likes!

Leaflets, for example!
"So what?" said Jack, "Let them copy whatever they like."

"But they could be leaflets calling for the overthrow of the United States government!" I protested.

"Big deal!" replied Jack. "It's a free country. You can do all the overthrowing you like."

"But how could that be?" I replied, still failing to comprehend. "What if people read the leaflet and rush to overthrow the government? What would we do then?"

'Who would rush to overthrow the government?" asked jack "I wouldn't."

'Maybe not you. But others might."

"Some actually have. But, as you can see, nothing happened."

Suddenly, I imagine myself back in Moscow. Oh, to have a machine like that in Russia! How many problems it would have solved! For example, Samizdat. The way it is now, manuscripts rejected by the censor are reproduced on typewriters using as many as thirteen carbons. Or they are copied by hand and lent out for two hours at a time with the words, "Read it and pass it on." Just imagine writing something indecent or unprintable, making as many copies

as you need, and distributing them to anyone wishing to read them! I can see it now. The scene is KGB Headquarters in Moscow. A nearly printed Xerox copy of an article (a novel, poem, study, or expose) is lying on the desk of Col. Krasnov. Sitting in a chair in front of the desk is a somewhat embarrassed Samizdat author,

Ivan Petrovich.

"So how is it, my dear Ivan Petrovich," asks the colonel kindly, "that you've taken again to writing objectionable material about our country? What have we done to displease you this time?"

"I'll tell you what you've done!" replies our author. "You made a god-awful mess with your Lenin and Stalin, and now you don't have the guts to admit all your mistakes and crimes. Nor are you willing to begin a bright new lift."

<sup>&</sup>lt;sup>1</sup> Underground publications in Russia

"I've read what you wrote, my friend," replies Krasnov. "It's clear you're quite passionate about it. I really like this line here in your article. Sounds pretty passionate. But, tell me, what happens after that? Suppose you drive us from power-this welloiled patient and customary regime-you'll have chaos all over again! The people, if you don't mind my telling you, Ivan Petrovich, will tear you from limb to limb! We take care not just of ourselves, but you as well, my dear man. The people's wrath is always sacred. You see what happened in Cambodia when things got out of hand? And Iran? So give some thought about what might happen here before you go wasting any more Xerox paper."

"No, no, a thousand times no!" exclaims our author. "Russia is a prison! You don't allow us to think, write, or breathe!"

"Oh come on, now, my dear man! We are just protecting our state system from people like you. You know, I'm surprised at our intelligentsia. Why are they always against everything? And I think I've found the answer."

The colonel walks over to the bookshelf

and reaches for the dictionary.

"See here! 'The intelligentsia are intellectuals in opposition to their government!" Extremely well put. And can we afford the luxury of permitting an opposition? You know the answer, of course-no. So wouldn't it be better if you were to give vent to your opposition, shall we say, abroad? You don't like it here? So, go my good man! You don't like it-goodbye!"

The wily colonel knows very well what he is talking about. He is not interested when the intellectuals scream about a brain drain from the country. He believes in the Marxist principle of transition from quantity to quality: what one Einstein could do, 150 Ivanovs will also do. And all these Ivanovs will not allow themselves to be distracted by melancholy thoughts about the nature of the Russian state. They go by a good rule: "It must be done?—Aye, aye, sir!" Without

any beating around the bush.

And the colonel also knows that when our modest author, (the one who printed that dangerous essay on the Xerox machine,) leaves his homeland, he will be in opposition to a foreign government, losing in the process, losing the right to be called a member of the intelligentsia. Really, when one lives in Russia could you be considered members of the intelligentsia if you kept denouncing democracy? Or America? Or Great Britain? On the contrary, if someone appeared in our society and bitterly attacked "American imperialists and their Zionist underlings," would we have listened to him? would have mentally torn him to bits, at the same time mentally calling him all kinds of ugly names which could not be printed on this page!

Colonel Krasnov knows that the formula for a member of the intelligentsia applies in America too. He must denounce his own government and extol foreign ones.

But our author does not know this yet. He believes that freedom-loving people everywhere in the world will understand him, this sufferer from inside Mother Russia. At the very least he will never have to see the likes of Colonel Krasnov again. . . . So using the Israeli route, Ivan Petrovich emigrates to the United States.

Intellectuals welcome him with open arms. He is invited to people's homes. He gives speeches at universities. Articles about him appear in the newspapers. For the first time in his life he can speak the truth

aloud, without fear of punishment. He exposes the Soviets, he issues warnings, he pleads, he makes appeals!

But one evening he is guest in the home of Mr. Smith. Smith is a lawyer interested in foreign policy. He has also invited the black activist Joe Brown, well known for his "progressive" views. Joe Brown is a liberal who bitterly denounces his own U.S. government. He is a great admirer of Mao, Fidel. and Arafat. He believes that true democracy exists only in Cuba, China, Libya, etc. He is genuinely pained by the efforts of American capitalism to defend itself from the inevitable people's revolution, which will lead to a happy new life.

Ivan Petrovich listens in horror and tries in vain to explain to him the naiveté of his views. He talks about repressions, about the lack of freedom, and about the Xerox ma-

The host, Mr. Smith, takes Ivan Petrovich aside and says, "Look it's getting awkward. Joe Brown is so famous, so progressive and intellectual . . . What will he think of my wife and myself? That we are right-wing conservatives, even reactionaries. In this country, my friend, criticizing left-wing governments is just not the thing to do. A true intellectual concentrates his fire on his

I felt someone shake my shoulder and was brought back to the surroundings of the post office.

"What were you thinking about all that time?" asks Jack. "Just admiring the Xerox machine? Look, right now I'll yell 'Down with the President,' and nothing will happen. That's what we call freedom.

We walk out of the post office onto the street and Jack shouts "Down with the President!'

I look at him and also shout, "Down with the President."

Because for me it is very important to stay in the ranks of the intelligentsia.

## FTC AUTHORIZATION

# HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. DINGELL. Mr. Speaker, the members of the Energy and Commerce Committee have received a communication which I insert in the RECORD at this point from former chairmen of the section of antitrust law of the American Bar Association.

I believe it important that our colleagues review the correspondence which points out their opposition to the provision in the Federal Trade Commission Authorization Act of 1982 which "eliminates the Federal Trade Commission's jurisdiction over professionals."

**DECEMBER 13, 1982.** 

Hon. John D. Dingell,

Chairman, Committee on Energy and Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: As members of the private bar, the undersigned former chairman of the Section of Antitrust Law of the

American Bar Association 1 urge the Congress not to do damage to the integrity of the law by passing the FTC Authorization Act of 1982 (H.R. 6995) with a provision that eliminates the Federal Trade Commission's jurisdiction over professionals. We are concerned that passage of such legislation will improperly dilute the FTC's authority. to the detriment of the economy, consumers, and the public interest.

In our view, legislative proposals to curtail the substantive authority of the FTC raise important and interrelated issues going to the heart of the Commission's enforcement role, and it is not sound public policy to consider such fundamental issues on a piecemeal basis. Instead, proposals of this nature should be considered only after a carefully planned and comprehensive Congressional study of the interrelationship of the FTC's powers, structure, and procedures.

For these reasons, we urge the Congress to reject efforts to immunize professionals from the FTC's jurisdiction. While this issue deserves to be part of a thorough review of the FTC's structure, power, and procedures, it should certainly not be resolved in the context of a reauthorization bill or other piecemeal legislation.

Respectfully submitted,

Harvey M. Applebaum, Washington, D.C.; E. William Barnett, Houston, Texas; Richard K. Decker, Chicago, Illinois; C. Brien Dillon, Houston, Texas; Allen C. Holmes, Cleveland, Ohio; John Izard, Atlanta, Georgia; Miles W. Kirkpatrick, Washington, D.C.; Ira M. Millstein, New York, New York; Earl E. Pollock, Chicago, Illi-nois; Edwin S. Rockefeller, Washington, D.C.; Frederick M. Rowe, Washington, D.C.; Julian O. von Kalinowski, Los Angeles, California.

COMMENTS BY OAS SECRETARY GENERAL ON PRESIDE PRESIDENT'S

# HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

Mr. ZABLOCKI. Mr. Speaker, although reservations have been expressed about certain aspects of President's Reagan's recent trip to Latin America, I believe that on balance, it was widely perceived as a welcome and opportune gesture to our neighbors to the South. The focus of the initiative was essentially bilateral and should help improve U.S. ties with the nations visited.

In addition, however, there are specific regional, multilateral questions which must be addressed by the United States and Latin America in the future. These are succinctly spelled out in the attached statement issued by the Secretary General of the Organization of American States, Alejandro Orfila, on the occasion of Mr.

<sup>&</sup>lt;sup>1</sup> This letter is not being written on behalf of the American Bar Association or any of its component

# **EXTENSIONS OF REMARKS**

Reagan's visit to our friends and neighbors in this Hemisphere.

For the general information and guidance of the Congress I include Secretary General Orfila's statement in the Record at this time:

Mr. Reagan's Hemispheric Visit: Another View

As President Ronald Reagan sets off this week for Latin America, various U.S. critics are charging that this diverts him from the main issues disturbing U.S. foreign policy.

Last week, however, Ministers of 31 OAS countries including U.S. Secretary of State George Shultz, met in their Annual General Assembly and reflected another opinion. Following this meeting how does Latin America perceive this presidential mission?

Reservations have been heard—and properly so—about expecting too much from a visit of this nature. Yet the consensus is that this trip is not a welcome gesture of hemispheric solidarity but a necessary bridge-building venture at precisely this moment in regional history.

One feature of the recently-concluded OAS Assembly was the open yet civil tone which characterized its deliberations. This was noticeably so in the off-the-record dialogue. Eight months ago when the protracted but then suddenly violent dispute between Argentina and Great Britain over the future of the Malvinas Islands first broke into world consciousnes, the situation was completely different. Then, the views expressed within the OAS had a harsh ring to them, and were especially negative against the U.S. decision to side with Great Britain.

However, with Mr. Reagan's mission at hand, several conclusions can now be drawn from the regional debates:

The results of the recent Assembly were good—but hardly exceptional. They constitute a solid beginning on which to restore mutual trust and confidence within the regional system. But the OAS members are not at the beginning of the end of their efforts to heal their relationship which has long been in disarray. They are on the contrary, merely at the end of the beginning of a long healing process.

The Malvinas trauma itself was and is neither the only nor the primary cause of the crisis long evident in the hemispheric system. Rather, this dispute dramatized the more basic crises affecting the OAS: the protracted inability of its member states to address the modern development agenda before the Americas.

This current development agenda is no longer simply that which brought the Alliance for Progress into being two decades ago: widespread deficiencies in health, education, social well-being and basic income. Today, in fact, the major challenges are to assure adequate energy supplies, tap the region's vast food potential, broaden international markets for Latin American products, reduce the region's excessive debt burden and step up job creation opportunities. The goal is to assure integral human development: political, economic, cultural, social and moral, of all hemispheric people and societies while promoting individual freedom and distributive justice.

The United States has latterly made some impressive attempts to respond to the urgent concerns of its neighbors. Does not the peaceful resolution of the Panama Canal dispute—a tribute to President Jimmy Carter and to the late General Omar Torrijos—serve as a model for mankind of conflict resolution between a superpower and a small but sovereign nation?

With the Reagan Administration another positive door opened up in the regional association as among the President's first acts were his discussions with the heads of government of Mexico and Jamaica; support for free elections in El Salvador—a process endorsed by the 1981 OAS Assembly; and, the highly creative stroke of the Caribbean Basin Initiative. The trade and investment features of this Initiative are genuinely appealing to the OAS members affected. Latin American favors rapid U.S. action on these proposals.

The OAS has served and can continue to serve highly useful purposes for its members. Its record of peacekeeping since 1945 has few parallels on a strife-torn planet, a point attested last week by OAS foreign ministers. It serves as a bulwark for the cause of human rights and democracy which all citizens of this hemisphere accept as their birthright. During various stages of its history, it has been the fulcrum for achieving regional economic cooperation (the Inter-American Development Bank, e.g., was created in its forum). And since the last meeting of OAS presidents in 1967, it pioneered in the fields of education, science and culture.

Yet its existing weaknesses are also apparent, especially in the field of economic cooperation. A Special OAS Committee on Trade and Negotiation (CECON), set up in 1970 at U.S. insistence, has been more a locale for the United States to announce trade decisions already taken, e.g., to raise sugar tariffs, rather than to negotiate about them. The formerly distinguished CIES (the Inter-American Economic and Social Council) is limping along, even though some of its technical programs remain the most constructive instruments propelling the course of hemispheric development. And inaction on the current development agenda since 1976 can only be described as massive.

As Mr. Regan ventures forth, then, the U.S. faces the following regional challenges: The need to respond constructively to both the bilateral and the multilateral development agenda of Latin America, notably so in the field of trade expansion.

A Latin America which—with important exceptions—was transformed economically and socially during the past two decades into the middle ranks of the world economy. But it is also an area badly hit by the world-wide recession over the past two years—and one with an immense development potential still before it, provided the U.S. and the industrial world respond to its concerns.

An OAS whose future course remains uncertain but which has been strengthened over the past decade by the addition of nine new member states from the English-speaking Caribbean and by inclusion in its forum of 19 Observer Countries from Europe, the Middle East and Asia.

A regional association—mankind's oldest regional body—now stretching towards its centennary anniversary—which is waiting for a fresh infusion of ideas, creative imagination and renewed leadership from regional OAS members and, as pointed out by the presidents of Colombia, Venezuela and Uruguay, from OAS heads-of-state. The objective of all should be to modernize and update the regional system so that it is restored and renewed as a vibrant symbol of peace and friendship for every citizen in the Americas.

Time alone will tell whether Mr. Reagan's mission will contribute to this objective. But it is clearly undertaken in the right spirit, at the right moment and in the right way.

PERSONAL EXPLANATION

# HON. EUGENE V. ATKINSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. ATKINSON. Mr. Speaker, on Monday, December 13, I was unfortunately absent from the House, delayed in returning to Washington due to the inclement weather. Therefore, I would like to take this opportunity to indicate my position on the eight recorded votes that were considered under suspension.

On rollcall 441, H.R. 3191, Modification of North American Convention Tax Rules, I would have voted "yes."

On rollcall 436, House Joint Resolution 429, State Commissions on Teacher Excellence, I would have voted "no."

On rollcall 437, H.R. 4281, Critical Materials Act of 1982, I would have voted "no."

On rollcall 438, H.R. 7044, Mail Order Consumer Fraud Protection, I would have voted "yes."

On rollcall 439, S. 2059, Special Prosecutor Appointments Amendments, I would have voted "yes."

On rollcall 440, S. 1621, Authorizing Replacement of Existing Pump Casings in South Nevada Water Projects, I would have voted "no."

On rollcall 442, House Joint Resolution 553, Authorizing Indians to Bring Action on Certain Legal Claims, I would have voted "no."

On rollcall 435, S. 2355, Telecommunications for the Disabled Act of 1982, I would have voted "yes."●

RETAIN REGULATIONS FOR THE BENEFIT OF OUR HANDI-CAPPED CHILDREN

# HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. HUBBARD. Mr. Speaker, I received an excellent letter from a fellow Kentuckian, Margaret L. Adams, of Louisville, Ky. Margaret has written to me concerning her opposition to the proposed regulation changes under Public Law 94-142, the Education for All Handicapped Children Act, that have been proposed by the U.S. Department of Education. I believe my colleagues will be interested in her comments. Indeed, I am certain that the Members of Congress are as concerned as I with regard to the education of our handicapped children. Her letter follows:

OCTOBER 18, 1982.

Hon. CARROLL HUBBARD. U.S. Representative, Washington, D.C.

DEAR MR. HUBBARD: I sometimes find it hard to imagine what it would be like to be a legislator in our country responsible for making decisions for milions of people knowing that by your vote on certain issues some people will suffer but hopefully the majority will benefit. But I will try to imagine what it is like to be a legislator if you will just for a moment try to imagine what it is like to be a handicapped child or the parent of a handicapped child, as I am. Neither of us will have an easy job.

I know I am just one of thousands of your constituents who are clamoring for your attention for their "cause," but I feel strongly that you should become aware of the changes proposed by the present adminis-tration concerning Public Law 94-142, the Education for All Handicapped Children Act. Please do not allow the changes in the regulations to be passed. I cannot overemphasize the detrimental effect it would have on hundreds of thousands of children all

across our country

Even now, with the Law (and it is a good law) it is sometimes a struggle to get the services our children need and must have if they are to become successful and independent adults. With this law behind us we can look errant school officials in the eye and say, "But my government and my country guarantees this for my child." Without it, we have virtually nothing to rely on except good intentions and that, unfortunately, won't get us very much, I'm afraid.

I never expected to become the parent of a handicapped child and sometimes I mourn the child that might have been, but partly because of PL 94-142 I can face the future without so much fear for my child because I know that she is getting the educational services that will help her do and become the best that she can. I can rejoice in the child that can be and will be because of that help. Please don't take that away from her or from her father and me or from all the hundreds of handicapped children and parents that we have met in the last seven years or from all the hundreds of thousands out there we will never meet but know if only in spirit. Handicapped children are a part of our country's future and with your continued support they can become one of the best parts.

Thank you for your time.

Sincerely,

MARGARET L. ADAMS. Louisville, Ky.

THE JOURNAL OF COMMUNITY ACTION

## HON. JOHN CONYERS. JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

· Mr. CONYERS. Mr. Speaker, in a few years time the Journal of Community Action has emerged as an indispensable forum on the issues of urban economic development, local service delivery, public finance, and intergovernmental relations.

The recent issue focuses on the idea and implementation of community partnerships. Public-private partnerships are collaborative efforts by Government, business, and voluntary associations, to meet a particular collective need such as job creation and innercity revitalization. The partners share in the planning of projects and their financing. Community partnerships under the right conditions have

proved enormously successful.

The Journal of Community Action has performed a major service in publishing an entire issue on the partnership approach. A variety of articles examine the history of such partner-ships, analyze the conditions that make them work, and provide detailed case-studies of the most successful examples. The following excerpts illustrate the range and quality of the coverage. I recommend that my leagues review the articles and the issue of the Journal of Community Action (vol.1, no. 4, 1982), from which they are drawn.

The articles follow:

#### COMMUNITY PARTNERSHIPS

Political fads wax and wane with benumbing regularity in American life. After a brief swirl in the news media and a series of foundation-funded studies, most disappear without a trace. There is thus a distinct possibility that the current concept of "community partnerships" may go the way of other political fashions that have long since departed. This would be a great loss. In contrast to other contemporary nostrums that will deservedly vanish without a backward glance. the idea of forming partnerships between government, business, voluntary organizations, and other private entities to fulfill social needs deserves a prominent role in the grammar of American politics. This is because the idea is based upon a powerful historical premise: American government cannot fulfill the collective needs for which it has assumed responsibility solely through its own bureaucratic instrumentalities and taxing powers. This premise is rejected by many who call for the continued growth and bureaucratization of the state. It is also rejected by those who indulge in a romantic rejection of government responsibilities.

As with most other political ideas that have any lasting value, one need not look very far to find precedents and precursors. Political platforms of both parties have made reference to the desirability of partnership efforts in various policy spheres over the last two decades. Much of the growth in domestic social programs that oc-curred in the 1960s and 1970s was carried out through more-or-less structured partnerships between government and private. voluntary, non-profit organizations that already provided a variety of social services to society. Beginning in the late 1960s, successive Administrations promoted partnerships in foreign aid between the U.S. government and American private organizations operating abroad. During the Carter Administration of the late 1970s, a central theme of urban policy was the need for public/private partnerships between business and local government in the economic development of

central cities.

What is important about the current political climate is that the idea of partnerships has finally achieved explicit recognition by a national administration as a central policy theme. Yet, as explicated by the President's Task Force on Private Sector

Initiatives, the theme is still vague and inchoate. Opportunistic advocates of particular policies are rushing to bring their proposals under the friendly umbrella of the community partnership concept without so much as a basic understanding of the idea. If the concept is not to be discarded after the termination of the Task Force in December, it is essential that the meaning of partnership be clearly delineated and that certain realities of organizing and operating partnerships derived from previous experience be acknowledged.

A community partnership, simply defined, is a sustained collaborative effort of two or more institutions in which each of the partners shares in the planning of projects and programs designed to meet a collective need and contributes a portion of the resources needed to implement those projects and programs. This definition focuses attention on the key aspects of a partnership endeav--collaborative planning and investment of independent resources-and excludes efforts which are primarily based on discrete business relationships. For example, the "privatization" of city services to private corporations is often included in discussions of community partnerships. Yet, if the privatization agreement merely entails the award of a performance contract vendor for a service designed and paid for by the city, such a simple business relationship should not be confused with a community partnership. Only in cases where the city and the private corporation jointly plan an activity and in which both the city and the corporation independently invest resources in implementing the activity, do privatization agreements fall within the partnership framework.

Similarly, the cooperation of business and government in promoting downtown economic development is often discussed within the partnership framework without careful examination of the crucial differences in the nature of the public/private relation-ship from city to city. In some cities, economic development projects involve meaningful collaborative planning between government and business and a sharing of investment, risk, and benefit. These are true community partnerships. In many other cases, however, so-called partnerships involve little more than passive city acceptance of privately planned and privately fi-nanced proposals, with minor public interest planning adjustments. It does not contribute to the impact of the community partnership concept in public policy debate to indulge in such conceptual confusion.

Perhaps the central issue in policy debate about community partnerships is the relative role which government, business, and voluntary organizations should play in initiating and sustaining partnership endeavors. Some pronouncements from the Reagan Administration emphasizing private initiatives and volunteerism leave relatively little role for government in community partnerships, apparently envisioning collaborative efforts of business and voluntary institutions as substitutes for government efforts to meet social needs. Other pronouncements place more emphasis upon the role of state and local government. A healthy dose of realism is needed to ground this debate on a more productive level.

American society is distinguished by its prominent tradition of voluntary service to society by non-profit organizations and by the contemporary emergence of corporate social responsibility. These attributes must be appreciated, encouraged, and engaged in

our collective efforts to meet social needs. However, when the magnitude of the collective needs facing American society is realistically acknowledged, there is little question that government usually must play the prime role in organizing modes of action at the appropriate scale. As indicated by the Notes from the Field and other examples of community partnerships discussed in this issue, government is almost always centrally involved in partnership endeavors, assuming the role not only because of its ability to contribute more resources than other sectors, but also because of its fundamental responsibility for collective needs. Neither business nor the voluntary sector can arrogate to itself the legitimacy of government's mandate to act in the interests of society as a whole. Nor can government, unlike business, expediently absolve itself of responsibility for social needs when profits fall.

#### NEIGHBORHOOD REVITALIZATION PARTNERSHIPS

The neighborhood revitalization efforts discussed in this section present different approaches to the construction of community partnerships. The Roanoke Neighborhood Partnership was initiated by government and reached out to the private sector for support and representation. The Kansas City Neighborhood Alliance, on the other hand, was initiated by private corporations and is organized around business-neighborhood collaboration. The Alliance relates closely, but independently, to the public agency for housing and community development in Kansas City.

Both cases are based on the premise that neighborhood revitalization requires an integrated commitment of dollars, energy, and interest between neighborhood organizations, government agencies, and private business. Each has an important stake in the stability and security of the nation's older neighborhoods. Today, the premise seems obvious. It was not so obvious a decade ago during an era of confrontation and adversarial relations between all par-

### ROANOKE

The Roanoke Neighborhood Partnership is a city-wide neighborhood development program that has brought three new sources of support into the community development process—the business community, neighborhood organizations, and voluntary agencies. Until the inauguration of the Partnership in 1980, the development process was primarily a direct operation of the city government's Office of Community Planning.

By 1978, local officials in charge of community development realized that they could not engineer private investment by themselves. They had already involved neighborhood organizations in the development process through a citizen participation system. The real problem was that the cooperation of government and neighborhoods could not convince banks and developers to put dollars and construction commitments into the older neighborhoods. The financial community lacked a political role in the community development process. If business could be brought into the planning process, then it might enter the spending process.

In 1978, the Carter Administration announced its urban policy, which was based on the partnership approach to urban revitalization. Federal, state, and local government; the business community; neighborhoods; and voluntary institutions were asked to work together. This policy gave Ro-

anoke officials the opportunity to offer business a role in neighborhood planning, without arousing antagonism from the neighborhood sector. Business responded with commitments of support from the Roanoke Valley Chamber of Commerce, the banking community, the Roanoke Valley Board of Realtors, and the Homebuilders Association.

A plan worked out under the leadership of Earl Reynolds, Director of the Office of Community Planning, for the City Council to establish a new entity, initated the Roanoke Neighborhood Partnership. This plan was influenced by models of neighborhood development in Atlanta and Baltimore. Atlanta has previously reorganized its planning process on the basis of neighborhood plans and assigned planning staff to work with neighborhood organizations. Baltimore had organized the staff of its community development department around neighborhood strategies.

The Partnership is organized around a Steering Committee, which is appointed by the City Council to oversee neighborhood development work. The Steering Committee enjoys official review and approval powers, similar to the role of the Architectural Review Board, which oversees historic preservation activities in Roanoke, or the Planning Commission, which approves planning decisions. The Partnership operates directly out of the Office of Community Planning and is staffed by an employee of that office, selected by the Partnership. It has a budget

There are two unique features of the Partnership Steering Committee which help to insure its successful operation. First, it is the official Community Development Board of the City of Roanoke. While many cities have a citizen participation unit in the community development process, that unit is generally appointed by the community development department as an advisory unit. Community development officials report directly to the Council or Mayor, without passing through an intervening official committee. In Roanoke, however, the community development agency has subordinated itself to the Steering Committee in exchange for the active involvement of different sectors which are viewed as essential to a successful community development proc-

Second, the private sector was brought into the community development process not just in reaction to federal cutbacks but as a positive force in building a better community. Thus, business does not feel put upon to fill the "gap".

Once the Steering Committee was formed, the Partnership reached out to involve a broad spectrum of individuals and groups in Roanoke. The basic premise of this outreach approach was that neighborhood residents, if organized and backed by the resources of business, voluntary organizations and the public sector, could define and solve many of the problems affecting the quality of life in their neighborhoods.

In early 1981, a city-wide Neighborhood

In early 1981, a city-wide Neighborhood Forum was held for the purpose of identifying priority needs. The Forum included workshops to: (1) define issues—positive and negative; (2) identify and connect with needed resources; and (3) develop an action plan for neighborhood projects. The workshops were open to all neighborhood residents. As many as 150-200 people attended each workshop, which were conducted by volunteer facilitators who were trained in group process.

The workshop format used participatory small groups, each with a defined work agenda. Members of the neighborhood organizations were also assigned tasks to be accomplished between meetings. All around town, neighborhood residents were preparing issue summaries, neighborhood histories, maps and surveys; then identifying, contacting and meeting new resources; and finally working closely to negotiate and refine action plans.

At the conclusion of the workshop process, city staff, consultant, and volunteer assistance was available to help groups work on priority projects. A small matching grant fund was established to help neighborhood groups reach out to the private sector and learn the mechanics of fundraising and financial management. Four neighborhoods were selected for major demonstration efforts. These neighborhoods represent the full range of social, economic, and geographic characteristics of the city.

#### KANSAS CITY

The Kansas City Neighborhood Alliance is a city-wide neighborhood development partnership of corporations and neighborhood associations. The Alliance was organized in 1980 as an initiative of the Kansas City Civic Council—an organization consisting of 100 large corporations in Kansas City.

The Council has initiated four major projects in recent years. It spawned the Council on Education, which links the business community to the local school system. It created the Kansas City Corporation for Industrial Development, which works closely with city government to retain large-scale employers in the downtown and industrial areas of the city. It founded Kansas City Tomorrow, which trains young business, community and government leaders for future responsibilities in the public and private sectors of the city. Finally, it originated the Neighborhood Alliance after several prominent business leaders like Don Hall (Hallmark Corporation), Charles Curry (Home Savings Association), and Jake Mascotte (Mutual Benefit Life) were able to convince their peers about the importance of neighborhood revitalization.

The Civic Council formed a Task Force on Neighborhood Revitalization which recommended establishing a citywide organization of community and business leaders to support neighborhood revitalization projects. The Task Force identified neighborhood-based leaders for the board, along with business members of the Council who were interested in revitalization. Finally, it recommended a support budget of \$450,000 for three years. These recommendations were adopted, and the Kansas City Alliance was formed.

The Alliance board consists of eleven members representing both business and community interests. Its Executive Director is Tony Salazar, and its program officer is Jim White. Its principal funding comes from the Civic Council which has just approved a renewal grant for another three years at a reduced funding level. The Alliance also receives substantial financial support from Hallmark Cards, the Kansas City Association of Trade, and the Ford Foundation. A new LISC target city fund of \$1,000,000 will substitute in the future for the decreasing support of the Kansas City Civic Council, and represents a strong path of growth for the Alliance.

## ACTIVITIES

Alliance activities encompass five major goals. The first major goal is to strengthen

the capacity of organizations involved in revitalizing the inner city. This involves supporting housing rehabilitation organizations in four neighborhoods; providing direct administrative assistance to East Community Team, Inc.; and forming a development organization for the Palestine neighborhood. The Alliance is also publishing a city-wide survey of neighborhood organizations.

Its second objective is to bring greater investment capital to Kansas City's older neighborhoods. The Alliance has leveraged a \$500,000 grant from LISC-a national private investment fund for neighborhood development-on a dollar for dollar matching basis; and will serve as the allocation vehicle for the resulting million dollar loan fund. The Alliance also prepares funding applications for neighborhood organizations, and identifies resourceful private sector individuals to volunteer their time to neighborhoods. It acquires materials and equipment from the private sector, operates a \$200,000 revolving Weatherization loan fund; and complies and distributes energy kits. It implements an effective loan packaging procedure among different neighborhood organizations and develops a considerable number of actual loans.

The third goal of the Alliance is to establish and nurture small-scale working partnerships between the public, private, and neighborhood sectors. Currently, for example, this involves cooperating with the Lutheran community to capitalize a \$100,000 mortgage pool to finance the rehabilitation of abandoned houses by the Westside Housing Organization (WHO). The Alliance will also assist WHO in acquiring and rehabilitating the West Penway Housing Project.

Fourth, the Alliance seeks to market older neighborhoods to residents and new buyers. This involves media coverage of neighborhood news, slide presentations on neighborhoods, mapping older neighborhoods, and

general promotional activity.

The final goal is to foster the acquisition of vacant property by neighborhood organizations so that they can better control their This means researching environment. vacant land ownership, planning strategies of acquisition, holding workshops on vacant land development, maintaining both a revolving loan fund for acquisition and a bulk buying program, and providing \$35,000 in interest free loans for vacant house acquisition by six neighborhood organizations.

## THE HORRORS OF YELLOW RAIN

# HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. HOYER. Mr. Speaker, recently two articles from Time magazine on the use of biochemical warfare by the Soviets were brought to my attention by Mr. Harvey M. Meyerhoff of Baltimore. The articles discuss allegations that the Soviets are using such warfare in Cambodia, Laos, and Afghanistan.

As you know, Secretary of State George Shultz recently released a 10page report that accuses the Soviets and Vietnam of using biochemical weapons in flagrant violation of two major international accords. The gov-

ernments of the United Kingdom and France have joined this country in calling for a complete investigation by the United Nations into these allegations. While a recent investigation by U.N. officials cited "circumstantial evidence" indicating "possible" use of biochemical weapons, this body has yet to take any substantive action or complete studies that involve entering the real combat zone in Laos, Cambodia, or Afghanistan. Meanwhile, it is estimated that 10,000 people have been killed by acid rain in these coun-

Like Mr. Meyerhoff, I am shocked and dismayed by these charges. We must mount a systematic and determined campaign to expose these vellow rain incidents and bring international attention to this shocking situation. We must not permit the smugness of a few Soviet officials at the United Nations in New York to undermine our efforts.

I urge all my colleagues to read the following articles and to begin the public dialog we need to force change in Soviet policy on this issue.

The articles are as follows:

[From Time Magazine, Nov. 8, 1982] DEADLY SHOWERS-WEAK RESPONSE TO YELLOW RAIN

seven-man United Nations team flew into Bangkok last week to investigate one of the more controversial issues to come before the international organization; accusations that the Soviet Union, through its ally Viet Nam, has for the past six years been waging chemical warfare in Cambodia and Laos.

Indeed, the team's visit itself is controversial. Just one year ago, a similar U.N. group looked into the same accusations, only to report that the evidence appeared to be inconclusive. But subsequent American and Canadian studies giving detailed evidence of deadly "yellow rain" attacks have forced the launching of a new inquiry, and the hope is that this time the U.N. will find some real

Scores of eyewitness accounts by refugees fleeing into Thailand tell the same story. Attacks in remote mountain jungles of Indochina have, according to a State Department estimate, killed at least 7,000 people. Typically, a plane sweeps in low over an isolated village, spraying a yellowish cloud or dropping bombs that burst in a shower of sticky beads. The rain, says the survivor of an April attack, feels "wet like rain and hot like chilies." The lethal ingredient of yellow rain is a poorly understood class of mycotoxins, or fungal poisons, known as trichothecenes, that apparently kill by rupturing blood vessels and inhibiting the blood's clotting ability. Within minutes of a yellow rain attack, villagers' eyes start to burn; soon after that, their skin erupts in blisters, and as internal bleeding begins, they vomit blood.

Despite mounting evidence that Viet Nam is using Soviet chemicals in its battle against anti-Communist insurgents in Laos and Cambodia, there has been little international outcry. A chief culprit, U.S. State Department officials complain, is the U.N., which had been conspicuously reluctant to investigate the U.S. charges vigorously. In a speech in West Berlin last year, then Secretary of State Alexander Haig charged the Soviets and their allies with violating the 1925 Geneva Protocol on chemical warfare and the 1972 Biological and Toxin Weapons Convention. One month after Haig's charge in West Berlin, the first U.N. team went to Thailand, but it visited only a handful of refugee camps during a brief eleven-day investigation.

While conceding that chemical warfare agents had perhaps been used, the U.N. investigators cited problems in verifying the sources of yellow rain samples, as well as questionable diagnoses of alleged yellow rain victims, concluding that the evidence was insufficient to "prove or disprove the allegations." Critics charge that the findings were no coincidence, since the head of the department sponsoring the investigation was a Soviet. Says a U.S. diplomat: "The performance was lackluster at best."

In the U.N.'s defense, officials argue that the international organization is "caught in a political vortex," needing incontrovertible evidence before being able to condemn a superpower. Meanwhile, for the victims of the deadly yellow showers, the raindrops keep

### [From Time Magazine, Dec. 13, 1982] DEADLY DOSE-NEW CHARGES ABOUT YELLOW RAIN

"The world cannot be silent in the face of such human suffering and such cynical disregard for international law and agree-ments." So declared Secretary of State George Shultz last week as he presented a new ten-page report that, for the second year, accused the Soviet Union time this and its ally Viet Nam of using biochemical weapons against native rebel forces in Afghanistan, Laos and Cambodia in flagrant violation of two major international ac-cords. Since 1975, U.S. officials charge, nearly 10,000 people have died as the result of "yellow rain," a distinctive yellowish mist that is sprayed from planes or that bursts from shells and bombs, and then falls to the ground in sticky drops. It causes an agonizing death through blistering, vomiting and internal bleeding.

Former Secretary of State Alexander Haig had previously made the accusation last year in West Berlin. According to last week's report, the U.S. has obtained from yellow-rain victims numerous blood, urine and tissue samples that are contaminated with rare fungal poisons known as mycotoxins, the key lethal ingredient in yellow rain. At a press conference that followed Shultz's statement. State Department officials showed one of two Soviet gas masks that they said had been captured in Afghanistan. One taken from the head of a dead Soviet soldier the other obtained clandestinely in Kabul, each apparently carried traces of mycotoxins, which had presumably been used in attacks against Afghan rebels. The State Department also released photo-graphs showing the skin lesions that afflict yellow-rain victims.

Vladimir Shustov, a disarmament expert at the Soviet mission to the U.N. denied the U.S. charges, describing them as "sheer invention from the beginning to the end." As proof, he cited a U.N. report due to be re-leased ths week. The result of trips to Thailand and Pakistan by a seven-man team, the U.N. investigation was undertaken when the U.S. expressed dissatisfaction with a previous U.N. probe that yielded inconclusive results last year. The latest report concludes lamely that the investigators "could not disregard the circumstantial evidence" indicating "possible" use of biochemical weapons. But the team lead by Egyptian Military Physician Esmat Ezz included "political officers" from Bulgaria and Iran. It did not enter combat zones in Laos, Cambodia and Afghanistan to collect evidence, relying instead on samples and accounts from refugees.

Canada and Thailand are the only countries that have pursued the investigation with as much intensity as the U.S. In a statement to the House of Commons last week, British Minister of State Douglas Hurd declared that his country fully supports the U.S. charges. Said he: "The continued use of [biochemical] weapons calls for a vigorous condemnation by the civilized world and further demonstrates the need for early agreement to ban possession of these weapons." France has led the way in pushing through approval of a new U.N. committee to investigate chemical-warfare incidents. The latest U.S. findings, said a French official, "can only reinforce our contiction that a rapid and effective monitoring system must be set up."

The mounting evidence is beginning to convince skeptical scientists. H. Bruno Schiefer, a once critical Canadian veterinary pathologist who studied the problem in Indochina earlier this year, agrees that the only logical explanation for the symptoms he found among victims was that they had been attacked with biochemical weapons.

U.S. officials remain disappointed by the generally muted world reaction to their accusations. One explanation, according to some experts, may be that the U.S., unfortunately, has not persuasively demonstrated that it is doing its best to document the charges. Noting that the State Department has only two part-time non-specialists collecting evidence in Thailand, a Western European diplomat says: "With all the resources the U.S. has to call on, you'd think it would have at least one qualified person working full time on chemical warfare." Still, the more other governments speak out, the more effective the campaign against chemical warfare will be.

TRIBUTE TO TED STEPIEN

# HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. MOTTL. Mr. Speaker, I would like to relate to you one of the great success stories in our Nation. Theodore J. Stepien was born on June 9, 1925, one of six children of a railroad inspector. His parents, John and Julia Stepien, immigrated to the United States from Poland, eventually settling in Pittsburgh as teenagers.

Stepien entered Schenley High in Pittsburgh and proceeded to establish himself as one of the premier athletes in the school's history, winning all-city honors in football and top accolades in basketball as the area's leading scorer. Upon graudation from Schenley High, Stepien entered the Air Force in June 1943 and later went on to combat duty in Europe as a lieutenant bombardiernavigator. He received an honorable discharge in 1945.

Mr. Stepien returned home and 2 years later, at the age of 22, founded his own advertising agency, specializing in recruitment advertising. Today, Nationwide Advertising Service is the No. 1 recruitment advertising agency in the world, ranking among the top 30 of all advertising agencies internationally. The company has a total of 35 offices in the United States, Canada, and London, England.

While developing Nationwide Advertising in Cleveland, Ted earned his bachelor's and master's degrees from Western Reserve University and in 1953 he met and married Ann Bowerman. While their life together brought him his greatest joy, her passing in 1979 brought him his greatest sorrow. Nonetheless, six daughters have become the legacy of the marriage of Ted and Ann Stepien.

Most persons would have been satisfied with the accomplishments of a Ted Stepien up to this point—but, always on the move, the colorful millionaire added another chapter to his life with his purchase of a majority interest in the Cleveland Cavaliers in June 1980.

Ted Stepien is truly an American success story.

## KIRKLAND CONDEMNS SOLIDARITY BAN

# HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. DERWINSKI. Mr. Speaker, the president of the AFL-CIO, Lane Kirkland, the outspoken champion of the Solidarity movement and of free labor unions throughout the world, continued his strong voice against the suppression of Solidarity by the Polish Communist Government. His statement was carried in the AFL-CIO bulletin, and I would like to insert it at this point.

The article follows:

KIRKLAND CONDEMNS SOLIDARITY BAN

In response to the Polish parliament action against Solidarnosc, AFL-CIO President Kirkland issued the following statement in the name of the AFL-CIO.

In outlawing Solidarnosc, the Polish government has broken its solemn compact

with the Polish people.

The AFL-CIO rejects, as a matter of principle, the right of any government to decree the structure, composition, and function of a trade union movement. That is the exclusive and inalienable right of workers. Any trade union movement that is created by a government, without the participation or consent of workers, cannot by its very nature represent the interests of workers. It can only represent the interests of the state.

By replacing Solidarnosc with a fragmented local structure, with no national center, the Polish government has laid bare its intention of depriving Poland's workers of any voice in the nation's economic and political

life. It has thus taken Poland another step down the road to social misery and chaos.

Since the imposition of martial law ten months ago, the Polish authorities had been promising to restore Solidarnosc in a modified form. These promises now stand exposed as cynical lies, designed in part to forestall a halt of Western credits.

The banning of Solidarnosc explodes the myth that the Jaruzelski junta is a force for moderation which merits the patient understanding of the Western democracies. It is an illegitimate government maintained in power only by its Soviet masters.

A government which breaks its solemn commitment to its own population cannot be trusted to honor its commitments to its foreign creditors. The AFI-CIO renews its demand that the United States government declare Poland in default of its debts and halt the flow of credits to the Soviet Union and its satellites.

The dissolution of Solidarnosc is a blatant violation of the International Labor Organization's Convention #87, guaranteeing freedom of association. The denial of employment to Solidarnosc activists—including Anna Walentinowicz, who sparked the Gdansk strike and now is kept in a psychiatric clinic—is a violation of ILO Convention #111 dealing with discrimination in employment. The Jaruzelski regime is compounding Poland's violations of ILO conventions.

The AFL-CIO, in cooperation with the International Confederation of Free Trade Unions, will demand an accounting by the Polish government at the ILO and in every international labor forum in which we participate the second of the cooperation with the International Cooperation with the International Cooperation of the Cooperation of th

For 300 days, Lech Walesa has been held in captivity and thousands of Solidarnosc members have been detained in squalid concentration camps. They, and not the Jaruzelski junta, represent the aspirations of the Polish people, and we demand their immediate release.

We shall not waver in our support for Solidarnosc—the only legitimate voice of Poland's workers.

# WAITING IN HOPE AND DESPAIR

# HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. SIMON. Mr. Speaker, if there is any one nation that should feel a special responsibility for the problems of the refugees of Vietnam it is the United States.

For that reason, it was disturbing to read the story I am inserting in the RECORD at this point which appeared in Time Magazine titled, "Waiting in Hope and Despair".

I am not sure what should be done, but I urge the administration and my colleagues in Congress to see if we cannot be of assistance to these unfortunate people.

The article follows:

### WAITING IN HOPE AND DESPAIR

The exodus of refugees from Indochina is a story of broken lives, broken dreams and broken promises. Since the fall of Saigon seven years ago, almost 500,000 boat people have passed through Southeast Asia to find new homes, mostly in the U.S., Western Europe and Australia. But an additional 175,000 refugees still languish in camps in Thailand. Because so many of them lack the skills deemed essential for resettlement elsewhere, they have come to be known in official jargon as "residuals," or people with "no guarantee of movement onward." The worst of these refugee camps is NW 82, a tropical purgatory 16 miles north of Aranyaprathet, a town on the Thai-Cambodian border. United Nations officials are not allowed to have a permanent presence in the heavily guarded enclosure. Time Bangkok Bureau Chief David DeVoss was the first foreign correspondent permitted by Thai authorities to look inside NW 82. His report:

NW 82 looks more like a concentration camp than a refugee sanctuary. A barren mud flat smaller than a football field, it was originally designed to hold 800 people. Today it is home to more than 1,900 listless Vietnamese "land people," who singly or in family groups bribed their way across Cambodia, which is still occupied by 160,000 Vietnamese troops. Jumbled together inside 27 tents, the refugees each have a coffin-size sliver of space, 6 ft. by 3 ft., in which to rest and sleep. Living conditions for new arrivals are even more crowded; they are housed in a series of bamboo tiers reminiscent of a 19th century slave ship.

Several months ago, the entire population came down with scabies. More recently, respiratory infections have been a problem, especially for the camp's 400 children. But the most serious malady is malaria. Nearly everyone has it, and some have suffered six or seven attacks. Says Tran Long, 27, a former mathematics teacher from Saigon: "Inadequate food and sanitation are our biggest problems. There are not enough latrines. The rainy season turns the camp into a cesspool."

Though it is surrounded by hostile anti-Vietnamese Khmer guerrillas and is within range of Vietnamese artillery inside Cambodia, NW 82 is not guarded by the Thai army. That task falls to the local militia, a sparsely equipped organization composed of former peasants, who are ill-disposed toward their Vietnamese charges. Several refugee women claim to have been raped, and men say that beatings are common. What is certain is that refugees who "misbehave" wind up spending the night in a red bamboo "tiger cage" 3 yds. long, 2 yds. wide and 1 yd. high.

Who is responsible for living conditions at NW 82? Thailand's supreme command insists, somewhat disingenuously, that it is the Geneva-based International Committee of the Red Cross (I.C.R.C.). The Red Cross vehemently denies any responsibility, other than medical, for the camp. Nearly a dozen Western embassies in Bangkok have joined the I.C.R.C. in asking the Thai government to move NW 82 away from the dangerous malaria-infested border. But all the legations began to backpedal when the Thais said they would comply if the countries represented by the embassies agreed to resettle all 1,900 refugees within 45 days.

Thailand's great fear is that it may be stuck with thousands like the residents of NW 82. During the first ten months of this year, 38,968 refugees were resettled, compared with 91,154 during the same period in 1981. Appearing before the executive board of the U.N. High Commissioner for Refugees in Geneva last month, Prasong Soonsiri, secretary-general of Thailand's National Security Council, blasted Western nations that have not honored their commitments

to resettle Indochinese refugees. Said Prasong; "The lesson we learn is that being too merciful could lead us to bear an endless burden, and it cannot be forecast how much longer the Thai people would want to live with the problem."

Prasong is particularly angry at the U.S., which cut its quota for Indochinese refugees from 168,000 in 1980 to 100,000 in 1981. In the end the U.S. took in 73,000. What has happened is that the U.S. Immigration and Naturalization Service (INS) has new qualifications for refugees. Says a Bangkok-based U.S. official: "Someone who was a refugee in 1976 might not qualify as a refugee in 1982. A person must be able to show he has good reason to fear prosecution. Conjecture is not enough."

During a five-day visit to Southeast Asia last month, U.S. Attorney General William French Smith discussed the problem with Thai officials. Smith said that Washington was not going to increase this year's quota of 64,000 refugees from Indochina, though he did promise that the U.S. would do its best to accept as many refugees as possible,

up to the maximum quota.

Thailand has contributed to the problem through its policy of "human deterrence." In an effort to make the country unattractive as a sanctuary, the Bangkok government has decreed that no refugee arriving after August 1981 can leave for resettlement until every refugee who arrived previously has been moved out. The policy has proved a perverse punishment for many Laotians and Vietnamese who would neet American immigration requirements because they worked for the U.S. during the war years or have relatives in the U.S.

Despite the harsh conditions, most Vietnamese say they prefer living in NW 82 to returning to Viet Nam. Indeed, more than 600 land people cluster around hospitals in three border camps, hoping to get into NW 82. Says Nguyen Quoc Khanh, 41, a former lieutenant in the South Vietnamese army, whom the Communists sent to a jungle work camp for three years: "If we can get into NW 82, perhaps we can eventually get on a resettlement list. If you lived in South Viet Nam, you would understand why people have to flee. If it takes three years, I will wait."

## LESTER WOLFE'S BOOK ON THE TAIWAN RELATIONS ACT

# HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

Mr. WON PAT. Mr. Speaker, on March 7, 1979, I was privileged to speak on the floor in support of H.R. 2479, the Taiwan Relations Act. As the Delegate from America's most westerly territory in the Pacific, and with some oriental blood in my veins, I could not help but feel strongly about his measure. I paid tribute to the honorable chairman of the Foreign Affairs Committee, CLEMENT ZABLOCKI, and all our colleagues who supported this measure, because it was deemed in the best long range interests of the United States that it and Taiwan enjoy close commercial and cultural ties. I also supported and will continue

to support the belief that any armed attack or boycott against Taiwan would be an implicit threat against the prevailing peace in the western Pacific.

I recall pointing out the large numbers of Taiwanese living on Guam and their fears for the future of their former homeland. I was happy to insert in the Record on open letter from the Guam Chinese community addressing these fears.

Now, nearly 4 years later, those fears have been greatly minimized; trade and cultural relations between the United States and Taiwan has never been better; and it appears that the Peoples' Republic of China has moved a little closer to recognizing the independence of Taiwan. So, I am happy today to welcome the emergence of a book by the distinguished former chairman of the Asian-Pacific Affairs Subcommittee, our former colleague and one who was in the forefront of this very important legislation, Lester Wolfe. I am proud to have played but little part in his documentation.

But if I may inject one disconcerting note about this act. We wrote the legislation to authorize Taiwan to have up to 15 international offices—the exact number of consulates they had before. Now they have nine and Guam is not among. I have been unable to find out just what is the holdup. All I know is that Taiwan used to have a very busy office in Guam, the gateway to America in the far western Pacific. There is still need for such an office, especially with the unsettled situation Hong Kong as the exchange place of the Far East.

### CALIFORNIA DELEGATION

# HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 8, 1982

• Mr. ROUSSELOT. Mr. Speaker, let me take this opportunity to thank my colleagues, Mr. Moorhead and Mr. DREIER, for their kind words and actions in taking out this special order tonight. Seldom in our hectic schedules are we permitted the time to reminisce over past actions, or do we take the time to thank the people who mean so much to us here. It is unfortunate that we were not able to come together during a time when more Members might participate in this special order, or under slightly more favorable circumstances. This being the case, however, I guess that I should first thank the gentleman from San Francisco for providing the reason for us all to be here tonight. Thank's PHIL-we really needed that.

It has been a great honor for me to serve with the California Republican delegation. There have been many

changes since I first arrived in 1961. In fact, it is an entirely new group of people. I guess that the delegation will be losing about 85 years of tenure with the seven of us. But the quality will remain as high as ever. It has been pointed out that we are a diverse group leaving this month. Don comes from the north, and CLAIR from the south. Pete is from the left while I am from the right. WAYNE is a relative newcomer while Bob and BARRY have been around awhile. We have all worked well together, and especially in the last 2 years, we have been able to claim a few victories with our man in the White House. It is reassuring to know that the rest of the delegation will be able to carry on with the work we have begun.

There is not much left that can be said about my friends that has not already been said this evening.

I have known Don Clausen, the dean of our delegation, for a long time. He came to Congress in a special election-like a lot of us here tonightback in 1963. He has been our voice on the Public Works Committee and one of the only Californian Republicans with enough seniority to be a ranking minority member on a committee-Interior during the last Congress and Public Works during this Congress. Despite this responsibility not many of us have ever seen him without a smile on his face. Don is effective, thoughtful, and jovial. Thank you Don for serving your country and district in such a constructive way.

CLAIR BURGENER and I met long before he came to Washington, D.C. He started out in both the assembly and State senate up in Sacramento. CLAIR is the only one of us who is leaving completely by his own design. In fact, the last 2 years must have been very satisfying for CLAIR. He was reelected in 1980 with an election that all of us dream about. He was even endorsed by the Democratic party. He has had the honor of representing probably more people within his district than anyone in the history of our democracy. He is, of course, secretary of the Republican Conference, CLAIR can best be described as a quiet, but strong and firm public servant. I am reminded of a funny reoccurring situation. CLAIR is always receiving mail addressed to Miss Clair Burgener. If his mail is anything like mine, these are the same people who usually claim to be "good and close friends" of the Member. That is OK CLAIR. With 1 million constituents you cannot possibly meet all of them, and we all know that you are a real tough guy-particularly on the issues.

What can anyone say about Bob DORNAN? I do not think I know of anyone in the House who was as sure of his positions as Bob. He is also the only person to ever invite me to go to El Salvador. He has provided conserv-

atives of all parts of the country with inspiration and direction. He has amazed us with his detailed knowledge of various issues-particularly in defense related issues. It has been a running legend within the delegation about the "Dornan Hour," otherwise known as a special California Republican delegation weekly meeting. There is no doubt that whatever BoB goes on to do now he will do it with untiring effort and dedication. The other day I ran across an old newsletter of mine that had a picture of the two of us. It was a few years back when I was a guest on his Los Angeles television show. It is amazing Bos-neither of us looks a day older, just a lot wiser.

BARRY GOLDWATER, JR. is a man who has had to fight two political battles all his adult life. The first has been as a Member of Congress. The second has been as a member of the Goldwater family. Both are very high honors and it is not a secret that he has been very successful at both. Barry has become the House expert on concepts of guaranteed privacy for the individual. He has fought very hard over the years for their success. BARRY and I came to Congress relatively close together at the end of the 1960's, early 1970's. He and I have worked together for the free market, limited Government positions we both hold. I will miss working with you BARRY.

I said earlier that the delegation was losing a lot of seniority this year. WAYNE GRISHAM is the newest Member to be leaving this year. I first met Wayne when he was running for election back in 1978. I was eager to help him out in his district-much of which I had represented back in the early 1960's-to make sure that he came to Congress. There were seven Republicans running for the nomination but none of them was more qualified than WAYNE. He has been a very successful businessman and mayor of his hometown, La Mirada. WAYNE has had a very exciting life with a wonderful family-from his early days in the war to the halls of Congress.

Last, but certainly not least in my book is PETE McCloskey. To say that I have known Pere for a long time would probably be the biggest understatement of the evening. We organized street basketball games in grammer school, playing at the Southwestern Military Academy gym. In high school we formed the South Pasadena Amalgamated Federation of Virgins. I do not think that either one of us ever expected that to be written up in the Almanac of American Politics. Pete and I sometimes do not agree on issues. He has, however, always been a big opponent of the large bloated bureaucracy. I will never forget the time back in 1977 when, as ranking minority member on Merchant Marine, he took on the Carter administrationjust like a true marine-on that domestic transportation of imported oil bill. And he won. Pete has always been a Republican and it is his maverick stands on issues that give our party the diversity and depth that it needs. We have come a long way from those early days Pete—It will be interesting to see where we both end up. Maybe working on the same issue in our perspective new jobs?

I also want to say a few words about the two friends who took the time today to take this special order. CARLOS MOORHEAD will become the new dean next year. You mentioned the time Carlos when I came to your house in 1972. I remember that very well. There were several of our colleagues on the other side of the aisle who were looking forward to us battling it out last spring. Well-we disappointed them. They figured one way or another one of us would be gone. I do not think that this will be the last time we surprise them either. You will do fine Carlos. Any time you need help, just give me a call.

David Dreier is the youngest member of our delegation. We have a very close personal relationship that I value very highly. I think that in a very short time David will have made a deserved name for himself. And I will be very quick to take my share of the early credit. In fact, there are a number of young, highly motivated members of the California delegation. It is into their hands that the responsibility now falls. I said earlier that I am confident that they will do a good job and be around for years to come.

I joked earlier about Phil Burton's role in bringing us together tonight. In an ironic sort of way I guess that this is the highest compliment that has been paid to us as a group. They could not fight us on our own ground, here in the Halls of Congress or in our districts, so they changed the lines in a controlled legislature. Some victory. The great thing about conservatives is that the more times you put us down, the higher we bounce back the next time.

Somebody once said that "You won't have me to kick around anymore."—but the seven of us say "You ain't seen the last of us." This Chamber holds many memories for me. I want to thank you ladies and gentlemen for your support and assistance throughout the years. It has been a genuine honor for me to have served here with the other six I have just mentioned, and a very high honor for me to serve in this, the people's body.

## PREVENTING OIL THEFT

## HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. CHENEY. Mr. Speaker, in passing the Federal Oil and Gas Royalty Management Act, the House of Representatives has taken an important step toward reducing the more than \$2 billion lost annually by oil and gas producers to theft. This bill requires the Secretary of the Interior to initiate new inspection and accounting procedures to insure that theft losses are brought under control. These losses

are estimated by the Department of the Interior to affect significant amounts of daily production in the

United States.

American industry has already responded to the challenge offered by this new legislation. Cypher Systems has developed a technological solution to the problem of monitoring inventories at remote sites in the oil and gas industry. This system, using microcomputer technology, allows the petroleum industry for the first time to measure accurately oil and other tankstored fluids on even the most remote and widespread facilities operating from a central location-for example, company headquarters. A petroleum inventory manager using this system can instantly determine if an unau-thorized removal of tank fluids is taking place. Access codes in the Cypher System allow operators to perform only those functions assigned to

By requiring inventory security systems on public oil leases, the Federal Oil and Gas Management Act of 1982 will set a standard for the petroleum industry which in time will insure that the U.S. Government, Indian tribes, and other oil and gas owners receive the full measure of royalties and other payments due them on their leases.

# AN ASSET TO THE COMMUNITY

# HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. HOYER. Mr. Speaker, I am fortunate to represent a county that has a tremendous wealth of talent and enterprise among its citizens. One such man—an outstanding businessman, civic activist and father—is Walter Manning Meinhardt, of Brandywine, Md.

Born in Brandywine some 47 years ago, Walter has spent his life devoted to supporting his community. He attended elementary school, junior high and high school in Prince Georges County, and after serving 2 years in

the U.S. Army, he returned to begin his career in the place of his birth.

In the interim 20 years, Walter Meinhardt has expanded a thriving concern into 20 auto parts businesses located throughout Prince Georges County. He is part owner and operator of Brandywine Auto Parts, Inc., Brandywine Auto Sales, Inc., Brandywine Sales and Services, Inc., A.D.B. Auction Systems, Campbell Brothers Auto Parts, Save More Auto Parks, Foreign Car Parts, and Bowie Used Truck and Van.

Walter Meinhardt's efforts have greatly aided the quality of life in Prince Georges. Recognizing that a cohesive program of economic development is critical to the success of a community, Meinhardt has worked to insure that businesses throughout Maryland and across the Nation actively participate in providing consumers with the best service possible.

He is the past chairman of the Prince Georges Chamber of Commerce, a member of the better business bureau and the U.S. Chamber of Commerce. He is also the 1982 president of the Prince Georges County Board of Trade. This organization is deeply committed to strengthening and enhancing the relationship between representatives of business and the residents of Prince Georges County. As board of trade president, Meinhardt has greatly expanded the influence of this able body.

Walter Meinhardt is also extremely active in charitable organizations. He has kindly devoted his time to the Red Cross, the Heart Fund, and the United Cerebral Palsy drives of recent years.

This active business and civic life is rounded out by his involvement in the political life of his community. In 1980 he was appointed to the electoral college for the State of Maryland in the national elections. He is past president of the Nottingham and Brandywine Democratic Clubs. He is also past vice president and director of the Baden Volunteer Fire Department and is a member of the Ploughman and Fisherman Club, Isaac Walton League, Ducks Unlimited, and the Southern Prince Georges Optimist Clubs.

Meinhardt the businessman, the entrepreneur, the community leader, is also a devoted family man. He is the father of eight children, and as one close friend remarked, "one seldom sees Walter without his children." Just as Walter was widowed several years ago, but he had the good fortune to remarry recently. His lovely new wife Kay has learned to cope with her recently adopted family and together they take pride in rearing their children.

Fortunately for the citizens of Prince Georges County, Walter Meinhardt is involved in nearly every aspect of life in the county. He can truly serve as a colorful advertisement

for the prosperity, growth, and ingenuity of its residents, and I am truly honored to count him as one of my dear friends.

Mr. Speaker, Walter Meinhardt will soon be turning over the reins of leadership of the Prince Georges Board of Trade to Shirley Harrer, another extremely competent and able professional in my community.

It is with great pride that I can bring to the attention of this body the fine accomplishments of Walter Meinhardt. He has provided tremendous contributions to the residents of Prince Georges County and to the State of Maryland. In recognition of that service, I offer this tribute.

## ARTHUR J. FINKELSTEIN

# HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. CARMAN. Mr. Speaker, I rise in praise of Arthur J. Finkelstein, president and founder of Arthur J. Finkelstein & Associates, a survey and political consulting firm. For more than 12 years Mr. Finkelstein has been involved with candidates and political campaigns at all levels of the electoral process. He has worked with many of my colleagues in this body. Scores of officials at State and local governments have received his counsel. He has been heavily involved in the last three presidential campaigns.

His commitment to the political process has been substantial. His intelligence, wit and good humor have been welcome additions to every campaign in which he has worked.

At a time when many think of those involved in politics as incompetent and uncaring, it is important to point to those who are capable and Arthur Finkelstein is an example of a person of outstanding ability and determined dedication. I am happy to have him as a friend and pleased to have this opportunity to bring his service to the attention of the House.

## TIME FOR A SOLUTION TO SOCIAL SECURITY DILEMMA

# HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. BEREUTER. Mr. Speaker, This Member urges my colleagues to read the following editorial from the Washington Post of December 15, 1982. Further it is urged that the Speaker and the majority party leadership act upon the recommendation of the editorial.

SOCIAL SECURITY TRUCE

It's time for some energetic white flag waving in the Great War-to-End-All-Wars over Social Security. The partisans on both sides-loosely organized under the banners of Democrats and Republicans-have inflicted and suffered their share of political casualties. The leadership is demoralized. The trust funds keep dwindling. As National Social Security Commission Chairman Alan Greenspan warned this past weekend, only a prompt and enduring truce can prevent everyone-including current Social Security beneficiaries-from ending up losers.

The difficulty now is that no one wants to take the first step toward a compromise for fear of being riddled by bullets from both sides. Mr. Greenspan, Sens. Robert Dole and John Heinz and other key members of commission are urging President Reagan and House Speaker O'Neill to help the commission agree on a compromise. But the president feels that's the commission's job. After all, as the president reminded reporters yesterday, the reason he set up the commission in the first place was to defuse the political debate over Social Security.

The commission has done its work to the extent of defining the size of the shortfall faced by Social Security, outlining a series of options and making it clear that both tax hikes and benefit restraints are necessary to solve the problem. But the members of the commission, which includes both Republican and Democratic senators and congressmen, have stopped short of selecting a recomended set of options lest they become sitting ducks for attacks by their colleagues in both parties.

That's a reasonable concern. No matter what the commission agrees to, it won't please those on the one side, who insist that no current or promised benefit shall be compromised, and those on the other, who insist that not a penny more in taxes shall be raised. Because the options are all unattractive, there is no political gain to be had in supporting a solution to Social Security's ills-real as they are.

On the mere chance, however, that our political leaders might be interested in some statesmanlike behavior, we'll suggest the terms for a possible truce. The Democrats, for their part, could promise never again to mention the Reagan administration's 1981 proposals for sharp reductions in Social Security benefits. These were ill-timed and illconceived, to be sure, but they drew attention to an urgent problem. The Republicans, in turn, could swear to forget the political hay made by the Democrats over Social Security in the last election. The Republicans deserved some criticism for loose talk about dismantling the system, but the Democrats misled their constituents by suggesting that no changes were necessary.

Then administration officals and the speaker's men could sit down with the commission members and decide on a balanced set of tax increases and benefit restraints to put Social Security on a safe course for the foreseeable future. No plan can cover every contingency, but the plan should include enought options to offer a reasonable margin of safety. All sides would then agree to push the package to early passage in the next Congress and quit attacking each other.

S. 1661—EFFIGY MOUNDS NATIONAL MONUMENT

# HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. TAUKE. Mr. Speaker, I want to extend my thanks for your support of S. 1661, a bill which authorizes the exchange of certain lands at Effigy Mounds National Monument in my district.

This exchange more clearly defines the boundary, simplifies the administration, and improves the resource protection at Effigy Mounds. According to the Department of the Interior, which supports this measure, there is no indication of any cultural or archaelogical material on either parcel of land described in the bill.

Effigy Mounds National Monument was established by Presidential proclamation on October 25, 1949, to protect a series of unique prehistoric Indian mounds overlooking the Mississippi River near McGregor, Iowa. Within the monument's 1,475 acres are 200 known mounds, 29 in the form of bear or bird effigies. Among the most outstanding is the Great Bear Mound, which is 70 feet across the shoulders and forelegs, 137 feet long, and 31/2 feet high.

Legislation similar to S. 1661 passed the House of Representatives on December 11, 1980, as an amendment to a miniparks omnibus bill, S. 924, but unfortunately, Congress adjourned before the Senate could consider the amendment.

This bill was of a noncontroversial nature, and I hope it will soon be signed into law.

# LAW OF THE SEA TREATY

# HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. FIELDS. Mr. Speaker, I enter the following material into the RECORD for the benefit of our colleagues:

[From Reason Magazine, October 1982] SINK THE FLOATING OPEC (By Doug Bandow)

On April 30, the United States concluded its participation in what had become a supreme act of masochism: the United Nations Conference on the Law of the Sea (UNCLOS). Though the leaders of the developing countries, and their acolytes, are now signing hosannahs to the proposed 175page treaty (or convention), with its 439 articles, President Reagan has done the world's peoples a favor by announcing that the United States will not sign it.

The treaty increased territorial sea limits from 3 to 12 miles, establishes 200-mile exclusive economic zones, promulgates rules on ocean marine research and pollution control, and provides international navigation rules. It also creates an international regulatory system governing deep seabed mining.

Unfortunately, the treaty, approved by a Conference vote of 130 to 4, with 17 abstentions, is a fatally flawed document. It is inconsistent with this country's economic and security interests and is inimical to the principles of liberty upon which our country was founded.

The treaty's most egregious flaws involve the Orwellian deep seabed mining regime that it would create; an "International Seabed Authority," rule by an Assembly and a Council, to regulate deep seabed mining and redistribute income to developing countries, and a subsidiary "Enterprise" to mine the seabed for the Authority. This interna-tional Leviathan would severely restrict the potential world supply of minerals, and in particular US access to important strategic minerals. It also would pose pernicious political precedents for future international diplomatic and economic relations.

Access to the deep seabed is important because the seabed is covered with billions of polymetallic nodules, containing cobalt, manganese, nickel, and copper. Significant sulphide deposits have also recently been

discovered.

Increasing the world supply of these resources would be of economic benefit not only to the United States but to the rest of the world. It would be of particular value to developing countries that are seeking to industrialize. Increased supplies of seabed minerals also would enhance our national security by reducing our overseas dependence on potentially unstable land-based suppliers of critical minerals, such as cobalt.

The treaty adopted in April, if accepted by the industrialized countries, would discourage any access to seabed resources. Virtually any regulatory system, however limited, tends to limit experimentation, depress productivity, and increase costs, creating inefficiencies and misallocations in the marketplace. But the byzantine regime created by this treaty is almost unique in its perversity, threatening development of deep seabed minerals in several ways.

First, the incomprehensible regulatory system is specifically designed to restrict private-sector development of the seabed. A company must survey two sites and turn one over gratis to the Enterprise before even applying for a production authorization. To then receive permission to mine its remaining site, a company must potentially compete with the Enterprise, developing nations, and other private companies. A production authorization also could be denied if the company was found to violate either the antimonopoly or antidensity provisions, which restrict the number of mine sites available to any one country-a restriction aimed at the United States.

Permission to mine would be finally subject to votes by the Legal and Technical Commission, the membership of which could be stacked, and the 36-member Council, which is dominated by developing countries. The US government has no effective blocking power, even in conjunction with other Western industrialized countries, despite their disproportionate political and economic interests in seabed mining. Hence, access by US firms would be dependent upon the whims of economic competitors. political adversaries, and nations that want no seabed mining.

Finally, the so-called pioneer investorsthose active before ratification of the treaty-would be protected by grandfather-

ing them into (not out of) the Authority's regulatory miasma. Although the four existing private seabed mining consortia and four specified companies controlled by foreign governments would each be guaranteed access to one site, other potential miners from the private sector could be frozen out by Council votes.

Second, many of the treaty's objectives are openly antimining, including "orderly and safe development," "rational manage-"just and stable prices," and "the protection of developing countries." This special-interest protectionism is also embodied in the article limiting deep seabed mining production and authorizing commodity agreements and in an article (added late in the negotiations) governing subsidies to land-based producers.

In addition, a moratorium has been placed on the development of minerals other than manganese nodules, such as sulphides, until rules and regulations are adopted by the Authority. Of course, any nation opposing further resource development could, and probably would, block any new rules and

regulations indefinitely. Third, the convention mandates the transfer of mining and processing technology from private miners to the Authority and developing countries. Technology could be interpreted to include engineering and technical skills as well as actual equipment, and there is no effective compensation system

for the unauthorized disclosure of any transferred technology.

Fourth, the treaty imposes significant fi-nancial burdens both on private miners and industrialized countries. The Authority and the Enterprise would be bureaucratic horrors, with initial start-up costs in the hundreds of millions, or billions, of dollars, and annual operating costs in the tens of millions. To fund them, miners would be subject to an application fee (\$500,000), a fixed annual fee (\$1 million), and a production, or royalty, charge, Developed countries would be required to provide subsidies in the form of interest-free loans and loan guarantees. The US share would be 25 percent. Moreover, the final session added the requirement that the sponsoring country miner be liable for the miner's obligations if the company were unable to perform.

Fifth, the seabed articles create a system of monopolistic advantages for the Enterprise that discriminates against private miners. The Enterprise gains a donated mine site for each and every site for which a developer seeks production authorization. It gains transferred technology directly from its competitors. And it receives from the Authority and from signatory nations subsidized financing and exemptions from taxes and Authority payments.

These competitive disadvantages for pri-

vate miners include specific consideration granted to 125 developing countries and some 105 "land-locked and geographically disadvantaged" countries. United

States is neither, of course.

Sixth, even the severely resticted access for private miners could be swept away by a three-fourths vote of the member nations after the Review Conference meets 15 years after the commencement of commercial production. Thus, amendments to end private mining approved by the Third World and Soviet block could take effect without the consent of the United States and the other Western industrialized nations, irrespective of the seabed investments that had been made in the intervening time. Meanwhile, prejudicial changes in customary interna-

tional law might preclude a return to open ocean access

Overall, the treaty creates an environment enormously hostile to private investment. Yet it poses a far more serious danger to this country than simply hindering deep seabed development: ratifying it would legitimize the New International Economic Order (NIEO), a form of international hemlock being served by the developing states. The Law of the Sea conference was but one of the many forums through which the developing countries have been waging economic warfare on the developed nations.

The core of the developing countries' ideology is that economic relations are a zerosum game, with rich countries having grown wealthy at the expense of poor ones. Third World poverty is seen as a legacy of colonialism, for which the industrialized coun-

tries owe reparations.

To enforce this obligation, the developing countries want to create a system of international organizations controlled by them redistribute the wealth of developed countries' peoples. Such wealth includes not only money but also resources and technology. Demands for preferential insurance and transportation rates and subsidized technologies and claims of expropriation rights all are part of this international socialist nightmare. Related to the NIEO are other totalitarian dreams, such as the New Internation-Information Order, with Third World control of the international press.

In fact, the Law of the Sea treaty is crucial for NIEO proponents, because it would radically restructure international relations. forging new, redistributionist and collectivist legal relationships between developing and developed nations. Among other things, the treaty would establish a legal duty for economically successful countries to tribute to unsuccessful ones, Third World control over previously unowned resources and proprietary private technology, and a system of international governance that does not fairly reflect America's political and economic stake in the issues involved.

US acceptance of the treaty, in the words of former Maltan UN Ambassador Arvid Pardo, "however qualified, reluctant, or defective, would validate the global democratic approach to decision making." This would greatly accelerate the campaign to instill NIEO principles in other international organizations and institutions and over other global problems and unowned resources. such as the Antarctic and outer space.

The treaty is fundamentally flawed in its philosophical conception, as well. Though neither commentators nor industrialized country negotiators have paid much attention to philosophy, preferring, instead, to focus on practical economic effects, ideology may have been the deciding factor in these negotiations: it drove and controlled the

entire process.

Indeed, the negotiations over the seabed articles were almost entirely an ideological struggle to define the meaning of "common heritage of mankind." The developing countries-the so-called Group of 77-seized the philosophical high ground, effectively setting the agenda for the entire conference. Their ideological aggressiveness essentially guaranteed, from the very beginning, that the West would lose on both the philosophical and practical issues.

The industrialized countries, instead of accepting the redistributionist "common heritage of mankind" principles supported by the Third World, should have stood firm for the fundamental notion, drawn from John

Locke, that property ownership of previously unowned resources devolves on those who identify them and mix their labor and capital with them. So vesting ownership in producers-those who take the risks and who have the greatest connection with the resources-is both moral and just. It also has historical and international precedents; the development of the American West is one example.

The treaty embodies the bizarre idea that nations are equal owners of ocean re-sources—that they are, in essence, as Robert Goldwin put it recently, "stockholders, each with an equal share of stock and the equal voting right that goes with it." This philosophy of international corporate ownership, by restricting access and confiscating earned wealth, goes far beyond the traditional principle of commons, with communal owner-ship and access. Granting ownership inter-ests to countries that don't even have contact with the resources fundamentally perverts property ownership rights.

Indeed, such self-indulgent claims of ownership are prompted by the naked avarice of some of the leaders of developing states. An oligarchy of international lawyers and diplomats would appropriate and rule in the interests of themselves and their ruling establishments back home; the fundamental rights of all individuals, including most of the citizens of the developing countries, would be venally sacrificed in the guise of international justice, fairness, and coopera-

The seabed articles offend other deeply held American values, as well. For instance, restricting entry into seabed mining, setting production limitations, limiting the number of sites for mining, and mandating the transfer of private technology all abridge miners' and consumers' economic liberties.

Such economic freedom arises from the natural right of self-ownership and the necessary corollary right to transfer and trade the fruits of one's own labor. It also arises as a necessary adjunct—indeed, prerequi-site—to political freedom, by restricting the general authority of government over individuals and by preserving private counterforces to concentrated government power. The protection of these economic freedoms was one of the prime motivations for founding our democratic system, and the reasons for their protection remain just as compelling today.

Further, creating the Enterprise, with its monopolistic advantages of subsidized funding, donated mine sites, exemption from taxes and Authority payments, and transferred technology, violates the fundamental American antipathy toward government monopolies. Such cartels possess political power as well as economic power and are able to use their political power to aggregate additional economic power. This danger is even greater with the supranational, autonomous, and supremely political Au-

What conceivable justification could there be for signing a treaty that discourages seabed development, sets dangerous political precedents for future international negotiation, and conflicts with fundamental American philosophical tenets? Some argue that the advantages of the other treaty provisions outweigh the disadvantages of the eabed articles. Others suggest that the lack of a universally accepted treaty could lead to anarchy, chaos, and maybe even war.

Both claims are nonsense. All too often we are asked to sacrifice very real philosophical and economic interests for amorphous and ephemeral foreign and defense policy objectives. The supposed advantages of the latter soon disappear; the disadvantages of the former persist.

For instance, the treaty would require eventual sharing of revenue from petroleum production from the outer margin of the continental shelf, discouraging energy development. The boundary provisions may be unsound. Marine science research would be severely restricted. And the pollution arti-

cles are at best marginally beneficial.

More important, the articles governing international navigation are not a major advantage to the United States. The location and depths of the world's straits, and the current state of military technology, suggest that America's military need for the treaty is limited. Further, economic and commercial interest make it likely that international navigation routes would remain open to commercial navigation without a treaty, even where belligerents with no respect for international law, such as Iran and Iraq, are involved.

The articles also offer little improvement over current customary international law. They retreat from free navigation in some instances and are dangerously ambiguous in others

Indeed, even if the articles were clearly advantageous, such an idealized regime of international law cannot overcome reality. Any navigational guarantees are likely to be commonly supported only so long as it is in both parties' interests to do so. History is replete with examples of countries breaking treaties when they have considered it to be in their national interest. Thus, meaningful navigation protection will come from the ability and willingness of the U.S. government to assure compliance and from the state of the bilateral or regional relations involved. Having no treaty might be marginally less efficient, but that disadvantage would not warrent accepting the costs of the other sections of the treaty.

The anguished cries of the internationalistic Cassandras about anarchy and war should not be taken seriously either. One need only look at the conduct of nations during the past two decades to see that most have behaved rationally. Simply signing international agreements in no way guarantees order; even if it did, the order resulting from this treaty would not be desira-

But rejecting this treaty will encourage reliance on a different kind of order—the spontaneous order that arises from reliance on voluntary cooperation and the market-place. Such order, based on freedom of choice and flexibility, is preferable to the totalitarian order embraced by the Third World.

The Reagan administration's decision to reject the treaty was not made simply to satisfy the commercial interests of a few mining companies. Rather, the aim was to attempt to ensure that fundamental philosophical, economic, and national security interests of the United States are adequately protected in the years ahead.

Of course, rejecting the treaty means the failure of a process nearly two decades in the making. But, the question of the kind of global structure being created is paramount, for as former Delegation Deputy Chairman Richard Darman wrote:

"... the notion of conceding [the negative international precedents set by the proposed treaty] to avoid the precedent of Conference "failure" (meaning "lack of agreement") seems absurd. It would be to trade

long-term, substantive failure for avoidance of temporary procedural failure. Trading these objectionable elements for marginal gains in the system of environmental protection and dispute settlement seems out of proportion. Trading them for questionable interests in treaty protection of distantwater military mobility seems a tie to the past at the expense of the future. And trading them to protect interests that might just as well be protected without a comprehensive treaty seems no trade at all."

Rejecting the treaty also means risking the early death of the US deep seabed mining industry, for without a universally accepted treaty, there may be no US-flag seabed mining operations. If some foreignflag seabed mining occurred under a treaty without our participation, however, the increased mineral production would still yield economic benefits to us. Moreover, if the return on seabed mining is high enough, some US seabed mining outside of the treaty is possible, since the geographical and technological characteristics of seabed mining create de facto property rights and discourage poachers, and economic or military retaliation by treaty signatories seems unlikely.

Still, in rejecting the treaty, the U.S. government should begin building an alternative ocean resource regime based on current customary international law, which provides open access to seabed resources and allows miners to mine. Such an alternative mining system would be rooted in the traditional principles of freedom of the high seas and would be intended simply to create an international mechanism to vest and protect the resource property rights of those who seek to explore and develop the seabed and to resolve conflicts between them.

The Deep Seabed Hard Mineral Resources Act, passed in 1980 to provide an interim framework until the treaty came into force, should be amended to eliminate the prohibition on actual mining before 1988. Then the government must attempt to reach an agreement with other potential seabed mining nations for mutual recognition of claims and settlement of disputes over contested claims. Though the major industrialized countries now appear to be unwilling to sign the previously negotiated "Reciprocating States Agreement." after the administration's decision not to sign the Conference treaty, they may be amenable to less-formal arrangement, including even simple parallelism, that would have the same effect.

Such arrangements would recognize that free-market seabed mining and voluntary commercial exchange exploit no one. It also would define the "common heritage of mankind" as a common heritage of unimpeded and equal access to previously unowned resources and freedom to use individual initiative to develop those resources. And it would build an international system intended to benefit all the peoples of the world, not just an elite class of international bureaucrats, lawyers, and political leaders.

In building such a system, the United States would be creating a truly just international structure, which would promote free trade and economic prosperity. In doing so, our country would be enhancing the prospects for international cooperation and world peace.

TRIBUTE TO MILLICENT FEN-WICK AND "CAPPY" HOLLEN-BECK

# HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 14, 1982

• Mr. SHUMWAY. Mr. Speaker, it is with great pleasure that I participate in this special order honoring our departing colleagues, MILLICENT FENWICK and "CAPPY" HOLLENBECK, and I appreciate having this opportunity to pay tribute to two outstanding legislators.

Both MILLICENT and CAPPY will be sorely missed by all their colleagues here in the House, and by me in particular. They have served with distinction, and have each left a mark to be remembered. I extend every best wish to them as they prepare to return to private life, where I know they will continue to serve and to offer leadership through whatever endeavors they choose to undertake.

In particular, I would like to express my appreciation for the privilege of serving with MILLICENT FENWICK. She has set an admirable example by being not only a first-rate legislator and an outspoken champion of that in which she believes, but also a great lady. Her contributions to congressional action have been considerable, and the memories with which she leaves us are especially warm and wonderful.

My best wishes to you both, as well as my regret that you are going.

## PASSAGE OF INTERNATIONAL FISHERIES AGREEMENT

# HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. UDALL. Mr. Speaker, I was pleased to see passage last week of the United States-Japan Governing International Fisheries Agreement (GIFA) by both the Senate and the House of Representatives. The GIFA provides an orderly mechanism for managing our fisheries resources with the cooperation of our friend and ally, Japan, while substantially benefiting U.S. fishing industry.

Unfortunately, approval of this important bilateral agreement was overshadowed by a serious disagreement between our two governments concerning commercial whaling. The United States has advocated an end to commercial whaling for over a decade. At its July 1982 meeting, the International Whaling Commission (IWC), after considering the current biological status of the great whale populations, voted by an overwhelming ma-

jority of its member nations to stop commercial whaling beginning with the great whales. the 1985-86 coastal season. On November 2, 1982, the Japanese Government

responded by formally announcing that it may well continue whaling past the deadline, defying the international agreement. Norway, Peru, and the U.S.S.R. also have filed objections. Unless these objections are withdrawn and the cessation on commercial whaling honored, international cooperation in protecting the whales will be seriously undermined and the future of the great whales will be in doubt.

This development would be unacceptable to millions of people worldwide who are deeply concerned about the continued existence of these magnificent creatures. While many national governments have adopted policies similar to our own on this issue, the United States has a particular responsibility to insure that international conservation measures are enforced. We alone have the domestic legislation and the economic strength that can be used to persuade the nations favoring continued commercial whaling to change their policies.

Principal among the legislative tools available is the Packwood-Magnuson and Pelly amendments to the Magnuson Fisheries Conservation and Management Act of 1976. Upon certification by the Secretary of Commerce that a nation has diminished the effectiveness of international efforts to protect the whales, the administration is obligated under these amendments to severely limit that nation's fishery allocations in U.S. waters and to embargo the importation of its fish prod-

Short of imposing such severe economic penalties, the United States can take other punitive actions. A primary concern during congressional consideration of the GIFA renewal was whether the administration would raise the commercial whaling issue in fishery allocation negotiations scheduled for this spring.

That concern was addressed by Acting Secretary of State, Kenneth W. Dam, in a December 4 letter to Senators Bob Packwood and Charles H. PERCY. In that letter, Mr. Dam noted that the administration was prepared to undertake every diplomatic means open to it and "to use available laws and regulations, beginning this spring, to prevent Japan from thwarting the IWC cessation decision." I am pleased to see the U.S. policy on this issue affirmed in such a clear and strong manner, and I am hopeful that through the means available to the administration that it can persuade the whaling nations to abide by the IWC decision

Nevertheless, in the event that the whaling nations do not find the administration's arguments persuasive, we must be prepared to take legislative

action to insure the future survival of BRANDEIS

HON. BILLY LEE EVANS

# HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 13, 1982

• Mr. STENHOLM. Mr. Speaker, as the 97th Congress draws to a close. I think it is important to pause and express our appreciation to those Members who have worked so diligently in the Halls of Congress, and who will not be returning to the 98th Congress. One such individual is my esteemed colleague, BILLY LEE EVANS.

Elected in 1976 to represent the Eighth District of Georgia in the 95th Congress, BILLY has distinguished his district, his own State of Georgia, and the Nation by his dedication, hard work, and sincerity. He has done an outstanding job while serving on the Public Works and Transportation, Judiciary, and Small Business Committees. In addition, he was an effective member of the House Select Committee on Narcotics Abuse and Control.

BILLy's work and efforts have demonstrated a keen understanding of agriculture, and the need for a thoughtful and pragmatic approach in reconciling the differences of thought which exist between rural and urban constituencies. As a leading expert on bankruptcy law, he recognized the need for reform of current bankruptcy law and introduced H.R. 4786, the Bankruptcy Improvements Act of 1981; this legislation was cosponsored by over half of the House Members of the 97th Congress. His work on the House Select Committee on Narcotics Abuse and Control was outstanding, and demonstrated even further the seriousness of the drug problem in our Nation, along with measures which must be taken to combat this problem. As coordinator of the Conservative Democratic Forum (CDF), I appreciated Billy's support for attempting to bring fiscal responsibility to the House of Representatives and to the United States.

On a more personal level, I would simply like to say that I will miss BILLY's able counsel, his youthful enthusiasm, his sincere dedication, and his ready smile. I know that he will excel in any future endeavors, and I look forward to our continued association and friendship.

IMMIGRATION SCHOLAR, URGES ENACTMENT OF IMMIGRATION REFORM BILL

# HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. Solarz. Mr. Speaker, the House soon scheduled to consider H.R. 7357, a major immigration reform bill that has been carefully crafted by our distinguised colleagues, Congressman RODINO and Congressman Mazzoli.

One of the chief proponents of this legislation is Dr. Lawrence Fuchs, one of the outstanding experts on American immigration policy, and a close personal friend. Dr. Fuchs now serves as the Meyer and Walter Jaffee Professor of American Civilization and Politics at Brandeis University, my alma mater. As a member of the board of trustees of Brandeis, I am particularly proud of the contributions that Dr. Fuchs has made, not only to the academic community through his scholarship and teaching at Brandeis, but for the tremendous role he played as the staff director of the Select Commission on Immigration and Refugee Policy. Our Nation owes an enormous debt of gratitude to men like Dr. Fuchs, and to the illustrous members of that Select Commission, particularly its chair, Rev. Theodore Hesburg, who spent almost 2 years carefully studying and analyzing the ramifications of our immigration law and policies. Many of the recommendations of that Commission are contained in the legislation which Simpson-Mazzoli Immigration Reform Act now are pending in the House.

Today's New York Times contains an excellent article by Dr. Fuchs which I would like to call to the attention of my colleagues since it contains cogent arguments in favor of the legalization proposal contained in H.R. 7357 and makes a strong case for immediate enactment of this needed legislation. Mr. Speaker, I ask that this article be reprinted in today's RECORD. [From the New York Times, Dec. 15, 1982]

PROPER IMMIGRANT REFORM

(By Lawrence H. Fuchs)

WALTHAM, MASS.-The Simpson-Mazzoli bill, now before the House, is a major effort to reform immigration policy. It would do so by both affirming the importance of lawful immigration and making possible firm steps to prevent illegal immigration in the future—an approach that is often called keeping the front door open while closing the back door.

Of the major provisions in this complicated measure, the most vulnerable calls for the legalization of a substantial number of aliens who entered the United States illegally or who ceased to have legal status before Jan. 1, 1980.

The bill includes a provision to levy fines and prison terms on employers who hire illegal aliens. Opposition to this employer sanctions provision has made some proponents of legalization, notably leaders of Hispanic groups, turn against the bill as a whole. They fear, exaggeratedly I think, that employers will discriminate against foreign-looking and foreign-sounding citizens and resident aliens. Many employer groups oppose not only the sanctions but also a comprehensive legalization program that would give labor-law protection to easily exploited workers.

Certain officials in the Office of Management and Budget, partly because of sympathy with the employers' viewpoint, have peppered Congressmen with greatly exaggerated projections about benefits newly legalized aliens would claim, using numbers that vary sharply from those de veloped by the more objective evaluations of the Select Commission on Immigration and Refugee Policy and the Congressional Budget Office. Some Congressmen are understandably nervous that the public would see legalization mainly as a reward for illegality. In addition, the Administration may be losing interest in fighting for the Simpson-Mazzoli approach to legalization—named for Alan K. Simpson, Wyoming Republician, sponsor of the Senate version, and Romano L. Mazzoli, Kentucky Democrat, sponsor in the House-just to get some kind of bill passed.

What is legalization about? Why was it proposed by Presidents Jimmy Carter and Ronald Reagan and recommended unanimously by the bipartisan Select Commission after studying the question for two years?

Legalization would substantially reduce the number of people living and working in an underclass situation—people who are easily abused by employers, afraid to report health problems and even to complain to the police when preyed upon by criminals. Further, it would help develop an effective approach to future enforcement.

The illegal-alien population, estimated by the commission to be no fewer than 3.5 million or more than 6 million at any one time, many of whom shuttle between the United States and their countries of origin, is small compared to the potential for illegal migration in the future. As a result of legalizing aliens, it would be possible to interview a representative sample of them and obtain crucial information on smugglers, migration routes, immigrant origins and employment histories; this would enable our authorities to do a much better job of finding smugglers and unscrupulous employers, and to improve trade and aid strategies in order to inhibit migration pressures at the source. People concerned with enforcement as well as the benefits of immigration should do everything possible to make certain that if the Simpson-Mazzoli bill is enacted, aliens who qualify will show up.

Some critics argue that legalization would prevent Americans from filling jobs now held by illegal aliens. The fact is that employer sanctions would not be fully effective for at least seven years. Even without a legalization program, few illegal aliens would leave their jobs, many of which are for growers, ranchers and sweatshop operators, who would have no incentive to upgrade wages and working conditions to make those jobs more attractive unless forced to by a legalization program and effective sanctions.

Legalization might actually result in a net return of migrants to their own countries, partly because some would feel free to move back and forth and partly because the jobs they now hold would become more attractive to Americans. Many who remain would invest their energies in ways that profited the nation: They would upgrade their skills, pay more in taxes and generate economic activity.

The Simpson-Mazzoli bill, as first drafted, represented an affirmation of lawful immigration and an equally powerful determination to deter future flows of illegal migrants. The elimination of a strong legalization program would strike a blow at both aims. It would provide symbolic satisfaction for those who want to crack down on aliens while actually perpetuating an illegal underclass and making enforcement more difficult instead of easier.

# MILLICENT FENWICK

# HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 14, 1982

• Mr. GOODLING. Mr. Speaker, at this time I feel privileged to pay tribute to my colleague, MILLICENT FENWICK. The House of Representatives will be less in stature without this Member.

I have shared assignments on the Education and Labor Committee, as well as the Foreign Affairs Committee. MILLICENT served with fervor, eloquence, and knowledge. I will miss her wit and her sparkle. There is a special quality surrounding MILLICENT, and that is a feeling of life. The halls of this great institution became alive whenever MILLICENT decided to take on an issue, whether it was defending the aged or attacking the wasteful expenditures by the Congress itself.

Her popularity with consitutents was obvious and justified. MILLICENT always won her congressional races with at least 70 percent of their vote.

I am sure that her retirement from the House will be followed by yet another phase in her glorious career. I wish Mrs. Fenwick well and hope that she will continue serving our country in a capacity worthy of her great abili-

IN SUPPORT OF A HOUSE SELECT COMMITTEE ON HUNGER

# HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. GILMAN. Mr. Speaker, earlier this session, my distinguished colleague, the gentleman from Texas, Mr. Leland, and I introduced House Resolution 424, legislation to establish in the House a Select Committee on Hunger. We intend to reintroduce this measure early in the 98th Congress, and we urge our colleagues to cosponsor what we believe is vitally impor-

tant legislation to assist us in according to hunger a significantly higher priority on our Nation's policymaking agenda.

The following 67 members have cosponsored this resolution: Mr. Aspin, Mr. AuCoin, Mr. Barnard, Mr. Barnes, Mr. Bedell, Mr. Bonior, Mr. BONKER, Mrs. BOUQUARD, Mr. BROD-HEAD, Mr. BROWN of California, Mr. PHILLIP BURTON, Mrs. CHISHOLM, Mrs. COLLINS, Mr. CONTE, Mr. CONYERS, Mr. CORRADA, Mr. CROCKETT, Mr. DASCHLE, Mr. Dornan, Mr. Dougherty, Mr. DOWNEY, Mr. DWYER, Mr. EDGAR, Mr. ERDAHL, Mr. ERTEL, Mr. EVANS of Delaware, Mr. Fauntroy, Mr. Findley, Mr. FORD of Tennessee, Mr. Frank, Mr. GILMAN, Mr. HARKIN, Mrs. HECKLER, Mr. HERTEL, Mr. HOWARD, Mr. HUB-BARD, Mr. HUCKABY, Mr. KASTENMEIER, Mr. KILDEE, Mr. LEACH, Mr. LELAND, Mr. Lowry, Mr. McHugh, Mr. MARKEY, Mr. MATSUI, Mr. MAVROULES, Mr. MINISH, Mr. MITCHELL of Maryland, Mr. NEAL, Mr. NELLIGAN, Mr. OBERSTAR, Mr. OTTINGER, Mr. PEASE, Mr. PEYSER, Mr. PRITCHARD, Mr. ROSENTHAL, Mr. SIMON, Mrs. SNOWE, Mr. Solarz, Mr. Stokes, Mr. Traxler, Mr. Washington, Mr. Weaver, Mr. WEISS, Mr. WOLPE, Mr. WYDEN, and Mr. YATES.

Currently, those organizations supporting House Resolution 424 include: Bread for the World, World Hunger Year, Save the Children, the Hunger Project, Oxfam America, the Interreligious Task Force on U.S. Food Policy, the Community Nutrition Institute, U.S. Committee for UNICEF. INFACT, NETWORK, a Catholic social justice lobby, Clergy and Leity Concerned, Center for Science in the Public Interest, United Church of Christ, World Hunger Education Service, Center for Concern, Society for Nutrition Education, Overseas Development Council, Friends Committee on National Legislation, Church World Service, Meals for Millions, Christian Children's Fund.

We are confident that a Select Committee on Hunger will better enable our Nation to launch a comprehensive program to resolve the increasingly critical problem of hunger and chronic malnutrition.

For a discussion of the Committee objectives and the need for such a committee, I refer my colleagues to my statement in the Record of April 26, 1982 p. 7708 and Mr. Leland's statement in the Record of April 27, 1982, p. 7915.

TRIBUTE TO THE HONORABLE SHIRLEY CHISHOLM

# HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, December 9, 1982

• Mr. SHUSTER. Mr. Speaker, I am pleased to join with my colleagues in paying tribute to the Honorable Shirley Chisholm, who with be retiring at the end of the 97th Congress. She has courageously and effectively served the people of the 12th District of New York for the past 14 years.

I have always admired the dignity and determination with which Shirley Chisholm fought for what she believed. She has gained the respect of her peers, regardless of ideological position, for her articulate, informed, and compassionate leadership on behalf of women, minorities, and the disadvantaged.

SHIRLEY CHISHOLM'S constituency was wider than just her congressional district alone. She was looked to by many Americans as the spokeswoman for their concerns in Washington, and I am sure that she will continue to be an effective advocate of those causes outside of Congress.

This House and this Nation have benefited from the service of Shirley Chisholm, and her voice here will be missed. I wish her the best of success and happiness in her future endeavors

EXPRESSING THE SENSE OF CONGRESS ON SITUATION IN POLAND

## HON, EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Friday, December 10, 1982

• Mr. DERWINSKI. Mr. Speaker, at the close of business Friday, House Concurrent Resolution 432 was passed by the House. Having had a hand in drafting and processing this resolution, I am naturally pleased that it was approved by unanimous consent.

The President has maintained a firm policy, recognizing that the Soviet Union directed the imposition of martial law and that top Polish military officials are Moscow trained.

Today is the first anniversary of the imposition of martial law in Poland and the imprisonment of leaders of the Solidarity Union movement. The situation in Poland is another tragic example of the suffering imposed on the peoples of Eastern Europe since the Iron Curtain was drepped by the Soviet Union.

However, the spirit of nationalism and the pride of the Polish people cannot be crushed. This resolution properly reaffirms the determined support of the American people for the people of Poland in their rightful aspirations for freedom, dignity, and economic security.

U.S. policy toward Poland is to apply whatever pressure we can until the regime there eases its crushing grip on the Polish people.

## ANTIABORTION STATEMENT

# HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. MOFFETT. Mr. Speaker, I participated in a forum on the effects of the New Federalism on the children of Connecticut, back in September. At that time, I received testimony, both oral and written, from a wide range of persons concerned about the future of our children. One statement which I received dwelled, inevitably, on the issue of abortion, surely one of the most emotional and controversial issues of our time.

I am pro-choice and will remain prochoice, whether in public or private service. I strongly believe that the Government has no right to intrude in the highly personal decision of abortion. This is a matter that must be left to individual conscience.

However, I did promise the author of the antiabortion statement that I would alert my colleagues to his concerns, which follow.

STATEMENT OF ROBERT G. MORRISON, EXECU-TIVE DIRECTOR, CONNECTICUT CITIZENS CONCERNED FOR LIFE

No subject is currently being viewed with greater concern than child abuse. And deservedly so. Many of us believe that the need to combat child abuse is so urgent that it cannot be questioned. Many see child abuse as a problem which is discrete and which can be dealt with separately by federal, state, and local authorities, and by conferences such as this one.

I believe the problem of child abuse is not discrete, but inextricably bound together with other social problems that the federal government has said are none of our business. These other problems fall into a judicially protected sphere of privacy.

Infanticide is one of these other problems. Recently, a child was born in Bloomington, Indiana. with Down's Syndrome. Infant Doe, as he was called, was mentally retarded and incapable of taking nourishment by mouth. He needed corrective surgery that was "serious but feasible." His parents refused the doctors permission to operate. They were sustained by Indiana's highest court. The so-called treatment prescribed was no food and no water. The "therapy" was death by starvation. Infant Doe died in six days. Was this child abuse? "It depends. wrote Washington Post columnist Richard Cohen, in defense of Mr. and Mrs. Doe's decision to starve their son to death. "The killing will not stop," warned another Washington Post columnist, George Will.

The uproar surrounding that court-approved homicide has now died down. The lawyer for the Does has made a very sympa-

thetic case for his clients on the CBS Morning News. Phil Donohue has administered extreme unction. The Connecticut General Assembly has declined to pass an act to protect handicapped newborn babies. Infanticide at Yale-New Haven hospital is not discussed in polite company.

So we now have a new de facto infanticide rule it will be tolerated so long as it is done in a hospital by doctors and parents using a "quality of life" or "meaningful life" standard to judge the so-called hard cases.

America's response to the Infant Doe case says more about our nation than it does about that little boy. He was, under the fifth and fourteenth amendments to our constitution, undeniably a citizen of the United States and of Indiana. Yet he was condemned to death without a trial for the crime of being a burden to his parents and society.

Richard John Neuhaus, a Lutheran clergyman long active in the civil rights and world peace movements, said it this way:

"If we say a life is without meaning, we are not are saying something about that life; we saying something about ourselves. Meaning is not ours to give or withhold: meaning is there for us to acknowledge and revere. Likewise, if we say a child is unloved, we are not saying something about that child; we are saying something about our failure to love."

No one of us here, charged with defending the meaning of our own lives—on pain of death—not even such distinguished persons as the members of Congress presiding could rationally do so. We are no more logically capable of arguing for the meaning of our lives than Infant Doe was.

Philosopher Bertrand Russell provides this challenge to all who think they can judge the meaning of their own or others' lives:

"That man is the product of causes which had no prevision of the end they were achieving; that his origin, his growth, his hopes and fears, his loves and his beliefs, are but the outcome of accidental collocations of atoms; that no fire, no heroism, no intensity of thought and feeling can preserve an individual life beyond the grave; that all the labors of all the ages, all the devotion, all the inspiration, all the noonday brightness of human genius are destined to extinction in the vast death of the solar system, and that the whole temple of man's achievement must inevitably be buried beneath the debris of a universe in ruins-all these things, if not quite beyond dispute, are yet so nearly certain that no philosophy which rejects can hope to stand.'

Child abuse has often been linked to "unwantedness." The case is commonly made, as it was in a letter to the Hartford Courant this week, that children unwanted before they are born are likely victims of later parental mistreatment. Dr. Philip Ney, the chief of psychiatry at a Vancouver hospital, disputes this. He noted that those Canadian provinces with the highest abortion rates also had the highest rates of child abuse. Dr. Ney writes:

"Having an abortion can interfere with a mother's ability to restrain her anger toward those depending on her care. Abortion might also weaken a social taboo against harming those who are defenseless. With wholesale abortions discarding nondefective unborn children, the value of children might diminish, resulting in less care and less protection. . . An aborting person, having already repressed her instinctive caring for her unborn young, might be less

inhibited in giving vent to rage at a whimpering child. . . .

Only two decades ago, parents were willing to suffer major deprivation to have and raise children. It seemed like a sacred obligation or a great privilege. Now, people balance having children with wanting a country house, another car, better vacations and early retirement. This might be observed by children in such families. As a result, they might feel less confidence in their parents' true concern for their welfare. They might then become so importunate in their demands for care and attention that their parents feel threatened. Not infrequently, the parental response to those attention-demanding children will be physical violence. . .

"Society is beginning to believe that a child has no right to exist and is therefore valued only when it is wanted. If it is permissible to kill an unwanted unborn child, then one can defend the killing of children already born when they are no longer considered valuable.

"Recent evidence indicates that many women harbor strong guilt feelings long after their abortions. Guilt is one important cause of child battering and infanticide. Abortion also lowers women's self-esteem, and there are studies reporting a major loss of self-esteem in battering parents . . . .

"Some women resent their male partners impregnating them and then coercing them to have abortions. Fathers, on the other hand, might feel hostility toward women because they have no rights in the decisions about which infants get aborted and when. The 'battle of the sexes' aggravated by elective abortion can all too easily be turned violently against children . . . .

"There is increasing evidence that previously aborted women become depressed during a subsequent pregnancy. Depression interferes with a mother's early bonding with her infant, and the children who are not bonded to their mothers are at a higher risk of being battered."

Doctor Ney's views are disturbing enough. But even more distressing is the rigidly enforced consensus of this and hundreds of similar conferences that the relationship of abortion on demand to infanticide and child abuse may not be discussed. It may well be the "wanted" child-one who is wanted by his parents as the fulfillment of some parent-defined need-who stands in greater danger of abuse. But this idea cannot be seriously examined because it is heretical, and social service "providers" are schooled in a strict orthodoxy. They will not consider the simple thought that there may be a direct correlation between what one person may "choose" to do to another before his birth and what one does to that same child later.

Connecticut Citizens Concerned for Life believes that none of these seemingly intractable problems will be ameliorated until our nation and our state re-affirm the sanctity of all human life. We must re-dedicate ourselves to the proposition that all men-regardless of age or sex—are created equal-not merely born—and regardless of handicap or wantedness. When that day comes, as surely it must, this nation and this state will enjoy a new birth of freedom.

TRAGEDY IN EAST TIMOR.

# HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

 Mr. McHUGH. Mr. Speaker, I have been concerned for some time about conditions in the former Portuguese colony of East Timor, a largely Roman Catholic territory that was invaded and occupied by Indonesia in late 1975.

In June, 1980, the Foreign Operations Subcommittee, on which I serve, held hearings on the situation in East Timor. The subcommittee focused on the serious food problems that resulted from warfare in the territory, the question of family reunification for those who wish to emigrate and rejoin family members abroad, and the broader issue of human rights violations.

These issues are still with us today, Mr. Speaker. As in 1980, there are conflicting reports regarding what is happening in East Timor, and thus many important questions remain unanswered. These issues deserve our serious consideration.

For the benefit of those of our colleagues who may not be familiar with recent developments in East Timor, I am inserting into the Record a number of items that have appeared in the press recently.

(From the New York Times, Oct. 7, 1982) Indonesia Accused of Abuses in Timor (By Bernard Weinraub)

Washington, October 6.—A bipartisan group of senators and representatives, citing reports of widespread hunger and human rights abuses in East Timor, has urged the Indonesian Government to allow international relief agencies into the area.

At the same time, the lawmakers called for a Senate inquiry into the impact of the Indonesian takeover of East Timor seven years ago and the famine and violence that have beset the island, a former Portugese colony, since then.

The Congressional move came in advance of a scheduled visit to Washington next week by President Suharto of Indonesia.

"In the past there has been very little attention paid to this tragedy, partly because no one ever heard of East Timor, and partly because access has been limited," said Senator David Durenberger, Republican of Minnesota. "The more news that comes out, the more that Congress is going to start asking some hard questions about U.S. policy, particularly arms sales and human rights policies."

### 100,000 DIE IN FAMINE

At least 100,000 people in a famine in East Timor, a predominantly Roman Catholic territory, after the Indonesian annexation.

Representative Tony P. Hall, Democrat of Ohio, said recently that the 1975 famine was comparable to the ones in Biafra and Cambodia. He said that "serious food shortages resulting from Indonesian military operations" continued but were largely unnoticed because of restrictions by Indonesia on foreign journalists and other visitors.

In recent years, an insurgency against Indonesia has added to the disruption, resulting in the loss of civil rights for the people of East Timor, according to Congressional critics of Indonesia.

"We recognize the importance of Indonesia to United States foreign policy and to stability within the region," a group of senators said in a letter to Secretary of State George P. Shultz. "We applaud as well the apparent improvements made during 1981. But we are deeply concerned that the situation may deteriorate, and we are deeply disturbed at the reports of famine."

#### U.S. IS ASKED TO MEDIATE

The senators, including Daniel Patrick Moynihan, Democrat of New York, and Alfonse D'Amato, Republican of New York, urged the Indonesians to permit "humanitarian contributions of food and medical supplies for the Timorese," as well as a "complete survey of the actual situation in East Timor by appropriate international relief and humanitarian agencies."

The senators also called on the Reagan Administration to "mediate with the Indonesians" to allow the reunification of families in East Timor and Portugal.

Among the signers of the letter to Mr. Shultz were Senators Henry M. Jackson, Democrat of Washington; Nancy Landon Kassebaum, Republican of Kansas; Richard G. Lugar, Republican of Indiana; John Heinz and Arlen Specter, Republicans of Pennsylvania; Carl Levin, Democrat of Michigan, and Mark O. Hatfield, Republican of Oregon.

Senator Charles H. Percy, Republican of Illinois, chairman of the Foreign Relations Committee, was urged to hold hearings to "determine as accurately as possible the actual situation in East Timor."

The senators said the Indonesian takeover, which followed the collapse of the Portuguese colonial system, "resulted in the forcible annexation of East Timor."

"United States policy has been to accept this unilateral annexation as a fact of life without recognizing that an act of selfdetermination by the Timorese people has taken place." they said.

[From the New York Times, Oct. 9, 1982] FORGOTTEN SORROWS IN TIMOR

Aggression forgotten is aggression rewarded. Because Britain could send a fleet to the Falklands, Argentina paid in bitter coin for its seizure of the islands. Indonesia had better luck seven years ago: it grabbed East Timor, a former Portuguese colony, and heard only token protest. The principle was the same but Indonesia's crime is nearly forgotten.

Yet not wholly forgotten. On the eve of President Reagan's meeting with Indonesia's President Suharto, a bipartisan group in Congress has asked America not to avert its eyes.

East Timor was indifferently governed from Lisbon for 400 years. Its half-million people, predominantly Catholic, were unprepared when independence was thrust upon them. But at worst, it was a slum; now it is a wasting prison. As many as 200,000 people may have perished under Indonesia's occupation. And the denials of ill treatment remain implausible as long as Jakarta refuses both free exit to Timorese and Portuguese nationals and unimpeded entry to relief organizations.

At the very least, Indonesia's rulers have to be persuaded to open the doors to East Timor. But there is nothing persuasive about a United Nations that regularly threatens Israel for much lesser transgressions while gently chiding Indonesia for the abduction of a whole people. And it does not help for the United States to mute its protest in gratitude for Indonesia's anti-Communism.

Protesting the situation in East Timor is not just a matter of arraigning a new nation for what the old colonial powers used to do with impunity. It is a way to help the United Nations and world opinion elevate standards of conduct. What other help is available to a remote and vulnerable people when their cause dwindles to a footnote?

Creditably, though tardily, Portugal is not shrugging. Prime Minister Pinto Balsemao reminded the General Assembly last week that he still cared. He appealed for using all mechanisms of the U.N. to find a remedy. Maybe the effort would fail. So far, it hasn't really been made.

[From the New York Times, Oct. 11, 1982]

# A SMALL, FAR-OFF PLACE (By Anthony Lewis)

President Reagan is host in Washington this week to President Suharto of Indonesia. The visit is inevitably going to be, in large part, an occasion to compliment an Asian leader important to the United States. But there is one uncomfortable issue that Mr. Reagan must raise if he is fairly to represent American concerns.

The issue is East Timor. It is a small place, one of the most remote and obscure on earth. But in recent years more and more people in the world, including U.S. Senators and Representatives, have become aware of terrible things happening in East Timor and have spoken out. The issue nags at the considerate.

science.
East Timor is a former Portuguese colony, the eastern half of an island north of Australia. The western half of the island was part of Indonesia. When Portugal abandoned the colony in 1975, Indonesian troops marched in, crushed an independence movement, occupied the territory and declared it a province of Indonesia.

Famine followed the invasion. At least 100,000 people died—nearly a fifth of the population. The human misery may have been comparable to what happened in Cambodia, but few outsiders knew about it at the time.

Indonesia has kept the territory largely cut off from the outside world. Until recently no foreign journalists or government representatives were allowed to visit East Timor. The Timorese are not allowed to leave, with few exceptions.

In response to foreign pressure, in part from the United States, the Indonesian Government has permitted some visitors recently. It signed an agreement with UNICEF for a primary health care project, though UNICEF was not permitted to have a representative stationed regularly in East Timor. The International Committee of the Red Cross was allowed for the first time to visit a detention camp for Timorese suspected of political unreliability.

ed of political unreliability.

Last spring a Philadelphia Inquirer reporter, Rod Nordland, spent 11 days touring East Timor. He found signs of continuing hunger and of represssion by the authorities. People who talked with him were later summoned to military intelligence head-quarters and interrogated. He said no one may leave his village without permission. He reported that many people have been taken from their homes and put in resettlement

The few available sources do not all agree with Nordland's dark picture of life in East Timor. Barry Wain of The Asian Wall Street Journal reported pockets of hunger but not major famine. But those in Washington who collect what information there is on the territory feel there are at least renewed reasons for concern.

Last winter the Red Cross, after its people visited the territory, said the 1982 crop had failed and there would be no significant harvest. Assistant Secretary of State John D. Holdridge, in testimony last month that tried to put the best light possible on everything Indonesia was doing, said the harvest was merely bad.

The worst threat of renewed disaster would be another big Indonesian military operation against pro-independence guerrillas in the mountains. There was a massive sweep last year that all the experts agree had devastating effects on planting and the whole agricultural system. Nordland reported that the Indonesian Army forced every male Timorese 13 and older to join in trying to flush the guerrillas out of the mountains.

That is what we know as President Suharto comes to Washington. The situation in East Timor is obsecure but worrying. The United States has little direct leverage—no big aid program for Indonesia, for example. But expressions of concern from our government, and others, have had some effect on Indonesian practices: opening the territory to a certain extent, allowing relief efforts.

On the eve of the Suharto visit an unusually broad group of Senators and Representatives expressed new concern about East Timor. Republicans and Democrats along a wide spectrum wrote Secretary of State Shultz of concern at reports of famine. Others called for Senate hearings on the "forcible annexation of East Timor." Members cited reports of human rights abuses and asked specifically that international relief agencies be allowed to operate freely in the area.

President Reagan's responsibility in these circumstances is clear. It is to bring home to President Suharto that what happens in East Timor matters to the United States.

He can do that without trespassing on the friendly atmosphere he wants for the visit. We are glad, Mr. Reagan can say, at recent steps on East Timor—the visits by relief agencies and journalists, for example. But we are anxious about reports of hunger and crop failure. Can the United States help? May our aid people have a look? And we hope you will take further humanitarian steps to let people leave East Timor to rejoin families abroad.

The important thing is simply to raise the

The important thing is simply to raise the question of East Timor. Not to do so would be wrongly understood as a signal that there is no real American concern. Many people engaged in the issue believe the Indonesians should be pressed to leave the tertiory altogether, allowing the Timorese to choose freely what government they want. But humanity requires at least a signal that

[From the Daily News, Oct. 13, 1982] REAGAN, SUHARTO HUDDLE (By Bruce Drake)

Washington.—President Reagan yesterday met with Indonesian President Suharto, but administration officials refused to say whether they discussed the sensitive issue of alleged human rights abuses by the Suharto government in East Timor.

A bipartisan group of senators and congressmen last week had told Secretary of

State Shultz of their concern over reports of widespread hunger and violence on East Timor, a predominantly Catholic former Portugese colony annexed by Moslem Indonesia seven years ago. It is estimated that about 100,000 people have died of famine on the island.

An administration official who delivered the press briefing after the 90 minute White House meeting grew irritated when pressed about the subject. He repeatedly refused to say anything other than "our policy is to rely on quiet diplomacy—this is an issue we do not bring up in public."

Reagan has frequently condemned the human rights policy of former President Jimmy Carter, who publicly attacked human rights abuses in other nations.

"Sixteen questions and no answers," a reporter shouted at the senior administration official after the briefing. The official responded. "That's what I'm paid for."

In the White House meeting and in public remarks, Reagan assured Suharto, on his first visit in 12 years, that the United States considered the anti-Communist alliance to which Indonesia belongs—the Association of Southeast Asian Nations—as the keystone of its policies in that part of the world.

Reagan also assured Suharto that the U.S. would not let its efforts to maintain good relations with China interfere with its support for allies in Southeast Asia.

Indonesia and China have been on bad terms since the 1960s, when Indonesia broke off diplomatic relations in part because of reports that China had encouraged Indonesian leftists in a coup attempt.

## [From the New York Times, Oct. 17, 1982] FILLING THE VOID IN JAKARTA

The name of the American Ambassador to Jakarta was missing from the White House guest list last week when Indonesian President Suharto came to call. The embassy has been vacant for months, a vacuum filled by hurt feelings in Jakarta, the State Department and Congress and exacerbated by international character assassination and gossip about Mr. Suharto's friendships at the Central Intelligence Agency.

President Reagan cleared the air by giving the ambassadorship to Assistant Secretary of State John H. Holdridge, an old Asia hand. "Very good," the Indonesian leader commented, "a great honor." All was not sweetness and light, however. As requested by 84 members of Congress, "the tragic situation" in East Timor was discussed.

There have been reports of continuing fighting and widespread hunger and human rights abuses in the Portuguese colony seized by Indonesia in 1975 and unconfirmed estimates of the tens of thousands of deaths. Many inhabitants have been forced into coastal areas with little arable land. Amnesty International recently reported 4,000 prisoners were being held on Atauro island offshore.

American officials declined to comment on the Timor talks, saying they were pursuing "quiet diplomacy." Foreign Minister Mochtar Kusumaatmadja said alarming reports about the island were untrue; reporters had been largely barred from Timor, he said, because roads were bad and helicopter travel was "very costly."

While they were in town, the Indonesians sought and received reassurance that Washington was not planning to give Japan "some policeman role" in the Pacific. The Japanese military is remembered in Jakarta as World War II oppressors. "We prefer to

defend ourselves," Mr. Kusumaatmadja said.

[From the New York Times, Nov. 8, 1982]
"EXTRAORDINARY BRUTALITY" IN EAST TIMOR
To the Editor:

In an Oct. 14 news article, "Indonesia Defends Role in East Timor," Foreign Minister Kusumaatmadja is cited as saying that reports of human-rights abuses against residents of East Timor are "untrue."

Amnesty International has followed the human-rights situation in East Timor since the territory was invaded by Indonesian forces in December 1975, and we find the Foreign Minister's comment disturbing.

It has been evident to Amnesty International in investigating the situation in East Timor that human-rights violations occur there within the context of an occupation of extraordinary brutality in which a whole range of fundamental human rights have

been denied the population.

We believe that the population of East
Timor has been systematically denied the
rights to freedom of expression, association,
assembly and movement. Persons exercising
their right to petition the government for
redress of grievances have been arbitrarily
detained. Movement and communication
within and beyond East Timor has been
tightly controlled.

We are also disturbed by the Indonesians' failure to investigate a number of cases of human-rights violations in East Timor.

human-rights violations in East Timor.

One case involved "Operation Fence of Legs." Undertaken by Indonesian forces from July to September of 1981 with the aim of eliminating Fretilin forces (the movement for an independent East Timor which resisted the Indonesian invasion), its strategy was to deploy tens of thousands of Timorese to form human fences that converged on and flushed out remaining Fretilin forces.

Reports indicated that civilians enlisted for this operation were required to advance in front of Indonesian forces and were unarmed or armed only with primitive weapons. While it is not possible to gauge the number killed in the operation, it is clear that many did not return to their homes.

We also received extensive reports of torture of detainees during interrogation. Forms of torture described in those accounts include burning with red-hot irons and cigarettes, electric shocks to the genitals and other parts of the body, extraction of finger and toenails with pliers and slashing with knives.

We have raised these concerns with the Indonesian Government. So far there has been no response.—LARRY Cox, Deputy Director, Communications, Amnesty International, New York, Oct. 22, 1982.

[From the New York Times, Nov. 21, 1982] Indonesia Squeezing Guerrillas in East Timor

## (By Colin Campbell)

JAKARTA, INDONESIA, November 16.—Western diplomats here say the leftwing guerrila movement that has warred since 1975 against Indonesia's occupation of the former Portuguese colony of East Timor has been reduced to a force of several hundred.

It is still capable of conducting raids, the informants say. But they describe its prospects of entering into any kind of powersharing arrangement with the Indonesians as minuscule.

For a few months at the end of 1975, the guerrilla movement, known as Fretilin, con-

trolled the provincial capital of Dili and large parts of the interior. The Portuguese had abandoned the colony, and the guerrilla movement, whose name stands for the Revolutionary Front for an Independent East Timor, had vanquished its Timorese enemies with the help of arms acquired from the Portuguese Army garrison.

#### CIVILIANS HERDED INTO CAMPS

But then tens of thousands of Indonesian troops forced the group to retreat into the island's rugged uplands. It reportedly took thousands of its followers with it.

Many of the guerrillas' civilian supporters, however, are now said to have been herded by the Indonesian Army into new settlements or detained. The local popularity of the guerrillas has waned, according to diplomats who recently visited the island.

Although the Indonesian Government has restricted all access to the guerrillas' areas of operation for years, several Western embassies here place the rebels' strength at between 200 and 400 armed men. Other recent estimates have placed the figure as high as 600

The hard core can sometimes call on supporters to help it fight, all sources agree. But its total strength is said to be shrinking, and most Western estimates of the organization's military strength are little higher than the estimates offered by the Indonesian Government.

Western diplomats say they do not think that the guerrillas have received any weapons from abroad. How much remains of their Portuguese ammunition is unknown, but they are said to have managed to seize some American-supplied weapons from Indonesian troops.

The guerrillas are thought to be suffering from food shortages as the Indonesian Army has extended control over civilian settlements that might have once supplied them. Hunger has caused some guerrillas to surrender; others are said to depend on armed foraging.

"Whoever's up in the mountains, they're starving," said Patrick C. Johns, director in Indonesia for Catholic Relief Services, which supervises an agricultural development project west of Dili. "They come down to steal cows, to steal food."

Mr. Johns said he believed the Government was consolidating its control. For example, he said, there were formerly 13 military checkpoints along the 50-mile main road between Dili and Baukau on the northern coast. "Now I don't think there are any," he said.

### TIMORESE INDUCTED

Despite the gains made by the Indonesian Government, fighting broke out again last August, and several guerrilla raids apparently were well organized.

Government efforts to extend control included the launching in July 1981 of a large drive against the guerrillas in which thousands of Timorese were inducted to precede army troops and sweep across large areas on foot. Amnesty International, the Londonbased human rights organization, and several diplomats here say that the operation resulted in civilian deaths and that it kept farmers from harvesting their crops.

Two of the four Government battalions in East Timor, the 744th and the 745th, are identified as Timorese, and some reports have said they have been responsible for some civilian deaths.

[From the New York Times, Nov. 28, 1982]
EAST TIMOR'S FOOD SITUATION IS REPORTED
IMPROVING

#### (By Colin Campbell)

JAKARTA, INDONESIA.—Western diplomats and international aid workers here who have traveled in East Timor over the last few months say that food supplies there are gradually increasing.

They said that fears that famine might be imminent in the area, which Indonesia annexed in 1976, were exaggerated. Most visitors also said reports charging that Indonesian authorities had violated human rights in East Timor through dentions and other actions had been difficult to investigate.

Western correspondents have been denied permission to do reporting in East Timor. One reporter's requests were turned down on the ground that there were too few helicopters to transport a visitor across its roadless mountain terrain, and that the province's newly appointed Governor, Mario Carrascolao, needed "time to breathe."

East Timor, a former Portuguese colony on the eastern half of an island about 350 miles north of Australia, was invaded from the Indonesian western half late in 1975 and declared Indonesia's 27th province in 1976. The United Nations General Assembly has refused to accept the annexation, although its votes on the issue have narrowed.

#### 100,000 MAY HAVE DIED SINCE 1975

More than 100,000 of the province's original 650,000 people are believed to have died between 1975 and 1980 as a result of civil war, invasion, the resistance of Timorese Fretilin guerrillas and famine. The famine, in the late 1970's, has been attributed to the dislocation of farmers.

It was reportedly brought under control by early 1981 with the aid of international food shipments, mostly from the Untied States. But renewed concern had been raised by warnings late last year by the head of the province's Roman Catholic Church and by a report of malnutrition published last spring in The Philadelphia Inquirer after an 11-day tour of East Timor.

A point of wide concern is that several Timorese settlements have been cut off from their fields by the Indonesian Army for security reasons. According to Pierre Guberon, the delegate here of the International Committee of the Red Cross, imports of food are needed in four such settlements—Iliomar, Luro, Turiscai and Laclubar.

The heads of the Indonesian offices of the United Nations Children's Fund and the American-based Catholic Relief Services, both of which run aid programs in East Timor, said that their own travels and reports from field workers provided no evidence of impending famine.

"We're flip-flopping all over the place in our helicopter," said Victor Soler-Sala, the Unicef representative. "If there was the slightest sign of famine—not even famine, just severe hunger—it would be dealt with immediately."

He said food stocks and the general level of nutrition in East Timor appeared to him no worse than on other backward islands at the eastern end of Indonesia, and that over the course of a year he had seen nutrition improve.

He said the Indonesian Government was spending more per capita on East Timor than almost anywhere else in the country. He attributed this in part to what he described as the diplomatic trouble that reports of famine in East Timor had caused.

Unicef supplies food, health care, clean water and Indonesian-language instruction to mothers and children in seven settlements of eastern and central East Timor.

Patrick C. Johns, director of Catholic Relief Services, said that from his more limited observations along the north coast, people were not starving. His organization, which was the primary relief agency in heavily Catholic East Timor during the famine, is now supporting an agricultural development project in the Loes River valley west of Dili, the provincial capital.

Aid officials and diplomats who have visited the island have noted that East Timor is still poorly fed by world standards, that its agricultural future is precarious and that a drought affecting most of Indonesia also

affects Timor.

## HON. BOB SHAMANSKY

# HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

• Mr. UDALL. Mr. Speaker, it was with regret that I learned that Bos Shamansky of Ohio will be retiring from the House at the end of this term.

Bob is not afraid to put his conscience first, and he acquired a reputation here for defending the defenseless. He always fought hard to turn the energies of Government to the aid of disadvantaged Americans. That speaks of a special commitment.

All the while, Bob Shamansky was fair and decent and a credit to this Chamber and to the people of Ohio

who sent him to Congress.

I wish Bob and his family well and hope their future wil be bright and rewarding.

### THE MX MISSILE

# HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

 Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, December 15, 1982, into the Congressional Record:

THE MX MISSILE

President Reagan has decided to base 100 MX missiles in super-hardened shelters in a closely spaced field, called "dense pack" by the press. The 100 MX silos would be 1,800 feet apart in a column 14 miles long. In theory, the MX missiles would be close enough together that attacking missiles would destroy each other, but far enough apart that any warhead could destroy only one MX.

one MX.

The President's proposal responds to a real problem. The United States has maintained strategic deterrence by means of a triad of land-based missiles, manned bombers, and submarine-launched missiles. The legs of the triad act in concert to complicate Soviet attack planning and to hedge against

a possible technological breakthrough threatening any single leg. The Soviet Union has now deployed missiles of such quality and quantity as to jeopardize our land-based missiles. It is this weakness in our strategic forces that the MX attempts to correct. It is designed to put Soviet forces under the same sort of threat our own forces are presently under.

There are two central questions on the MX. The first focuses on the need for the missile itself; the second focuses on "dense

Proponents argue that the MX will allow the United States to reduce, if not eliminate, our relative inferiority to Soviet missiles. It is also a good "bargaining chip" in talks with Moscow on reducing strategic nuclear forces. It could be scrapped in return for reductions in large Soviet missiles. It is time to modernize the present Minuteman missile force in any case, and the MX would be more reliable. It would be relatively cheap. Killing the MX missile outright would not be wise at a time when we are trying hard to keep our nervous Western European allies from reneging on the commitment to keep intermediate-range nuclear missiles on their soil.

The arguments against the MX are that it is not needed to pose a serious threat to Soviet missile silos. By improving the size and quality of our warheads, Minuteman missiles could also threaten those targets. Without a survivable basing mode the MX undermines American security because it adds nothing to our ability to retaliate after attack, but it creates the perception among the Russians that America is moving toward a first-strike capability. Faced with that purpose, the Russians might adopt a launch-on-warning policy and fire first in a crisis. As seen from this perspective, the MX raises the risk of war.

My own view is that the MX remains an essential ingredient in American nuclear strategy—as long as a secure base is found. It provides a better mix of accuracy and control than do submarine-launched missles, and it permits us to offset the Soviet advantage in the number of warheads carried by their missiles. It is a potent "bargaining chip" in talks on arms control.

The second major question with regard to the MX is how to deploy it in a way which would insure its survival against increasingly accurate Soviet missiles. More than 30 basing techniques have been considered by several administrations, all including variations on three basic approaches: The MX could be deployed in underground silos, carried on a moving platform, or moved randomly among a large number of covered launch sites. President Reagan has at least twice announced and then renounced basing plans for the missiles.

The President's choice of "dense pack" is founded on the theory that if American missiles are close together they would not be wiped out in a single attack—incoming Soviet warheads would be so close that the first few to explode would disable the others. This phenomenon is referred to by the experts as "fratricide."

Critics of the President's proposal argued that "dense pack" does not solve the problem of vulnerability. They have suggested several things which the Russians could do to avoid fratricide. Some of them would depend on the near simultaneous explosion of incoming warheads. Others would depend on pinning the American missiles in their shelters by detonating weapons in the air above the missile field. Some critics deny

that silos could be hardened to the degree necessary to withstand the destruction of neighboring silos. The arguments are extremely techical, and there are few Americans qualified to make the calculations involved. But it is significant that no expert outside the government has declared unambiguously in favor of "dense pack," and many have declared against it. Even the Joint Chiefs of Staff recommended against it. If the United States deploys the MX in "dense pack," however, it could very well in-crease strategic instability. Rather than waiting to retaliate, each side would have an incentive to shoot first. Accurate missiles which have little chance of surviving attack represent the most dangerous combination possible.

My conclusion is that very little is really known about fratricide. There is no demonstration of the feasibility of basing our strategic defenses upon in. Consequently, I do not have high confidence that "dense pack" will deal with the problem of vulnerability. The administration has given the cost of the missiles in the dense pack basing mode as \$26 billion; this would be a gigantic waste if the MX is not survivable in this mode. I also believe that the Soviets have available to them measures to counter "dense pack" within a few years of initial development. Therefore, I think that the value of MX as a deterrent will diminish rapidly.

I doubt if the dispute over the fate of the MX will be quickly resolved. Congress began debating the issue in 1974; it started considering methods of basing the missile in 1977. There is, in any case, no rush in funding the production of MX, for it will be at least three years before a basing mode can be completed. Congress should continue funding the development of the MX missile, but we should send "defense pack" back to the Pentagon for further analysis.

CHILD WELFARE

# HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. MOFFETT. Mr. Speaker, the lameduck session is quickly drawing to an end, but before it concludes I want to insert in the RECORD a view on child welfare from a constituent in my home State of Connecticut.

The House narrowly approved last night a new continuing resolution to fund various programs during fiscal year 1983. The administration is now at work preparing its budget request for fiscal year 1984. From reports leaking from this endeavor, we can expect more grim and outrageous proposals to cut funds for children's services.

When the budget request is submitted to Congress, I hope that Members of the 98th Congress will remember the words on child welfare of the constituent to follow. And, please keep in mind that while children are one-third of our population, they are our entire future.

Statement of Mary LaForge of New Canaan, Conn., speaking for the Coalition for Basic Human Rights, which consists of representatives from social, civic, and religious organizations in Stamford, Darien, New Canaan, and Greenwich, Conn.:

The "New Federalism" is the next step in the abandonment of Federal responsibility for seeing that essential human services are provided. It ignores differences between States with regard to economic resources, and political unwillingness to care for the needy.

Even under the present system of 50% or more Federal funding, a rich State such as Texas has welfare allowances which are almost as low as those in Mississippi, the poorest State in the U.S. Even a State such as our own Connecticut, which is among the very wealthiest in the country, provided allowances for families with dependent children which are well below what is needed for basic necessities—even when supplemented by food stamps and energy assistance

Actually, the "New Federalism" has been underway for almost a year now. The block grants, deregulation, funding cuts, and program changes which were instituted in fiscal year 1982 were the first steps in the abdication of Federal responsibility. This set the stage for reduced services, diminished accountability for the use of Federal dollars, and political competition among needy constituents for pieces of the smaller pie.

In its latest proposals, the Administration aims at further application of the block grant principal until there is a wholesale, no-strings-attached system, while Federal funding is cut back more and more. The ultimate aim was stated by the President in March of 1981, when he said: "I have a

dream.

I think block grants are only the intermediate steps. I dream of the day when the federal government can substitute for those the turning back to local and state governments of the tax sources we ourselves prempted here at the federal level so that you (the states) would have those tax sources.

Here in Connecticut where we have many wealthy people and highly paid executives, we already have rich tax sources, but most legislators have been unwilling to tax those sources with a comprehensive income taxeven with the present federal income tax cuts. Instead, services have in general been reduced to conform to reductions in federal funding and tightening of eligibility. I am not hopeful that, under the "New Federalism", the state would retune its tax structure and raise enough revenue to provide adequate support and services for the poor, as federal funding diminishes or disappears, even if more tax resources are returned to the state and Medicaid is largely taken over by the federal government.

Essential assistance to poor families with children was inadequate before this Administration took office. It became more inadequate and unfair in FY 82, and will be further eroded under the FY 83 federal budget.

What will happen to children of the poor here in Connecticut and elsewhere if in addition the federal government now moves AFDC over to the states with little or no federal funding, while at the same time cutting back on Medicaid—for example, by eliminating so-called "option" services such as eyeglasses and dental care and medical care for non-welfare poor families, services provided now by Connecticut and some other states?

What will happen to these children if all those other programs are turned back to the states with reduced and eventually no feder-

al funding, with states ultimately free to do what they want—services such as child welfare, child health care, preventive health services, child nutrition, social services, including day care and protective services, education, etc.?

The latest Census Report says that one in every five children in the U.S. is in a family with an income below the unrealistically official poverty level—that's 20% of the children in this country—and the number has been increasing as unemployment rises. Even in Connecticut, there were as of 1980-81 around 100,000 children on the welfare rolls, with many others in poor families which do not qualify for assistance—more of them now that so many of the working poor have become ineligible for cash assistance, or free medical or day care under last year's budget act.

It is nonsense to say in effect that it is not a matter of national concern whether over 20% of the Nation's children are enabled to grow up healthy and equipped to be self-supporting and productive. One of the main reasons the national school lunch program was launched was that there were so many unhealthy, malnourished young men from poor families who were no use as draftees for the Army. So even from a narrow military point of view, the developing "New Federalism" is jeopardizing the future of this country.

If the Nation neglects this large segment of its precious human resources, we will have increased numbers of unhealthy, uneducated, unemployed, and alienated people who will become burdens instead of resources—not only for our local communities and states, but for the Nation as a whole.

## FIORELLO LA GUARDIA'S MEMORY LIVES ON

# HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. BIAGGI. Mr. Speaker, last night the National Italian American Foundation used the occasion of Fiorerllo H. La Guardia's centennial birthday to present its first annual Fiorello H. La Guardia Public Service Award to my good friend and distinguished colleague from New Jersey, Peter W. Rodino, Jr.

The award, which honors the public servant who best exemplifies the traditions and high standards established by Fiorello La Guardia, was certainly well deserved. Like La Guardia, PETER RODINO has served this body and the Nation with great distinction.

Earlier this year, I authorized a resolution that was unanimously adopted by the Congress honoring the centennial birthday of Fiorello La Guardia. In that resolution, I stated:

His public service career serves as a benchmark from which others are judged—his many accomplishments and the honesty and fairness which characterized his work continue to serve as an inspiration to all Americans, particularly those who share his Italian heritage.

These same words can certainly be applied to the life and work of Peter

Rodino. How fortunate this Nation was to have such an able and respected man leading the House Judiciary Committee during the difficult days of Watergate. How fortunate his Newark constituents are to have such a committed and effective Representative in the Congress. How fortunate we are to have such a wise and diligent colleague to help us deal with the tough problems our Nation faces.

Mr. Speaker, I am particularly pleased that the National Italian American Foundation has—through this award—established a constant reminder to all Americans of the tremendous contributions Fiorello La Guardia made to the betterment of our Nation. I feel strongly that his life and work can and should continue to inspire others. That is why I authored my resolution commemorating his centennial birthday, and that is why I applaud the National Italian American Foundation for establishing this award.

It should be noted, though, that this award is only a part of the foundation's outstanding work on behalf of all Americans, but particularly those of Italian heritage. During its 8-year history, the foundation has grown to become a major, and influential, voice for the Italo-American community.

A brief review of their work shows that they have established a valuable undergraduate college scholarship program and a highly commendable legislative intern program for graduate students. They serve as an effective and much-needed liason with Italian-American Members of Congress. They have been a driving force behind efforts to eliminate antidiscrimination activity against Italo-Americans. Especially noteworthy has been their most successful efforts to collect funds for Italian earthquake relief.

Congressional founders of the foundation 8 years ago were myself, Joe Minish, Johnny Dent, Dominic Daniels, Frank Annunzio, who presented the La Guardia Award last night, and Peter Rodino. Key officers of the foundation include Jeno F. Paulucci, chairman; Frank Stella, president; and Fred Rotondaro, executive director. Simply put, this group of outstanding leaders from both the public and private sector have succeeded in establishing for the first time a major Italian-American presence in Washington and around the country.

Last night I was especially honored to serve as an honorary cochairman of the La Guardia Centennial Reception with my good friend and fellow New Yorker, Alfonse D'Amato. It was Senator D'Amato who steered the resolution (H.J. Res. 595) honoring La Guardia's centennial birthday through the Senate and onto the White House for signature into law.

Also honored at last night's reception were two very distinguished Americans, Ernest Cuneo and Leon H. Keyserling. Ernest Cuneo was recognized by the foundation for his tireless efforts on behalf of the La Guardia Centennial Committee. Having served as La Guardia's secretary and law clerk, Ernest Cuneo is recognized as the most knowledgeable scholar on La Guardia. His book, entitled "Life with Fiorello," is renowned as the most comprehensive on "The Little Flower's" life.

Leon H. Keyserling is an internationally respected economist who has served Mayor La Guardia, as well as a number of U.S. Presidents, with equal distinction. He is recognized as the author and architect of the National Industrial Recovery Act under Franklin D. Roosevelt, and he worked very closely with Mayor La Guardia in developing major labor and social legislation.

Mr. Speaker, in closing, let me once again pay tribute to the first threeterm mayor of New York City, and sixterm Congressman, Fiorello H. La Guardia. On December 11, 1982, we celebrated his centennial birthday. Thanks to the work of the National Italian American Foundation, the La Guardia Centennial Committee, Ernest Cuneo, Morris Novik, and Peter Rodino, the greatness of Fiorello La Guardia will not be forgotten. Rather, it will continue to inspire others.

TIME FOR THE DEMOCRATS TO TAKE A STAND ON SOCIAL SE-CURITY

## HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. NELLIGAN. Mr. Speaker, many Republicans were the victims of Democrat scare tactics centering on the issue of social security this election year. These attacks were made despite the fact that many Republicans, myself included, are opposed to any cuts in social security benefits to the elderly. Unfortunately, the Democrats chose to utilize scare tactics rather than to present any real alternatives to Republican proposals on social security, the economy, or many other areas.

I would like, therefore, to set the record straight on the issue of social security and the changes which are presently taking place in the program, changes which were mandated by the 1977 amendments to the Social Security Act.

In 1977, when Jimmy Carter was President, and both the House of Representatives and the Senate were controlled by the Democrats, changes

were made in basic social security retirement benefits with the implementation of amendments to the Social Security Act. Some of these 1977 changes were mandated to begin within a 5-year period, and went into effect in 1982.

Therefore, it was the Democrats who reduced benefits to a dependent spouse by the amount of any Federal, State, or local civil service pension received by that spouse.

It was the Democrats who froze the initial level of the minimum benefit at the 1978 level of \$122 per month.

It was the Democrats who adopted a critical change in the method of calculating social security benefits for future retirees, resulting in further reductions in social security benefits.

For the average beneficiary retiring on 1982 at age 65, cuts in the Democrat-passed bill meant a \$130-permonth reduction in benefits, and a loss of more than \$5,000 over the next 3 years. It was not the Republicans who did this. It was the Democrats who did this and then blamed the Republicans for it.

The 1977 amendments also provided for the largest tax increases in the history of social security. For the average taxpayer, the 3-year added social security tax will total \$685.

The tax increases mandated by the

1977 amendments:

Raised the social security wage base from \$17,700 to \$22,900 in 1979, and in stages to \$32,400 in 1982. After that, it will increase automatically with inflation to a projected level of \$42,600. Over that period of time, the wage base will increase by almost 160 percent. It has already increased by 82 percent since 1977.

Payroll tax rates were also increased in stages from 5.85 percent in 1977 to 6.70 percent in 1982, and will eventual-

ly reach 7.65 percent in 1990.

So that there can be no misunderstanding as to who inspired the changes in social security which were mandated by the 1977 amendments, we must recall President Carter's statement upon signing this legislation into law on December 20, 1977. He predicted that this bill would "assure today's workers that the hard-earned taxes they are paying into the system today will be available upon their retirement." Earlier, he asserted that: "Taken together, the actions I am recommending today will eliminate the social security deficit for the remainder of the century."

So what the Democrats gave us as the solution to the security tragedy was the largest tax increase in the history of the United States and a broken promise.

Four years later, the social security trust funds are losing \$18,000 a minute, and for the first time, the Government has had to borrow to pay social security benefits.

It is interesting to note at this point that in October 1981, Congressman J. J. Pickle, chairman of the House Ways and Means Subcommittee on Social Security, scheduled hearings on a comprehensive reform bill. According to Time magazine, May 24, 1982:

House Speaker Tip O'Neill ordered Pickle to go no further. The reason: O'Neill saw an opportunity for Democrats to assail Reagan as an enemy of social security, and he did not want the issue clouded by anything that could be interpreted as a Democratic plan to reduce benefits for anybody.

With respect to the cost-of-living increase which was just implemented, it is necessary to review the 1981 budget, and the changes which were recommended to the House of Representatives by the Democratically controlled Ways and Means Committee, chaired by Congressman Rostenkowski. They included:

Delaying half of the 1982 cost-ofliving adjustment from July 1982 to October 1982. If the Democrat reconciliation package had passed, social security recipients would have received one-half of the cost-of-living adjustment they actually received on July 1, 1982.

Eliminating the lump-sum death benefits paid to recipients with no surviving spouses.

Terminating benefits paid to the parents of children who receive social security benefits when a child reaches age 16 rather than 18.

Eliminating the minimum benefit for newly entitled beneficiaries as of January 1, 1982.

Phasing out social security benefits for postsecondary students over a 4-vear period.

Rounding benefit increases to the lowest dime and benefit increases to the lowest dollar.

In addition to these proposals, Senator Ernest Hollings, ranking Democrat on the Senate Budget Committee, proposed a budget alternative this year that would have canceled the 1982 and 1983 social security cost-of-living adjustments.

In fairness, I must point out that the Republican-controlled Senate Budget Committee was ready to go along with Senator Hollings' proposal for the 2-year freeze on social security cost-of-living benefits. However, the President dismissed this proposal to freeze social security benefits as a part of a package of measures to cut the deficit.

President Reagan was one of the few people in Washington who didn't want to change this year's cost-of-living adjustment,

According to Social Security Commissioner John Svahn.

President Reagan is correct in taking the credit for providing the 7.4-percent cost-of-living adjustment in social security benefits. He stood firm in his commitment to the elderly to provide the full increase in fiscal year 1982. and he should receive proper credit for his stand on this issue.

TIP O'NEILL, Speaker of the House in 1977 and now, thundered during the debate on the 1977 amendments to the Social Security Act,

If I've ever seen an issue that's a Democratic issue, it's this.

I agree with the Speaker-this is it. Now that the great social security lie of 1982 has been perpetrated on the American public, and the scare tactics on our senior citizens used by Congressman CLAUDE PEPPER and the Democrats succeeded in defeating many who were strong supporters of our senior citizens, such as myself, I call on the Speaker and the Democrat Party to take the lead in proposing solutions to the critical social security problem and to demonstrate the courage and conviction needed to legislate those changes. This would be an honest and courageous approach to the so-called "Democratic issue" and not the cowardly, passive approach taken by the Democrats thus far; that is, to sit back, criticize and dishonestly politicize the issue.

Mr. Speaker, now is the time for you and your party to step forward and show America what you and your party are made of.

HON. RON MOTTL

## HON, MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. UDALL. Mr. Speaker, Row MOTTL will be retiring from this House at the end of the year, and I am sorry to see him go.

I appreciated the opportunity to get to know Ron. He leaves with a national reputation for his efforts on behalf of American veterans, through his work on the House Veterans' Affairs Committee. Among many other things, Ron led the difficult fight to see that the Veterans' Administration granted free medical care to servicemen who may have been exposed to agent orange.

Throughout his years in the House, Ron Mottl has kept a special vigor in reserve to work on behalf of the people in his Ohio district who sent him to Washington. It is exhausting to think about his schedule, but it is true that he has not spent a weekend in the capital since he was first elected.

RON MOTTL has been a devoted, conscientious, and dedicated Member of Congress, and one of which the people of his district and State can be proud.

I wish Row and his family all the best of what they seek in the future.

THE RETIREMENT OF EARL H. MOSER, JR.

## HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

 Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the retirement of Mr. Earl H. Moser Jr., from the Federal civil service after more than 48 years of continuous duty.

Earl began his distinguished career with the Federal Government in July 1934, as a soil conservation trainee for the Department of Agriculture. In May 1942, after advancing to an assistant civil engineer, he transferred to the U.S. Army Engineers.

In August of 1943, Earl accepted a commission as an ensign in the U.S. Navy Civil Engineer Corps, and was assigned to the Construction Battalion Detachment 1029 in Espiritu Santo, New Hebrides Islands. He was appointed operation officer of the spare parts depot, and as a lieutenant (junior grade) he supervised 200 enlisted men and 3 other LTJG's.

Following this discharge from active duty in July 1946, Earl began his civilian career with the naval facilities engineering command in Port Hueneme, Calif., enventually becoming the acting head of the structural division.

In January 1952, Mr. Moser, a Reserve CEC officer, was recalled to active duty to head up a 10-man polar research expedition. During their 3-month expedition to Greenland, the team successfully prepared a snow runway suitable for C-47 wheeled operations and collected valuable information on logistical and operational requirements of small independent airborne functional components. For his outstanding service and leadership, Earl received a commendation from the Secretary of the Navy.

Returning to his civilian job at the Naval Civil Engineering Research Laboratory, he continued in polar research and soon made his mark in the Antarctic, being commended by the U.S.S. Atka for assistance provided during the U.S. Navy Antarctic expedition of 1954-55. In 1957 he was selected as Director of the Polar Division, a position that he held for the next 14 years. During this period he received the Navy Superior Civilian Service Award, two quality step increases, two letters of appreciation for clearly superior performance, a \$300 cash award for superior accomplishment, and a letter of commendation from the consulting engineering for the California Olympics Commission Organizing Committee.

With the advent of stricter pollution control laws in 1970, the Naval Civil Engineering Laboratory was tasked to develop a Navy environmental protection data base. Under Earl's leadership, plans for the \$7 million program were developed and accepted essentially unchanged. Under great pressure to implement the plans quickly, he developed an organizational structure, hired personnel, and set up procedures for what has become the Naval Environmental Protection Support Service (NEPSS).

Despite the transition to another technical area, Earl proved time and again to be a topnotch Government executive. Since moving to the environmental field in 1971, he has received two outstanding performance ratings, a superior achievement cash award, and a letter of appreciation from his commanding officer. In addition, work performed under his direction has resulted in laudatory correspondence from numerous other commands, including CNO, CMC, CNET, CHNAVMAT, NAVSUP. NAVFAC.

During much of his civilian career, Earl also served in the Naval Reserve, eventually becoming the commanding officer of Construction Battalion Company 11-16. Starting with a unit ranked 113 of 114 units, his unit became one of the top 10 units in the Nation within 3 years. In November 1969, he retired as a commander in the Naval Reserve.

Mr. Moser's many hours of overtime without compensation, his 3,200 hours of unused sick leave and his regular forfeiture of unused annual leave further attest to his tireless and selfless dedication to duty. This executive's contributions and accomplishments during his 48-year Federal career and his 39-year Navy career have truly made a significant positive impact on the Naval Facilities Engineering Command, the Navy, and the Federal Government. I ask my colleagues to join me in congratulating him on his accomplishments to date and on best wishes in the future.

## REDUCING THE DANGER OF NUCLEAR ARMS

## HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. RITTER. Mr. Speaker, I believe with all my heart and soul that we must reduce the danger of nuclear arms. There are far too many and the danger is already unacceptably high. I also believe that the danger is only partly related to the number of such weapons. A greater danger, perhaps, is conflict arising out of one side feeling they have the upper hand and threatening or blackmailing the other.

To achieve real peace, reducing the danger of nuclear weapons must always mean mutual reductions of weapons. That means the U.S.S.R. as well as the United States. Even the nuclear freeze resolutions use the term "mutual" when they discuss freezing at present levels. In that sense, the House of Representatives, by voting down MX production on December 7. 1982, violated the intent of the nuclear freeze resolutions by not requiring that the cutoff on MX be linked to limiting further production and deployment of counterpart Soviet SS-18

The House, by itself-without any counterpart assurances of mutual freezing by the Soviets-voted to freeze U.S. land-based missiles to the early 1960's Minuteman.

#### FUROR OVER BASING MODE

It must be stressed that the appropriations bill of December 7 did not seek to approve the controversial Dense Pack or any other basing mode for the MX. It sought only to approve initial production.

I share many of the reservations expressed about Dense Pack, but the legislation before us put off any expenditure of funds for a basing mode, allowing for more careful scrutiny by the Congress. Everyone should know that whatever way MX is based, in Dense Pack, or even in existing Minuteman silos, it is still far superior to what we have. A commitment to build it gives us a chance to mutually reduce those kinds of late-generation land-based missiles which are most threatening and which the Soviets already have deployed.

INCENTIVES FOR NUCLEAR MISSILE REDUCTION

In the absence of a modern U.S. land-based missile, why would the U.S.S.R. feel the need to reduce any of its own land-based intercontinental missiles? Many of their new and highly capable SS-18's and SS-19's already have MX power and accuracy, and they are already deployed. Without some U.S. bargaining position, where would the incentives be for the Soviets to cut back and contribute to a reduction in the danger of nuclear arms?

I personally believe that at least for the time being, we have handed the Soviets a victory by default in our negotiations in Geneva and this increases the danger from nuclear arms. Why? Because with highly accurate, superpowerful SS-18's and SS-19's deployed across the Soviet Union and pointed mostly at American targets, they have gotten away scot-free from having even to discuss their reduction of MX-type weapons.

## THE LESSONS OF HISTORY

When the Carter administration unilaterally turned down the B-1 bomber in 1976, many applauded because it saved money. But we need to ask ourselves now, did such unilateral action promote reduced danger from advanced nuclear weaponry? Unfortunately not, and now their Backfire is deployed in substantial numbers and Soviet B-1's are rolling off the production lines. Our B-52 bomber dates from the early 1950's. Would not it have been more effective to commit to build B-1 back in 1976 and then mutually negotiate away production of such weapons with the Soviets?

Now the Soviets refuse to discuss manned bombers such as Backfire and B-1 because we have nothing to bargain with. It is ironic that many B-1 foes are opting for a more powerful. more capable manned bomber, called Stealth, in order to make up for letting the Soviets off the hook in the early and mid-1970's. Stealth will be expensive and certainly will not curtail the arms race regarding manned

The one time we did engage in mutual limitations, the antiballistic missile (ABM), we did get a real reduction in the momentum for new weapons. The Soviets' initial reaction was to go ahead and build their own ABM system when they felt Congress would not allow the American version. They agreed on a mutual curtailment only after we decided to do an American ABM system.

#### ARMS REDUCTION TALKS IN GENEVA

Our strategy in Geneva is to cut deployed nuclear missiles by one-half and total warheads, of both the United States and the U.S.S.R., by one-third. However, without some-thing comparable to their already deployed SS-18, they will stonewall us on any reductions in those most dangerous land-based missiles.

After the United States unilaterally did away with B-1 in 1976, a U.S. Senator asked a Soviet general what their response would be. His reply: "Senator, we are neither pacifists nor phi-lanthropists."

SAFETY AND COST

There are two basic considerations to my position. First and foremost, mutual reduction of weapons systems offers greater safety for us, our children, and our grandchildren. Second, the cost of the arms race is lessened when both sides agree to cut back or not to go ahead with a particular weapons system.

We have been successful in avoiding major war with a powerful adversary for 37 years. Much is owed to our strategy of deterrence.

It has worked in the past. Opting out of the land-based missile competition now, without the Soviets followig suit, gives them a free ride to overwhelming advantage in the most powerful and accurate of weapons.

Voting to go ahead with limited production of MX at this time is not popular. But I ask the people of the Lehigh Valley to take a longer view of safety and cost. In considering my vote I was mindful that December 7 was a black day in American history, and a symbol of how we got ourselves into trouble in the 1930's. At that time, prior to World War II, well-meaning people brought great pressure against rearmament at a time of economic difficulty. Those pressures, combined with the complacency of the rest of the American people, worked to undermine our safety as a nation. The ultimate cost of closing our eyes in the 1930's went far beyond what anyone would have imagined at the time. Learning from history, we need not repeat the past. Not wanting to repeat past mistakes and recognizing the current state of our negotiations with the Soviets in Geneva, I cast my vote for initial MX production. I believe it was a vote for peace.

U.S. Representative Don RITTER and his wife, Edie, lived for a year in the U.S.S.R. in the late 1960's. He speaks fluent Russian and serves on the Commission on Security and Cooperation in Europe, also known as the Helsinki Commission.

#### TOBY MOFFETT

## HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 14, 1982

• Mr. OTTINGER. Mr. Speaker, I rise this evening to add my own words to the tribute being paid to our distinguished colleague from Connecticut TOBY MOFFETT. TOBY is a true friend and will be missed by all-not only by his colleagues in Congress, but by the people of his home State, Connecticut, and of this great Nation.

Toby has served the people of this country with enthusiasm and distinction. Whether it was as the young champion of consumer rights, as the founder of the Connecticut Citizens Action Group, or as chairman of his Subcommittee on the Environment, Energy, and Natural Resources, working to hold the administration's feet to the fire on our commitment to a safe environment and a sane energy policy. In all aspects of his political career, Toby has proven himself an able legislator and a fighter for what he believes in.

Toby's decision to relinquish his seat leaves a void that will not easily be filled. I know, however, that wherever future years will lead him, that Toby will continue to exhibit the leadership and enthusiasm that he has shown here in the House.

Toby, you will be greatly missed, and I wish you the best of luck in future years.

#### SES AWARD WINNERS COMMENDED

## HON, FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. WOLF. Mr. Speaker, I would like to take this opportunity to bring to my colleagues' attention the President's 1982 Senior Executive Award winners. President Reagan praised the Nation's top members of its elite managerial corps, the SES, in a White House ceremony Monday, November 22, and I believe it is appropriate that Congress should recognize these individuals' achievements as well.

Thirty-eight senior executives were honored with "Distinguished Senior Executive" awards. All were selected on the basis of sustained exceptional performance during the past year. Ten of these award winners live in my congressional district and I would like to cite the individual accomplishments of

these senior executives:
Sally H. Christensen is the director of Budget Services at the Department of Education. Mrs. Christensen has served with distinction in the Department and has developed several major legislative initiatives of the administration including proposals on student aid, education for the handicapped, impact aid, and block grants.

Robert L. Fairman is the senior ranking career/civil servant as Assistant Secretary for Administration in the Office of the Secretary of Transportation. Through his work in drafting the Department's cost avoidance reduction efficiency program, Mr. Fairman was able to effect savings of \$60 million in reduced and avoided costs in 1981 for the Department of Transportation.

Richard R. Hite is the Deputy Assistant Secretary for Policy, Budget and Administration at the Department of the Interior. During his tenure, he planned and directed numerous, complex reorganizations in response to rapidly evolving energy and environmental policies. The Department's ability to meet the challenge of the energy crises of 1974 was largely due to his leadership in organizing and structuring new energy functions and coordinating these with related efforts of other Federal agencies. He has played a vital role in this agency's role during the past decade.

Henry L. Longest II serves as the Director of Office of Water Program Operations at the Environmental Protection Agency. Mr. Longest has proposed reforms to the Clean Water Act which effectively reduced the overall Federal share of costs for the construction grants program from \$90 billion to \$36 billion.

James H. Michel, the Principal Deputy Legal Adviser at the Depart-

## EXTENSIONS OF REMARKS

ment of State, is the highest ranking career attorney in the Department of State and has advised Secretaries of State and successive Presidents on the critical legal issues of war and peace for 17 years.

Jerome A. Miles is the Deputy Chief for Administration of the Forest Service at the Department of Agriculture. Mr. Miles has successfully increased productivity, reduced costs, and improved the quality of administrative operations in the Department. As Director of Finance, he established a national finance center which saves over 600 staff years annually.

Richard S. Nicholson is the Acting Deputy Assistant Director for Mathematical and Physical Science and Director of the Chemistry Division of the National Science Foundation. He directs the National Science Foundation program in chemistry, which provides resources for more than 800 research groups.

James I. Owens is the Deputy Commissioner of the Internal Revenue Service at the Department of the Treasury. Mr. Owens was recently responsible for the implementation of the most significant reorganization of the IRS since 1952. He has made outstanding contributions in every position he has held.

Stuart E. Schiffer, Deputy Assistant Attorney General of the Department of Justice's Civil Division, has been recognized as an outstanding manager and authority in the civil litigation field. He has personally handled the most complex and sensitive ligitation in the Civil Division. Examples of such cases are the litigation of the Iranian suits, the Patco strike, and challenges to the Presidential hiring freeze.

Charles O. Starrett, Jr., is the Director of Defense Contract Audit Agency. Under Mr. Starrett's leadership in disclosing incidences of fraud, waste, and mismanagement, the Agency has contributed significantly to reductions in Federal expenditures for procurement of defense material. Recovery of up to \$810,000 has been realized in recent months.

Some 161 "Meritorious Senior Executive" award recipients were named as well. Those awarded as distinguished or meritorious senior executives receive a cash bonus and a Presidential citation.

These career civil servants exemplify the very highest levels of the Federal Government. To these Americans we owe a debt of gratitude for their contribution toward effective and efficient government.

## ANTHONY MOFFETT

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 14, 1982

• Ms. FERRARO. Mr. Speaker, one of the truly positive developments in the 1970's was the growth of a strong consumer rights movement. Toby Mor-FETT has been a great leader and friend of that movement.

Particularly in the area of energy pricing, Toby has worked to protect consumers against unreasonable and excessive price increases. As chairman of the Government Operations Subcommittee on Energy, Environment, and Natural Resources, and as a hardworking member of the Energy and Commerce Committee, he has opposed the special interests on behalf of the public interest.

He has emerged as a strong defender of the environment, insisting on stringent safeguards in the development of our natural resources. Many of the protections which have been written into our laws are the result of Toby's leadership and commitment to a clean environment.

The problem of acid rain destroying lakes and killing fish and plant life, especially in the Northeast, has become a special concern of Toby's in recent years. His legislation to require reductions in sulfur emissions from powerplants is a far-reaching proposal for dealing with this serious problem.

Since his first election to Congress in 1974, Toby Moffett has established a reputation for hard work and commitment to his principles. His presence will be missed, but his influence will still be felt in this House. The good news is that his presence may only be missed for 2 years. But whatever his future holds, I know his voice will continue to be heard on important issues in the years to come.

## DR. GEORGE B. KISTIAKOWSKY

## HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. BOLAND. Mr. Speaker, on December 7, with the death of Dr. George B. Kistiakowsky, the United States lost one of its most distinguished citizens.

Dr. Kistiakowsky was an internationally known scientist, academician, and scholar. Perhaps best known for his work in connection with the development of the atomic bomb, Dr. Kistiakowsky became an outspoken and effective critic of the nuclear weapons race and the world's burgeoning nuclear weapons stockpile. When he sit-

nessed the first atomic explosion in the New Mexico desert in 1945, he believed that he had seen a vision of how the world would end. "I am sure that at the end of the world—in the last millisecond of the Earth's existence," he said "the last human will see what we saw."

George Kistiakowsky, who knew better than most the awesome destructive capacity of even one nuclear device, was appalled by the proliferation of these weapons, and the tensions and uncertainties that proliferation has produced. As chairman of the Council for a Liveable World, Dr. Kistiakowsky spoke around the world on the need to control nuclear arms. While he was pessimistic about the ability of the world's leaders to end the arms race, he never slackened his efforts to achieve that result. His death removes from the nuclear arms debate one of its most knowledgeable and respected participants.

Mr. Speaker, Dr. Kistiakowsky's life was one of high achievement. Born in Russia, he became a naturalized U.S. citizen in 1933.

He served his adopted country with distinction noted by three Presidents. President Truman awarded him the Medal of Merit, President Eisenhower presented him with the Medal of Freedom, the Nations' highest civilian award, and President Johnson awarded him the National Medal of Science. He served in the Eisenhower administration as special assistant for science and technology and chaired the Science Advisory Committee. His service in these posts came at a time when the U.S. space program was in its infancy and concern about the need to restrict atmospheric nuclear tests was increasing. Later, Dr. Kistiakowsky served as a delegate to talks in Geneva aimed at lessening the danger of surprise nuclear attack and as an adviser to the Defense Department.

Perhaps the affiliation that Dr. Kistiakowsky most treasured was the one he enjoyed with Harvard University. A member of Harvard's faculty for 41 years, he rose from assistant professor to professor emeritus of chemistry. The Kistiakowsky lectureship in the chemistry department at Harvard will serve as a lasting memorial to the impact that he had on the institution, its students, and the world of science.

George Kistiakowsky was a truly remarkable man. His talents gave him the ability to see the potential for good and for harm that can come from technological advances. A skilled scientist whose mind never ceases to be challenged by the seemingly impenetrable problems with which it was confronted, he recognized the scientist's special duty to consider all of the ramifications of scientific advancement. The people of the United States were indeed fortunate that he chose to

devote so much of his life to public service.

NATURAL GAS PRICE INCREASES: TIME FOR CONGRESS TO ACT

## HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. BEREUTER. Mr. Speaker, today I presented testimony to the House Subcommittee on Fossil and Synthetic Fuels on the disturbing circumstances facing our country because of rapidly increasing natural gas prices. I would like to have the text of my statement printed in the Congressional Record.

TESTIMONY OF HON. DOUG BEREUTER BEFORE THE SUBCOMMITTEE ON FOSSIL AND SYNTHETIC FUELS

Mr. Chairman and Members of the Subcommittee: I appreciate having the opportunity to appear before this panel to briefly address the impact of natural gas price increases upon my constituents and upon the American economy in general. I know the members have received the testimony of many of our colleagues and that this has been a long day, so I will keep my remarks brief

We have all heard the horrible facts surrounding natural gas price increases in the past few months. Frankly, as one of the first members to cosponsor legislation in this area, I am somewhat disappointed in the failure of the Subcommittee to hold hearings on this issue at an earlier date. when it was clear that significant problems would occur this winter and while there was still sufficient time to address the matter in the 97th Congress. Clearly, in these closing days of the Congress, there is insufficient time to fully consider the many complex facets of the natural gas issue, and it appears that our constituents must suffer through the next few months of high gas prices as a result. The least we can hope to accomplish would be a freeze on natural gas prices until such time as the 98th Congress can comprehensively address the matter. At any rate, I am relieved that the Subcommittee is making this effort to examine the situation, even at this late date.

Mr. Chairman, natural gas prices have risen an average of 17 percent over last year, and an astounding 5 percent in November alone. Reliable estimates indicate that natural gas consumers will be overcharged by \$5 billion this year as a result of last enforcement by the Federal Energy Regulatory Commission and supply decisions made by natural gas producers.

Of course, the single greatest factor in the meteoric rise in gas prices has been the "take or pay" clauses which have been the inevitable result of the NGPA. Many of the proposals before the Subcommittee would address the take or pay issue and would encourage pipelines to purchase the cheapest gas available. This is the approach which I believe we should be pursuing. We simply must take action to alleviate the disastrous results of supply contacts which are not in effect.

Of particular concern to me, as the representative of one of the major agricultural regions in the nation, is the impact of these

exorbitant natural gas prices upon the agricultural sector of the economy. As you know, the farm sector is a major consumer of natural gas, and any increase in the cost of gas will be reflected in higher production costs for a section which is already on the ropes. In addition, of course, the consumers in our area rely to a great extent on natural gas during our particularly hard winters.

Mr. Chairman, I'm not certain what can be done at this late date, but I do want to express my deep concern, and urge the Subcommittee to make a commitment to take up this issue in the very earliest days of the 98th Congress. We owe nothing less to our constituents.

## CONGRESSIONAL SALARIES

## HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. COURTER. Mr. Speaker, there is a great deal of confusion surrounding the legislative procedures which resulted yesterday in a change in the salaries of Members of Congress. Therefore, I would like to clarify these procedures and also explain my reasons for voting as I did. In order to understand what occurred in the House Chamber one must first recognize that, as a result of action taken by the Appropriations Committee to remove the existing pay cap on Members' salaries from the continuing resolution, Members would automatically receive a pay raise of over 27 percent upon passage of the continuing appropriations bill.

Two amendments were introduced to address this action. The first amendment offered, the Fazio amendment, reduced the amount of the increase from 27 percent to 15 percent, essentially cutting the raise in half. I voted yes in favor of the Fazio proposal, because a no vote would have resulted in a greater pay increase than a yes vote. I also voted in favor of the second amendment which would have prohibited any pay raise at all and would have reinstated the pay cap, but this amendment was unsuccessful.

Regardless of whether or not one chooses to support a pay raise, we must certainly be opposed to the confusing way that this pay raise has been proposed to the Chamber. I was outspoken against previous attempts in 1980 and 1981 to increase Members' salaries specifically because of the manner in which these raises were presented. In addition, I was one of a number of Members who sponsored legislation to repeal the increased benefits we gave ourselves last year. I am, in fact, amazed that, after the public uproar surrounding last year's controversial and back door approach to raising our salaries, Congress would again attempt to increase our earnings in the same fashion.

I am not opposed to a pay raise per se. Our salary increases fall well below the rise in the CPI, and this alone is reasonable justification for additional income. However, the experience of last year's pay raise fiasco should have taught us, once and for all, that this is an issue of importance to our constituents. While it is true that any attempt to raise our salaries will be unpopular with some sector of the population, we can never hope to win public approval of such measures until we are willing to argue straightforwardly as to why we feel warranted in requesting more of the taxpayers' money. It would have been far more appropriate to vote on this issue prior to the elections. We then would have demonstrated that we truly believe in the need for a pay raise by showing our willingness to go to the polls on this issue. But by waiting until after the elections, when everyone can feel secure in his position for the next 2 years, we are sending the signal that we ourselves are not convinced of the fairness of this raise.

Members of Congress are given the jurisdiction to determine their own salaries. This is an unusual, some might say enviable, situation. However, with this position comes a great responsibility not to betray the public trust. I believe it is possible for us to provide ourselves with the salaries that this demanding job warrants and still maintain the respect and support of the individuals we represent. But this can be achieved only if we are forthright and straightforward in debating this issue, and only if we are willing to take responsibility for our actions through the democratic proc-

## HENRY REUSS

ess.

## HON, DANIEL K. AKAKA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. AKAKA. Mr. Speaker, it is unusual for a Member to win election to five terms in the House. It is even rarer for a Member to win election to 10 terms. I rise today to pay tribute to a man who has won election to this body a total of 14 times, which is an altogether incredible performance. Mr. Henry Reuss, the gentleman from Wisconsin, has quite obviously been doing something right.

Mr. Reuss has represented his constituents in this House since 1955, and has, since that time, been considered by his colleagues one of the most intelligent people on Capitol Hill.

Henry Reuss has always been an achiever. Few know this, but at one time Henry was the youngest Eagle Scout in America. Entering the military service in 1943, he won the

Bronze Star for action at the crossing of the Rhine. After the war he returned to Wisconsin where he held successively responsible posts, and helped to build that State's modern Democratic Party. But all this is merely prolog.

Since entering this body in 1955, HENRY's career has been one of leadership, in many diverse areas. A few of his more noteworthy achievements will serve as examples. It was Henry REUSS who rediscovered a forgotten statute, the Rivers and Harbors Act of 1899, which prohibits dumping of pollutants in navigable waterways, and in applying it began the clean air and water movement which culminated in the Clean Air and Clean Water Acts. It was Henry Reuss whose doggedness and determination led to halting the construction of the SST. It was HENRY REUSS in a Joint Economic Committee report which he authored, who encouraged the Nixon administration to move to a system of floating exchange rates. It was HENRY REUSS whose ideas led to the formation of the Peace Corps. It was HENRY REUSS whose ideas led to and who was a cofounder of the Democratic Study Group. I could go on and on with a remarkable list of his accomplishments.

Any one of the items that I have mentioned could be the capstone of a successful and productive congressional career. Yet, they can all be attributed to one man, Henry Reuss. For years he has been the Democrat's leading expert on international finance. He has been the chairman of several House committees and subcommittees. In fact, as chairman of the Banking Committee, he was one of the leading figures in loan guarantees for such diverse entities as New York City and the Chrysler Corp.

HENRY REUSS is not an ordinary politician. He is a man of extraordinary vision and breadth of interest, whose ideas were iterated and reiterated until others saw their wisdom. This body and the Nation as a whole are in his debt. His retirement leaves a hole in this body which will not easily or quickly be filled, if at all.

## GERM TESTS: MANCHURIAN MASK LIFTED

## HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. DORNAN of California. Mr. Speaker, while discussions of nuclear war and nuclear freeze are important and are extensively covered in the news, at this very moment, biological and chemical warfare are being brutally waged by the Soviet Union and the Soviet supplied Communist conquerors of Vietnam against innocent non-

combatants in Laos, Cambodia, and Afghanistan. While America discusses the horrors of nuclear war, the Soviets are practicing the horrors of biological and chemical warfare. The limited coverage of this type of abomination has occurred throughout our recent history as Michael Parks, Los Angeles Times article, "Germ Tests: Manchuri-an Mask Lifted," shows. I am submitting this article to inform Members of Congress of thses dreaded war crimes in the not too distant past. It is absolutely incomprehensible that these ugliest of all war crimes went virtually unpunished. Actually some of these Japanese War Lord servants from hell were rewarded and still live in respectable Japanese society. Incredible. May God protect the loved ones of these World War II POW's who suffered an agony and lonely death worse than the mind can comprehend.

The article follows:

[From the Los Angeles Times, Dec. 9, 1982]

Japanese Experiments—Germ Tests: Manchurian Mask Lifted

(By Michael Parks)

PINGFANG, CHINA.—Men were tied to stakes, and canisters of bubonic plague, gangrene and anthrox bacteria were exploded nearby. Soldiers in gas masks and protective clothing used stopwatches to measure how long it took them to die.

Women were infected with syphilis, impregnated and, after giving birth, were vivisected along with their children to assess

the effects of the disease.

Naked men, usually doused with ice water, were kept out of doors in 40-below-zero weather in experiments to learn more about frostbite. Their limbs froze solid and sounded like wood when struck with a club.

The blood was drained from human subjects and replaced with the blood of horses or monkeys in experiments aimed at creating artificial blood. The subjects were sometimes cut open while alive to determine how the artificial blood was being absorbed.

#### "FULL HORROR" REALIZED

These are documented accounts of experiments conducted by the Japanese army in Manchuria during World War II.

"People are only beginning to realize the full horror of what went on here," said Wang Xueqing, vice chariman of the government of Pingfang District 18 miles south of Harbin. The largest of the Japanese germ warfare centers was built here.

At least 3,000 people were killed here in the 5½ years that the 731st Anti-Epidemic and Water Supply Unit was in full operation at Pingfang, but recent Chinese research indicates the the number of victims is likely to be three or four times that number.

"Every Saturday afternoon from 1939 to the end of the war in 1945, at least 20 and usually 30 or 40 prisoners were brought to Pingfang by train," Han Xiao, a local official researching the activities of Unit 731 recounted, "and nobody left alive.

#### DESTROYED AT END OF WAR

"At the end of the war, in early August, 1945, as the Japanese were destroying their facilities, they gassed the 400 or 500 prisoners they still held and then burned the bodies in a large pit with gasoline... Over the years, construction workers have found

three large pits of bones. From the smallest, we took three big truckloads of bones.

Until recently, the activities of Unit 731 under Lt. Gen. Shiro Ishii were shrouded in secrecy. Only about 20 of the unit's officers, none higher than a department head, were ever tried for war crimes. Ishii and other senior officers were granted immunity from prosecution by the United States in return for the records of their research, which Washington wanted to keep from the Soviet

Union.
The Japanese government acknowledged only last spring that 1,472 civilians and 1,285 military people had worked at the bacteriological warfare research center here.

China over the years compiled a fairly full picture of Unit 731's activities, along with those of two similar but smaller units, but

had not publicized them.

We had accounts from some of the several thousand Chinese who worked as coolies and from peasants who lived nearby," Han said. "We also had some of the records, laboratory reports, photos and other documents not destroyed when the Japanese left. But only recently have we been able to confirm everything and fill in some of the missing details."

Han credited two new best-selling books by a Japanese author, Seiichi Morimura, along with an earlier Japanese television documentary, with bringing the activities of Unit 731 to light.

He noted that the United States played a role in covering up the atrocities here and that this role has been disclosed to some extent by the Pentagon's release of secret cables and reports under the Freedom of Information Act.

#### CRIMES AGAINST HUMANITY

"The guilt is not just that of Ishii and his men or the Japanese government at that time," Wang said. "These were crimes against humanity, and the responsibility for them, and for ensuring that they do not happen again is wider.'

Small plaques recounting in general terms the activities of Unit 731 have been placed on the unit's old headquarters building, a yellow, two-story structure that now is Harbin's Secondary School No. 25, and on the only remaining wall of the facility's power

"When the Japanese heard that the Soviet Union had entered the war and the Red Army had crossed the border, they began the demolition of the laboratories, workshops, prison and barracks," Han recounted. "For two days, the explosions continued, and then a sapper unit was brought up to finish the job. They wanted to leave no evidence behind."

Ishii and other commanders fled south and were captured five weeks later in Nanjing (Nanking), the old Chinese capital.

## LABORATORY ANIMALS RELEASED

Before they fled, the researcher released all the laboratory animals. "Suddenly, one day we saw dozens of horses, camels, monkeys, dogs, and cats in the area and hundreds of thousands rats and mice," Qing Fuhe, then an 11-year-old boy, recalled recently. "Some time later, many, many people became very sick and died. In my family alone, 12 persons out of 19 died in less than two weeks."

The mice, which Japanese troops had forced local peasants to collect for laboratory use, had been infected with bubonic plague, and it swept through several nearby

villages.

In Qing's village of Houerdaogou alone, 40 persons died, and the total death toll was

more than 100 before medical personnel from Harbin brought the epidemic under control

"Pingfang had not suffered from plague for several centuries," Wang said, "and its reappearance in this way led us to suspect what was going on in Unit 731."

#### UNIT SET UP IN 1931

The unit was established in 1931 when Japan secured its hold on Manchuria and Ishii's first headquarters was at the Harbin Military Hospital. Construction of the Pingfang complex, a base of 21/2 square miles surrounded by a prohibited-entry zone of 12½ square miles, was started in 1936 and was finished in 1939, according to officials here.

Japanese researchers here cultured the bacteria that cause plague, typhoid, typhus, dysentery, anthrax, gaseous gangrene, cholera, salmonella, smallpox, tuberculosis, tick encephalitis, and botulism, according to Han's studies of laboratory reports and other comments

They also experimented with gases and liquids to spread the bacteria, using explosive shells, bombs, food, clothing, paper and

even feathers

To test the bacteria and new weapons, prisoners were brought from various parts of China. Most were Chinese, but later they included Koreans, Mongols, Russians, and according to some reports, a few Americans.

#### RESEARCHERS "VERY METHODICAL"

"The researchers were very methodical and wanted to see how their weapons would work on other races." Han said, "They even brought Chinese from southern China for their frostbite experiments to see whether they would freeze faster than northerners.'

At Anda, about 90 miles northwest of Harbin, Unit 731 had a test range where canisters of toxic gases could be exploded in the open air to check their effectiveness. Usually 10 to 20 human subjects plus some horses. cattle, and other amimals were

brought from Pingfang for the tests.

The Japanese army had two similar but smaller bacteriological warfare centers—one of them, Unit 100 at Changchun in neighboring Jilin province and the other, the socalled Tama Unit, at Nanjing-but activities at these have been only partially documented. In Changchun, however, according to local officials, there was an epidemic of bubonic plague when the laboratory rats were released with the destruction of the facility in August, 1945.

Some of the research done at Pingfang dealt with ceramic pods meant to carry plague-infected rats by balloon and prevailing winds at an altitude of 30,000 feet across the Pacific Ocean to the U.S. West Coast. This sort of thing was done with incendiary bombs, which caused a few forest fires but not much other damage.

"For technical reasons, this plan was apparently not executed before the war a Chinese historian noted in a ended,"

U.S. officials apparently decided to take no notice of these plans or of the use of American prisoners of war as test subjects when they granted Ishii immunity.

"Since any war crimes trial would completely reveal such data to all nations," Defense Department officials wrote in a memo after interviewing Ishii, "it is felt that such publicity must be avoided in the interests of defense and national security of the U.S."

Later, two biologists from Ft. Detrick, Md., the principal U.S. bacteriological warfare center, concluded that the material that Ishii and 20 other Unit 731 officials provided was of considerable value and "could not be obtained in our laboratories because of scruples attached to human experimentation."

"It is hoped that individuals who voluntarily contributed this information (during interviews in Tokyo) will be spared embarrassment because of it and that every effort will be taken to prevent this information from falling into other hands," the two American researchers wrote.

These documents were first unearthed last year by an American, John William Powell, who quoted from them in an article he wrote for the Bulletin of the Atomic Scientists.

There is some Chinese anger over the failure to prosecute Ishii and other top officials of Unit 731 and over the continued coverup of Japan's bacteriological warfare activities.

"Certainly there would have been prosecutions were their victims Europeans or Americans," a Chinese Foreign Ministry official in Peking remarked, speaking privately. "To me, there seems to be an obviously racist element—that Chinese lives do not matter but that Polish or Russian or American or Jewish lives do."

The Chinese press has noted pointedly that Ishii's deputy, Maj. Gen. Masaii Kitano, lives quietly in retirement in central Tokyo, a revered man in his 90s after serving as president and chairman of Green Cross, a Japanese pharmaceutical firm developing artificial blood. His successor at Green Cross was the late Ryoichi Naito, who is described in the Morimura book as the leader in research on the use of poison from blowfish.

The head of the "frostbite team," Hisato Yoshimura, is a professor emeritus of Hyogo Medical University and was honored by the Japan Physiological Society last year for a lifetime of research, including that carried out by Unit 731. The head of the vivisection team is reportedly teaching at another Japanese university.

At the annual meeting of the U.S. Commission on Human Rights last August in Geneva, a British delegate, Ben Whitaker, called for an investigation of what he called this "major violation of human rights" and asked how it could have been covered up for so long.

"We occasionally get a Japanese soldier who served here who returns in his old age as a tourist," Wang said. "They confess their roles. Most were only guards, quite ordinary soldiers-but they are very remorseful at even this."

## EMERGENCY JOBS LEGISLATION

## HON, EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

Mr. ROYBAL. Mr. Speaker, we are obviously faced with a crisis in this country. Unemployment has risen to 10.8 percent-over 12 million people. And all indications are that this number will continue to rise. Our productive plant capacity has reached a postwar low. Businesses are filing for bankruptcy at an incredible pace, and thousands of our people are without the most basic necessities of life.

Let us try to comprehend, just for the moment, the depth of frustration felt by the jobless. According to the National Institute of Mental Health, a series of studies underway since 1977 have found that declines in the work force are significantly related to reported child abuse. Other studies have demonstrated that increases in unemployment are usually followed by increases in the rates of suicide and other health problems. It is not difficult to figure out how a loss of income and self-esteem, coupled with related events, can lead to violence, alcoholism, drug abuse, and a host of other physical and mental problems. These problems will exist even after our economy begins to recover, and at a terrible price to society. We must act

The emergency jobs bill we are considering here today will not be a panacea for all these ills, but it will at least be a start. We will be putting about 900,000 people back to work, in one way or another, if we pass this measure. These will not be simply makework jobs, but rather productive jobs that will contribute to the strength of our Nation, both now and in the future.

We have already heard a great deal of discussion about the decay of our infrastructure. A large portion of the jobs created by this bill would be dedicated to repairing and improving our Nation's public buildings, roads, bridges, and railways. Funds would be provided for such worthwhile but long-delayed projects as modernization of our public housing, developing and improving parks and recreational fa-cilities, maintaining our national forest system, improving our fish and wildlife services, and repairing and modernizing our prisons. Communities, which have gotten the short shrift from this administration so far. would get much needed funds for vital community development projects such as water and sewer improvements and housing rehabilitation. All of these activities fill an important void in existing funding priorities, while providing thousands of jobs in the very occupations that have been hardest hit by the recession.

In addition to providing jobs to many thousands of Americans, this bill also considers the special needs of those who are out of work and unable to provide for themselves or their families. Employment offices in the States will be beefed up, as will day care and health care services, thus removing some stumbling blocks from the paths of many who want to work. To meet immediate needs, volunteer organizations will receive extra funds for food distribution and emergency shelter.

All of these projects can be started almost as soon as this bill is passed, because the framework is in place; most have already been authorized. If we pass this legislation, we will provide thousands of Americans with fresh hope, both for themselves and for the future of this country. I urge you to join me in adopting this measure.

#### PROTECTIONIST FOLLY

## HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES Wednesday, December 15, 1982

• Mr. FRENZEL. Mr. Speaker, below is a December 13, 1982, editorial in the Journal of Commerce which reminds Members of Congress that there is a price to pay for protectionist legislation, that of retaliation in the form of fewer U.S. exports. Saving jobs in one sector at the expense of another while forcing our trading partners to make similar adjustments is not smart public policy—it is just plain folly. I recommend the article to my colleagues:

#### A BARRIER BY ANY OTHER NAME

Leave it to the protectionists in Congress. Not satisfied with broaching such ill-advised legislative plans as the domestic-content bill, they are striking on another front.

They have taken a basically good proposal, the nickel-a-gallon increase in the federal gasoline tax, and coupled it with a foolish one: a so-called Buy American amendment.

The measure, passed 54-46 by the House of Representatives and facing Senate action, would require all "steel, cement and manufactured products" that are used in the highway-rebuilding and mass-transit programs the tax will finance to be made in the United States, along with 50 percent of the components of mass-transit buses and rolling stock.

The amendment is a trade barrier, pure and simple. It is protectionism at its most gratuitous. And amendment backers, when pressed, admit it.

Their arguments give a compelling picture of the human problems that are culminating in the increasingly stronger drive for protectionism. But the arguments also have a side that illustrates why the success of such a drive would be counterproductive in the extreme.

"You can call it protectionist, stingy, whatever. You're probably right," says a spokesman for Rep. Douglas Applegate, the Ohio Democrat who introduced the amendment. "But we're trying to save our (constituents') necks."

Rep. Appleton is from Steubenville, Ohio. The area is dominate by the steel industry, a producing sector hit hard by the recession and competition from abroad. The local unemployment rate is 16 to 17 percent.

Each day, the congressman's office gets from five to 10 phone calls—and an equal number of letters—from constituents who have been laid off, who cannot find work, whose unemployment benefits are running out, the spokesman says.

Typical, he says, is a note from a married factory worker who was laid off after 35 years on the job and whose benefits expire Dec. 31: "We don't want charity. I want a job."

People, the spokesman says, have become increasingly angry at foreign exporters, Japan in particular. They feel those nations

are exporting their own unemployment; the United States keeps its market open but other nations do not, and residents of Ohio and the rest of America are clamoring for justice.

"All we've been asking for is 'Just treat us the same,'" the spokesman says of U.S. trading partners. "If we're going to open our market to you, open yours to us."

The picture is both grim and touching. It is impossible not to empathize with the unemployed workers of recession-wracked America, whose ranks are swelling every day.

But the people of the United State are not alone in their plight. The recession is a global phenomenon; its chilling effects touch every country. Even Japan, which admittedly is less than fair when it comes to trade policies, is hurting.

Heavy industry is in decline and unemployment a big problem in virtually all industrialized nations. Joblessness among Europeans 25 and younger is estimated at 40 percent.

Indeed, the European Community minister responsible for employment issues, Ivor Richard, is said to give thanks each morning that one of his own children has found a job—as a low-paid, part-time lecturer.

Needless to say, many politicians in Europe see a solution to the dilemma in the same type of action the protectionists in Congress favor: restricting foreign competition.

The trouble is that this sort of shortsighted thinking—no matter how justified or well-intentioned—can lead to a worldwide cycle of protectionism that could strangle development and cost more jobs than it was meant to save.

That's the bottom line the protectionists seem to forget: cost. The sponsor of the House "buy American" amendment admits that no cost analysis accompanied the measure. But a serious look has been taken at a similar proposal, the domestic-content bill that would require a high percentage of the parts of imported cars to be made in the United States.

That analysis was undertaken by the Congressional Budget Office. Its results are revealing.

The agency noted that the General Agreement on Tariffs and Trade allows the use of retaliatory trade sanctions when justified. It concluded that it is reasonable to assume U.S. trading partners will take such action if the content bill goes through. The result would be that retaliatory sanctions would halt U.S. exports to roughly the same degree the content bill would halt U.S. imports of autos and auto parts.

In technical terms, that would bring by 1990 a rise of two-tenths of a percent in the U.S. Consumer Price Index; a drop in real American gross national product of three-tenths of a percent; and a tenth of a percent increase in unemployment.

In starker terms, the budget office said, it would mean the content bill would save 70,000 jobs in the auto industry by 1990. But it would eliminate 220,000 jobs in the other U.S. export-related industries—a net loss of 150,000 jobs.

No one can deny the seriousness of the problems in the United States and the world. No one has a quick solution. But neither should anyone be fooled into thinking that erecting big trade barriers of any type will bring real relief.

HAZARDOUS WASTE

## HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES
Wednesday, December 15, 1982

• Mr. FORD of Tennessee. Mr. Speaker, the issue of hazardous waste can no longer be put off. We are only starting to feel the repercussions of past inaction. Unfortunately, it seems future Love Canals and Valley of the Drums are the only way to insure the hazardous waste issue not be ignored. Surely, if this country can spend billions of dollars putting men in space, we can certainly figure out what to do with hazardous waste material for a fraction of the cost.

Mr. Speaker, I learned last week that our distinguished colleagues in the Senate Environmental and Public Works Committee decided that they lacked the time to consider H.R. 6307, the Resource Conservation and Recovery Act Reauthorization of 1982, sponsored by Representative Florio. It seems that members of that committee are following the lead of the administration in believing that the Environmental Protection Agency can control the health and environmental threats of waste dumping under current regulations. However, the residents of my district in Memphis know full well that this is not true. Memphians have the dubious honor of having the EPA's top priority hazardous waste site in Tennessee, better known as the north Hollywood dump. In addition, residents of Rayburn Street in south Memphis have to contend with the effects of cyanide residue and other toxic chemical wastes being stored in metal drums at an aban-

doned drum company on a daily basis. It has always seemed that no matter what is done with hazardous waste, there is some sort of potential danger. Minimizing that danger is no longer a sufficient response; eliminating the risk has to become the objective. Granted, this body has come a long way over the past 6 years in defining the problem and starting to develop answers for that problem. However, what about the citizen who becomes ill because he has the misfortune of drinking contaminated water, or living near an abandoned dump that EPA has yet to clean up. What price can any legislative body put on the health of an individual? Congress has to go one step further than it ordinarily might in hopes of eliminating the risk of contamination and disease.

It is for this reason that the Environmental Protection Agency has to change its attitude toward hazardous waste. The Agency has to start thinking not only about the clean up of waste sites, but begin developing real policy initiatives that prevent these sites from becoming a reality. We, as a

nation, have to commit ourselves to take the hazardous out of hazardous waste. However, it has been delayed by those in the Senate, and we in the House find ourselves back at step one. Mr. Speaker, I feel it the responsibility of this Chamber to return a comparable, if not stronger piece of legislation to the other body; it is only at that time that the Members of this body can believe thay have done everything possible to make certain today's situation does not get further out of hand.

A TRIBUTE TO THE NATIONAL ITALIAN-AMERICAN FOUNDATION

## HON, FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

• Mr. GUARINI. Mr. Speaker, last night the National Italian-American Foundation, the principal voice in Washington for Americans of Italian heritage, held a reception to commemorate the centennial observation of the birth of Fiorello H. La Guardia, the renowned "Little Flower" who served as a U.S. Congressman and as the first three-term mayor of one of the most famous cities in the world, New York City. Mayor La Guardia made his mark as a dynamic leader and an untiring humanitarian during the depths of the Great Depression. At the reception, the National Italian-American Foundation presented its first annual Fiorello H. La Guardia award to my good friend and neighbor from New Jersey, Chairman Peter RODINO. The Fiorello H. La Guardia award is made in recognition of distinctive excellence in public service. I can think of no better example of conscientious devotion to duty than Chairman Rodino, the dean of the New Jersey delegation.

Founded in 1976, by a coalition of Italian-Americans representing the corporate, labor, scientific, artistic, and political worlds, the National Italian-American Foundation is making its mark as a cultural and educational force in promoting interethnic understanding. The foundation has as its chairman of the board Jeno F. Paulucci, of Minnesota, Frank D. Stella, of Michigan, is the foundation's president. The board of directors is comprised of 60 of the most prominent Italian Americans in America, including 7 of our colleagues here in Congress. The board boasts of having the chief executive officers of some of America's most prestigious corporations, labor leaders, and directors of major Italian American organizations.

The National Italian-American Foundation seeks as one of its primary goals to raise the awareness of all Americans of the contributions Italian Americans have made to make America the great Nation it is. Through conferences, dinners, and workshops, this effort is succeeding. The foundation has an active national scholarship program, and has recently initiated an intern program for graduate students here on Capitol Hill. It has worked with the Italian Embassy to establish a travel-study program for Italian students who come to America in the effort to promote intercultural understanding. By all accounts, the foundation's programs are a rousing success. In January, the foundation will coordinate with the National Gallery of Art and exhibit of the works of Raphael to mark the 500th anniversary of his birth. Many are eagerly anticipating this gala showing.

More events are being planned for 1983. Besides an interethnic workshop, the foundation will be staging an international conference on banking and finance, to be named after A. P. Giannini, the founder of the Bank of America and the father of the branch-

banking concept.

The National Italian-American Foundation's biannual dinners are establishing themselves as one of the premier social events in Washington. In 1976, when the foundation was founded, more than 2,000 friends gathered, including President Jimmy Carter. Last year, another 2,000 came to toast Lee Iacocca, of the Chrysler Corp., A. Bartlett Giamatti, the president of Yale University, and Sophia Loren, the talented and beautiful actress. We are all looking forward to the next events.

In closing, Mr. Speaker, I would like to commend the National Italian American Foundation on the remarkable work it has done and plans to do in the future. The celebration of the La Guardia Centennial focused our attention on the accomplishments of one of the United States most prominent legends; Mayor La Guardia lives on as a symbol of the American dream and as a model of honesty and good leadership for us all. Congratulations are certainly in order to Chairman RODINO, who has given his constituents, and his Nation, only the best of public service. His record of diligence. honesty, and compassion deserves applause from us all.

## TRIBUTE TO TOBY MOFFETT AND JOHN BURTON

## HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, December 14, 1982

• Mr. COELHO. Mr. Speaker, I would like to take this opportunity to pay a very special tribute to a good friend

and colleague, Toby Moffett. The de-

EXTENSIONS OF REMARKS

parture of this thoughtful, compassionate, and dedicated Member will be a great loss not only for those in Connecticut's Sixth District, but for the Nation as a whole.

When Toby Moffett first come to Congress in 1974, he brought with him some courageous goals: He was a champion of peace, advocate of consumer protection, a leading environmentalist, and a strong believer in a sane energy policy. Throughout his 8 years in Congress, Toby has tirelessly pursued the attainment of these goals. Throughout his tenure, his accomplishments have been many, although I would especially like to commend the fine job he had done with his work on the Energy and Commerce Committee and as the chariman of the Energy and Natural Resources Subcommittee of the Government Operations Committee. His efforts on both committees

TOBY MOFFETT is an intelligent, thoughtful man, and the paths by which he seeks to better the quality of life for all Americans are to be commended. He is a man of conscience and he stands by his beliefs. I will miss the man and I will miss the legislator-I certainly wish Toby all the best in the vears ahead.

have brought many legislative achieve-

ments and reforms.

Mr. Speaker, It is with great pleasure that I join my colleagues today in paying a special and well deserved tribute to our colleague and friend. JOHN BURTON. Many of my colleagues will miss the dynamism and intellect that John brought to the Halls of Congress during his tenure here. His constitutents will miss the dedicated and compassionate man that represented them.

For many years, John was able to walk into this Chamber and in his own colorful way, brighten up the debate. It has been a pleasure for me to watch John operate and I will certainly miss him when the 98th Congress convenes in January. I would also like to take this opportunity to commend the fine job John has done in his role on the House Administration and Government Operations Committees. He has worked hard at Federal aviation reform as chairman of the Government Activities and Transportation Subcommittee.

JOHN is one of the most refreshingly candid and articulate Members of Congress, and his presence will be sorely missed. I certainly wish him all the best in the years ahead.

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4. agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest-designated by the Rules Committee-of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the Congressional RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 16, 1982, may be found in the Daily Digest of today's RECORD.

#### MEETINGS SCHEDULED

## DECEMBER 17

9:00 a.m.

Commerce, Science, and Transportation To continue hearings on S. 2300, to establish domestic content requirements for motor vehicles sold in the United States.

235 Russell Building 10:00 a.m.

#### **JANUARY 10**

10:00 a.m.

Foreign Relations International Economic Policy Subcommittee

To hold hearings on the effects of current economic problems on international affairs.

4221 Dirksen Building

2:00 p.m.

Foreign Relations

International Economic Policy Subcom-

To continue hearings on the effects of current economic problems on international affairs.

4221 Dirksen Building

#### **JANUARY 12**

9:30 a.m.

Labor and Human Resources

Employment and Productivity Subcommittee

To hold hearings to review Federal programs which create certain job opportunities.

4232 Dirksen Building

## **JANUARY 19**

10:00 a.m.

Foreign Relations

International Economic Policy Subcom-

To hold hearings on the current international debt situation

4221 Dirksen Building

#### JANUARY 25

9:30 a.m.

Finance

To hold hearings on the administra-tion's assessment of the meeting of Ministers to the General Agreement on Tariffs and Trade (GATT).

2221 Dirksen Building

#### FEBRUARY 1

10:00 a.m.

Foreign Relations

International Economic Policy Subcommittee

To hold hearings on proposed solutions to global economic problems.

4221 Dirksen Building

## FEBRUARY 27

Foreign Relations

To hold hearings on the prospective nomination of Edward J. Derwinski, of Illinois, to be Counselor, Department of State.

4221 Dirksen Building

## SENATE—Thursday, December 16, 1982

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by the President protempore (Mr. Thurmond).

#### PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Our Father in Heaven, Hanukkah and Christmas bestow profound significance upon these days. We pray for the peace of Jerusalem as we remember the rebuilding of the temple which represented God's presence among the people in Zion. We pray for peace in the Middle East and throughout the whole Earth as we remember the birth of God's Son, Saviour of the World and Prince of Peace.

Gracious Father, these times are especially important to family and home. Grant that the pressures under which the Senators have been placed these past days will not interfere with the excitement of Christmas, which is of greatest meaning for the children. Let there be peace and joy in our homes. Help the Senate to finish its business so that it will not distract from family pleasure or interfere with family plans.

We know, our Father, that loved ones who have died this past year will be deeply missed at family gatherings. May Thy love and grace enhance precious memories with tenderness and gratitude. Be near to each family and fill hearts and homes with rich joy and blessings. We pray in the name of God's gift to the world, the Lord Jesus. Amen

#### RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

## ORDER OF PROCEDURE

SURFACE TRANSPORTATION ACT OF 1982

Mr. BAKER. Mr President, under the provisions of rule XXII, a live quorum will commence 1 hour after the Senate convenes to be followed by a vote on cloture pursuant to the motion filed against further debate on the Baker substitute to the pending bill

Mr. President, there are a number of amendments yet to be disposed of. Some of them perhaps need to be done before that cloture vote. Some of them

The Senate met at 9:45 a.m., on the I expect can wait until after that cloexpiration of the recess, and was ture vote if cloture is invoked.

The distinguished Senator from Kansas will manage as will the distinguished Senator from Vermont (Mr. Stafford) and the Senators from Utah and Oregon their respective titles of this measure.

Mr. President, a special order in favor of the Senator from Iowa (Mr. Grassley) has been vitiated. If he has any need for time today, I will make an effort to provide that later in the day

It is also the intention of the leadership to provide a time for the transaction of routine morning business later in the day.

Mr. President, when the Senate ended its business early this morning and went into recess, it is my understanding that the Boschwitz amendment No. 1472 regarding truck threshold weights was the pending question.

Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield a minute to the Senator from Wisconsin on my time under the standing order.

Mr. PROXMIRE. Mr. President, I thank the majority leader.

### THE GENOCIDE CONVENTION: 34 YEARS IN LIMBO

Mr. PROXMIRE. Mr. President, for 15 years I have come before this body daily to solicit your support for the ratification of the Genocide Convention, a document that has awaited the Senate's "advise and consent" since 1948.

This is a long time indeed considering the initial enthusiasm and determination that our country showed in sponsoring the convention at the United Nations and in persuading our allies to join with us in signing the document in New York. It seemed then that the world was unified in its resolution to work collectively against genocide and its attendant afflictions. The pain of the Nazi Holocaust was replaced by an almost universal desire to see its crime addressed and combated through the combined efforts of the world community. This Nation rose to

the occasion and led its neighbors in the writing of this historic document and, after helping to engineer its passage in the General Assembly, the United States became one of the first nations to affix its signet to the convention's charter.

It is ironic that a nation that was so responsible for the convention's development and passage should, some 34 years later, still withhold its final approval of the treaty. Our reluctance to participate in this agreement that we helped inspire leaves us internationally isolated from our allies on this issue, and almost singularly opposed to a basic human rights measure. Politically our hesitation to take part in the pact is devastating as our detractors around the world portray our failure to do so as evidence of our insincerity on human rights. Morally our failure to ratify the convention is an indictment of everything we stand for as a republic founded in the Judeo-Christian traditions.

The Convention on the Prevention and Punishment of the Crime of Genocide represents more for our country than a general denunciation of genocide and its practitioners. It serves as a reaffirmation of this country's allegiance to the ideals that we profess and tests our fidelity by forcing us to make a long-term commitment. As Prof. Richard Gardner of Columbia University testified in 1970, "our ratification of this convention will dissipate the embarrassing contradiction between our failure to act and our traditional leadership in support of basic human rights."

Both our historical experience and philosophical foundations should prompt us to ratify the Genocide Convention without further delay or amendment. The misconception that our abstention from this document costs us nothing underestimates the moral and political tax that our isolationism on this issue extracts from our country. Our 34-year review must be brought to a conclusion if our 206 years of at times revolutionary action in human rights will remain unsullied.

WHEN THE BOMB GOES OFF— ARE YOU ON THE SURVIVAL LIST?

Mr. PROXMIRE. Mr. President, who will survive in Washington, D.C. after the bomb goes off? Will the distinguished occupant of the Chair be a survivor or the Senate or our families?

Well, according to author Howard Rosenberg, there is a plan, drafted in secret by Federal bureaucrats, that spells out who will survive. It is a plan designed to evacuate 4,000 to 5,000 bureaucrats and governmental leaders to so-called safe locations where they can carry out the functions of our Government in the aftermath of a nuclear attack.

So, who gets saved in the plan? The answer, of course, is a national secret. There are 33 Federal departments and agencies which are declared "essential and uninterruptible." From these agencies, select individuals are chosen for survival.

You might be interested in knowing, Mr. President, that among these essential and uninterruptible agencies that we must provide for after the bomb are the Railroad Retirement Board, the Eximbank, and the Consumer Product Safety Commission. Are they critical to our well-being as a nation in the post-nuclear-attack period?

Each agency is asked to draw up a list of three teams. Team A gets the enviable job of staying around town while everyone else is being evacuated. Apparently they work right up to the moment when the bomb hits ground zero. I wonder if these are volunteers.

Team B members survive by finding their way to Mount Weather near Berryville, Va. And Team C members go to other relocation areas.

Families get left behind, of course. Except for the First Lady. Spouses of Members of Congress, Justices of the Supreme Court and other top officials must stay at home or go to low-risk areas outside of Washington.

Perhaps it is comforting for the American public to know that after an initial attack on Washington, D.C., two members of the National Mediation Board will have passes to get inside Mount Weather and that 12 employees of the Ex-Im Bank will be saved along with 7 from NASA; a handful at the Farm Credit Administration and a few from the Federal Highway Administration. It should come as no great surprise that in each case the head of the agency or department is on the survival list. And, of course, the Post Office must have people surviving to direct change of address mailings for anyone else who survives countrywide.

Now let me return to my original question, Mr. President. When the bomb goes off—will you be on the survival list? Well, if someone has not spoken to you about it by now, then the answer is no—as it is for this Senator. Maybe we will just have to take our chances like everyone else.

Mr. President, I ask unanimous consent that an article by Howard Rosenberg in the Washingtonian magazine be printed in the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washingtonian, November 1982] Who Gets Saved?

(By Howard L. Rosenberg)

By Washington standards, Fritz Oelrich is not an extraordinary man. A 44-year-old government worker, he buys his clothes off the rack, spit-shines his wingtips, and drives to work in a 1981 Chevette. He has never dined with Kay Graham or danced at the White House. But Fritz Oelrich's name is on one social register that someday may really count. He is a member of the elite group of Washingtonians chosen to be saved in a nuclear war.

If a nuclear conflict appears imminent, Oelrich will report to a hardened underground bunker outside Washington. There, as the acting emergency coordinator of the Selective Service System, he will start drafting millions of young American men. The Selective Service System emergency planwhich Oelrich recently helped update—provides for a draft following the onset of nuclear war. Amid the sirens, mailgrams theoretically could go out to registrants at a moment's notice; according to System officials, "We can deliver the first inductees on the thirteenth day."

Preparations for a post-holocaust draft are a small part of a complex blueprint designed to make sure that the U.S. government—represented by 4,000 to 5,000 loyal bureaucrats, most of them middleaged white males—will survive a nuclear war even if most of the nation does not.

These chosen few work for 33 federal departments and agencies designated as "essential and uninterruptible." It's a surprisingly broad list. Federal agencies rising from the ashes will include the Railroad Retirement Board, the Export-Import Bank, and the Consumer Product Safety Commission.

These agencies have been ordered to draw up lists of three teams, each capable of independently directing government operations in an emergency. Even the biggest and most important departments are limited to a few dozen bureaucrats per team.

Team A members aren't among the chosen few; quite the contrary. They're supposed to remain at headquarters and carry on while Washington is evacuated.

The B and C teams are the designated surviors. Members of the B Team head for Mount Weather, an enormous bunker a few miles from Berryville, Virginia, near the Shenandoah River. Team C members report to one of nineteen emergency-operating centers "located in a 300-mile radius of the nation's capital called the Federal Arc." There, in underground bunkers, food, water, and file cabinets await. (The quotation, and much of the other information in this article, is from a secret report on civil defense prepared by the State Department's Arms Control and Disarmament Agency, or ACDA.)

In these command bunkers, the chosen few will sit out a nuclear war. They could be the only Washingtonians who will survive to reconstitute constitutional government in the United States. Conceivable, they could also provide the seeds of a post-nuclear America cloned in the image of the loyal bureaucrat. New mates would be needed; in most cases, spouses and children are not among the chosen few, but secretaries are.

A year ago, President Reagan placed a renewed emphasis on civil defense. The underlying premise is simple: If we can protect our leaders, vital industries, and key workers better than the Soviets can protect theirs, we will "win" a nuclear war. That belief is embodied in the "continuity of government" program, or COG, and the plan to save "the chosen few."

All civil-defense plans are predicated on the assumption that a "crisis expectant period" will precede the outbreak of hostilities. During this time of rising tensions, an attack warning signal will be quietly passed through the bureaucracy, and federal emergency team members will disappear to their assigned posts. Simultaneously, US industry will gear up for a "surge" wartime production schedule.

The Pentagon has plans for protecting top military leaders during a nuclear war. At least 96 military command centers are buried around the world. A "war room" lies deep beneath the Pentagon itself. Another military command post is dug into Raven Rock Mountain near Fort Ritchie, Maryland, and an Alternate National Warning Center bristling with antennas occupies 65,000 square feet under a cow pasture off Riggs Road near Olney, Maryland.

What happens to the rest of us? The Reagan civil-defense plan calls for the mass evacuation of 80 percent of the American public from some 400 high risk areas to the rural countryside. Yet even if an evacuation can be successfully mounted—and many critics say it can't—the ACDA report estimates that only "35 to 65 percent of the US population might survive the immediate effects of a large-scale nuclear attack." Millions more would perish within months from injury, radiation sickness, starvation, and disease.

The government, however, plans to live on regardless of who is left to be governed. The Internal Revenue Service will tax the survivors, the Postal Service will bring them their mail, and the Social Security Administration will make sure that pensioners among them get their monthly checks—which could, at least in theory, be cashed for some of the billions in fresh new currency that has been stockpiled by the Federal Reserve Board.

"We don't plan to have postmen walking through a hail of missiles," says the Federal Emergency Management Agency's Jim Holton, but the US Postal Service has prepared change-of-address forms for evacuated citizens. Absurd? No, say officials, humanitarian. Families will need a way to locate missing relatives and find out who is

"I'm the only person in the whole Postal Service," says Ralph Jusell, "whose fulltime job is wartime or civil defense planning. In the case of nuclear war, certain classes of mail are embargoed and others are redirected. If New York City gets wiped the postal worker asks, "where do you send their mail? "It's a what-if situation and depends on what gets bombed." Each of the "essential and uninterruptible" federal departments and agencies has an emergency coordinator with a similar task. They have been supplemented in the past year by a new group of top-level officials assigned to an Emergency Mobilization Preparedness Board chaired by National Security Adviser William P. Clark. The Board's members all have the rank of deputy secretary or undersecretary and represent all the major federal departments and the White House staff.

Emergency coordinators and mobilization planners are supposed to help identify employees so essential that they should be saved. Those who make the C Team are for-

tunate enough, but in prestige they rank a notch below their colleagues on the B Team, who go to Mount Weather, the new seat of government.

Known as the "Special Facility," Mount Weather is dug into solid granite. Inside are streets, sidewalks, a fleet of electric cars, a small underground lake, and dormitories with about 2,000 beds. The Special Facility was designed with the "communications and logistical support to function as the center of administrative and decision-making authority in wartime," according to the ACDA report. It would be the home of an evacuated Congress, Supreme Court, and all members of the B Team.

In effect, these bureaucrats function today as a de facto government-in-waiting, a "shadow" government trained and capable of running these United States. They are unelected and, for the most part, unknown. Not even most members of Congress know with these guarante officials are respected.

who these surrogate officials are.

Each B Team member carries a special pass with his or her photo, blood type, and a message asking that "full assistance and unrestricted movement be afforded the person to whom this card is issued." To get into Mount Weather, you must have this pass.

Robert Merchant has one. He is the emergency coordinator for the Treasury Department. If nuclear war appears imminent, Merchant will drive to Mount Weather and present his pass. Another Treasury employee, who works full-time at the bunker, will be there to greet him and make certain he is the real Robert Merchant. "Our man at the site should know everyone on our team," Merchant says. It's a precaution against impostors.

Mount Weather was also once the official evacuation site for the President and his family. But the plan to whisk the Chief Executive to a shelter by helicopter was abandoned during the Carter administration. An impromptu test, with Zbigniew Brzezinski as the President, revealed that a helicopter might get knocked down by incoming Soviet missiles, which could reach Washington within twelve minutes if fired from submarines near the coast. Now the plan is for the President and key aides to take the much shorter helicopter trip to Andrews Air Force Base and immediately take off aboard "Kneecap," a specially modified jumbo jet officially designated as the National Emergency Airborne Command Post (NEACP, thus the name Kneecap). Besides being safer, Kneecap's communications equipment would fare better than Mount Weather's, which might be disturbed by the electromagnetic repercussions of nuclear explo-

For most of the top officials of government, Mount Weather—or a similar facility—is still the primary evacuation site. Just who is on the lists to be saved is among the most closely held of government secrets. The First Lady has a pass, but other spouses do not. When the late Chief Justice Earl Warren learned his wife was not included, he is supposed to have said: "If she's not important enough to save neither am I." And he gave up his pass.

The problem of arranging wartime accommodations for the families of federal emergency-team members is a thorny issue. Fritz Celrich wishes "they'd save my wife and kids." But they won't; civil-defense budgets are tightly strained, and the command bunkers simply don't have room for dependents.

"I don't know how much difference it makes where they will be," says Richard

Shullaw philosophically. Shullaw, emergency coordinator for the Interstate Commerce Commission, thinks the question would be rendered moot by the first missile to hit the capital. "I've talked with my wife about this, and we've made no provisions."

Other bureaucrats assigned to emergency teams think their critical duties should take precedence. "My first obligation is to do my job," explains the Civil Aeronautics Board's emergency coordinator, Joseph Laufer. "Then I have to make secondary considerations. It's like having a life-insurance policy. You hope you never have to take advantage of it, but it's nice to know it's there."

Under a voluntary program recently instituted, facilities are set aside in low-risk areas for families of team members. They must arrange their own transportation to the spartan facilities, and pay for food and housing. Robert Merchant inspected the housing units, and he's confident his family will emerge safely after the bombs stop falling. "I'm a believer," he says, "that there'll be islands of survival."

Bill Alcorn has his own plan. The emergency coordinator of the National Labor Relations Board, Alcorn doesn't like the idea of leaving his family in an emergency. He's made certain they "all know what to do."

"I'm a realist." Alcorn explains in careful, measured tones, "and I know the roads are going to be crowded and you won't be able to get out of the city by car, but I think you could get out on a motorcycle. So I've got a Harley-Davidson and a Honda 350 in the garage and an Airstream trailer parked on a beautiful campsite 85 miles from Washington. Even before an evacuation is ordered, my son knows enough to put his mother on the back of the Harley, and along with my daughter they should all head for the camp."

Alcorn himself will try to make his way to Mount Weather. Most emergency-team members must arrange their own transportation to command posts, though some high officials will be flown there by helicopter. Still, "we kind of keep our fingers crossed that local authorities and the police recognize us,"says Ed Cain, emergency coordinator of the National Communications System.

That could be a sticking point. Out of curiosity, Cain once showed his special pass to a Virginia state trooper and asked what the officer's response would be if presented the pass during an emergency. "His reply," Cain notes with a chuckle, "was not too reassuring." The pass meant nothing to the cop.

The A Team members who remain in Washington while the city is evacuated will face their own problems. There will be "stay-behinds" in the city who choose not to evacuate. One Defense Department report speculated that voluntary stay-behinds would include "addicts and alcoholics, antiwar idealists, pet lovers, and individuals—perhaps those from minority communities—who might not be willing to tolerate the cultural shock of a relocation."

Some federal buildings are supposedly equipped with well-stocked shelters, but many are in disrepair. At the Export-Import Bank, emergency coordinator Adrian Wainwright says the building's shelter "is not a place where any number of people would be able to survive for any length of time whether you had a nuclear bomb drop or not. If you wanted to spend a weekend down there, you'd have a hell of a time."

Bill Alcorn optimistically figures he could survive in the basement of the National Labor Relations Board building, across 17th Street from the White House, if he was unable to reach his post at Mount Weather. "We have some stale water and some cookies in the basement. This building, from an engineering standpoint, would probably withstand a nuclear attack if it wasn't a direct hit. I think we could withstand a Pentagon hit in this building."

At another regulatory agency, however, the emergency coordinator was not so confident. "Our plan is to go down to parkinglevel two and pray for a few minutes until the bombs hit."

In contrast to that pessimistic view, most emergency coordinators and many members of the emergency teams are true believers imbued with a "can do" spirit and a dedication to civil defense. Many have been closely involved with the program since the Cuban Missile Crisis. "This type of assignment you carry with you wherever you go," says the FBI's 37-year-old emergency coordinator, Special Agent William Kardash Jr. "We're privy to certain types of information and it's a burden, but it's also an important responsibility."

The complexity of emergency plans and the number of people destined to be saved vary widely among government agencies. At the National Mediation Board, only chairman Robert O. Harris and an alternate have bunker passes. Twelve or fewer of the 360 employees at the Export-Import Bank will be saved. Only seven from NASA headquarters will go to Mount Weather, and a like number to the Olney facility. At the Farm Credit Administration, the chosen few include the governor, Donald Wilkinson; his secretary, his senior deputy, and three other deputy governors; general counsel Frederick Medero; the chief financial officer; and the chief budget officer. The rest of FCA's employees are supposed to meet in South Carolina. All federal agencies have similar gathering spots, but few employees know where they are supposed to go-or have thought to ask.

At the National Communications System, Ed Cain says all of the supersecret agency's 40-some employees are considered "essential" in a nuclear war. "One of our primary missions," he explains, "is emergency management of all telecommunications. Everybody's been tagged to do a job and practices that job."

Everyone at the Federal Bureau of Investigation is also considered essential, but that doesn't mean they all get saved. As with more prosaic agencies, the Bureau's agents are divided into emergency teams. "It is workable," assures Special Agent Kardash. We put together three teams, all of which represent the minimal essential operating functions of the FBI."

How emergency-team members are chosen is a matter of some speculation. President Ford authorized the program through an executive order in 1976. The Federal Preparedness Agency—predecessor to the Federal Emergency Management Agency (FEMA)—then devised the team system. Like all civil defense programs, selection of the teams is at once the most important and least pressing chore on an agency head's agenda. Some haven't gotten around to it yet.

Most officials say that the teams that do exist were picked in a rational, methodical way. "It's position versus expertise," points out Bernard Weiss of the Nuclear Regulatory Commission. "The question is, should we choose individuals for the teams on the basis of rank or on the basis of particular

skills needed? At the NRC we picked people basically, although not solely, by position. In most cases we went right to the top of a department or office and picked the head and his deputy. . . . In the case of nuclear attack we would need high level management people capable of dealing with broad management questions—not experts in heat transfer."

At the Federal Highway Administration, emergency coordinator Clarence Friesen reflected a more egalitarian attitude. He identified the essential people as ranging from "secretarial support to engineers all the way up to the executives—from GS-6 to the top. We'll need workers as well as leaders." That sentiment was echoed by a number of emergency coordinators, but the FBI's, Kardash summed it up best: "If you do it Ichoose team members] predicated on politics," he noted wryly, "then when you need them, no one shows up."

The Selective Service System—charged with mounting a post-nuclear draft—has a plan for wartime emergencies that is typical of many. It specifies: "Until central control has been reestablished, each element of the System must be prepared to continue operations with little or no direction from national or regional levels. . . . The Basic Principle of this plan is that authority and responsibility are never vacated."

To that end, a line of succession to the director of the System was established with the proviso that "successors are delegated sufficient authority to carry out emergency functions, but will not, because of this procedure, formally succeed to the office or the title." The A Team will stay at headquarters in Georgetown "for as long as possible" while director Thomas Turnage is flown to the safety of Mount Weather. There he will be joined by the B Team.

The C Team, headed by chief of staff James Delk, will report to the Selective Service System's regional headquarters in Atlanta. Turnage will theoretically take refuge there if Mount Weather is destroyed. The System even has an emergency plan to safeguard the rosters of potential draftees. Millions of names are stored at the Joint Computer Center at the U.S. Naval Training Center in Great Lakes, Illinois, near Chicago, and a duplicate roster is entered in the W. R. Church Computer Center at the Naval Postgraduate School in Monterey, California. Whatever happens, the draft will go on.

Fritz Oelrich, who updated the System's emergency draft plan, is by no means a cold, calculating elitist. The onetime dean of Bee County Community College in Beeville, Texas, he's a dedicated father of three who goes to church on Sunday and good-naturedly offered to help a neighbor cut down some menacing tree limbs a few months ago. When he slipped and fell, Oelrich broke his back, both arms, and a leg. Still, he missed only two weeks of work. "I admit that there's a certain irony in the idea of a post-nuclear-attack draft, but I think we'll be able to do it," he says. "It all depends on how many they shoot at us and where they hit."

That's not all it depends on. Following a nuclear war, restoration of a working government would be a formidable task. According to a classified draft circulated by the Federal Emergency Management Agency (FEMA), "the strategy for reconstitution of the Executive Branch of the Federal Government after a nuclear attack relies on the Federal Regional Offices to be de facto regional governments.... Regional

offices of Federal Agencies will join with the FEMA regional infrastructure to form a comprehensive Federal Government for each region. . . . Because of the uncertainties surrounding a nuclear attack, one of the regional governments may be the national government."

Conceivably, if the President is incommunicado or killed by the first wave of missiles, an unelected bureaucrat working for FEMA, or some other federal agency, could become the new national leader by default. Though the constitution line of succession is clear, a nuclear attack could kill all possible successors, or cut off their communications. As a practical matter, someone who controls the means of communicating with far-flung US armed forces would have to serve as commander-in-chief.

Although federal officials deny it, many observers believe that a true national emergency would mean martial law and a suspension of constitutional guarantees. FEMA chief Louis Guiffrida is trying to figure a way to determine who would really have the power to push the button to start a nuclear war—or to stop one.

Many civil-defense proponents believe that blast shelters should be built for everyone in the United States. But that would cost \$100 billion or so, according to Defense Department analysts. There's no political pressure to revive the fallout-shelter craze of twenty years ago.

So, if a nuclear war comes, the vast majority of us will have to fend for ourselves in the rural countryside, if we are lucky enough to get there. Theoretically, a few bureaucrats will emerge from bunkers to direct the rebuilding of America.

But the chosen few might not survive, either. Mount Weather and the other bunkers are well known to the Soviets. In fact, Russian agents once tried to buy a piece of property adjacent to the Mount Weather facility so they could keep a close eye on things. According to the secret report by ACDA, "like other facilities of its kind," Mount Weather "would be vulnerable to direct attack by nuclear weapons."

"There's probably a very big bull's-eye painted on that thing," concludes the ICC's Dick Shullaw

nck Shullaw.

## THE MILITARY NEEDS MORE INDIANS AND LESS CHIEFS

Mr. PROXMIRE. Mr. President, one of the problems with our military is that there are too many desk sitters giving orders and not enough men and women taking those orders.

The President of the United States desires that our military be stronger. But buying expensive weapons is not the only way to accomplish that goal. The military might consider looking within itself, and do some restructuring, to gain strength.

According to a recent article in the National Taxpayers Union newspaper Dollars and Sense, our military is top heavy. Some examples: There are less than five enlisted men for each officer, one rear admiral for every ship in the Navy, and more four-star generals

in this peacetime than during World War II.

Do we need all those chiefs? Chiefs are expensive. We have "officer bloat" in the military and it is costing money.

High-ranking personnel cost more and when they retire, their pension and benefits continue to drain the taxpayer.

But the big worry here is quality. The worker bees in a hive keep it going. Without them everything dies. The strength of our military is determined by the strength of the soldiers who must be battle ready. But the United States is lacking in this area.

A U.S. combat division and all its support personnel includes roughly 48,000 troops. To generate comparable firepower, the Israelis and West Europeans use only 30,000 to 35,000 soldiers and the Soviet Union only 22,000—half the amount of troops that the United States needs in order to deliver the same firepower.

Having too many people in the chain of command makes the Armed Forces unwieldy. If we insisted that less people give orders and more people be in positions to receive those orders, our military would be more efficient.

We need to examine a military structure that siphons the top talent from the field and places them behind desks. Some solutions exist to this dilemma and we might do well to consider a few.

First, the military must be streamlined. Layers of bureaucracy could be cut to limit the number of desk sitters and increase the number of combat troops.

Second, the "up or out" attitude that prevails in the military must be reversed. The "up or out" philosophy states that you either advance in rank or stagnate in your present position. We need incentives to keep our soldiers happy in their jobs. By reducing the number of top-level commanders we could fuel the saved money into higher salaries and benefits for our soldiers.

It is time the military look within itself for strength. It may be surprised to find a great source of power there.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Defense Spending: Are We Getting Our Money's Worth?

(By Eric Meltzer)

("The Reagan defense policy has been to throw money at the Pentagon, relying on the generals and admirals to compile the shopping lists."—Editorial Page, The Wall Street Journal)

Item: In Washington, D.C. alone there is more than one rear admiral for every ship in the entire Navy. That's just in Washington, D.C.

Item: At the Army War College in Carleton Barracks, Pennsylvania there are more full colonels or officers about to become full colonels than could command all the combat regiments in the Army. And this is just at one war college.

Item: There are over one hundred Air Force generals in Washington. That's one third of all Air Force generals.

Item: The Pentagon has more lieutenant colonels assigned as historical officers than it does as tactical reconnaissance wing com-

Burgeoning bureaucracy is not unique to one branch of the military; it pervades all branches. Congressman Les Aspin, himself a former Pentagon official, noted that, "Since WWII the armed services have increased the number of generals and admirals relative to fighting units by a factor of 7.5 in the Navy, 6.6 in the Air Force, and 2.1 in the Army."

How many officers is this? In the Navy there are over 65,000 officers. That's one officer for every 7.3 enlisted men. In the Army, there are more than 100,000 officers. There are fewer than 7 men under each officer. But in the Air Force, there are again more than 100,000 officers. That means there are less than five enlisted men for each officer.

Aspects which we think of as being typical in bureaucracy are found in the Defense department. Among these characteristics is a top-heavy organization manned by lots of chiefs and comparatively few Indians; a system in which tenure is more highly valued than output; and an organization in which output is very difficult to measure.

which output is very difficult to measure.

The military has a time honored rule: "Up or out." This rule means that an officer either advances in the ranks or is shunted off into some position where he quits or gathers dust until retirement. The result of "up and out" is that the officer corps has expanded to the point where the taxpayer spends dearly to keep many more personnel than we need.

But what do these figures mean? What is so bad about a bloated officer corps?

First of all, there is the simple and unambiguous increase in costs, that unnecessary, highly paid personnel create.

Second, not only must we pay for the salary and retirement benefits of each officer, but every officer has to have support personnel, also paid for by the taxpayers.

But monetary concerns are, in a very real way, only one of our worries.

## CHAIN OF CONFUSION

Another worry is the quality of our defense. Having too many people in the chain of command can make the armed forces unwieldy, possibly harming battlefield readiness

A U.S. combat division and all its support personnel includes roughly 48,000 troops. To generate comparable firepower, the Israelis and West Europeans use only 30,000 to 35,000 soldiers and the Soviet Union only 22,000. Even our main adversary, the Soviet Union, whom we think of as being so inefficient, requires less than half the amount of troops that the United States needs in order to deliver the same firepower. Something is wrong, We have tens of thousands of men performing tasks that may be unnecessary. The cost to the American taxpayers both in terms of salaries and future pension benefits is in the billions.

Why is it that things seems so messed up? Why does all defense activity seem as though it is an endless morass of taxpayer waste and an endangerment of human life—the life of the American soldier?

Again, the story we see is one of bad incentives. Rational people trying to get ahead in a system that promotes undesirable outcomes.

Gordon Tullock, a professor at Virginia Polytechnic Institute and State University in Blacksburg, Virginia, has studied these problems for a long time. The problem, ac-cording to Tullock, is that no one wants to risk his life. This seems like a reasonable assertion but risk is undeniably a necessary part of Army life. It seems almost paradox ical that the Army, which most folks would consider to be a high-risk occupation, is, in fact, structured to attract safety-minded people. Military personnel are offered extremely generous pensions-even as much as 80 percent of their pay-upon retirement. It takes only 20 years of service to receive a pension at 50 percent of pay. Furthermore, it is generally the case that military personnel—especially officers—rarely see military action. For example, at the height of U.S. involvement in the Vietnam war, approximately 550,000 troops were stationed in Vietnam. Yet at any one time only 80,000 to 85,000 of those troops actually saw military action. The rest were involved in all sorts of support activities, leadership roles, and civilian-type support services. According to Tullock, the United States military should have been able to get by on 30,000 support personnel, less than one-tenth the number actually used.

This sort of needless overstaffing is rampant in the military.

Consider the case of the U.S. base at Long Binh, Vietnam, In 1972, Long Binh was a 17,000-acre base with 14,000 military personnel stationed on it. Of those 14,000, a mere 122 were actually combat soldiers. The rest were "support" personnel. The base had 60 bars. It had 11 swimming pools. There were 100 movies being shown on the base at once, with one theater alone costing \$445,000. There was a huge bowling alley, a skeet shooting range, and a lapidary shop. And that wasn't all. There were massage parlors and male beauty salons complete with every beautifying technique. Of course, this all belongs to the Communists now, along with the \$5 billion in weapons left behind when the South Vietnamese Army melted away.

Sadly, such well stocked bases became a logistical trap for the United States military in Vietnam. This is precisely the point made by General Woolwine whose thoughts on this subject appeared in the official magazine of U.S. Army Logistics, the Army Logistician. General Woolwine wrote that the sheer glut of equipment and supplies hauled in to American bases in Vietnam made American forces immobile.

"Consider the question of mobility," wrote General Woolwine. "At the battalion level certainly our troops were more mobile than ever before. Companies moved swiftly by helicopter. . . . But the brigade bases, to say the least, were semi-fixed, and the divisions, with the exception of the 1st Cavalry, stayed in essentially the same areas throughout the war."

"The statistics of our support infrastructure in Vietnam almost overwhelm you. Seven deep-water ports with 27 berths. Twelve runways at 8 major air bases with 200 small airfields and the same number of heliports. Eleven million square feet of covered storage. About 2,000,000 square feet of refrigerated storage. Ice cream delivered by air. A dry-lce plant to keep the ice cream refrigerated."

General Woolwine concludes: "Our division headquarters and the base area support facilities tended to be equally plush. We could not have moved even if we had wanted to."

## MORE NOW THAN EVER

Today, in a time of peace, the United States has more four-star generals than we did during World War II. In World War II we had one officer for every ten serving in the military. In recent years, this ratio has fallen to one officer for every seven enlisted men. Ironically, the increase in the size of the officer corps has had the effect of draining off the bulk of the most highly qualified field personnel. Out of every 40 men in field positions, three of the best four are siphoned off into desk jobs or other behind-the-scene chores. The result is a field capability which is weaker than it would otherwise be if the incentives did not result in the removal of the most capable field soldiers from field positions.

According to Tullock, one of the main reasons the United States ends up with so many chiefs and so few Indians is because it's simply the easiest way. It is convenient to everybody involved, except for the tax-payer.

This situation is so bad that we now have three commanders for every combat unit in the Army.

It seems rational that high-ranking officers would desire an ever greater number of officers. This gives them more authority over a greater number of like-minded individuals who are virtually certain to support their decisions. In this regard, military officers are no different from the officers of any other bureaucracy who desire greater support and staff to promote their bureaucratic goals.

How can we resolve this dilemma? How can we make the military bureaucracy more inclined to behave in the interests of the taxpayers? The answer lies in rearranging the incentives to produce a strong national defense without costly frills.

## WHAT REFORMS ARE CALLED FOR?

First, the military should consider replacing military personnel with civilians in tasks which do not require military personnel. Private firms could just as easily provide the necessary goods and services.

Second, the military compensation package should be overhauled. The American taxpayer can no longer afford soaring military payroll costs and pension benefits. We should reduce the support staff allocated for officers.

A strong defense requires a streamlined military. Excessive layers of bureaucracy do nothing to promote the defense of this country. If we are truly to secure a strong defense at the most cost effective price to the taxpayers, we must sharply limit the number of uniformed bureaucrats who sit behind desks in Washington.

I thank the majority leader and I yield the floor.

Mr. BAKER. Mr. President, does the distinguished acting minority leader have any need for time at this point? If not, I once again suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Cochran). Without objection, it is so ordered

#### ORDER OF PROCEDURE

Mr. BAKER. Mr. President, if there is any time remaining to me on leader time under the standing order, I yield it to the control of the distinguished Senator from Kansas (Mr. Dole) so that we can utilize it in pursuance of the debate on the pending legislation.

The PRESIDING OFFICER. The majority leader's time has expired. The minority leader has 10 minutes re-

maining.

Mr. BAKER. Mr. President, I ask unanimous consent that the remaining time between now and 10:45 a.m., before the quorum required under the provisions of rule XXII commences, be under the control of the Senator from Kansas and the distinguished minority manager—I withdraw the request.

# RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

### EMPLOYMENT FOR DISADVAN-TAGED ELDERLY AMERICANS

Mr. ROBERT C. BYRD. Mr. President, the title V senior community service employment program provides employment and work training opportunities for elderly Americans living at or below the proverty level, who want to work but lack sophisticated job skills. Two-thirds of the program participants are older women, the most vulnerable segment of the aging population with the highest percentage of poverty. About half of title V's beneficiaries are age 65 or older. About half have less than a high school education. Many have found that they cannot live on their social security retirement and, rather than apply for welfare or seek financial aid from family members, these senior citizens search for productive employment.

Today, the program provides minimum wage, part-time jobs for 54,000 elderly Americans throughout the Nation. It is a modest jobs program and many participants can just make ends meet with their additional employment income. In my own State of West Virginia, there are about 690 senior citizens employed in such jobs. These workers provide needed community services in hospitals, day care centers and libraries. Many serve less able-bodied elderly Americans at senior centers, in nutrition programs, or by providing other Outreach services.

vices.

We are just ending the first year of a 3-year reauthorization of the Older Americans Act which provides that the scope of the community service employment program should not be limited and that funding should be expanded to preserve the program's operations. This legislation overwhelmingly passed the Congress before na-

tional unemployment began soaring to postwar records. Yet, we have just pulled through a difficult battle to save the special jobs program for the

aged from extinction.

This fight began when the administration proposed dismantling the community service employment program as part of its 1983 budget. I introduced a "Sense of the Senate Resolution." Senate Resolution 340, that no action be taken to terminate or otherwise weaken the program. OMB's proposal was cruel and foolish because eliminating the senior jobs program would force elderly citizens onto the welfare rolls, and savings assumed from its elim ination would be borne there. The job losses would have also impaired the ability of local agencies to provide other specific services authorized under the Older Americans Act, with funding already cut back for such services.

The resolution to preserve the senior community service employment program enjoyed bipartisan support; 33 Senators cosponsored it, the Labor and Human Resources Committee unanimously reported it, and the Senate passed it 89 to 6. A similar measure passed the House overwhelmingly. Despite this show of strong congressional support, administration support for continued funding of the jobs program remained such a clouded issue during the appropriations process that some elderly workers were told that their jobs were being terminated.

Two appropriations bills containing money for the jobs program were vetoed. When the President vetoed the third appropriations measure, which was \$1.8 billion less than the administration's budget request, Congress voted to override it. The community service employment program was an important factor in the vote to over-

Now that the finishing touches are being added to the administration's 1984 budget plans, we are already hearing of still another OMB proposal that would lead to a weakened and less effective jobs program for the aged. OMB wants to move the community service employment program from the Department of Labor to the Department of Health and Human Services. Such a move does not make any sense and could fatally undermine the program's record of cost-effective success.

Congress carefully investigated which agency should administer the special jobs program when legislation to create it was first introduced. In fact, the original bill would have placed it within HEW. After reviewing the proposal in congressional hearings, an almost unanimous consensus was reached that the plan should be administered by the Department of Labor because jobs programs should be run by the cabinet agency with re-

sponsibility for, and expertise in, employment and training services.

The goals of the senior community service employment program are: employment, job training, and placement in nonsubsidized work. These objectives are currently being met with significant success. Despite the dismal job market of the past year, title V program participants have experienced a 17-percent placement rate in nonsubsidized employment. The training and work experience provides a solid stepping stone to self-sufficiency.

The Department of Labor's small staff administering the program is skilled, administrative overhead is low. and fraud and abuse is almost nonexistent. The Congress exceptionally strong support for the program is testimony to its success. If it were transferred to the Administration on Aging (AOA) in the Department of Health and Human Services, significant dis-ruption could occur. AOA has no experience in running a jobs program. Unlike the Department of Labor, the Department of Health and Human Services has no network of jobs placement or jobs training services in place, on which to build.

Transferring a program from one cabinet department to another does not produce budget savings by itself. I cannot help but question the tactical reasons behind the OMB proposal. Why would OMB want to break up a winning program at this time? The Administration on Aging staff is barely able to meet its current duties under the Older Americans Act. It cannot assume a significant new responsibility. Moreover, the appropriate time to look at substantive administrative changes is when a program comes up for reauthorization, not soon after it has been reauthorized.

The community service employment program has proved itself in its capacity to recruit and employ older workers as valuable community resources. It cannot afford any disruptions in program operations. Unemployment among older workers has increased by almost 65 percent during the past 15 months, from 526,000 in August 1981 to 867,000 in November 1982—an all-time record number. November marks the second consecutive month that unemployment has hit record highs for older workers.

Traditionally, unemployment among this segment of the labor force is comparatively low since seniority helps many of these workers retain their jobs. While retirement allows others to leave the work force when their jobs are threatened. However, when these older workers become unemployed, they tend to remain jobless for longer periods of time than younger workers.

Regrettably, the Democratic job package I offered as an amendment to

the gasoline tax bill was defeated on a party line vote. Included in that package was \$100 million to provide 20,000 additional direct jobs under the title V community service employment program for older Americans. Jobless elderly citizens need this assistance, and communities financially hard-pressed by Federal budget cuts would benefit from such aid.

I would prefer to see appropriations increased for the community service program. I will fight against any proposal to cut money for the jobs program or to otherwise weaken its operations. I believe a number of col-leagues share my thoughts and would oppose any OMB plan to transfer the title V senior community service employment program from the Department of Labor to the Department of Health and Human Services as part of any fiscal 1984 budget plan.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my

time.

## RULE XXII QUORUM CALL TO BEGIN AT 11 A.M.

Mr. BAKER. Mr. President, could I inquire of the minority leader if there would be a disposition on his side to change the time for the commencement of the rule XXII quorum from 10:45 until 11 a.m.? The reason for that is we advanced the convening hour from 10 to 9:45 a.m. to accommodate a Senator who made a request for a special order. He has now vitiated that and I think all Senators would be best served by sticking with the original announcement, which was that the quorum would start at 11 a.m.

Mr. ROBERT C. BYRD. Mr. President, the majority leader earlier ordered that the Senate come in at 10 a.m. with the understanding that the quorum would begin at 11 a.m. After some Senators may have gone, the majority leader did bring forward the opening time to accommodate a Senator. I think we should proceed as the majority leader has indicated.

Mr. BAKER. Mr. President, I thank

the minority leader.

Mr. President, I ask unanimous consent that the quorum call required by the provisions of rule XXII begin at 11 a.m. today instead of 10:45 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SURFACE TRANSPORTATION ACT OF 1982-H.R. 6211

Mr. DOLE. Mr. President, if Senator LEVIN is going to offer his amendment. I suggest that he get over here. We have only 1 hour remaining.

Mr. STEVENS. Mr. President, the Boschwitz amendment is pending.

Mr. DOLE. I understant that. The Dole amendment is also pending. We would like to dispose of the Dole

amendment, too. We are so busy disposing of all of the other amendments and I want to dispose of my own.

Mr. MELCHER. Will the chairman vield?

Mr. DOLE. Yes.

Mr. MELCHER. Mr. President, I spoke last night or early this morning on a proposal modifying my amendment, which the chairman is familiar with, to make it acceptable to the managers of the bill. The modification would be in the form of taking the amendment as a study proposal to be reported back by IRS to the Finance Committee within a time period.

Mr. LONG. Mr. President, I believe I need a further explanation of the proposal. I heard some of it explained last night, but I must admit that about after 1 o'clock in the morning my intellect was not as good as it would be

at 9 o'clock in the morning.

Would the Senator tell me briefly

what this is about?

Mr. MELCHER. Mr. President, the amendment deals with the inequity that construction workers receive or how they are treated by the Internal Revenue Service in the deduction for their expenses away from home. It is admittedly a problem that IRS recognizes, the Treasury Department recognizes, and needs some attention.

Mr. LONG. Is the Senator asking for a study at this point, not a change of

substantive law?

Mr. MELCHER. That is correct. Mr. LONG. I would be willing to go along with that, Mr. President.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendments, including the Boschwitz amendment, be temporarily laid aside so that we might consider the amendment of the distinguished Senator from Montana, Senator Melcher, and that there be no amendment to his amendment.

The PRESIDING OFFICER. Is there objection?

METZENBAUM. Objection, Mr. unless there is a time limit of 5 minutes in connection with that amendment.

Mr. DOLE. Or less.

Mr. METZENBAUM. Or less.

The PRESIDING OFFICER. Is there objection to the request, as modified? Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand it, this is only a study. It does not change substantive law, as indicated by the distinguished Senator from Louisiana and the distinguished Senator from Montana. On that basis, I have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate?

Is the amendment at the desk?

Mr. DOLE. Mr. President, as I understand it, they are in the process of modifying the amendment.

Mr. HUDDLESTON. Will the Senator yield?

Mr. DOLE. Yes.

Mr. HUDDLESTON. Would it be possible at this time to offer the amendment that we discussed relating to U.S. trade relations with Japan?

Mr. DOLE. Will it take long to modify the Melcher amendment? Perhaps, because we do have a rather tight time constraint, we can temporarily set aside the Melcher amendment, the Boschwitz amendment, and the Dole amendments and take up the amendment of the distinguished Senator from Kentucky.

Mr. LEVIN. Mr. President, I was

here last night.

Mr. DOLE. This one we are going to accept.

Mr. HUDDLESTON. It will just take 1 minute.

The PRESIDING OFFICER. Is there objection to the request that the pending amendment be set aside? Without objection, it is so ordered.

The Senator from Kentucky.

#### UP AMENDMENT NO. 1476

(Purpose: To undertake a concerted effort to restore balance in the trade between the United States and Japan)

Mr. HUDDLESTON. Mr. President, I call up my amendment relating to the sense of the Senate resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLE-STON), for himself, Mr. METZENBAUM, Mr. GRASSLEY, Mr. Boschwitz, Mr. Dole, and Mr. Melcher, proposes an unprinted amendment numbered 1476.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC.

At the appropriate place in the bill insert the following new sections:

#### UNITED STATES-JAPAN TRADE

. (a) The Congress finds that-(1) the United States has incurred a cumulative trade deficit with Japan of \$56,000,000,000 from 1979-1981 and the trade deficit is expected \$20,000,000,000 in 1982; to reach

(2) the United States has given Japan open access to our large domestic market and has worked to open the world trading system through all available channels in-cluding the General Agreement on Tariffs and Trade:

(3) Japan has devised and utilized a com-plicated system of quotas, tariffs, and non-tariff trade barriers which have unfairly restricted the importation of United States agricultural commodities and manufactured goods, including plywood, beef, tobacco, baseball bats, fruits and vegetables, proc-essed foods, pharmaceuticals, cosmetics, sporting goods, automobiles, high technology products, and numerous chemical substances;

(4) this restrictive trade policy has prevented United States agricultural producers and businesses from gaining reasonable access to the Japanese markets;

(5) protracted negotiations and discussions between the United States and Japan have falled to produce significant liberalization of the protectionist Japanese trade policies; and

(6) severe political and economic tensions now exist as a result of the imbalance of trade which persists between the United

States and Japan.

(b) It is the policy of the Congress that the United States undertake a concerted effort utilizing all reasonable and effective means available to open the Japanese market to United States agricultural producers and businesses by removal of restrictive and unfair trade practices, and that in the event significant progress is not made within a reasonable period of time, the President submit to Congress a plan for assuring that trade between Japan and the United States is brought into greater balance beginning in 1983.

UNITED STATES-JAPAN TRADE

Mr. BOSCHWITZ. Mr. President, I am pleased to join the Senator from Kentucky (Mr. Huddleston) in offering this resolution to impress upon the Japanese the need for them to open their markets to U.S. products-and, to do so quickly. The Senator from Kentucky and I share this common goal and a common interest-promoting exports of U.S. agricultural commodities and U.S. manufactured goods. We both serve on the Agriculture Committee where he is the ranking minority member and I am chairman of the Foreign Agricultural Policy Subcommittee. He is also the ranking minority member of the Small Business Committee Subcommittee on Export Promotion and Market Development which I chair. We have worked together in the past and will continue to do so in the future.

Mr. President, we all know that our trade relations with Japan are at an all-time low: Our 1981 trade deficit with Japan was \$15.9 billion, with a cumulative deficit of about \$56 billion. I am convinced that this enormous deficit substantially results from the barriers Japan erects to prevent U.S. goods from entering that country. Japan keeps U.S. products out of their country by import policies of formal and informal quotas, regulatory policies of discriminatory product standards, testing, certification, and other requirements and industrial policies of industry targeting and government procurement, among other barriers.

The U.S. Trade Representative has identified numerous U.S. products on which Japan maintains quotas, which the United States believes violate the tariff provisions of the GATT. These include: Leather, beef, beef products, fruit and vegetables, grains, and others.

The United States and Japan have a very interesting agricultural trading

relationship. On the one hand, Japan is our largest customer for farm products, buying over 15 percent of all our agricultural exports. Feed grains, soybeans, and wheat are the principal items making up their \$6.7 billion of purchases in 1981.

On the other hand, Japan maintains quotas on 22 agricultural items. These quotas put an absolute limit on the amount of the product that can be imported and clearly violate the GATT. The most important products which are restricted by quota are beef and citrus. While we have no citrus orchards in my home State of Minnesota, we have a large beef cattle industry.

The case for beef is particularly instructive. Despite the strong demand for American grain-fed beef in Japan, only 30,800 metric tons are permitted to be imported annually from all sources. To obtain this quality beef, for which the American consumer pays about \$3.50 per pound, the Japanese consumer must pay over \$13 per pound.

With that price, it is not surprising that the per capita beef consumption in Japan is only 11 pounds per year. Japan could be a major user of our beef. But under their present import policies only 7 percent of the meat consumed in Japan comes from the United States. Japan could use a lot of our products if it were not for their protectionist philosophy.

I am advised that lifting the quotas would bring about several hundred million dollars in additional agricultural exports. This could provide a needed boost to the depressed cattle market.

But, Mr. President, beef is only one example. The overall unwillingness of Japan to open its markets to U.S. exports is illustrated by the futility of our negotiations. As recently as October 20, 1982, our negotiations on beef and citrus quotas proved futile. Last May, the Japanese announced, with much fanfare, trade liberalization initiatives addressing both tariff and nontariff barriers—but we are still waiting for the details. Last year, the Japanese Government agreed to open its Government procurement process for U.S. telecommunications products, but the results have been negligible to date. Even the current negotiations for a high-technology trade agreement, of great importance to businesses in Minnesota, have met with Japanese reluctance.

Mr. President, our markets are the most open in the world, and I would like them to remain open. But, open trade must be a two-way street and Japan must take concrete steps to open its markets. This resolution should impress on the Japanese the need to act swiftly and decisively. Congress stands firmly behind concerted

efforts by our Government to secure access to Japanese markets.

I urge my colleagues to adopt this resolution and work with the President next year to bring trade between Japan and the United States into greater balance.

Mr. HUDDLESTON. Mr. President, as the ranking minority member of the Small Business Committee's Export Promotion Subcommittee and the ranking minority member of the Agriculture Committee, I have become increasingly aware of the importance of exports to the U.S. economy.

During the 1950's and 1960's, American companies dominated the world market. The U.S. economy set the pace in international trade and many believed that we could never be surpassed in our economic leadership in the world.

However, times have changed and in a relatively short span of time we have seen our leadership role slowly erode. This erosion has become so bad that the Secretary of Commerce has stated that: "If current trends continue, we may lose our position as the world's premier industrial power by the end of the century."

Unfortunately, the statistics support his statement. In 1962, 22 percent of the world's manufacturing export sales came from the United States, but this has now dwindled to about 16 percent. During the same period of time our huge domestic market also came under attack and the amount of manufactured imports escalated from about \$7 billion to more than \$140 billion.

One of the primary causes of this changing trade picture has been the extremely aggressive foreign trade policy of Japan. Much of their success in the world market can be attributed to the fact that they have effectively protected their own domestic markets while pushing into foreign markets. One of the largest foreign markets available to them has been the United States.

Unfortunately, the open markets which they have access to in the United States do not exist in Japan in regard to foreign markets. This combination of policies has produced a situation whereby the United States is experiencing growing trade deficits with Japan.

During the period 1979 through 1981, the trade deficit was \$56 billion and some experts are predicting that the deficit in 1982 alone may be as much as 20 billion.

Mr. President, I do not believe that this huge deficit represents an inability of American business persons to compete with Japanese business. I believe that on the whole, U.S. business know-how is still superior and that on an even playing field we can hold our own with any other country. However, we have not been playing on an even

field. The Japanese have erected a complex and highly effective system of trade barriers that makes it extremely difficult and sometimes impossible for foreign firms to enter the Japanese market.

A recent report by the office of the U.S. Trade Representative issued just last month has identified and cataloged these direct and indirect barriers. In essence they fall into two types. First there are those deriving from Government policy which include import policy, regulatory policy, and industrial policy. Second, there are those deriving from the private sector, which include industrial structure, distribution systems, and "buy national" attitudes.

Even though the intent of some of these policies may not be to deny entry to foreign goods, the end result is exactly that. The conclusion of the report is that:

The Japanese market remains relatively less open to foreign suppliers when compared to access for Japanese goods and services in their markets.

For 15 years the United States has been negotiating with Japan to open their economy to foreign goods and services. While we have had some success, the overall conclusion as of last month is that "barriers to imported goods, services, and foreign investment still remain."

Mr. President, relations with the Japanese now stand at crossroads and I believe that we must send some very strong signals to the Japanese Government in regard to this issue. This amendment would accomplish this.

In essence it would demonstrate that the U.S. Congress is endorsing the use of all reasonable diplomatic and economic means to secure a reduction in the restrictive trade barriers in Japan.

Further, it would encourage the President to sumbit to Congress a comprehensive plan for bringing United States-Japanese trade back into greater balance if our efforts at voluntary cooperation are not successful.

Mr. DOLE. Mr. President, we have no objection to the amendment.

Mr. HUDDLESTON. Mr. President, Senator Metzenbaum, Senator Grassley, and Senator Boschwitz join me in presenting this sense-of-the-Senate amendment, along with the distinguished manager of the bill, Senator Dole, and Senator Melcher. It has been checked on both sides. I move its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment?

The question is on agreeing to the amendment of the Senator from Kentucky (Mr. Huddleston).

The amendment (UP No. 1476) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, if we could just take a minute, I say to the Senator from Michigan, we are about ready to complete the modification of the amendment of the distinguished Senator from Montana.

Mr. President, I might say while we are completing the modification, that, as I understand it, the live quorum will begin at 11 a.m. We still need to dispose of the amendment of the distinguished Senator from Michigan. We are working with the Senator from Alabama, Senator Heflin. There may be some others. As I understand it, there is a possibility to dispose of an amendment of the Senator from Missouri. And there are still the Dole amendments pending at the desk which I hope we can dispose of before we proceed on cloture.

Mr. LEVIN. Will the Senator from Kansas yield?

Mr. DOLE. Yes.

Mr. LEVIN. While the amendment of the Senator from Montana is being modified, could we get my amendment taken up so we may save some time?

Mr. DOLE. Mr. President, let us temporarily set aside the amendment of the distinguished Senator from Montana, the distinguished Senator from Minnesota, and the Dole amendments, and proceed to debate the amendment of the Senator from Michigan on the condition that there would be no amendment to the amendment.

Mr. LEVIN. I thank the Senator.

The PRESIDING OFFICER. Is there objection to that request?

Mr. BOSCHWITZ. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LEVIN. I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 1477

(Purpose: To define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable income for purposes of Federal income tax)

Mr. DOLE. Mr. President, as I understand, the amendment of the Senator from Montana has now been modified.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. Melcher), for himself and Mr. DeConcini, proposes an unprinted amendment numbered 1477.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment add the following new sections:

(a) STUDY OF TRAVEL AND TRANSPORTATION EXPENSES OF CONSTRUCTION WORKERS.—The Secretary of the Treasury shall by July 1, 1983, submit to the House Committee on Ways and Means and the Senate Committee of Finance a study of the tax treatment of travel and transportation expenses of construction workers at job sites away from home.

Mr. MELCHER. Mr. President, the amendment we are introducing today seeks to clarify the tax law concerning the deductibility of travel expenses to and from temporary job sites. I believe that construction workers should be deemed to be temporarily away from home for their first 2 years of employment at any job site more than 40 miles from their home, and thus will be eligible for travel expense tax deductions. Thereafter, the deductibility of their travel expenses should be determined, case by case, on the basis of whether the expenses were incurred because of business necessity rather than personal convenience.

Last year, I introduced S. 1342, a bill to correct IRS practices that prevent construction workers from deducting their legitimate away-from-home business expenses just like you and I or business people throughout the country. I had intended to offer the substance of S. 1342 to the debt limitation bill. However, because of procedural problems, it was impossible to bring up the amendment. We believe that modification of tax law to correct the present circumstances should become part of this tax bill to help ease problems workers are facing in dealing with IRS's 1-year ruling and the hindsight test that they apply to construction workers' expenses.

Under the 1-year rule, as enforced through IRS rulings 59-371 and other similar rulings, the IRS automatically disallows deductions for away-fromhome travel expenses for construction workers if they are on the temporary jobsite for longer than 1 year. Under the 1-year rule, not only does the IRS disallow current deductions for away-from-home expenses, but also using the hindsight test, the IRS disallows deductions claimed during the previous year.

This arbitrary test is totally unfair to the taxpayer and, in fact, has been struck down in court cases in the eighth and ninth districts. S. 1342 is aimed at eliminating these unfair IRS rulings, and replacing them with a simple and fair method to determine the deductibility of away-from-home expenses.

The need for changing the Internal Revenue Service rules on this problem is best illustrated by an actual case history. In 1970, Mr. Louis Frederick, a carpenter, lived in Belcourt, N. Dak., his hometown, with his wife and five children. He had practiced his trade in the Belcourt area, close to his home, for more than 18 years.

In the summer of 1970, however, there was no work available for carpenters in the Belcourt area. Mr. Frederick's union referred him to an antiballistic missile project in Nekoma, N. Dak., 81 miles from his home. There was no work at Belcourt but work available 80 miles away at Nekoma. The choice was obvious. Sign on at Nekoma was Mr. Frederick's choice.

When he took the job, Mr. Frederick knew that his tenure at Nekoma was highly uncertain. Work at the project was seasonal, owing to the harsh North Dakota winters. Layoffs were routine occurrences because of the 17,000 change orders made on the project. A laid-off worker would be placed at the bottom of the referral list, and a subsequent referral would be to the first available job, which might or might not be the Nekoma project. The project was part of the Safeguard antiballistic missile system. whose construction depended on the progress of the SALT talks. Once the missile site was completed, no more carpentry work would be available in the Nekoma area.

In order to take the job at Nekoma, Mr. Frederick had only two choices for where he lived while working on the job. Either he had to drive 81 miles to and from Nekoma each day, or he had to move closer to the project. Moving closer to the project was not a realistic option, since he could be laid off at any time, and if he were laid off there would be no other available work in the Nekoma area. In any event, there was no housing available in Nekoma or the surrounding communities. limited housing in the area had long been spoken for, and the Government and the contractor had refused to build housing because of the uncertainty of the project. Mr. Frederick tried to find a room near the project, but none was available, and on several occasions he had to sleep in his car. In light of these circumstances, Mr. Frederick made the only reasonable decision: He decided to drive back and forth each day.

Mr. Frederick deducted the costs he incurred in driving to the project each day as ordinary and necessary business expenses. The IRS disallowed the deductions, on the theory that Mr. Frederick's travel expenses were personal expenditures, indistinguishable, in the IRS' view, from the commuting expenses of typical suburbanites.

Both the U.S. District Court for North Dakota and the Eighth Circuit Court of Appeals rejected the IRS position and held the expenses to be fully deductible. Mr. Frederick thus finally prevailed, although he was forced to incur substantial legal expense to do so.

The problems encountered by Mr. Frederick are not unusal in the construction industry. At almost every construction site similar cases are found. There are hundreds of workers employed in construction of the Colstrip three and four electric generating plants in Montana who travel from 60 to 350 miles from their homes in Miles City, Hardin, Billings, Great Falls, Lewistown, Roundup, Missoula, Butte Anaconda, Kalispell, Polson, or other communities.

Construction workers typically maintain their homes in areas where work is generally available, and move from job to job within those areas. Because construction work is erratic and uncertain, however, most workers eventually experience times when no work is available in their home areas. When this happens, the worker must look for a job elsewhere until work opens up nearer home.

Workers forced to look for work elsewhere face a variety of problems of the kind experienced by Mr. Frederick. The job outside the home area will often be in a remote or unpopulated area in which local housing is scarce or nonexistent. There typically will be few prospects for further employment once the worker's project is completed. And, of course, the progress of the distant job, and the worker's continued employment, like all construction work, will always be subject to interruption because of supply, regulatory, environmental, and economic problems.

A worker in this situation has no choice but to incur substantial travel costs in order to practice his trade. It is not unusual for workers to drive 100 miles or more each day to and from these temporary jobs, often spending almost all their waking hours either working or traveling. The travel is difficult and expensive, but it is necessary if the worker is to continue earning money.

The IRS, however, generally takes the position that these travel expenses are not necessary to the worker's trade but are incurred for personal reasons, and are therefore not deductible. The IRS has announced that it will refuse to follow the Frederick decision. The Service bases this position on its conclusion that the decision "conflicts in principle with a long line of judicial authority." In fact, Frederick is fully consistent with existing law, which allows deductions for all necessary business travel expenses. The expenses incurred by Mr. Frederick were unavoidable if Mr. Frederick was to practice his trade. They were thus ordinary and necessary business expenses and properly deductible.

In determining whether construction workers may deduct the travel expenses they incur in traveling to and from distant jobsites, the IRS, apparently for reasons of administrative convenience, applies a hindsight approach in deciding whether a worker's travel expenses resulted from personal convenience rather than business necessity. Thus, in auditing a construction worker's tax return, the IRS ordinarily asks only how long the job actually lasted, disdaining any inquiry into whether there was any reasonable possibility of predicting the job's duration at any previous time.

The hindsight approach is often used in tandem with a rule of thumb known as the 1-year rule. This informal administrative rule, followed in the field by IRS examining agents, provides that a job that lasts more than 1 year is presumed not to be temporary—whether or not the worker could have determined its length in advance—in the absence of special circumstances. If under this rule the job is not temporary, travel expenses incurred in connection with it are held to be nondeductible.

The IRS frequently explains its reasons for denying these deductions by stating that the construction worker's job is not temporary, but is indefinite. These terms are often used in judicial decisions in elucidating whether the expenses are necessary; if the distant job is temporary, the travel expenses are necessary, but if it may be expected to last indefinitely, the taxpayer should move nearer the job rather than incur the expenses. The IRS unjustifiably interprets this test in construction worker cases to mean that any uncertainty over the expected length of the job precludes deductibility. This interpretation, however, is inconsistent with the reasons underlying the test; a taxpayer can reasonably be expected to avoid travel expenses by moving closer to the job only if he is assured of some minimum length of employment. It makes no sense to move closer to a job that may terminate at any time. The proper test is job are nondeductible only if the job if expected to last for an indefinite and substantially long period of time.

The approach taken by the IRS has resulted in discrimination against construction workers by denying them the right to deduct expenses that unquestionably would be deductible if incurred by persons in other professions. An attorney with a Chicago law firm who travels to Los Angeles for a complex antitrust trial that may be settled promptly but may last 2 years if it has to be tried is entitled to deduct his travel expenses. This type of taxpayer is not subjected to a hindsight test if he or she eventually has to conduct a protracted trial, nor are the expenses denied simply because the case in fact lasted longer than 1 year. Similarly, the deductions are not denied because the length of the case is indefinite; indeed, his uncertainly over its length is a strong factor supporting deductibility. Construction workers such as Mr. Frederick are in no different situation, and they should not be subjected to different treatment.

There are indications that the Service may be preparing to advance to an even more extreme position. In the recently decided case of Paolini against Commissioner, T.C.M. 1982-69 (February 11, 1982), the Service departed from a longstanding policy and contended that travel each day between a personal residence and any place where business is done, even if the taxpayer works at the alternate site for only a single day, is commuting unless the trip requires sleep or rest, and that expenses incurred in such travel are therefore nondeductible. The Tax Court, in a highly questionable decision, accepted the Service's position. The Service had attempted to adopt this position previously by publishing Revenue Ruling 76-453, 1976-2 C.B. 86, but Congress forbade the IRS from implementing the policy by passing Public Law 95-427 and Public Law 96-167. Although the congressional prohibition has not expired, it was allowed to do so with the understanding that no similar ruling would issue until Congress has had a chance to act. The IRS is apparently nevertheless asserting the rationale of the forbidden ruling in its litigating positions.

The problems caused by the IRS' position are widespread. The Service often conducts, mass audits at large construction projects, disallowing travel expense deductions for long lists of workers. These and other audits. and the controversy they often generate, consume audit resources of time and money that are disproportionately large when compared with the amount of additional revenue collected. Congressional action is necessary to eliminate the waste of audit resources and the unfairness of treatment resulting from the IRS administrative practices.

that travel expenses to an indefinite It is time for a definitive explanation of needed correction for this tax dilemma for construction workers.

This need for corrective action is clear and I hope that my colleagues will join me in approving this amendment to require by next July 1 for a report from the IRS on corrections and necessary modifications in their rules to assure that correction.

Mr. DOLE. Mr. President, amendment has been discussed. I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amend-

The amendment (UP No. 1477) was agreed to.

BOSCHWITZ AND DOLE AMENDMENTS LAID ASIDE Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendments, the Boschwitz amendment and the Dole amendments, be temporarily set aside so that we may consider the amendment to be offered the distinguished Senator from Michigan, Senator Levin, for a period not to exceed 10 minutes, and that following that we proceed to a vote on the Boschwitz amendment.

Mr. LEVIN. Mr. President, will there be a vote on my amendment prior to the cloture vote?

Mr. DOLE. There will be either a tabling motion or an up-or-down vote. OFFICER. Is

The PRESIDING there objection?

Mr. STEVENS. Reserving the right to object, Mr. President, and I do not know whether I will object or not, some of us have been working for 2 years trying to get to this artist question. It is an amendment in the second degree to the Dole amendment. That was the only way we could get the amendment offered last night.

Now I am told that unless we agree that the Senator from Michigan can have a vote on his amendment, there will not be a vote on the Boschwitz amendment. So we have to stand aside once again and not even have any consideration given to this very important amendment.

Mr. LONG. Mr. President, the way I construe the parliamentary situation at the moment, any single Senator can prevent any amendment from being voted on between now and the time cloture is voted. The Senator from Ohio is standing in the way of an amendment that he thinks would be bad tax law; he thinks it would cost the Treasury a lot of money, and he is opposed to it. The Senator from Louisiana is standing in the way of an amendment he thinks would add just one more big tax loophole in the tax laws, that is, the artist's amendment.

I may as well put the Senate on notice that the Senator from Louisiana is not going to agree to that amendment, and I would like other Senators to protect my rights if I should walk off the floor. This Sena-

tor is not going to agree to vote on an amendment to add the artist's tax loophole between now and the time we vote on cloture, just as the Senator from Ohio is not going to agree to a vote on the amendment he is against between now and the time we vote on cloture. I am for the tax amendment the Senator from Ohio opposes. But if the Senator from Ohio should drift off the floor, I would protect his rights not to have a vote on that amendment between now and the time we vote on cloture, just as I would expect him to protect my rights.

Mr. President, I think we under-stand each other. We ought to, by this time. Anybody with reasonable intelligence, if he has been around here more than a week, knows that any single Senator can keep us from voting on an amendment between now and the vote on cloture. It does not take any talent. All it takes is the ability to stand here and make noise.

Mr. STEVENS. I still object. I was getting hassled around here last night. People said if I can just offer this amendment, we would get a vote on it in terms of the amendment dealing with artists' deductions. I want to demonstrate that is not so, but at the same time those of us who have the burden of trying to move this bill through the Senate are put in the position where the Senator from Ohio objects or the Senator from Michigan objects and we cannot get a vote. We are told, "Come on, now, you have to let the Senator from Michigan have his vote or you are not going to have any vote at all." It sounds like a bunch of kids playing marbles in Alaska.

Mr. LEVIN. If I may make a personal comment, Mr. President, I did not object to the artist's amendment. I am a cosponsor of the artists amendment.

Mr. STEVENS. Then let us agree and we will have a vote on the Dole amendment and the Senator's amendment too.

Mr. LEVIN. That is fine with me. I am not objecting to that.

Mr. STEVENS. Who is? Mr. LONG. I object.

Mr. METZENBAUM. If the Senator will agree to offer it independently, I think it is a good amendment.

Mr. STEVENS. How can we when they object to our taking up the Dole amendment?

Mr. METZENBAUM. It can be taken up independently.

Mr. STEVENS. There are other people around here besides the Senator from Ohio and the Senator from Louisiana. There are some people who demand rights that others do not have in order to get to a vote here. I think it is an extremely unfair situation.

The PRESIDING OFFICER. there objection to the request?

Mr. LONG. Reserving the right to object, Mr. President, let me make it clear that I have been opposed to the artist's amendment for years, in one fashion or another. In my view, it would provide one more tax loophole. I thought we were trying to get rid of tax loopholes rather than trying to put more in the Tax Code.

Mr. STEVENS. What do you call the amendment of the Senator from

Michigan?

Mr. LONG. I am not calling it anything. I am just talking about the

amendment I am opposed to.

Mr. President, the Senator from Alaska might have been told by somebody that there would be no objection to that amendment. He might have been told by 50 Senators that there would be no objection. But he was not told that by the Senator from Louisiana. I object to the amendment. On an appropriate occasion, if the majority wants it, they can roll the Senator from Louisiana and pass it over his objection, but they are not going to do it between now and the middle of the day.

Mr. STEVENS. I withdraw my re-

quest.

Mr. DOLE. Mr. President, I see the majority leader here. There is no way we are going to accommodate all those who want to be accommodated between now and 11 o'clock. If we permit 10 minutes on the Levin amendment and 15 minutes on the tabling motion

Mr. LEVIN. I shall only need 5 minutes.

Mr. DOLE. We have the Boschwitz amendment anf other nongermane amendments. We never should have brought up the nongermane amendments in the first place.

The PRESIDING OFFICER. Is

there objection?

Mr. RIEGLE. Reserving the right to object, Mr. President, I want to ask the Sentor from Kansas, we have discussed before the question of a tax credit giving an offset to the gas tax for people who earn less than \$10,000 a year. I have been waiting in thequeue like everybody else. I think that is fundamentally a germane amend-ment. I am willing to postpone the vote, put the vote later after the cloture vote or what have you. I would very much not like to be shut out in offering this because it seems to

Mr. DOLE. Mr. President, I would like to vote on my amendment, but I hve been shut out by one Senator for the last 30 days. My amendment passed the Senate by a vote of 77 to 17, but one Senator who knows he can block without any merit at all has been blocking it. I am supposed to accommodate every Senator in this Chamber except myself and I am not going to do it.

Mr. RIEGLE. As the Senator from Kansas knows, I voted with him on the issue he speaks about. What we are talking about here is whether people who earn \$10,000 a year or less are going to be able to afford to pay the gas tax. That is several million people. We ought to have a chance to vote on it yes or no.

Mr. DOLE. I have not had a chance

to vote on my amendment yet.

Mr. RIEGLE. I was prepared to vote on it at 2 a.m.

Mr. DOLE. I have been prepared to vote on it all along. One Senator does not want me to have a vote. One Senator wants to run the Senate. He will have an amendment up here some day and we will vote on it.

Mr. RIEGLE. Mr. President, my amendment goes directly to the heart of the gas tax issue. This is not an extraneous amendment. It is germane in the full senseof the word. All I want to know is that we shall be able to offer it. I do not care if we have a 5-minute limitation.

Mr. DOLE. I do not care if we have a 1-minute limitation. I want to proceed to the Levin amendment. If the Senator wants to object to his colleague, he

Mr. RIEGLE. I am just wondering if there will be a provision for the rest of us who have been waiting to address these issues.

Mr. DOLE. If the Senator wants to help me work out my problem, I will help him work out his problem. I suggest he talk to the Senator from Arkansas. I am trying to accommodate one Senator from Michigan. I cannot accommodate the other Senator from Michigan.

The PRESIDING OFFICER. Is

there objection?

Mr. BOSCHWITZ. Reserving the right to object, Mr. President, what is the situation? That the Senator from Michigan have 5 minutes and then the rollcall vote proceed on the Boschwitz amendment?

Mr. DOLE. There is a motion to table the amendment of the Senator from Michigan, followed by a vote on the Boschwitz amendment.

Mr. BOSCHWITZ. Will we be able to achieve that prior to the cloture vote proceedings?

Mr. DOLE. We could have achieved it about a half-hour ago, but we have been talking. The answer is yes.

The PRESIDING OFFICER. there objection to the request? Without objection, it is so ordered.

The Senator from Michigan.

UP AMENDMENT NO. 1478

(Purpose: To provide for additional weeks of Federal supplemental compensation)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state it.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) for himself and Mr. Specter, Mr. Robert C.

BYRD, Mr. DIXON, Mr. RIEGLE, Mr. KENNEDY, Mr. Moynihan, Mr. Cannon, Mr. Heinz, Mr. Proxmire, Mr. Packwood, Mr. Bradley, Mr. BIDEN, Mr. HEFLIN, and Mr. METZENBAUM proposes an unprinted amendment numbered 1478.

At the end of the amendment add the following new section:

ADDITIONAL WEEKS OF FEDERAL SUPPLEMENTAL COMPENSATION

SEC. (a) Section 602(e) of the Tax Equity and Fiscal Responsibility Act of 1982 is amended-

(1) in paragraph (2)(a)(i), by striking out '50" and inserting in lieu thereof "60" (2) in paragraph (2)(A)(ii), by striking out

"6" and inserting in lieu thereof "8"; and (3) by striking out subparagraphs (B) and

(C) of paragraph (2) and inserting in lieu thereof the following:

"(B) In the case of any State, subparagraph (A) shall be applied-

"(i) with respect to weeks during a higher

unemployment period, by substituting '15' for '8' in clause (ii) thereof: and "(ii) with respect to weeks during a high

unemployment period, by substituting '13' for '8' in clause (ii) thereof.

"(C) For purposes of subparagraph (B), the term 'higher unemployment period' means, with respect to any State, the period-

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 4.0 percent:

except that no higher unemployment period shall last for a period of less than 4 weeks.

"(D) For purposes of subparagraph (B), the term 'high unemployment period' means, with respect to any State, the period-

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 3.5 percent but is less than 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 3.5 percent or equals or exceeds 4.0 percent;

except that no high unemployment period shall last for a period of less than 4 weeks unless such State enters a period of higher unemployment.

(E) Notwithstanding the provisions of subparagraph (D), any State in which an extended benefit period was in effect under the Federal-State Extended Unemployment Compensation Act of 1970 for any week which began on or after June 1, 1982, and prior to the date of the enactment of this subparagraph, shall be deemed for any week thereafter, for purposes of subparagraph (B), to be in a period of high unemployment, unless such State is actually in a period of higher unemployment.

"(F) For purposes of this subsection, the rate of insured unemployment for any period shall be determined in the same manner as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970. "(3) The amount of Federal supplemental

"(3) The amount of Federal supplemental compensation payable to an eligible individual shall not exceed the amount in such individual's account established under this subsection."

(b) The amendments made by subsection (a) shall apply to Federal supplemental compensation payable for weeks beginning on or after the date of the enactment of this Act. In the case of any eligible individual to whom any Federal supplemental compensation was payable for any week beginning prior to such date of enactment and who exhausted his rights to such compensation (by reason of the payment of all the amount in his Federal supplemental compensation account) prior to the first week beginning on or after such date of enactment, such individual's eligibility for additional weeks of compensation by reason of the amendments made by this section shall be limited or terminated by reason of any event, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and prior to the date of the enactment of this Act (and such weeks shall not be counted for purposes of determining the expiration of the two years following and end of his benefit year for purposes of section 602 (b) of the Tax Equity and Fiscal Responsibility Act of 1982).

(c) The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Tax Equity and Fiscal Responsibility Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding only other provision of law, if any State fails or refuses, within the three-week period beginning on the date the Secretary of Labor proposes such a modification to such State, to enter into such a modification of such agreement, the Secretary of Labor shall terminate such agreeement effective with the end of the last week which ends on or before such three-week period.

Mr. LEVIN. Mr. President, this amendment is offered in behalf of Senators Specter, Robert C. Byrd. DIXON, RIEGLE, HEINZ, KENNEDY, MOY-NIHAN, CANNON, HEFLIN, PACKWOOD, PROXMIRE, BRADLEY, BIDEN, and METZ-ENBAUM. This amendment is a bipartisan amendment. It seeks to extend unemployment compensation benefits for an additional 2 to 5 weeks. It is exactly a part of the Byrd amendment, a more comprehensive amendment that was defeated here before by a few votes. This is just one part of the Byrd amendment. It is verbatim that part of the Byrd amendment which relates to the extension of unemployment benefits.

I do not think I have to tell anybody in this Chamber about unemployment in the United States. On two prior occasions of depressions in the early seventies, we extended unemployment benefits with a supplemental program similar to this. We are late in doing it.

The unemployment rate is much greater now than it was on those two occasions in the seventies. We have people who are exhausting benefits in Michigan, who are selling their blood in record numbers in order to put food on the table. Blood plasma firms are reporting that in record numbers, unemployed people in my State are selling their blood up to two times a week to put food on their tables.

We are exhausting unemployment benefits in this country in record numbers. The Congressional Budget Office has estimated that over 2 million Americans will exhaust their benefits under the current Federal supplemental benefits program.

Further, nearly a million Americans have already exhausted their extended benefits between January and October of this year.

This amendment is a bipartisan amendment. It is desperately needed. We did something very similar, indeed more extensive, in the early seventies.

I urge than we adopt it.

I call on my friend and cosponsor from Pennsylvania at this time. I yield to him for 2 minutes.

Mr. ROBERT C. BYRD. Mr. President, will the Senator add me as a cosponsor to his amendment?

Mr. LEVIN. The Senator is already a cosponsor. I thank him for that.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, in my judgment, this is a matter of great urgency. I say that based upon the conclusive national statistics on unemployment and with particular emphasis upon a 12.1 percent unemployment rate in the Commonwealth of Pennsylvania.

During the course of the past several months, I, like other Senators, have been traveling in my State extensively, and there is real agony in a State like Pennsylvania with tremendous unemployment, plant closings, especially in steel, but also in textiles, leather goods, and many other industries.

On votes in the Senate, there is frequently an analysis by each of us as to how the matter affects our own State, and as a general matter I raise no objection to that consideration. But the issue of unemployment today, even though some States may not be so acutely affected, is really a national tragedy and a national emergency.

This very modest extension ought to be adopted at this time. I thank my distinguished colleague from Michigan. I yield the floor.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I rise in opposition to the Levin amendment to extend unemployment benefits under the FSC program.

The new Federal supplemental unemployment compensation (FSC) benefit was a much needed, compassionate, and significant addition to existing unemployment compensation programs.

The (FSC) program, established in the 1982 tax bill, provides additional unemployment benefits to an estimated 2 million workers who have exhausted their benefits under existing unemployment compensation programs. The first payments became available on September 12. Every State is eligible to participate in the supplemental benefit program.

With this program in effect, unemployed workers in 38 States can receive benefits for a total of 49 weeks. Unemployed workers in the remaining States can receive anywhere from 32 to 34 weeks of benefits.

Frankly, this program is not the only way to provide additional unemployment relief. We explored a number of other proposals during extended discussions with House Members, representatives of organized labor, and the Labor Department. On balance, all parties concerned felt the program agreed upon would be the most effective and equitable.

The program now in place will cost about \$2.2 billion in fiscal year 1983 for 6½ months of additional benefits. This is obviously an expensive program. We have to realize there are fiscal restraints on any good program and I believe we reached those limits with this substantial supplemental benefit program.

In my view, this was the only major change in unemployment compensation desirable this year. We will, of course, want to review the effectiveness of the program next year. At that time, we can consider the continued need for the program, as well as other options.

The Levin amendment, however, would immediately increase the duration of benefits available under the program. Individuals receiving benefits in the 6 week States would become eligible for 2 additional weeks of benefits. Individuals in the 8 and 10 week States would receive an additional 5 weeks of payments.

The Congressional Budget Office estimates that the Levin amendment would have a cost of \$700 million. The Department of Labor estimates a cost of \$980 million. I remind my coleagues that this is an add-on to the \$2.2 billion price tag of the original FSC plan.

The Finance Committee will take a look at the Federal supplemental compensation program next year. In fact, we will be forced by the impending bankruptcy of the entire unemployment insurance system to consider reform of the Federal-State program. At that time, we can closely examine

the FSC program and data which will be available by that time on the operation and effectiveness of the pro-

If we do decide to extend the FSC program, we will want to insure that the benefits are targeted to those most in need. We will also want to find a way to pay for the benefits as we did with the original plan. Adding to the Federal deficit does not help the unemployed; more likely, it would just prolong the recession which may have deprived them of their jobs in the first place.

I urge my colleagues to reject the Levin amendment. I ask unanimous consent to insert the text of a letter from Labor Secretary Donovan regarding a similar House proposal in the Record at this point.

There being no objection, the letter was ordered to be printed in the

RECORD, as follows: U.S. DEPARTMENT OF LABOR,

U.S. DEPARTMENT OF LABOR,
SECRETARY OF LABOR,
Washington, D.C., December 8, 1982.
Hon. Harold E. Ford.

Chairman, Subcommittee on Public Assistance and Unemployment Compensation, Committee on Ways and Means, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Unemployment is clearly the most important problem currently facing large numbers of American workers and their families. The economic hardships of unemployment are not shared evenly, but fall severely and disproportionately on workers in particular industries and regions, as well as on particular demograph-

ic groups in the labor force.

We are grateful for the opportunity to comment on behalf of the Administration on H.R. 7327. We share your deep concern over the economic hardship caused by high unemployment which was the primary reason you introduced the bill and are holding hearings today. However, we urge your committee to defer any decision on the bill until the 98th Congress convenes in January. My Department has found that the Federal Supplemental Compensation Program, enacted last August was implemented in some haste. As a result, it provides no information on whether the program benefits are reaching those individuals most in need of assistance. It also provides no recent information on how many individuals have exhausted their FSC program benefits.

Realizing this deficiency, I have had a special study underway since September, which will survey about 200,000 FSC recipients in as many as 17 states. The study to be completed in January in time for the new Congress, will provide critically needed information on the financial resources and family characteristics of benefit recipients. The survey will be supplemented with information on the number of people exhausting

their benefits.

This information will enable us to determine not only the extent to which benefits are truly reaching those in financial distress, but will also give us a better picture on how many individuals have actually exhausted their benefits.

In addition, by January we will also have a clearer picture of how the FSC program operates in conjunction with the Extended Benefit Program. As you are no doubt aware, 15 states are currently paying extended benefits. We project that by February the number of states paying extended benefits will more than double. Many individuals in these states whose benefits were terminated earlier this year will resume receipt of payments under the Extended Benefit Program. In addition, new exhaustees of benefits under the regular state unemployment insurance program will begin receiving benefits.

The Administration is deeply concerned about the hardship caused by unemployment and is committed to ensuring that programs designed to alleviate this hardship achieve their objective. However, without knowledge of who is receiving benefits and who isn't, and without knowledge of the number of individuals exhausting benefits, any decision on extending benefits at this time could be a mistake.

I, therefore, urge the committee to defer any decision on H.R. 7327 until our study is completed in January. At that time, the Labor Department will be pleased to present its findings and recommendations to your committee. The Administration and your committee can then work together to address the economy's number one problem.

Sincerely.

RAYMOND J. DONOVAN.

Mr. KENNEDY. I am pleased to be a cosponsor of the Senator of Michigan's amendment. Last August this Congress passed the Federal supplemental compensation program in response to the alarming rise in unemployment. In early September, jobless workers in every State who had exhausted all other State and Federal unemployment assistance began receiving additional weeks of benefits.

This is a temporary program that expires March 31. However, for 750,000 individuals who began receiving benefits in September this emergency assistance has already run out. Another 1.5 million workers face this gloomy prospect unless we act now. These benefits have meant a reprieve from financial disaster and the humiliation of welfare. They have meant payments for food and fuel and warm clothes. They have kept hope alive.

As we are all painfully aware, there are no signs of the promised recovery and there are no jobs. Instead, these decent, proud Americans who were the first victims of this recession and now the first to test the safety net have been joined by hundreds of thousands more who are desperately looking for work. Unemployment stands at 10.8 percent-a full percentage point above the August rate which prompted the passage of the FSC program. One million more Americans have lost their jobs since we first provided for these benfits. We are told that we can expect unemployment to rise above 11 percent in the coming months and stay above 9 percent through 1984.

Just in time for Thanksgiving, we heard what the administration was considering as an answer for these unemployed Americans—a callous plan to tax their remaining benefits in an effort to make them pay a second time for the President's failed economic

policies. It is time for this administration to stop shifting the blame and resposibility to those who are most in need. These individuals face the holidays with no income, no savings, and now no unemployment benefits. There is very little for them to be thankful for this Christmas.

The amendment we are proposing would extend the original Federal benefits program by another 5 weeks in 38 States and 2 weeks in the remaining States. A similar proposal is being considered in the House. The additional cost of the extension is estimated to be \$980 million. It is a cost that is necessary and just. It is a responsibility that we must accept and a hand we must extend to 2 million hard-working Americans who would receive this help. It is by no means an answer to the 12 million who are unemployed. But it does mean that many of these deserving men and women will be able to hold on a little longer until we can act to change the disastrous course of this administration's economic pro-

I urge my colleagues to support this amendment.

## EXTENSION OF FEDERAL SUPPLEMENTAL BENEFITS

Mr. DIXON. Mr. President, I join Senator Levin and others in cosponsoring this amendment, which was debated rather extensively Tuesday, December 14. I have no intention of belaboring the matter.

The amendment addresses the urgent problem of people who have exhausted the Federal supplemental benefits or FSB which were enacted last fall.

In my State and many others, 10 weeks of FSC benefits were available beginning September 12. Those who first entered that phase of benefits, exhausted those 10 weeks on November 21. In other States, benefits ended even earlier.

What we are proposing is to add 5 weeks of benefits to States with insured unemployment rates over 4 percent; 5 weeks of benefits for States with insured unemployment rates between 3.5 percent and 3.99 percent; and 2 more weeks of benefits to States with insured unemployment rates under 3.5 percent.

It seems to me that we have a responsibility to these people, particularly as the Christmas season approaches. This amendment would give additional benefits to every State. The cost is \$700 million.

It is a proposal that is moderate by comparison with the maximum of 65 weeks of benefits which the Congress approved, under a Republican administration, in 1975, when unemployment in this country was only 8.8 percent.

We now suffer the highest rate of unemployment since the 1930's. My State of Illinois is enduring 13.2 per-

How this body and this administration can deny a basic lifeline to 13 million people in this country is inconceivable to me.

The suffering is real. We can close our eyes and our hearts, or we can pass this amendment and offer a hand to people who have worked their whole lives and now face the brutal reality that is before them-no job, families to support, health care being denied, and a government that does not care.

I am gratified by the bipartisan support for this amendment. It is in keeping with the concern shown by both parties when the FSC program was

first adopted last fall.

I want to go back to Illinois for the holidays and be able to look into the eyes of 733,000 people who desperately need this assistance. I am sure that we all understand the severity of the situation. It will not go away. The unemployed will not go away. And we must not turn away from our responsibility.

I urge my colleagues to oppose this tabling motion and vote for the amendment.

Mr. DOLE. Mr. President, I move to table the amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.
The PRESIDING OFFICER. The

clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona. (Mr. Gold-WATER), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), and the Senator from Hawaii (Mr. MATSUNAGA), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 47, navs 50, as follows:

### [Rollcall Vote, No. 415 Leg.]

#### NOT VOTING-3

Goldwater

So the motion to lay on the table Mr. Levin's amendment (UP No. 1478) was rejected.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The question is on the amendment of the Senator from Michigan.

Mr. DOLE. As I understand it, if cloture is invoked then the amendment falls; is that correct?

The PRESIDING OFFICER. The Parliamentarian advises that the amendment has not been examined for that purpose at this point. All time for debate on the amendment has expired.

#### CALL OF THE ROLL

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SARBANES. Could I have the attention of the managers of the bill?
The PRESIDING OFFICER. A

quorum call is in progress.

Mr. SARBANES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Mr. SARBANES. I want to make an

inquiry.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue calling the roll.

The legislative clerk continued the call of the roll.

Mr. RANDOLPH. Mr. President, I make the point of order that this body is not in order. If Members could work from their desks we could all know exactly what was taking place. There is constant movement in the well. I do not want to go on and on, but I think Members should, and I know they do want to, cooperate, and I call to the attention of the Presiding Officer that the Senate is not in order.

The PRESIDING OFFICER. The Senator's point is well taken. The Senate is not in order. The Senate will please be in order.

The clerk will continue the call of the roll.

The legislative clerk continued the call of the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LONG. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. HUMPHREY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LONG. Madam President, I object.

The PRESIDING OFFICER (Mrs. Kassebaum). Objection is heard.

The legislative clerk resumed the call of the roll.

The following Senators answered the call of the roll:

#### CLOTURE MOTION ON BAKER SUBSTITUTE AMENDMENT NO. 4998

The PRESIDING OFFICER. Pursuant to rule XXII, 1 hour having passed since the Senate convened, the clerk will report the motion to invoked clo-

The legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on an amendment in the nature of a substitute, to be proposed by the Senator from Tennessee (Mr. Baker), to H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

#### CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The bill clerk called the roll, and the following Senators answered to their names:

#### [Quorum No. 51 Leg.]

Abdnor	Exon	Metzenbaum

The PRESIDING OFFICER. A quorum is present.

#### VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that the debate on an amendment in the nature of a substitute, proposed by the Senator from Tennessee (Mr. Baker), to H.R. 6211, the Surface Transportation Assistance Act of 1982, shall be brought to a close?

The yeas and nays are required. The clerk will call the roll.

The legislative clerk called the roll.
Mr. STEVENS. I announce that the
Senator from Arizona (Mr. Gold-

WATER) is necessarily absent.

Mr. CRANSTON. I announce that
the Senator from Ohio (Mr. Glenn) is
necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The yeas and nays resulted—yeas 48, nays 50, as follows:

[Rollcall Vote No. 416 Leg.]

#### NOT VOTING-2

Glenn Goldwater

The PRESIDING OFFICER. On this vote, the yeas are 48, the nays are 50. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

Mr. BAKER. Madam President, I ask unanimous consent that the vote on the second cloture motion be vitiated.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Madam President, reserving the right to object, I object and I will object only until we have a chance to confer with the majority leader.

Mr. LONG. I object.

The PRESIDING OFFICER. Objection is heard.

## CLOTURE MOTION ON H.R. 6211

The PRESIDING OFFICER. Under rule XXII, 1 hour having passed since the Senate convened, the clerk will state the motion to invoke cloture.

The assistant legislative clerk read as follows:

#### CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Rudy Boschwitz, Strom Thurmond, Ted Stevens, Warren Rudman, Arlen Specter, Robert Dole, Slade Gorton, John H. Chafee, Bob Packwood, Robert T. Stafford, S. I. Hayakawa, Richard G. Lugar, James A. McClure, Dan Quayle, Frank H. Murkowski, David Durenberger, and Jennings Randolph.

#### VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on H.R. 6211, the Surface Transportation Assistance Act of 1982, shall be brought to a close? The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 5, nays 93, as follows:

### NOT VOTING-2

Glenn Goldwater

The PRESIDING OFFICER. On this vote, the yeas are 5, the nays are 93. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

#### ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there are a number of items that have been cleared for action on both sides for action by unanimous consent. I ask unanimous consent now that there be a brief period for the transaction of routine morning business to extend not past the hour of 1:15 p.m., in which Senators may speak for not more than 10 minutes each.

Before the Chair rules, am I not correct in saying that, at the expiration of that time or the closing of morning business, the Senate will automatically resume consideration of the highway bill, at which time the Levin amendment will be pending and nothing contained in this request will affect the status of any Senator's rights.

The PRESIDING OFFICER. The

Senator is correct.

Mr. RANDOLPH. Mr. President, at the proper time, will the leader yield to me?

Mr. BAKER. Yes, Mr. President, but first, may I ask the Chair to put the request.

The PRESIDING OFFICER. Is

there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object, did I understand the majority leader to say he will move to some noncontroversial calendar items in this period?
Mr. BAKER. Yes, Mr. President, the

Senator did.

Mr. HUMPHREY. That will occur

Mr. BAKER. Right now, Mr. President.

Mr. HUMPHREY. We are going back into morning business for that

purpose, is that correct?

Mr. BAKER. What I asked is that between now and 1:15 p.m., we can wrap up routine matters that have been cleared on both sides for action by unanimous consent, and that at 1:15 p.m. or sooner, if there is no further requirement for the time for morning business, the Senate will resume consideration of the highway bill and no Senator's rights, positions, or options will be affected by this request.

Mr. HUMPHREY. Mr. President, reserving the right to object, and I shall not object, I would like to take just a brief moment to point out with respect to the highway bill, the gas tax, that this tarbaby is becoming stickier and stickier. Continued deliberation on this bill is delaying us from taking up the continuing resolution which is on the calendar and which must be passed by Friday night at the latest, unless we are to subject the Nation to disruption of its finances.

Mr. President, this Senator cannot see much point in going on further with this gasoline tax bill. Senators have family plans; they have looked forward to Christmas and Hanukkah for months. They have plans, have worked hard. I hope that the leadership on both sides, as well as the White House, will reassess the situation and permit Senators, at the end of the year, to be with their families in an orderly and traditional way and that we shall not continue to tie the Senate up on this measure which, after all, has not been adequately presented. There were no hearings to speak of, there are no reports available to Senators to help them in their deliberations on this bill. It is very complex, it has elements that Senators do not even know about.

We always make mistakes when we get into a rush. Surely, a lameduck session is no time to continue with this bill. I hope the leadership will reassess the situation and go forward.

The PRESIDING OFFICER, Is

there objection?

Mr. METZENBAUM. Reserving the right to object, and I do not intend to object, will the majority leader just clarify that until 1:15, there will be no legislative matters taken up by unanimous consent and we need not concern ourselves about being on the floor.

Mr. BAKER. That is correct, Mr. President. It might be before 1:15, because we shall use so much of that time as is desirable for this purpose and for general morning business purposes by the Senators.

The wrap-up contains legislative material, but all of it has been cleared on both sides.

Mr. METZENBAUM. I understand

Mr. BAKER. That is through the regular clearance process. I believe the Senator need not be concerned that any other item that has not been cleared on both sides will be taken up. That is not my intention. I do not plan to do that, even if I could.

Mr. METZENBAUM. If the time is accelerated before 1:15, adequate notice will be given those of us who are concerned?

Mr. BAKER. If morning business is closed before 1:15, I am sure both

cloakrooms will advise Senators. Mr. METZENBAUM. I do not object,

Mr. President. The PRESIDING OFFICER. Is

there objection?

Mr. RANDOLPH. Mr. President, reserving the right to object, but I shall not object. I wish to have a colloquy with the able majority leader.

Mr. President, I heard what our good colleague from New Hampshire said about the highway bill, which is pending in this body. Perhaps he forgets that the other body has passed the highway bill, and that the Environment and Public Works Committee gave very serious consideration to drafting a highway measure. I remind

him that the bill came from the committee by a vote of 16 to nothing.

This is not a spliced-up bill which we have brought to the floor from the Environment and Public Works Committee, regardless of the attempts being made to so characterize it, but I understand the prerogatives of individual Members.

What we need, I say to the majority leader, is a chance to vote on this bill. Does he have any encouragement to offer to me and others in the body who remember why we came to the floor a few days ago in reference to this measure?

Mr. BAKER. Mr. President, I think the Senator from West Virginia knows how committed I am to the passage of this bill. I assure him that nothing in this request will diminish my commit-

ment to that purpose.

Mr. President, I understand the remarks of the Senator from New Hampshire, and I know his position. He has made it known eloquently and often. I am sure he also understands the need to do the work of the Senate as it has been cleared, so I appreciate his statement that he will not object to this.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object, and I shall not object, the Chair interrupted the Senator from New Hampshire in his opinion in violation of the rules, and so I wish to finish.

I do urge the leadership to proceed to other work and I shall not object. I hope that we will have unanimous

The PRESIDING OFFICER. The unanimous-consent request is not debatable.

Mr. HUMPHREY. I have no objection.

Mr. BAKER. I thank the Senator. I ask that the Chair put the request.

The PRESIDING OFFICER. there objection?

The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I ought to remark that I disagree with a good bit of what the Senator from New Hampshire said, but I do not disagree that we have consumed considerable time. We have not only a sticky issue but we have sticky Senators, and I understand that: everybody is working hard and they are tired, they are committed and dedicated. But I ought to say that we are going to work our way through this. We will just do it as best we can.

## ORDER OF PROCEDURE

Mr. BAKER. Mr. President, first on my list of items that appear to be cleared for action by unanimous consent is S. 1908, which I would like to

pass at this time, if the minority leader is agreeable.

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order so all can hear.

Mr. ROBERT C. BYRD. Mr. President, can the distinguished majority leader give me assurance that nothing dealing with Radio Marti will be offered as an amendment to any of these measures?

Mr. BAKER. Mr. President, I can give the Senator that assurance.

Mr. ROBERT C. BYRD. Then I have no objection to proceeding as the leader requests.

REINSTATEMENT AND VALIDATION OF AN OIL AND GAS LEASE

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 959, S. 1908.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1908) to provide for the reinstatement and validation of United States oil and gas lease NM-A26947 (Oklahoma).

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with amendments, as follows:

On page 2, strike line 6, through and including line 12, and insert the following:

That the recordholder of oil and gas lease numbered NM-A26947 (Oklahoma) shall, within thirty days of receipt of notice from the Secretary as provided by section 2 of this Act, tender payment of the amount of rental, royalties, and interest due. Sec. 2. Within ninety days of enactment of

SEC. 2. Within ninety days of enactment of this Act the Secretary of the Interior shall notify the recordholder of oil and gas lease numbered NM-A26947 (Oklahoma) of the amount of rental and royalties, together with interest thereon, due the United States as determined by the Secretary of the Interior. The interest to be charged shall be determined in consultation with the Secretary of the Treasury and shall reflect the prevailing interest rates over the period of time during which royalties were due the United States but were not paid.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law or regulation, United States oil and gas lease NM-A26947 (Oklahoma) shall be held not to have terminated by operation of law or otherwise on January 1, 1981, but shall be deemed to be in full force and effect and the terms of said lease extended for a period equal to the unexpired portion of the lease remaining on January 1, 1981, and so long thereafter as oll or gas is produced in paying quantities: Provided, That the recordholder of oil and gas lease numbered NM-A26947 (Oklahoma) shall, within thirty days of re ceipt of notice from the Secretary as provided by section 2 of this Act, tender payment of the amount of rental, royalties, and interest due.

SEC. 2. Within ninety days of enactment of this Act the Secretary of the Interior shall notify the recordholder of oil and gas lease numbered NM-A26947 (Oklahoma) of the amount of rental and royalties, together with interest thereon, due the United States as determined by the Secretary of the Interior. The interest to be charged shall be determined in consultation with the Secretary of the Treasury and shall reflect the prevailing interest rates over the period of time during which royalties were due the United States but were not paid.11Mr. BAKER. Mr. President, I ask unanimous consent that the amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, my question to the majority leader about Radio Marti amendments was made on behalf of another Senator and does not necessarily indicate any viewpoint of my own on that.

Mr. EXON. Will the minority leader yield before the majority leader leaves the floor for clarification? I came in just as the leadership was talking about that.

What was the statement that the majority leader made with regard to Radio Marti?

Mr. BAKER. Mr. President, the distinguished minority leader asked me if any amendment to any measure contained in the wrapup file related to Radio Marti. I assured him that it did not.

Mr. EXON. May I inquire of the majority leader if it would be possible for him to expand that to indicate that Radic Marti would not come up on any of the amendments during the lameduck session?

Mr. BAKER. No, I cannot do that, Mr. President. I can assure the Senator that is not going to come up between now and 1:15 which the Senate has provided as the time to do routine morning business. But I really cannot go beyond that.

Mr. EXON. I thank the Senator. I just wish to cooperate wherever I can.

Mr. BAKER. The Senator thought he would take a shot.

I thank the Senator.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill (S. 1908) was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was

USE AND DISTRIBUTION OF CERTAIN INDIAN JUDGMENT FUNDS

Mr. STEVENS. Mr. President, I now ask the Chair to lay before the Senate a message from the House on S. 1986, a bill dealing with the Fort Belknap Indian community.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1986) entitled "An Act to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250-A and 279-C by the United States Court of Claims, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause and insert: That, notwithstanding any other provision of law, the funds appropriated in accordance with section 1302 of the Supplemental Appropriation Act (31 U.S.C. 724a), on January 23, 1981, in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community in dockets numbered 250-A and 279-C of the United States Court of Claims; on July 16, 1981, in satisfaction of a judgment awarded to the Gros Ventre Tribe of Fort Belknap Indian Community in docket numbered 309-74 of the United States Court of Claims; and 26.8 per centum of the funds appropriated on June 30, 1981, in satisfaction of a judgment awarded to the Blackfeet and Gros Ventre Tribes in docket numbered 649-80L of the United States Court of Claims, less attorney fees and litigation expenses, but including all accrued interest and investment income, shall be distributed and used as herein provided.

SEC. 2. The funds appropriated to the Blackfeet Tribe of the Blackfeet Reservation, Montana, in docket numbered 279-C, in an original amount of \$400,000, shall be held in trust and invested by the Secretary of the Interior (hereinafter "Secretary") for the benefit of the members of the Blackfeet Tribe. The governing body of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for governmental operations and social and economic programs.

SEC. 3. The funds appropriated to the Assiniboine Tribe of the Fort Belknap Indian Community, Montana, in docket numbered 250-A, in the original amount of \$2,170,013 shall be used and distributed as follows: Provided, That no person shall be eligible to share in more than one award in his own

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons duly enrolled as Assiniboine members of the Fort Belknap Indian Community and born on or prior to, and living on, the date of enactment of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Assiniboine Tribe of the Fort Belknap Indian Community. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for social and eco-

nomic programs. Such programs may include, but are not limited to, land acquisitions and the development of local reservation projects.

SEC. 4. The funds appropriated to the Gros Ventre Tribe of the Fort Belknap Indian Community, Montana, in docket numbered 279-C, in the original amount of \$2,094,987; in docket numbered 309-74, in the original amount of \$77,780.13; and in docket numbered 649-80L, in the initial amount of 26.8 per centum of \$29,404,951.94, shall be used and distributed as follows: Provided, That no person shall be eligible to share in more than one award in his own right:

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons born on or prior to, and living on, the date of enactment of this Act who are (1) duly enrolled members of the Gros Ventre Tribe of the Fort Belknap Indian Reservation who possess at least one-quarter degree Gros Ventre blood or (2) who are enrolled in the Fort Belknap Indian Community and who are at least one-fourth degree Gros Ventre and Assiniboine blood, but not less than one-eighth degree Gros Ventre blood, and are not eligible to share under section 3 of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Gros Ventre Tribe of the Fort Belknap Indian Reservation. The treaty committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to approval of the Secretary, for social and economic programs. Such programs may include, but are not limited to, land acquisition and the development of local reservation projects.

(c) Nothing in this section is deemed in anyway to increase, diminish, or in anyway affect the right of the Gros Ventre Tribe to determine its membership.

SEC. 5. The per capita shares of living competent adults shall be paid directly to them. Per capita shares of decreased individual beneficiaries shall be determined and distributed pursuant to regulations prescribed by the Secretary. Per capita shares of individuals under eighteen shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be necessary to protect and preserve the interests of such individuals.

SEC. 6. None of the funds distributed per capita or held in trust under provisions of this Act shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

SEC. 7. The Secretary is authorized to prescribe rules and regulations to carry out the provisions of this Act, including the establishment of deadlines for filing applications for enrollment.

SEC. 8. (a) Notwithstanding any other law, the funds appropriated by the Act of September 30, 1976 (90 Stat. 1416), in satisfaction of a judgment awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, less attorney fees and litigation expenses, but including all accrued interest or investment income, shall be used and distributed as provided in this Act.

(b) Fifty per centum of such funds shall be held in trust by the Secretary for the

benefit of the Papago Tribe and shall be administered or invested by the Secretary for the best interest of the tribe under existing law. Such funds shall be held and used as follows:

(1) All interest or investment income accruing to said funds shall be available, at the request of the tribe on a quarterly basis, for use by the Papago Tribal Council on an annual budgetary basis for expenditures of the tribal government, and for health, education, and social services, capital improvements and economic development programs of the tribe and of the district and communities of the tribe's reservation. Any interest or investment income accrued during the year and remaining available at the end of the tribe's fiscal year shall, at the request of the tribe, be added to the principal amount.

(2) A portion of such funds, principal and accrued interest or investment income, but not in the aggregate a sum in excess of 20 per centum of the initial principal amount, shall be available upon the request to the tribe for capital improvement or major economic development activities of benefit to the tribe as a whole pursuant to a plan or plans developed by the Papago Tribal Council and approved by the Secretary.

(3) Sufficient funds from the principal amount of such funds shall be available to the Secretary to insure that the per capita distribution of \$1,000 to each enrollee is completed as provided in subsection (c) to the extent that there are not sufficient funds in the amount set aside for per capita distribution to make such payment.

(c) Fifty per centum of such funds shall be held and administered by the Secretary for per capita distribution and such sums, together with any accrued interest or investment income, shall be distributed and used as follows:

(1) The membership roll of the tribe shall be brought current to the date of enactment of this Act pursuant to the criteria specified in the tribal constitution and the provisions of the Papago Enrollment Ordinance, numbered 5-81, and the Papago Enrollment Manual, or other ordinances and regulations adopted by the Papago Tribal Council and approved by the Secretary: Provided, That no application for membership on the roll may be filed or received by the tribe for purposes of per capita payments under this section one hundred and eighty days after the date of enactment of this Act.

(2) Sufficient funds shall be made available to the tribe on an annual budgetary basis from interest and investment income accruing to such funds to assist the tribe to bring the membership roll current as provided in paragraph (1) of the subsection.

(3) Per capita distributions shall be made, in shares as equal as possible, to all members of the Papago Tribe who were born on or prior to, and living on, the date of enactment of this Act, as follows:

(i) Persons whose applications for membership on the roll have been approved on the date of enactment of this Act shall be paid the sum of \$1,000 within ninety days after such date.

(ii) Persons whose applications for membership on the roll have not been approved on the date of enactment of this Act shall be paid the sum of \$1,000 within ninety days after their membership has been approved.

(iii) Upon completion of the membership roll and of all appeals from adverse determinations on applications for membership, and upon the expiration of the time allowed for such appeals, any remaining amount, after the payments provided in paragraph (2) of this subsection and in subparagraphs (i) and (ii) of this paragraph, shall be distributed, in sums as equal as possible, to all enrolled members of the Pagago Tribe.

(iv) The per capita shares of living competent adults shall be paid directly to them. Per capita shares of deceased beneficiaries, legal incompetents, and minors shall be determined and distributed pursuant to regulations prescribed by the Secretary.

(v) Any amount remaining after the per capita distributions to enrollees provided in subparagraph (iii) of this paragraph shall revert to the tribe and shall be added to the principal fund held and administered by the Secretary pursuant to subsection (b) of this section.

(d) None of the funds distributed per capita or held in trust under the provisions of this section shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act or other Federal assistance programs.

Amend the title so as to read: "An Act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribe of Indians and the Assiniboine Tribe of Fort Belknap Indian Community, in certain dockets of the United States Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets numbered 345 and 102 of the Indian Claims Commission, and for other purposes."

Mr. STEVENS. Mr. President, I move that the Senate concur in the amendment of the House with a further amendment which I send to the desk on behalf of the Senator from Montana (Mr. Melcher).

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

## UP AMENDMENT NO. 1479

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. Stevens), on behalf of Mr. Melcher, proposes an unprinted amendment numbered 1479.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike Section 8(c)(3)(i) and 8(c)(3)(ii) and insert the following in lieu thereof:

"(i) Persons whose applications for membership on the roll have been duly approved by the Papago Tribal Council on the date of enactment of this Act shall be paid the sum of \$1,000 within 45 days after the date of certification by the Secretary of their eligibility to share in funds under this subsection."

"(ii) Persons whose applications for membership on the roll have not been duly approved by the Papago Tribal Council on the date of enactment of this Act shall be paid the sum of \$1,000 within ninety days after their membership has been approved by the Papago Tribal Council and their eligibility to share in funds under this subsection has been certified by the Secretary."

The motion to concur in the House amendment with the Senate amendment (UP No. 1479) was agreed to.

move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### GRATUITY TO DAPHNE CHAP-MAN AND VALERIE C. QUICK

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order 991, Senate Resolution 509.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 509) to pay a gratuity to Daphne Chapman and Valerie C. Quick.

The PRESIDING OFFICER. there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution

The resolution (S. Res. 509) was agreed to as follows:

#### S. RES. 509

Resolved, That the Secretary of the Senate is authorized and directed to pay, from the contingent fund of the Senate, to Daphne Chapman and Valerie C. Quick, daughters of Georgia M. Chapman, an employee of the Senate at the time of death, a sum to each equal to one-half of one year's compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. STEVENS. Mr. President, move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## GRATUITY TO ALPHA B. PERRY

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 992, Senate Resolution

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 510) to pay a gratuity to Alpha B. Perry.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 510) was agreed to as follows:

Resolved, That the Secretary of the Senate is authorized and directed to pay,

Mr. STEVENS. Mr. President, I from the contingent fund of the Senate, to Alpha B. Perry, widow of Leslie S. Perry, an employee of the Architect of the Capitol assigned to duty in the United States Capitol Building (Senate wing) at the time of his death, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

> Mr. STEVENS. Mr. President, move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### GRATUITY TO CHRISTINE GOOD

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 993, Senate Resolution 511.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 511) to pay a gratuity to Christine Good.

The PRESIDING OFFICER. there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolu-

The resolution (S. Res. 511) was agreed to as follows:

### S. RES. 511

Resolved, That the Secretary of the Senate is authorized and directed to pay, from the contingent fund of the Senate, to Christine Good, daughter of Barbara D. Lewis, an employee of the Senate at the time of her death, a sum equal to one year's compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. STEVENS. Mr. President, move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### EXTENSION OF INDIAN EDUCATION LEGISLATION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 999, S. 2623.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Select Committee on Indian Affairs with an amendment to strike out all after the enacting clause, and insert the follow-

Section 1. The matter preceding title I of the Tribally Controlled Community College Assistance Act of 1978 (92 Stat. 1325) (hereafter in this Act referred to as the "Act") is

(1) by striking out "DEFINITIONS" and inserting in lieu thereof the following:

#### "DEFINITIONS

"Sec. 2. (a) For purposes of this Act, the term-

(2) by inserting before the semicolon at the end of paragraph (5) thereof the following: "and the reference to Secretary in clause (5)(A) of such section shall be deemed to refer to the Secretary of the Interior"; and

(3) by striking out paragraph (7) and inserting in lieu thereof the following:

"(7) 'Indian student count' means a number equal to the total number of Indian students enrolled in each tribally controlled community college, determined in a manner consistent with subsection (b) of this section on the basis of the quotient of the sum of the credit hours of all Indian students so enrolled, divided by twelve.

"(b) For the purpose of determining the Indian student count pursuant to paragraph (7) of subsection (a), such number shall be calculated on the basis of the registrations of Indian students as in effect at the conclusion of the third week of each academic term. Credits earned in classes offered during a summer term shall be counted toward the computation of the Indian student count in the succeeding fall term. Indian students earning credits in any continuing education program of a tribally controlled community college shall be included in determining the sum of all credit hours. For such purposes, credits earned in a continuing education program shall be converted to a credit-hour basis in accordance with the tribally controlled community college's system for providing credit for participation in such program.". tion of the Indian student count in the succeeding fall term. Indian students earning credits in any continuing education program of a tribally controlled community college shall be included in determining the sum of all credit hours. For such purposes, credits earned in a continuing education program shall be converted to a credit-hour basis in accordance with the tribally controlled community college's system for providing credit for participation in such program."

SEC. 2. Section 101 of the Act is amended by inserting immediately before the period at the end thereof the following: ", and to allow for the improvement and expansion of the physical resources of such institutions'

SEC. 3. (a) Section 102 of the Act is amended-

(1) by striking out "is authorized to" in subsection (a) and inserting in lieu thereof "shall, subject to appropriations,"; and

(2) by striking out "to defray the expense of activities related to education programs for Indian students" in subsection (b) and inserting in lieu thereof "to defray, at the determination of the tribally controlled community college, expenditures for academic, educational, and administrative purposes and for the operation and mainte-

nance of the college"

(b) Section 106(a) of the Act is amended by inserting after the second sentence the following new sentence: "Such application shall include a description of recordkeeping procedures for the expenditure of funds received under this Act which will allow the Secretary to audit and monitor programs conducted with such funds."

SEC. 4. (a) The Act is amended-

(1) by redesignating sections 104 through 114 as sections 105 through 115, respectively; and

(2) by inserting after section 103 the fol-

lowing new section:

#### "PLANNING GRANTS

"SEC. 104. (a) The Secretary shall establish a program in accordance with this section to make grants to tribes and tribal entities to conduct planning activities for the purpose of developing proposals for the establishment of tribally controlled community colleges, or to determine the need and potential for the establishment of such colleges

(b) The Secretary shall establish, by regulation, procedures for the submission and review of applications for grants under this

section.

"(c) From the amount appropriated to carry out this title for any fiscal year (exclusive of sums appropriated for section 105), the Secretary shall reserve (and expend) an amount necessary to make grants to five applicants under this section of not more than \$15,000 each, or an amount necessary to make grants in that amount to each of the approved applicants, if less than five apply and are approved.".

(b) The Act is further amended-

(1) by striking out "section 106" in section 105 (as redesignated by subsection (a)(1)) and inserting in lieu thereof "section 107"

(2) by striking out "section 105" in section 106 (as so redesignated) and inserting in lieu

thereof "section 106";
(3) by striking out "section 110" in section 107 (as so redesignated) and inserting in lieu thereof "section 111";
(4) by striking out "section 106" in section

109 (as so redesignated) and inserting in lieu

thereof "section 107";
(5) by striking out "section 104" in section 109 (as so redesignated) and inserting in lieu

thereof "section 105"; and
(6) by striking out "section 106(a)" in section 110 (as so redesignated) and inserting in lieu thereof "section 107(a)"

SEC. 5. Section 105 of the Act (as redesignated by section 4(a)(1)) is amended-

(1) by inserting "from a tribally controlled community college which is receiving funds under section 108" after "upon request" in the first sentence thereof; and

(2) by striking out "to tribally controlled community colleges" in such sentence.

SEC. 6. (a) Section 106 of the Act (as redesignated by section 4(a)(1) of this Act) is amended-

(1) by striking out "FEASIBILITY" in the heading of such section and inserting in lieu thereof "ELIGIBILITY"

(2) by striking out "feasibility" each place it appears in such section and inserting in

lieu thereof "eligibility";
(3) by striking out "Assistant Secretary of Education of the Department of Health, Education, and Welfare" in subsection (a) and inserting in lieu thereof "Secretary of Education";

(4) by inserting at the end of subsection (b) the following new sentence: "Such a positive determination shall be effective for the fiscal year succeeding the fiscal year in which such determination is made."; and (5) by striking out "10 per centum" in sub-

section (c)(2) and inserting in lieu thereof "5 per centum"

(b) Section 107(a) of the Act (as redesignated by section 4(a)(1) of this Act) is amended-

(1) by striking out "feasibility" in subsection (a) and inserting in lieu thereof "eligi-', and

(2) by striking out "Assistant Secretary of Education of the Department of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Education".

SEC. 7. Section 108(a) of the Act (as redesignated by section 4(a)(1) of this Act) is

amended to read as follows:

"SEC. 108. (a) Except as provided in section 111, the Secretary shall, subject to appropriations, grant for each academic year to each tribally controlled community college having an application approved by him an amount equal to the product of-

'(1) the Indian student count at such college during such academic year, as determined by the Secretary in accordance with

section 2(a)(7) of this Act; and

'(2)(A) \$4,000 for fiscal year 1983, "(B) \$4,000 for fiscal year 1984, "(C) \$5,025 for fiscal year 1985,

"(D) \$5,415 for fiscal year 1986, and "(E) \$5,820 for fiscal year 1987,

except that no grant shall exceed the total cost of the education program provided by such college.

SEC. 8. Section 109 of the Act (as redesignated by section 4(a)(1) of this Act) is

amended-

(1) by inserting "(a)" immediately after the section designation; and

(2) by adding at the end thereof the fol-

lowing new subsections:

"(b)(1) The amount of any grant for which tribally controlled community colleges are eligible under section 108 shall not be altered because of funds allocated to any such colleges from funds appropriated under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13).

"(2) No tribally controlled community college shall be denied funds appropriated under said Act of November 2, 1921, because of the funds it receives under this Act.

(c) For the purposes of section 312(2)(A)(i) and 322(a)(2)(A)(i) of the Higher Education Act of 1965, any Indian student who receives a student assistance grant from the Bureau of Indian Affairs for postsecondary education shall be deemed to have received such assistance under subpart 1 of part A of title IV of such Act."

SEC. 9. (a) Section 110 of the Act (as redesignated by section 4(a)(1) of this Act) is

amended to read as follows:

## "APPROPRIATION AUTHORIZATION

"SEC. 110. (a)(1) There is authorized to be appropriated, for carrying out section 105, \$3,200,000 for each of the fiscal years 1985, 1986, and 1987.

"(2) There is authorized to be appropriated for carrying out section \$30,000,000 for each of such fiscal years.

"(3) There is authorized to be appropriated such sums as may be necessary to carry out sections 112(b) and 113 for each of such fiscal years.

"(b) For the purpose of affording adequate notice of funding available under this Act, appropriations for grants provided in section 107 of the Act are authorized to be included in an appropriations Act for the fiscal year immediately preceding the academic year for which grants are to be pro-

vided. Amounts appropriated for the academic year succeeding the current fiscal year shall become available for obligation on July 1 of the year in which they are appropriated and shall remain available until September 30 of the succeeding fiscal year. In order to effect a transition to the forward funding method of timing appropriation action, the provisions of this subsection shall apply notwithstanding that its initial application will result in the enactment in the same year (whether in the same appropriation Act or otherwise) of two separate appropriations, one for the then current fiscal year and one for the succeeding academic year."

SEC. 10. Section 111 of the Act (as redesignated by section 4(a)(1) of this Act) is amended by redesignating subsection (b) as subsection (c) and by striking out subsection (a) and inserting in lieu thereof the follow-

ing:

"(a)(1) If the sums appropriated for any fiscal year pursuant to section 110(a)(2) for grants under section 107 are not sufficient to pay in full the total amount which approved applicants are eligible to receive under such section for such fiscal year-

"(A) the Secretary shall first allocate to each such applicant which received funds under section 107 for the preceding fiscal year, or which was an eligible but unfunded applicant during the preceding year, an amount equal to the product of—

"(i) the per capita payment for the preceding fiscal year, and

'(ii) such applicant's Indian student count

for the current fiscal year;

"(B) the Secretary shall next allocate an amount equal to the product described in subparagraph (A) to applicants who do not receive funds under subparagraph (A) in the order in which such applicants have qualified for assistance in accordance with section 107.

"(2) For purposes of paragraph (1) of this subsection, the term 'per capita payment' for any fiscal year shall be determined by dividing the amount available for grants to controlled community tribally colleges under section 107 for such fiscal year by the sum of the Indian student counts of such colleges for such fiscal year. The Secretary shall on the basis of the most satisfactory data available, compute the Indian student count for any fiscal year for which such count was not used for the purpose of making allocations under this title.

"(b)(1) If the sums appropriated for any fiscal year for grants under section 107 are not sufficient to pay in full the total amount of the grants determined pursuant to subsection (a)(1)(A) the amount which applicants described in such subsection are eligible to receive under section 107 for such fiscal year shall be ratably reduced.

(2) If any additional funds become available for making payments under section 107 for any fiscal year to which subsection (a) or paragraph (1) of this subsection applies, such additional amounts shall be allocated by first increasing grants reduced under paragraph (1) of this subsection on the same basis as they were reduced and by then allocating the remainder in accordance with subsection (a). Sums appropriated in excess of the amount necessary to pay it full the total amounts for which applicant are eligible under section 107 shall be allocated by ratably increasing such total

"(3) References in this subsection and subsection (a) to section 107 shall, with respect to fiscal year 1982, be deemed to refer to

section 106 as in effect at the beginning of For the purpose of providing its required such fiscal year.'

SEC. 11. Section 112 of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

#### "REPORT ON FACILITIES

"SEC. 112. (a) The Administrator of General Services shall provide for the conduct of a study of facilities available for use by tribally controlled community colleges. Such study shall consider the condition of currently existing Bureau of Indian Affairs facilities which are vacant or underutilized and shall consider available alternatives for renovation, alteration, repair, and reconstruction of such facilities (including renovation, alteration, repair, and reconstruc-tion necessary to bring such facilities into compliance with local building codes). Such study shall also identify the need for new construction. A report on the results of such study shall be submitted to the Congress not later than September 30, 1984. Such report shall also include an identification of property (1) on which structurally sound buildings suitable for use as educational facilities are located, and (2) which is available for use by tribally controlled community colleges under section 202(a)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483(a)(2)) and under the Act of August 6, 1956 (70 Stat. 1057; 25 U.S.C. 443a).

"(b) The Administrator of General Services, in consultation with the Bureau of Indian Affairs, shall initiate a program to conduct necessary renovations, alterations, repairs, and reconstruction identified pursuant to subsection (a) of this section.

"(c) For the purposes of this section, the term 'reconstruction' has the meaning provided in the first sentence of subparagraph (B) of section 742(2) of the Higher Education Act of 1965 (20 U.S.C. 1132e-1(2)(B)).".

Sec. 12. Section 113 of the Act (as redesignated by section 4(a)(1) of this Act) is amended to read as follows:

## "CONSTRUCTION OF NEW FACILITIES

"SEC. 113. (a) With respect to any tribally controlled community college for which the report of the Administrator of General Services under section 112(a) of this Act identifies a need for new construction, the Secretary shall, subject to appropriations and on the basis of an application submitted in accordance with such requirements as the Secretary may prescribe by regulation, provide grants for such construction in accordance with this section.

"(b) In order to be eligible for a grant under this section, a tribally controlled community college (1) must be a current recipient of grants under section 105 or 107, and (2) must be accredited by a nationally recognized accrediting agency listed by the Secretary of Education pursuant to the last sentence of section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a)), except that such requirement may be waived if the Secretary determines that there is a reasonable expectation that such college will be fully accredited within eighteen months. In any case where such a waiver is granted, grants under this section shall be available only for planning and development of proposals for construction.

'(c)(1) Except as provided in paragraph (2), grants for construction under this section shall not exceed 80 per centum of the cost of such construction, except that no tribally controlled community college shall be required to expend more than \$400,000 in fulfillment of the remaining 20 per centum.

portion of the cost of such construction, a tribally controlled community college may use funds provided under the Act of November 2, 1921 (25 U.S.C. 13), popularly referred to as the Snyder Act.

"(2) The Secretary may waive, in whole or in part, the requirements of paragraph (1) in the case of any tribally controlled community college which demonstrates that neither such college nor the tribal government with which it is affiliated have sufficient resources to comply with such requirements. The Secretary shall base a decision on whether to grant such a waiver solely on the basis of the following factors: (A) tribal population; (B) potential student population; (C) the rate of unemployment among tribal members; (D) tribal financial resources; and (E) other factors alleged by the college to have a bearing on the availability of resources for compliance with the requirements of paragraph (1) and which may include the educational attainment of tribal

"(d) If, within twenty years after completion of construction of a facility which has been constructed in whole or in part with a grant made available under this section-

'(1) the applicant ceases or fails to be a public or nonprofit institution.

"(2) the facility ceases to be used by the applicant as an academic facility, unless the Secretary determines that there is good cause for releasing the institution from this

obligation, or

"(3) the tribe with which the applicant is affiliated fails to use the facility for a public purpose approved by the tribal government in furtherance of the general welfare of the community served by the tribal government, the United States shall be entitled to recover from such applicant (or its successor in title or possession) an amount which bears to the value of the facility at the time the same ratio as the amount of the grant under this section bore to the cost of the facility constructed with the aid of such grant. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which such facility is located.

(e) No construction assisted with funds under this section shall be used for religious worship or a sectarian activity or for a

school or department of divinity.

"(f) For the purposes of this section, the Secretary shall have the authority granted to the Secretary of Education pursuant to section 732(b) of the Higher Education Act of 1965 (20 U.S.C. 1132d-1) with respect to construction under title VII of such Act.

'(g) For the purposes of this section-

"(1) the term 'construction' includes re-construction or renovation (as such terms are defined in the first sentence of subparagraph (B) of section 742(2) of the Higher Education Act of 1965 (20 U.S.C. 1132e-1(2)(B))); and

"(2) the term 'academic facilities' has the meaning provided such term under section 742(1) of the Higher Education Act of 1965

(20 U.S.C. 1132e-l(1)).

SEC. 13. The Act is further amended by adding at the end thereof the following new

"TITLE III-TRIBALLY CONTROLLED COMMUNITY COLLEGE ENDOWMENT PROGRAM

#### 'PURPOSE

"SEC. 301. It is the purpose of this title to provide grants for the encouragement of en-dowment funds for the operation and improvement of tribally controlled community colleges.

#### "ESTABLISHMENT OF PROGRAM; PROGRAM AGREEMENTS

"SEC. 302. (a) From the amount appropriated pursuant to section 306, the Secretary shall establish a program of making endownment grants to tribally controlled community colleges which are current recipients of assistance under section 107 of this Act or under section 3 of the Navajo Community College Act. No such college shall be ineligible for such a grant for a fiscal year by reason of the receipt of such a grant for a preceding fiscal year.

(b) No grant for the establishment of an endowment fund by a tribally controlled community college shall be made unless such college enters into an agreement with

the Secretary which-

"(1) provides for the establishment and maintenance of a trust fund at a federally insured banking or savings institution;

"(2) provides for the deposit in such trust fund of-

"(A) any Federal capital contributions made from funds appropriated under section 306;

"(B) a capital contribution by such college in an amount equal to the amount of each Federal capital contribution; and

"(C) any earnings of the funds so deposit-

"(3) provides that such funds will be deposited in such a manner as to insure the accumulation of interest thereon at a rate not less than generally available for similar funds deposited at the same banking or savings institution for the same period or periods of time:

"(4) provides that, if at any time such college withdraws any capital contribution made by that college, an equal amount of Federal capital contribution shall be withdrawn and returned to the Secretary for reallocation to other colleges;

'(5) provides that no part of the net earnings of such trust fund will inure to the ben-

efit of any private person; and

"(6) includes such other provisions as may be necessary to protect the financial interest of the United States and promote the purpose of this title and as are agreed to by the Secretary and the college, including a description of recordkeeping procedures for the expenditure of accumulated interest which will allow the Secretary to audit and monitor programs and activities conducted with such interest.

## "USE OF FUNDS

"SEC. 303. Interest deposited, pursuant to section 302(b)(2)(C), in the trust fund of any tribally controlled community college may be periodically withdrawn and used, at the discretion of such college, to defray any expenses associated with the operation of such college, including expense of operations and maintenance, administration, academic and support personnel, community and student services programs, and technical assistance.

## "COMPLIANCE WITH MATCHING REQUIREMENT

"Sec. 304. For the purpose of complying with the contribution requirement of section 302(b)(2)(B), a tribally controlled community college may use funds which are available from any private or tribal source.

## "ALLOCATION OF FUNDS

"SEC. 305. (a) From the amount appropriated pursuant to section 306, the Secretary shall allocate to each tribally controlled community college which is eligible for an endowment grant under this title an amount for a Federal capital contribution equal to the amount which such college demonstrates has been placed within the control of, or irrevocably committed to the use of, the college and is available for deposit as a capital contribution of that college in accordance with section 302(b)(2)(B), except that the maximum amount which may be so allocated to any such college for any fiscal year shall not exceed \$350,000.

(b) If for any fiscal year the amount appropriated pursuant to section 306 is not sufficient to allocate to each tribally controlled community college an amount equal to the amount demonstrated by such college pursuant to subsection (a), then the amount of the allocation to each such college shall

be ratably reduced.

"AUTHORIZATION OF APPROPRIATIONS

"Sec. 306. (a) There is authorized to be appropriated \$5,000,000 for each of the fiscal years 1985, 1986, and 1987 to carry out this

"(b) Any funds appropriated pursuant to subsection (a) are authorized to remain

available until expended."

SEC. 14. In promulgating any regulations to implement the amendments made by this Act, the Secretary of the Interior shall consult with tribally controlled community col-

Mr. STEVENS. Mr. President, I ask for immediate consideration of the committee substitute.

The amendment was agreed to. Mr. ANDREWS. Mr. President, I rise in support of S. 2623, a bill to amend and extend the Tribally Controlled Community College Assistance Act of 1978. It was my pleasure to chair the Senate Select Committee on Indian Affair's hearing on this bill, a bill which I cosponsored. During course of that hearing, witnesses from the colleges and from the tribes explained the purpose of the colleges and the success this program has had among the young American Indian men and women.

In my State of North Dakota, there are four tribally controlled community colleges. These schools are doing a fine job preparing their students to enter the job market with employable skills. Many of the graduates go directly into the job market, while others continue their education at the university level. These schools enjoy the support of their students, the tribal leaders and the eductional communities.

The Senate Select Committee on Indian Affairs has worked long and hard to insure that S. 2623 adequately addresses the needs of the college program. The college presidents have met time and again with our staff, and they support this bill. When the bill was first introduced, it met with strong opposition from the administration. However, over the course of our meetings with the administration, the administration has removed its previous strong opposition to S. 2623.

I believe that S. 2623, as amended, is a good piece of legislation, and a necessary one. I urge my colleagues to

join me in voting for passage of this bill.

Mr. ABDNOR. Mr. President, I am pleased that the Senate has taken action to consider this important measure. As one of the cosponsors of S. 2623. I look forward to quick action. to extend one of the most valuable Indian education acts ever to be passed by Congress.

In my State of South Dakota, there are three tribally controlled colleges administered under this program; Cheyenne River Community College, Oglala Sioux Community College, and Gleska College. In addition South Dakotans attend the many Standing Rock Community College located in North Dakota.

Each of these colleges are tribally chartered, serve predominately Indian populations and are governed by native Americans.

These colleges serve a special world known only to those that reside on the Indian reservations. Being located in often remote areas and serving the special needs of these communities all these colleges provide a valuable service to our native American population.

They provide a up-to-date curricula which enables every student, young and old alike, to pursue a complete or partial course of study to improve their knowledge and their job skills.

More importantly, however, these schools provide hope. Education is the key to one's future and these colleges provide our native Americans with the only opportunity they might have to pursue this goal.

I have received letters and personal visits from many of these students and, young and old alike, they believe this opportunity to receive an education has made a special difference in their lives.

Learning invites more learning. The perspectives widen and the goals enlarge. This is a program that works, and it deserves support. For these reasons and many more I encourage my colleagues to support this measure for what it has already accomplished and for what it can do in the future.

Mr. COHEN. Mr. President, I bring before this body today, S. 2623 a bill which reauthorizes Public Law 95-471, the Tribally Controlled Community College Act, through fiscal year 1987. Passed in 1978, this legislation originally sought to reaffirm the Federal Government's commitment and responsibility toward meeting the educational needs of the Native American by providing direct funding assistance to community colleges which are tribally controlled and tribally chartered. Unlike the public community colleges found throughout this country, there is no tax base by which to find the operation of these institutions. S. 2623 and its companion bill in the House, would once again reaffirm that Feder-Government's commitment Native American higher education.

Since the early 1970's the tribally controlled community college movement has grown from one community college on the Navajo Reservation to 18 tribally controlled community colleges spread throughout Indian country. Their existence has made higher education accessible to sizable numbers of Indian individuals and has provided those individuals with previously unobtainable opportunities to enhance their employability and in many cases. to pursue higher education 4-year degrees. S. 2623 continues to provide operational funds through fiscal year

Mr. President, S. 2623 contains certain new provisions to the existing Tribally Controlled Community College Act which should significantly enhance the operational capabilities of these schools and facilitate their gaining accreditation. One of the more severe tests these schools have faced in past years is the problem of financial stability. S. 2623 provides for "forward funding" of these schools. This will enable these colleges to be funded on the same basis as all other postsecondary institutions which receive funding under the Higher Education Act.

S. 2623 addresses another cause of past financial inconsistency for these colleges by providing that funds granted to these schools under Public Law 95-471 shall not be reduced by virtue of the fact the tribe with which the college is affiliated has allocated some of its Snyder Act funds to the operation of the college, nor shall Snyder Act funds be reduced because of the Public Law 95-471 grants.

Provision is made for the establishment of an endowment fund, to be funded over a 3-year period beginning in fiscal year 1985. Funds for these endowments are to be provided on a dollar-for-dollar matching basis, thus encouraging the use of tribal funds or of private funding development sources.

Finally, S. 2623 authorizes, commencing in fiscal year 1985, funding for construction of new facilities or renovation of existing facilities for use as college facilities. Funds for con-struction or renovation of facilities have not previously been made available for tribally controlled community college facilities and this separate authorizing provision appears necessary.

Mr. President, many of these col-leges are located in very remote locations. I believe they are serving an extremely important purpose and I urge that my colleagues join me in support for this bill.

Mr. President, the Congressional Budget Office has estimated that the Services General Administration would require approximately \$100,000 over the fiscal year 1983-84 period to conduct a study of facilities available

to the tribally controlled community colleges system and their need for repair and reconstruction. I would note, however, that no provision in the bill authorizes the appropriation of new budget authority to cover these costs. The committee intends that the costs of the mandated study will be absorbed by GSA, S. 2623 is not intended to "drive up" the agency's budget requests.

Mr. STEVENS. Mr. President, I yield to the Senator from Montana.

Mr. MELCHER. Mr. President, I rise in support of S. 2623 and wish to associate myself with the remarks just made by the distinguished chairman of the Select Committee on Indian Affairs, Senator Cohen. He has done a truly excellent job in tailoring this bill to meet the administration's original objections and I wish to congratulate him on that effort.

Mr. President, there are a number of these colleges in my own State of Montana. Mr. President, these community colleges are succeeding in broadening educational opportunity for In-

dians young and old.

Reauthorizing the act is necessary to continue to help these institutions secure a stable funding source. The importance of a stable funding source cannot be overstated. This one item, more than any other, will make or break these institutions before their respective higher education accreditation bodies.

One of the institutions in Montana, Salish-Kootenai located on the Flathead Reservation, has just gone through an accreditation evaluation. They came out with flying colors, but the concern over funding stability was one item of concern raised by the accreditation team. S. 2623 would help alleviate much of this by reauthorizing the program through fiscal year 1987 and by the inclusion of provisions which can help these colleges develop more and more on their own in the future. Mr. President, I urge the passage of this legislation.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

### ORDER INDEFINITELY POSTPON-ING BUDGET WAIVER-SENATE RESOLUTION 426

Mr. STEVENS. Mr. President, I ask unanimous consent that Calendar No. 729, the budget waiver for Senate Resolution 426, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### AMENDMENT OF PEACE CORPS ACT

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate Calendar No. 972, S. 2611.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2611) to amend the Peace Corps

Mr. STEVENS. Mr. President, I ask for immediate consideration of this

There being no objection, the Senate proceeded to consider the bill.

The bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows: S 2611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 6 of the Peace Corps Act is amended by striking out "not to exceed" in the first proviso and by inserting in lieu thereof "not less than"

(b) This amendment shall be effective as of December 29, 1981.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President. I move to lay that motion on the table

The motion to lay on the table was agreed to.

# FEDERAL OIL AND GAS ROYAL-TY MANAGEMENT ACT OF 1982

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5121.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved. That the House agree to the amendment of the Senate to the text of the bill (H.R. 5121) entitled "An Act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes", with the following amendment: In lieu of the matter inserted by said amendment, insert:

## SHORT TITLE AND TABLE OF CONTENTS

Section 1. This Act may be cited as the "Federal Oil and Gas Royalty Management Act of 1982".

## TABLE OF CONTENTS

Sec. 1. Short title and table of contents. Sec. 2. Findings and purposes.

Sec. 3. Definitions.

#### TITLE I-FEDERAL ROYALTY MANAGEMENT AND ENFORCEMENT

Sec. 101. Duties of the Secretary. Sec. 102. Duties of lessees, operators, and motor vehicle transporters.

Sec. 103. Required recordkeeping.

Sec. 104. Prompt disbursement of royalties.

Sec. 105. Explanation of payments.

Sec. 106. Liabilities and bonding.

Sec. 107. Hearings and investigations.

Sec. 108. Inspections. Sec. 109. Civil penalties.

Sec. 110. Criminal penalties.

Sec. 111. Royalty interest, penalties and payments.

Sec. 112. Injunction and specific enforcement authority.

Sec. 113. Rewards.

Sec. 114. Noncompetitive oil and gas lease royalty rates.

## TITLE II-STATES AND INDIAN TRIBES

Sec. 201. Application of title.

Sec. 202. Cooperative agreements.

Sec. 203. Information.

Sec. 204. State suits under Federal law.

Sec. 205. Delegation to States.

Sec. 206. Shared civil penalties.

#### TITLE III-GENERAL PROVISIONS

Sec. 301. Secretarial authority.

Sec. 302. Reports.

Sec. 303. Study of other minerals.

Sec. 304. Relation to other laws.

Sec. 305. Effective date.

Sec. 306. Funding.

Sec. 307. Statute of limitations.

Sec. 308. Expanded royalty obligations.

Sec. 309. Severability.

#### TITLE IV-REINSTATEMENT OF LEASES AND CONVERSION OF UNPATENTED OIL PLACER CLAIMS

Sec. 401. Amendment of Mineral Lands Leasing Act of 1920.

#### FINDINGS AND PURPOSES

SEC. 2. (a) Congress finds that—

(1) the Secretary of the Interior should enforce effectively and uniformly existing regulations under the mineral leasing laws providing for the inspection of production activities on lease sites on Federal and Indian lands:

(2) the system of accounting with respect to royalties and other payments due and owing on oil and gas produced from such lease sites is archaic and inadequate;

(3) it is essential that the Secretary initiate procedures to improve methods of accounting for such royalties and payments and to provide for routine inspection of activities related to the production of oil and gas on such lease sites; and

(4) the Secretary should aggressively carry out his trust responsibility in the administration of Indian oil and gas.

(b) It is the purpose of this Act-

(1) to clarify, reaffirm, expand, and define the responsibilities and obligations of lessees, operators, and other persons involved in transportation or sale of oil and gas from the Federal and Indian lands and the Outer Continental Shelf;

(2) to clarify, reaffirm, expand and define the authorities and responsibilities of the Secretary of the Interior to implement and maintain a royalty management system for oil and gas leases on Federal lands, Indian lands, and the Outer Continental Shelf:

(3) to require the development of enforcement practices that ensure the prompt and proper collection and disbursement of oil and gas revenues owed to the United States and Indian lessors and those inuring to the benefit of States;

(4) to fulfill the trust responsibility of the United States for the administration of

Indian oil and gas resources; and

(5) to effectively utilize the capabilities of the States and Indian tribes in developing Federal royalty management system.

#### DEFINITIONS

SEC. 3. For the purposes of this Act, the

term—
(1) "Federal land" means all land and interests in land owned by the United States which are subject to the mineral leasing laws, including mineral resources or mineral estates reserved to the United States in the conveyance of a surface or nonmineral

estate;
(2) "Indian allottee" means any Indian for whom land or an interest in land is held in trust by the United States or who holds title subject to Federal restriction against

alienation:

(3) "Indian lands" means any lands or interest in lands of an Indian tribe or an Indian allottee held in trust by the United States or which is subject to Federal restriction against alienation, including mineral resources and mineral estates reserved to an Indian tribe or an Indian allottee in the conveyance of a surface or nonmineral estate, except that such term does not include any lands subject to the provisions of section 3 of the Act of June 28, 1906 (34 Stat. 539):

(4) "Indian tribe" means any Indian tribe, band, nation, pueblo, community, rancheria, colony, or other group of Indians, including the Metlakatla Indian Community of Annette Island Reserve, for which any land or interest in land is held by the United States in trust or which is subject to Federal restriction against alienation;
(5) 'lease' means any contract, profit-

share arrangement, joint venture, or other agreement issued or approved by the United States under a mineral leasing law that authorizes exploration for, extraction of, or re-

moval of oil or gas;
(6) 'lease site' means any lands or submerged lands, including the surface of a severed mineral estate, on which exploration for, or extraction or removal of, oil or gas is

authorized pursuant to a lease;

(7) 'lessee' means any person to whom the United States, an Indian tribe, or an Indian allottee, issues a lease, or any person who has been assigned an obligation to make royalty or other payments required by the

lease;
(8) "mineral leasing law" means any Federal law administered by the Secretary authorizing the disposition under lease of oil

(9) "oil or gas" means any oil or gas originating from, or allocated to, the Outer Con-

tinental Shelf, Federal, or Indian lands; (10) "Outer Continental Shelf" has the same meaning as provided in the Outer Continental Shelf Lands Act (Public Law

(11) "operator" means any person, including a lessee, who has control of, or who manages operations on, an oil and gas lease site on Federal or Indian lands or on the Outer Continental Shelf;
(12) "person" means any individual, firm,

corporation, association, partnership, con-

sortium, or joint venture;

(13) "production" means those activities which take place for the removal of oil or gas, including such removal, field operations, transfer of oil or gas off the lease site, operation monitoring, maintenance, and workover drilling;

(14) "royalty" means any payment based on the value or volume of production which is due to the United States or an Indian tribe or an Indian allottee on production of oil or gas from the Outer Continental Shelf,

and maintaining an efficient and effective Federal, or Indian lands, or any minimum royalty owed to the United States or an Indian tribe or an Indian allottee under any

provision of a lease;
(15) "Secretary" means the Secretary of

the Interior or his designee; and
(16) "State" means the several States of the Union, the District of Columbia, Puerto Rico, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands.

#### TITLE I-FEDERAL ROYALTY MANAGEMENT AND ENFORCEMENT

DUTIES OF THE SECRETARY

SEC. 101. (a) The Secretary shall establish a comprehensive inspection, collection and fiscal and production accounting and auditing system to provide the capability to accurately determine oil and gas royalties, interest, fines, penalties, fees, deposits, and other payments owed, and to collect and account for such amounts in a timely manner.

(b) The Secretary shall-

(1) establish procedures to ensure that authorized and properly identified representatives of the Secretary will inspect at least once annually each lease site producing or expected to produce significant quantities of oil or gas in any year or which has a history of noncompliance with applicable provisions of law or regulations; and

(2) establish and maintain adequate programs providing for the training of all such authorized representatives in methods and techniques of inspection and accounting that will be used in the implementation of

(c)(1) The Secretary shall audit and reconcile, to the extent practicable, all current and past lease accounts for leases of oil or gas and take appropriate actions to make additional collections or refunds as warranted. The Secretary shall conduct audits and reconciliations of lease accounts in conformity with the business practices and recordkeeping systems which were required of the lessee by the Secretary for the period covered by the audit. The Secretary shall give priority to auditing those lease accounts identified by a State or Indian tribe as having significant potential for underpay-ment. The Secretary may also audit ac-counts and records of selected lessees and operators.

(2) The Secretary may enter into contracts or other appropriate arrangements with independent certified public accountants to undertake audits of accounts and records of any lessee or operator relating to the lease of oil or gas. Selection of such independent certified public accountants shall be by competitive bidding in accordance with the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252), except that the Secretary may not enter into a contract or other arrangement with any independent certified public accountant to audit any lessee or operator where such lessee or operator is a primary audit client of such certified public accountant.

(3) All books, accounts, financial records, reports, files, and other papers of the Secretary, or used by the Secretary, which are reasonably necessary to facilitate the audits reauired under this section shall be made available to any person or governmental entity conducting audits under this Act.

#### DUTIES OF LESSEES, OPERATORS, AND MOTOR VEHICLE TRANSPORTERS

SEC. 102. (a) A lessee-

(1) who is required to make any royalty or other payment under a lease or under the mineral leasing laws, shall make such pay-

ments in the time and manner as may be specified by the Secretary; and

(2) shall notify the Secretary, in the time and manner as may be specified by the Secretary, of any assignment the lessee may have made of the obligation to make any royalty or other payment under a lease or under the mineral leasing laws.

(b) An operator shall-

(1) develop and comply with a site security plan designed to protect the oil or gas produced or stored on an onshore lease site from theft, which plan shall conform with such minimum standards as the Secretary may prescribe by rule, taking into account the variety of circumstances at lease sites;

(2) develop and comply with such minimum site security measures as the Secretary deems appropriate to protect oil or gas produced or stored on a lease site or on the Outer Continental Shelf from theft; and

(3) not later than the 5th business day after any well begins production anywhere on a lease site or allocated to a lease site, or resumes production in the case of a well which has been off of production for more than 90 days, notify the Secretary, in the manner prescribed by the Secretary, of the date on which such production has begun or resumed.

(c)(1) Any person engaged in transporting by motor vehicle any oil from any lease site, or allocated to any such lease site, shall carry, on his person, in his vehicle, or in his immediate control, documentation showing, at a minimum, the amount, origin, and in-

tended first destination of the oil.

(2) Any person engaged in transporting any oil or gas by pipeline from any lease site, or allocated to any lease site, on Federal or Indian lands shall maintain documentation showing, at a minimum, amount, origin, and intended first destination of such oil or gas.

## REQUIRED RECORDKEEPING

SEC. 103. (a) A lessee, operator, or other person directly involved in developing, producing, transporting, purchasing, or selling oil or gas subject to this Act through the point of first sale or the point of royalty computation, whichever is later, shall establish and maintain any records, make any reports, and provide any information that the Secretary may, by rule, reasonably require for the purposes of implementing this Act or determining compliance with rules or orders under this Act. Upon the request of any officer or employee duly designated by the Secretary or any State or Indian tribe conducting an audit or investigation pursuant to this Act, the appropriate records, reports, or information which may be required by this section shall be made available for inspection and duplication by such officer or employee, State, or Indian tribe.

(b) Records required by the Secretary with respect to oil and gas leases from Federal or Indian lands or the Outer Continental Shelf shall be maintained for 6 years after the records are generated unless the Secretary notifies the record holder that he has initiated an audit or investigation involving such records and that such records must be maintained for a longer period. In any case when an audit or investigation is underway, records shall be maintained until the Secretary releases the record holder of the obligation

to maintain such records.

### PROMPT DISBURSEMENT OF ROYALTIES

SEC. 104. (a) Section 35 of the Mineral Lands Leasing Act of 1920 (approved February 25, 1920; 41 Stat. 437; 30 U.S.C. 191) is amended by deleting "as soon as practicable after March 31 and September 30 of each year" and by adding at the end thereof "Payments to States under this section with respect to any moneys received by the United States, shall be made not later than the last business day of the month in which such moneys are warranted by the United States Treasury to the Secretary as having been received, except for any portion of such moneys which is under challenge and placed in a suspense account pending resolution of a dispute. Such warrants shall be issued by the United States Treasury not later than 10 days after receipt of such moneys by the Treasury. Moneys placed in a suspense account which are determined to be payable to a State shall be made not later than the last business day of the month in which such dispute is resolved. Any such amount placed in a suspense account pending resolution shall bear interest until the dispute is resolved."

(b) Deposits of any royalty funds derived from the production of oil or gas from, or allocated to, Indian lands shall be made by the Secretary to the appropriate Indian account at the earliest practicable date after such funds are received by the Secretary but in no case later than the last business day of the month in which such funds are received.

(c) The provisions of this section shall apply with respect to payments received by the Secretary after October 1, 1983, unless the Secretary, by rule, prescribes an earlier effective date.

#### EXPLANATION OF PAYMENTS

SEC. 105. (a) When any payment (including amounts due from receipt of any royalty, bonus, interest charge, fine, or rental) is made by the United States to a State with respect to any oil or gas lease on Federal lands or is deposited in the appropriate Indian account on behalf of an Indian tribe or Indian allottee with respect to any oil and gas lease on Indian lands, there shall be provided, together with such payment, a description of the type of payment being made, the period covered by such payment, the source of such payment, production amounts, the royalty rate, unit value and such other information as may be agreed upon by the Secretary and the recipient State, Indian tribe, or Indian allottee

(b) This section shall take effect with respect to payments made after October 1, 1983, unless the Secretary, by rule, prescribes an earlier effective date.

### LIABILITIES AND BONDING

SEC. 106. A person (including any agent or employee of the United States and any independent contractor) authorized to collect, receive, account for, or otherwise handle any moneys payable to, or received by, the Department of the Interior which are derived from the sale, lease, or other disposal

of any oil or gas shall be—
(1) liable to the United States for any losses caused by any intentional or reckless action or inaction of such individual with respect to such moneys; and

(2) in the case of an independent contractor, required as the Secretary deems necessary to maintain a bond commensurate with the amount of money for which such individual could be liable to the United States.

## HEARINGS AND INVESTIGATIONS

SEC. 107. (a) In carrying out his duties under this Act the Secretary may conduct any investigation or other inquiry necessary and appropriate and may conduct, after notice, any hearing or audit, necessary and appropriate to carrying out his duties under this Act. In connection with any such hearings, inquiry, investigation, or audit, the Secretary is also authorized where reasonably necessary

(1) to require by special or general order, any person to submit in writing such affidavits and answers to questions as the Secretary may reasonably prescribe, which submission shall be made within such reasonable period and under oath or otherwise, as may be necessary;

(2) to administer oaths;

(3) to require by subpena the attendance and testimony of witnesses and the production of all books, papers, production and financial records, documents, matter, and materials, as the Secretary may request;

(4) to order testimony to be taken by deposition before any person who is designated by the Secretary and who has the power to administer oaths, and to compel testimony and the production of evidence in the same manner as authorized under paragraph (3) of this subsection; and

(5) to pay witnesses the same fees and mileage as are paid in like circumstances in

the courts of the United States.

(b) In case of refusal to obey a subpena served upon any person under this section, the district court of the United States for any district in which such person is found, resides, or transacts business, upon applica-tion by the Attorney General at the request of the Secretary and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary. Any failure to obey such order of the court may be punished by such court as contempt thereof and subject to a penalty of up to \$10,000 a day.

#### INSPECTIONS

SEC. 108. (a)(1) On any lease site on Federal or Indian lands, any authorized and properly identified representative of the Secretary may stop and inspect any motor vehicle that he has probable cause to believe is carrying oil from a lease site on Federal or Indian lands or allocated to such a lease site, for the purpose of determining whether the driver of such vehicle has documentation related to such oil as required by law.

(2) Any authorized and properly identified representative of the Secretary, accompanied by any appropriate law enforcement officer, or an appropriate law enforcement officer alone, may stop and inspect any motor vehicle which is not on a lease site if he has probable cause to believe the vehicle is carrying oil from a lease site on Federal or Indian lands or allocated to such a lease site. Such inspection shall be for the purpose of determining whether the driver of such vehicle has the documentation required by

(b) Authorized and properly identified representatives of the Secreatary may without advance notice, enter upon, travel across and inspect lease sites on Federal or Indian lands and may obtain from the operator immediate access to secured facilities on such lease sites, for the purpose of making any inspection or investigation for determining whether there is compliance with the requirements of the mineral leasing laws and this Act. The Secretary shall develop guidelines setting forth the coverage and the frequency of such inspections.

(c) For the purpose of making any inspection or investigation under this Act, the Secretary shall have the same right to enter upon or travel across any lease site as the lessee or operator has acquired by purchase,

condemnation, or otherwise.

CIVIL PENALTIES

SEC. 109. (a) Any person who-(1) after due notice of violation or after such violation has been reported under subparagraph (A), fails or refuses to comply

with any requirements of this Act or any mineral leasing law, any rule or regulation thereunder, or the terms of any lease or permit issued thereunder; or

(2) fails to permit inspection authorized in section 108 or fails to notify the Secretary of any assignment under section 102(a)(2) shall be liable for a penalty of up to \$500 per violation for each day such violation continues, dating from the date of such notice

or report. A penalty under this subsection may not be applied to any person who is otherwise liable for a violation of paragraph

ported to the Secretary or his authorized representative by the liable person and corrected within 20 days after such report or such longer time as the Secretary may agree

(A) the violation was discovered and re-

to: or

(B) after the due notice of violation required in paragraph (1) has been given to such person by the Secretary or his authorized representative, such person has corrected the violation within 20 days of such notification or such longer time as the Secretary may agree to.

(b) If corrective action is not taken within 40 days or a longer period as the Secretary may agree to, after due notice or the report referred to in subsection (a)(1), such person shall be liable for a civil penalty of not more than \$5,000 per violation for each day such violation continues, dating from the date of

such notice or report.

(c) Any person who-(1) knowingly or willfully fails to make any royalty payment by the date as specified by statute, regulation, order or terms of the

(2) fails or refuses to permit lawful entry, inspection, or audit; or

(3) knowingly or willfully fails or refuses to comply with subsection 102(b)(3),

shall be liable for a penalty of up to \$10,000 per violation for each day such violation continues.

(d) Any person who-

(1) knowingly or willfully prepares, maintains, or submits false, inaccurate, or misleading reports, notices, affidavits, records, data, or other written information;

(2) knowingly or willfully takes or removes, transports, uses or diverts any oil or gas from any lease site without having valid

legal authority to do so; or

(3) purchases, accepts, sells, transports, or conveys to another, any oil or gas knowing or having reason to know that such oil or gas was stolen or unlawfully removed or diverted.

shall be liable for a penalty of up to \$25,000 per violation for each day such violation continues.

(e) No penalty under this section shall be assessed until the person charged with a violation has been given the opportunity for a hearing on the record.

(f) The amount of any penalty under this section, as finally determined may be deducted from any sums owing by the United States to the person charged.

(g) On a case-by-case basis the Secretary may compromise or reduce civil penalties under this section.

(h) Notice under this subsection (a) shall be by personal service by an authorized representative of the Secretary or by registered mail. Any person may, in the manner prescribed by the Secretary, designate a representative to receive any notice under this subsection.

(i) In determining the amount of such penalty, or whether it should be remitted or reduced, and in what amount, the Secretary shall state on the record the reasons for his determinations.

(j) Any person who has requested a hearing in accordance with subsection (e) within the time the Secretary has prescribed for such a hearing and who is aggrieved by a final order of the Secretary under this section may seek review of such order in the United States district court for the judicial district in which the violation allegedly took place. Review by the district court shall be only on the administrative record and not de novo. Such an action shall be barred unless filed within 90 days after the Secretary's final order.

(k) If any person fails to pay an assessment of a civil penalty under this Act—

(1) after the order making the assessment has become a final order and if such person does not file a petition for judicial review of the order in accordance with subsection (j), or

(2) after a court in an action brought under subsection (j) has entered a final judgment in favor of the Secretary,

the court shall have jurisdiction to award the amount assessed plus interest from the date of the expiration of the 90-day period referred to in subsection (j). Judgment by the court shall include an order to pay.

(1) No person shall be liable for a civil penalty under subsection (a) or (b) for failure to pay any rental for any lease automatically terminated pursuant to section 31 of the Mineral Leasing Act of 1920.

### CRIMINAL PENALTIES

SEC. 110. Any person who commits an act for which a civil penalty is provided in section 109(d) shall, upon conviction, be punished by a fine of not more than \$50,000, or by imprisonment for not more than 2 years, or both.

### ROYALTY INTEREST, PENALTIES AND PAYMENTS

SEC. 111. (a) In the case of oil and gas leases where royalty payments are not received by the Secretary on the date that such payments are due, or are less than the amount due, the Secretary shall charge interest on such late payments or underpayments at the rate applicable under section 6621 of the Internal Revenue Code of 1954. In the case of an underpayment or partial payment, interest shall be computed and charged only on the amount of the deficiency and not on the total amount due.

(b) Any payment made by the Secretary to a State under section 35 of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 191) and any other payment made by the Secretary to a State from any oil or gas royalty received by the Secretary which is not paid on the date required under section 35 shall include an interest charge computed at the rate applicable under section 6621 of the Internal Revenue Code of 1954.

(c) All interest charges collected under this Act or under other applicable laws because of nonpayment, late payment or underpayment of royalties due and owing an Indian tribe or an Indian allottee shall be deposited to the same account as the royalty with respect to which such interest is paid.

(d) Any deposit of royalty funds made by the Secretary to an Indian account which is not made by the date required under subsection 104(b) shall include an interest charge computed at the rate applicable under section 6621 of the Internal Revenue Code of 1954.

(e) Notwithstanding any other provision of law, no State will be assessed for any interest or penalties found to be due against the Secretary for failure to comply with the Emergency Petroleum Allocation Act of 1973 or regulation of the Secretary of Energy thereunder concerning crude oil certification or pricing with respect to crude oil taken by the Secretary in kind as royalty. Any State share of an overcharge, resulting from such failure to comply, shall be assessed against moneys found to be due and owing to such State as a result of audits of royalty accounts for transactions which took place prior to the date of the enactment of this Act except that if after the completion of such audits, sufficient moneys have not been found due and owing to any State. the State shall be assessed the balance of that State's share of the overcharge.

(f) Interest shall be charged under this section only for the number of days a payment

is late.

(g) The first sentence of section 35 of the Act of February 25, 1920 is amended by inserting "including interest charges collected under the Federal Oil and Gas Royalty Management Act of 1982" between "royalties" and "and".

# INJUNCTION AND SPECIFIC ENFORCEMENT

SEC. 112. (a) In addition to any other remedy under this Act or any mineral leasing law, the Attorney General of the United States or his designee may bring a civil action in a district court of the United States, which shall have jurisdiction over such actions—

(1) to restrain any violation of this Act; or (2) to compel the taking of any action required by or under this Act or any mineral

leasing law of the United States.

(b) A civil action described in subsection (a) may be brought only in the United States district court for the judicial district wherein the act, omission, or transaction constituting a violation under this Act or any other mineral leasing law occurred, or wherein the defendant is found or transacts business.

### REWARDS

SEC. 113. Where amounts representing royalty or other payments owed to the United States with respect to any oil and gas lease on Federal lands or the Outer Continental Shelf are recovered pursuant to any action taken by the Secretary under this Act as a result of information provided to the Secretary by any person, the Secretary is authorized to pay to such person an amount equal to not more than 10 percent of such recovered amounts. The preceding sentence shall not apply to information provided by an officer or employee of the United States, an officer or employee of a State or Indian tribe acting pursuant to a cooperative agreement or delegation under this Act, or any person acting pursuant to a contract authorized by

# NONCOMPETITIVE OIL AND GAS LEASE ROYALTY RATES

SEC. 114. (a) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended by inserting the words "not less than" after the words "payment by the lessee of a royalty of" and by inserting the words "nor more than 16% per centum" after the word "per centum".

(b) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended

by changing the period to a colon and adding the following: "Provided, That the royalty rate shall be not more than 12½ per centum unless the Secretary finds that an increase in the royalty rate will not adversely affect the exploration, development or production of oil or gas or the overall revenue to the Federal Government generated by such activity."

(c) The amendments made by subsections (a) and (b) shall take effect on the date six months after completion and submission to Congress by the Secretary of a thorough study of the effects of a change in the royalty rate under section 17(c) of the Mineral Leasing Act of 1920 (1) on the exploration, development, or production of oil or gas and (2) on the overall revenues generated by such change. Such study shall be completed and submitted to Congress on the date one year after the date of enactment of this Act.

### TITLE II—STATES AND INDIAN TRIBES

#### APPLICATION OF TITLE

SEC. 201. This title shall apply only with respect to oil and gas leases on Federal lands or Indian lands. Nothing in this title shall be construed to apply to any lease on the Outer Continental Shelf.

#### COOPERATIVE AGREEMENTS

SEC. 202. (a) The Secretary is authorized to enter into a cooperative agreement or agreements with any State or Indian tribe to share oil or gas royalty management information, to carry out inspection, auditing, investigation or enforcement (not including the collection of royalties, civil or criminal penalties or other payments) activities under this Act in cooperation with the Secretary, and to carry out any other activity described in section 108 of this Act. The Secretary shall not enter into any such cooperative agreement with a State with respect to any such activities on Indian lands, except with the permission of the Indian tribe involved.

(b) Except as provided in section 203, and pursuant to a cooperative agreement—

(1) each State shall, upon request, have access to all royalty accounting information in the possession of the Secretary respecting the production, removal, or sale of oil or gas from leases on Federal lands within the State; and

(2) each Indian tribe shall, upon request, have access to all royalty accounting information in the possession of the Secretary respecting the production, removal, or sale of oil or gas from leases on Indian lands under the jurisdiction of such tribe.

Information shall be made available under paragraphs (1) and (2) as soon as practicable after it comes into the possession of the Secretary. Effective October 1, 1983, such information shall be made available under paragraphs (1) and (2) not later than 30 days after such information comes into the possession of the Secretary.

(c) Any cooperative agreement entered into pursuant to this section shall be in accordance with the provisions of the Federal Grant and Cooperative Agreement Act of 1977, and shall contain such terms and conditions as the Secretary deems appropriate and consistent with the purposes of this Act, including, but not limited to, a limitation on the use of Federal assistance to those costs which are directly required to carry out the agreed upon activities.

### INFORMATION

SEC. 203. (a) Trade secrets, proprietary and other confidential information shall be made available by the Secretary, pursuant

to a cooperative agreement, to a State or Indian tribe upon request only if-

(1) such State or Indian tribe consents in writing to restrict the dissemination of the information to those who are directly involved in an audit or investigation under this Act and who have a need to know;

(2) such State or tribe accepts liability for

wrongful disclosure;
(3) in the case of a State, such State demonstrates that such information is essential to the conduct of an audit or investigation or to litigation under section 204; and

(4) in the case of an Indian tribe, such tribe demonstrates that such information is essential to the conduct of an audit or investigation and waives sovereign immunity by express consent for wrongful disclosure by such tribe.

(b) The United States shall not be liable for the wrongful disclosure by any individual, State, or Indian tribe of any information provided to such individual, State, or Indian tribe pursuant to any cooperative agreement or a delegation, authorized by

this Act.

(c) Whenever any individual, State, or Indian tribe has obtained possession of information pursuant to a cooperative agreement authorized by this section, or any individual or State has obtained possession of information pursuant to a delegation under section 205, the individual shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to an officer or employee of the United States or of any department or agency thereof and the State or Indian tribe shall be subject to the same provisions of law with respect to the disclosure of such information as would apply to the United States or any department or agency thereof. No State or State officer or employee who receives trade secrets, proprietary information, or other confidential information under this Act may be required to disclose such information under State law.

### STATE SUITS UNDER FEDERAL LAW

SEC. 204. (a)(1) A State may commence a civil action under this section against any person to recover any royalty, interest, or civil penalty which the State believes is due, based upon credible evidence, with respect to any oil and gas lease on Federal lands located within the State.

(2)(A) No action may be commenced under paragraph (1) prior to 90 days after the State has given notice in writing to the Secretary of the payment required. Such 90-day limitation may be waived by the Secretary

on a case-by-case basis.

(B) If, within the 90-day period specified in subparagraph (A), the Secretary issues a demand for the payment concerned, no action may be commenced under paragraph (1) with respect to such payment during a 45-day period after issuance of such demand. If, during such 45-day period, the Secretary receives payment in full, no action may be commenced under paragraph (1).

(C) If the Secretary refers the case to the Attorney General of the United States within the 45-day period referred to in subparagraph (B) or within 10 business days after the expiration of such 45-day period, no action may be commenced under paragraph (1) if the Attorney General, within 45 days after the date of such referral, com-mences, and thereafter diligently prosecutes, a civil action in a court of the United States with respect to the payment concerned.

(3) The State shall notify the Secretary

and the Attorney General of the United

States of any suit filed by the State under this section.

(4) A court in issuing any final order in any action brought under paragraph (1) may award costs of litigation including reasonable attorney and expert witness fees, to any party in such action if the court determines such an award is appropriate.

(b) An action brought under subsection (a) of this section may be brought only in a United States district court for the judicial district in which the lease site or the leasing activity complained of is located. Such district court shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to require compliance or order payment in any such action.

(c)(1) Notwithstanding any other provision of law, any civil penalty recovered by a State under subsection (a) shall be retained by the State and may be expended in such manner and for such purposes as the State

deems appropriate.

(2) Any rent, royalty, or interest recovered by a State under subsection (a) shall be deposited in the Treasury of the United States in the same manner, and subject to the same requirements, as are applicable in the case of any rent, royalty, or interest collected by an officer or employee of the United States. except that such amounts shall be deposited in the Treasury not later than 10 days after receipt by the State.

#### DELEGATION TO STATES

SEC. 205. (a) Upon written request of any State, the Secretary is authorized to delegate, in accordance with the provisions of this section, all or part of the authorities and responsibilities of the Secretary under this Act to conduct inspections, audits, and investigations to any State with respect to all Federal lands or Indian lands within the State; except that the Secretary may not undertake such a delegation with respect to any Indian lands, except with the permission of the Indian tribe allottee involved.

(b) After notice and opportunity for a hearing, the Secretary is authorized to delegate such authorities and responsibilities granted under this section as the State has requested, if the Secretary finds that

(1) it is likely that the State will provide adequate resources to achieve the purposes

of this Act;

(2) the State has demonstrated that it will effectively and faithfully administer the rules and regulations of the Secretary under this Act in accordance with the require-ments of subsections (c) and (d) of this section; and

(3) such delegation will not create an unreasonable burden on any lessee,

with respect to the Federal lands and Indian lands within the State.

(c) The Secretary shall promulgate regulations which define those functions, if any, which must be carried out jointly in order to avoid duplication of effort, and any delegation to any State must be made in accordance with those requirements.

(d) The Secretary shall by rule promulgate standards and regulations, pertaining to the authorities and responsibilities under subsection (a), including standards and regula-

tions pertaining to: (1) audits performed;

(2) records and accounts to be main-

(3) reporting procedures to be required by States under this section.

Such standards and regulations shall be designed to provide reasonable assurance that a uniform and effective royalty management system will prevail among the States. The records and accounts under paragraph (2) shall be sufficient to allow the Secretary to monitor the performance of any State under this section.

(e) If, after notice and opportunity for a hearing, the Secretary finds that any State to which any authority or responsibility of the Secretary has been delegated under this section is in violation of any requirement of this section or any rule thereunder, or that an affirmative finding by the Secretary under subsection (b) can no longer be made. the Secretary may revoke such delegation.

(f) The Secretary shall compensate any State for those costs which may be necessary to carry out the delegated activities under this section. Payment shall be made no less than every quarter during the fiscal year.

### SHARED CIVIL PENALTIES

SEC. 206. An amount equal to 50 per centum of any civil penalty collected by the Federal Government under this Act resulting from activities conducted by a State or Indian tribe pursuant to a cooperative agreement under section 202 or a State under a delegation under section 205, shall be payable to such State or tribe. Such amount shall be deducted from any compensation due such State or Indian tribe under section 202 or such State under section 205.

### TITLE III-GENERAL PROVISIONS

#### SECRETARIAL AUTHORITY

SEC. 301. (a) The Secretary shall prescribe such rules and regulations as he deems reasonably necessary to carry out this Act.

(b) Rules and regulations issued to implement this Act shall be issued in conformity with section 553 of title 5 of the United Code, notwithstanding section

553(a)(2) of that title.

(c) In addition to entering into cooperative agreements or delegation of authority authorized under this Act, the Secretary may contract with such non-Federal Government inspectors, auditors, and other persons as he deems necessary to aid in carrying out his functions under this Act and its implementation. With respect to his auditing and enforcement functions under this Act, the Secretary shall coordinate such functions so as to avoid to the maximum extent practicable, subjecting lessees, operators, or other persons to audits or investigations of the same subject matter by more than one auditing or investigating entity at the same time.

SEC. 302. (a) The Secretary shall submit to the Congress an annual report on the implementation of this Act. The information to be included in the report and the format of the report shall be developed by the Secretary after consulting with the Committees on Interior and Insular Affairs of the House of Representatives and on Energy and Natural Resources of the Senate. The Secretary shall also report on the progress of the Department in reconciling account balances.

(b) Commencing with fiscal year 1984, the Inspector General of the Department of the Interior shall conduct a biennial audit of the Federal royalty management system. The Inspector General shall submit the results of such audit to the Secretary and to the Congress.

### STUDY OF OTHER MINERALS

SEC. 303. (a) The Secretary shall study the question of the adequacy of royalty management for coal, uranium and other energy and nonenergy minerals on Federal and Indian lands. The study shall include proposed legislation if the Secretary determines that such legislation is necessary to ensure prompt and proper collection of revenues owed to the United States, the States and Indian tribes or Indian allottees from the sale, lease or other disposal of such minerals.

(b) The study required by subsection (a) of this section shall be submitted to Congress not later than one year from the date of the enactment of this Act.

#### RELATION TO OTHER LAWS

SEC. 304. (a) The penalties and authorities provided in this Act are supplemental to, and not in derogation of, any penalties or authorities contained in any other provision of law.

(b) Nothing in this Act shall be construed to reduce the responsibilities of the Secretary to ensure prompt and proper collection of revenues from coal, uranium and other energy and nonenergy minerals on Federal and Indian lands, or to restrain the Secretary from entering into cooperative agreements or other appropriate arrangements with States and Indian tribes to share royalty management responsibilities and activities for such minerals under existing authorities.

(c) Except as expressly provided in subsection 302(b), nothing in this Act shall be construed to enlarge, diminish, or otherwise affect the authority or responsibility of the Inspector General of the Department of the Interior or of the Comptroller General of the United States.

(d) No provision of this Act impairs or affects lands and interests in land entrusted to the Tennessee Valley Authority.

#### EFFECTIVE DATE

SEC. 305. The provisions of this Act shall apply to oil and gas leases issued before, on, or after the date of the enactment of this Act, except that in the case of a lease issued before such date, no provision of this Act or any rule or regulation prescribed under this Act shall alter the express and specific provisions of such a lease.

### FUNDING

SEC. 306. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, including such sums as may be necessary for the cooperative agreements, contracts, and delegations authorized by this Act: Provided, That nothing in this Act shall be construed to affect or impair any authority to enter into contracts or make payments under any other provision of law.

### STATUTE OF LIMITATIONS

SEC. 307. Except in the case of fraud, any action to recover penalties under this Act shall be barred unless the action is commenced within 6 years after the date of the act or omission which is the basis for the action.

### EXPANDED ROYALTY OBLIGATIONS

SEC. 308. Any lessee is liable for royalty payments on oil or gas lost or wasted from a lease site when such loss or waste is due to negligence on the part of the operator of the lease, or due to the failure to comply with any rule or regulation, order or citation issued under this Act or any mineral leasing law.

### SEVERABILITY

SEC. 309. If any provision of this Act or the applicability thereof to any person or circumstances is held invalid, the remainder of this Act and the application of such provi-

sion to other persons or circumstances shall not be affected thereby.

TITLE IV—REINSTATEMENT OF LEASES AND CONVERSION OF UNPATENTED OIL PLACER CLAIMS

AMENDMENT OF MINERAL LANDS LEASING ACT OF 1920

SEC. 401. Section 31 of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188) is amended by redesignating subsection (d) as subsection (j) and by inserting after subsection (c) the following new subsections:

'(d)(1) Where any oil and gas lease issued pursuant to section 17(b) or section 17(c) of this Act or the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 et seq.) has been, or is hereafter, terminated automatically by operation of law under this section for failure to pay on or before the anniversary date the full amount of the rental due, and such rental is not paid or tendered within twenty days thereafter, and it is shown to the satisfaction of the Secretary of the Interior that such failure was justifiable or not due to lack of reasonable diligence on the part of the lessee, or, no matter when the rental is paid after termination, it is shown to the satisfaction of the Secretary that such failure was inadvertent, the Secretary may reinstate the lease as of the date of termination for the unexpired portion of the pri-mary term of the original lease or any extension thereof remaining at the date of termination, and so long thereafter as oil or gas is produced in paying quantities. In any case where a lease is reinstated under this subsection and the Secretary finds that the reinstatement of such lease (A) occurs after the expiration of the primary term or any extension thereof, or (B) will not afford the lessee a reasonable opportunity to continue operations under the lease, the Secretary may, at his discretion, extend the term of such lease for such period as he deems reasonable, but in no event for more than two years from the date the Secretary authorizes the reinstatement and so long thereafter as oil or gas is produced in paying quantities.

"(2) No lease shall be reinstated under paragraph (1) of this subsection unless—

"(A) with respect to any lease that terminated under subsection (b) of this section prior to enactment of the Federal Oil and Gas Royalty Management Act of 1982:

"(i) the lessee tendered rental prior to enactment of such Act and the final determination that the lease terminated was made by the Secretary or a court less than three years before enactment of such Act. and

"(ii) a petition for reinstatement together with the required back rental and royalty accruing from the date of termination, is filed with the Secretary on or before the one hundred and twentieth day after enactment

of such Act, or

"(B) with respect to any lease that terminated under subsection (b) of this section on after enactment of the Federal Oil and Gas Royalty Management Act of 1982, a petition for reinstatement together with the required back rental and royalty accruing from the date of termination is filed on or before the earlier of—

"(i) sixty days after the lessee receives from the Secretary notice of termination, whether by return of check or by any other form of actual notice, or

"(ii) fifteen months after termination of the lease.

"(e) Any reinstatement under subsection (d) of this section shall be made only if these conditions are met:

"(1) no valid lease, whether still in existence or not, shall have been issued affecting any of the lands covered by the terminated lease prior to the filing of such petition: Provided, however, That after receipt of a petition for reinstatement, the Secretary shall not issue any new lease affecting any of the lands covered by such terminated lease for a reasonable period, as determined in accordance with regulations issued by him;

"(2) payment of back rentals and either the inclusion in a reinstated lease issued pursuant to the provisions of section 17(b) of this Act of a requirement for future rentals at a rate of not less than \$10 per acre per year, or the inclusion in a reinstated lease issued pursuant to the provisions of section 17(c) of this Act of a requirement that future rentals shall be at a rate not less than \$5 per acre per year, all as determined by the Secretary;

"(3)(A) payment of back royalties and the inclusion in a reinstated lease issued pursuant to the provisions of section 17(b) of this Act of a requirement for future royalties at a rate of not less than 16% percent computed on a sliding scale based upon the average production per well per day, at a rate which shall be not less than 4 percentage points greater than the competitive royalty schedule then in force and used for royalty determination for competitive leases issued pursuant to such section as determined by the Secretary: Provided, That royalty on such reinstated lease shall be paid on all production removed or sold from such lease subsequent to the termination of the original lease;

"(B) payment of back royalties and inclusion in a reinstated lease issued pursuant to the provisions of section 17(c) of this Act of a requirement for future royalties at a rate not less than 16% percent: Provided, That royalty on such reinstated lease shall be paid on all production removed or sold from such lease subsequent to the cancellation or termination of the original lease; and

"(4) notice of the proposed reinstatement of a terminated lease, including the terms and conditions of reinstatement, shall be published in the Federal Register at least thirty days in advance of the reinstatement. A copy of said notice, together with information concerning rental results, volume of

A copy of said notice, together with information concerning rental, royalty, volume of production, if any, and any other matter which the Secretary deemed significant in making this determination to reinstate, shall be furnished to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate at least thirty days in advance of the reinstatement. The lessee of a reinstated lease shall reimburse the Secretary for the administrative costs of reinstating the lease, but not to exceed \$500. In addition the lessee shall reimburse the Secretary for the cost of publication in the Federal Register of the notice of proposed reinstatement.

"(f) Where an unpatented oil placer mining claim validly located prior to February 24, 1920, which has been or is currently producing or is capable of producing oil or gas, has been or is hereafter deemed conclusively abandoned for failure to file timely the required instruments or copies of instruments required by section 314 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1744), and it is shown to the satisfaction of the Secretary that such failure was inadvertent, justifiable, or not due to lack of reasonable diligence on the part of the owner, the Secretary may issue, for the lands covered by the abandoned unpatented oil placer mining claim, a noncompetitive

oil and gas lease, consistent with the provisions of section 17(e) of this Act, to be effective from the statutory date the claim was deemed conclusively abandoned. Issuance of such a lease shall be conditioned upon:

"(1) a petition for issuance of a noncompetitive oil and gas lease, together with the required rental and royalty, including back rental and royalty accruing from the statutory date of abandonment of the oil placer mining claim, being filed with the Secretary—

"(A) with respect to any claim deemed conclusively abandoned on or before the date of enactment of the Federal Oil and Gas Royalty Management Act of 1982, on or before the one hundred and twentieth day

after such date of enactment, or

"(B) with respect to any claim deemed conclusively abandoned after such date of enactment, on or before the one hundred and twentieth day after final notification by the Secretary or a court of competent jurisdiction of the determination of the abandonment of the oil placer mining claim;

"(2) a valid lease not having been issued affecting any of the lands covered by the abandoned oil placer mining claim prior to the filing of such petition: Provided, however, That after the filing of a petition for issuance of a lease under this subsection, the Secretary shall not issue any new lease affecting any of the lands covered by such abandoned oil placer mining claim for a reasonable period, as determined in accordance with regulations issued by him;

"(3) a requirement in the lease for payment of rental, including back rentals accruing from the statutory date of abandonment of the oil placer mining claim, of

not less than \$5 per acre per year;

"(4) a requirement in the lease for payment of royalty on production removed or sold from the oil placer mining claim, including all royalty on production made subsequent to the statutory date the claim was deemed conclusively abandoned, of not less than 12½ percent; and

"(5) compliance with the notice and reimbursement of costs provisions of paragraph (4) of subsection (e) but addressed to the petition covering the conversion of an abandoned unpatented oil placer mining claim to a noncompetitive oil and gas lease.

"(g)(1) Except as otherwise provided in this section, a reinstated lease shall be treated as a competitive or a noncompetitive oil and gas lease in the same manner as the original lease issued pursuant to section

17(b) or 17(c) of this Act.
"(2) Except as otherwise provided in this section, the issuance of a lease in lieu of an abandoned patented oil placer mining claim shall be treated as a noncompetitive oil and gas lease issued pursuant to section 17(c) of

this Act.

"(h) The minimum royalty provisions of section 17(d) and the provisions of section 39 of this Act shall be applicable to leases issued pursuant to subsections (d) and (f) of this section.

"(i)(1) In acting on a petition to issue a noncompetitive oil and gas lease, under subsection (f) of this section or in response to a request filed after issuance of such a lease, or both, the Secretary is authorized to reduce the royalty on such lease if in his judgment it is equitable to do so or the circumstances warrant such relief due to uneconomic or other circumstances which could cause undue hardship or premature termination of production.

"(2) In acting on a petition for reinstatement pursuant to subsection (d) of this

section or in response to a request filed after reinstatement, or both, the Secretary is authorized to reduce the royalty in that reinstated lease on the entire leasehold or any tract or portion thereof segregated for royalty purposes if, in his judgment, there are uneconomic or other circumstances which could cause undue hardship or premature termination of production; or because of any written action of the United States, its agents or employees, which preceded, and was a major consideration in, the lessee's expenditure of funds to develop the property under the lease after the rent had become due and had not been paid; or if in the judgment of the Secretary it is equitable to do so for any reason.".

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendment to the Senate amendments with a further amendment which I send to the desk on behalf of the chairman of the Energy Committee, Senator McClure.

UP AMENDMENT NO. 1480

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. McClure, proposes an unprinted amendment numbered 1480.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment follows:

Strike section 114 in its entirety and insert in lieu thereof the following:

"Sec. 114. The Secretary is directed to conduct a thorough study of the effects of a change in the royalty rate under section 17(c) of the Mineral Leasing Act of 1920 on:

(a) the exploration development, or production of oil or gas; and (b) the overall revenues generated by such change. Such study shall be completed and submitted to Congress within one year after the date of enactment of this Act."

• Mr. MELCHER. Mr. President, I support the amendment proposed by Senator McClure to the version of H.R. 5121 that the House sent back to us on Monday. The basic bill we have worked out with the House to establish a modern Federal royalty management program with real teeth and adequate inspections is not at issue with the House. The McClure amendment would send that basic bill back to the House intact.

The royalty management part of the bill is the result of careful consideration and substantial amendment of the original administration proposal. The process has produced a complex bill, and one that addresses an important problem. I am sure it is not the best bill we could write, but it is the best bill we can get in this Congress. It would be a shame if we had to start over next year, and the Department continued to operate the Nation's program for the collection of revenues from the sale of the public's own oil and natural gas in the slipshod

manner that has prevailed for the last two decades.

The provisions of the bill which address the issues of royalty management have been negotiated with the principal authors of the House bill. They have accepted that compromise, and it is not controversial in the Senate. What is at issue is the provision added to the bill in the House that amends the Mineral Leasing Act of 1920 to permit the Secretary of the Interior to increase the royalty rate for noncompetitive Federal leases. This issue was not discussed in the Committee on Energy and Natural Resources or on the floor of the Senate when the royalty management issue was under consideration. We do not have an up-to-date hearing record upon which to base a decision about the change in the law that the House proposes. Of course, the Senate does not always wait until all the hearings have been held and all the information is in before legislating. But that is the way we try to do it.

The House amendment has a particularly awkward approach to the problem of the Senate's deficient record on this issue. The amendment provides that the Secretary of the Interior with discretionary authority to raise the royalty rate for these leases if the Secretary makes certain findings. The effective date of this authority is delayed until 6 months after the date the Congress receives a study conducted by the Secretary of the probable impact of the change. The study is supposed to be submitted to Congress a year after the date of the enactment of the act.

What this really means is that we legislate first and study the impact later. I do not think this is such a good idea.

Therefore what we are proposing to offer back to the House is simply the study to be completed within 6 months. Let the Secretary provide us with a thorough analysis of the effects of a change in the royalty rate for these leases. With this study as a starting point, the normal process can take over in the next Congress. If a change in the Federal royalty rate for noncompetitive leases should be authorized, it will be—in the normal way, by normal legislative means.

If the term "rider" has any utility in our language it has utility in this instance. The amendment that the House is proposing to the Mineral Leasing Act is a rider on the legislation to reform our royalty management practices.

The study of the issue we are offering to the House is a good compromise on the issue raised by this rider. I hope the House can accept it, so that the Secretary of the Interior can get on with the job he's supposed to do to reform our royalty management

system. The main bill is needed to complete that job. We need to pass

that bill now.

Mr. McCLURE. Mr. President, the amendment which I offer, I believe has been cleared by both sides of the aisle. The amendment strikes the provision of the House amendment dealing with noncompetitive oil and gas royalties and instead directs the Secretary of the Interior to conduct a study of the effect of a royalty change on exploration, development or production of oil or gas, and on revenues to the Treasury. In all other respects, the provisions of the House amendment would be accepted. They are virtually identical to the Senate provisions passed by this body on December 6 by unanimous consent. Mr. President, with the adoption of my amendment, it is my hope that the other body will accept this bill and send it to the President. The legislation is strongly supported by the administration as part of an effort to update the system for collecting royalties due on Federal oil and gas and to curtail identified opportunities for fraud and abuse with the existing system. Both the Federal Government and the States stand to benefit greatly from this bill which has been the product of many long hours of effort by the Members and staff of both Houses. I earnestly hope that the other body will not let this effort go to waste.

Mr. STEVENS. Mr. President, I ask for immediate consideration of the

amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 1480) was

agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

table.

The motion to lay on the table was

agreed to

The PRESIDING OFFICER. The question is on agreeing to the motion to concur.

The motion was agreed to.
Mr. STEVENS. Mr. President, move to reconsider the vote by which that motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

table.

The motion to lay on the table was agreed to.

COMMITTEE ON ARMED SER-VICES EXPENDITURE AUTHOR-IZATION

Mr. STEVENS. Mr. President, I send to the desk on behalf of Senator Tower a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 518) authorizing expenditures by the Committee on Armed Services for the training of professional staff.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

TOWER. Mr. President, report favorably from the Committee on Armed Services the following resolution and ask unanimous consent for its immediate consideration.

President, this amends section 5 of Senate Resolution 333, agreed to March 11, 1982, to provide authorization for the expenditure of funds by the Committee on Armed Services for the training of professional staff. The resolution does not authorize any additional funding for the committee. It simiply permits the committee to use a portion of the funds already authorized for the purpose of training professional staff.

The PRESIDING OFFICER. The question is on agreeing to the resolu-

tion.

The resolution (S. Res. 518) was agreed to, as follows:

Resolved, That section 5(b) of Senate Resolution 333, Ninety-seventh Congress, agreed to March 11, 1982, is amended by inserting before the period a comma and the following: "and not to exceed \$2,700 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such

### CONSERVATION PROGRAMS ON MILITARY RESERVATIONS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 1952.

The PRESIDING OFFICER. The Chair lays before the Senate a mes-

sage from the House.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, this is a privileged motion, but I think with all due respect the Chair should give an opportunity for objection, whereupon, the leader could then move and that would be not debatable. But I think we are slipping into some ways that are rather careless.

I would hope that we would at least ask if there is objection. If there is, then the leader can move. That is not debatable. At least that will give us an opportunity for a Member to object before the clerk states the message.

Does the acting majority leader agree with me?

Mr. STEVENS. The Senator is correct, and I probably should have phrased the request in a different manner.

Mr. ROBERT C. BYRD. No. The Senator made the request perfectly proper.

The PRESIDING OFFICER. The Chair apologizes.

Is there objection to the request of the Senator from Alaska?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved. That the House agree to the amendments of the Senate numbered 1, 2, 3, and the amendment to the title of the bill (H.R. 1952) entitled "An Act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes."

Resolved, That the House agree to the amendment of the Senate numbered 4 to the aforesaid bill with the following amend-

In lieu of the matter inserted by said amendment, insert:

SEC. 7. Section 3 of the Fish and Wildlife Improvement Act of 1978 (16 U.S.C. 7421) is amended by adding at the end thereof the following new subsection:

"(k) LAW ENFORCEMENT OPERATIONS .-With respect to any undercover or other enforcement operation which is necessary for the detection and prosecution of violations of any laws administered by the United States Fish and Wildlife Service relating to fish, wildlife, or plants, the Secretary of the Interior may, notwithstanding any other provision of law-

"(1) direct the advance of funds which may be deposited in commercial banks or other financial institutions;

"(2) use appropriations for payment for information, rewards, or evidence concerning violations, without reference to any rewards to which such persons may otherwise be entitled by law, and any moneys subsequently recovered shall be reimbursed to the current appropriation; and

"(3) use appropriations to establish or acquire proprietary corporations or business entities as part of an undercover operation. operate such corporations or business entities on a commercial basis, lease space and make other necessary expenditures, and use the proceeds from such undercover operations to offset necessary and reasonable expenses incurred in such operations: Provided. That at the conclusion of each such operation the proceeds shall be deposited in the Treasury of the United States as miscellaneous receipts."

Mr. STEVENS. Mr. President, move that the Senate concur in the House amendment with two further Senate amendments which I send to the desk on behalf of Senator CHAFEE and ask that they be considered en bloc.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. ROBERT C. BYRD. There is no objection.

UP AMENDMENT NO. 1481 (Purpose: Technical amendments to H.R. 1952)

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. Stevens), on behalf of Mr. Chafee, proposes an unprinted amendment numbered 1481 en bloc.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend section 7 by inserting "or the National Marine Fisheries Service" immediately after "the United States Fish and Wildlife Service" and by inserting "or the Secretary of Commerce" immediately after "the Secretary of the Interior".

"SEC. 8. Section 4(a) of the Coastal Barrier Resources Act (P.L. 97-348) is amended by inserting '(but excluding maps T02 and T03)' immediately after A01 through T12' and by inserting 'and the maps designated T02A and T03A, dated December 8, 1982' immediately after 'and dated September 30, 1982'."

• Mr. CHAFEE. Mr. President, H.R. 1952, which would reauthorize the Sikes Act, was originally passed by the House of Representatives on September 21, 1981. On June 9, 1982, the Senate passed H.R. 1952 with a series of four amendments, plus an amendment to the title of the bill. On September 30, 1982, the House agreed to Senate amendments 1, 2, and 3 as well as the amendment to the title of the bill. Amendment No. 4 was agreed to with a House amendment to clarify the authority of the Fish and Wildlife Service to carry out certain procedures as part of their sting-type undercover operations

In recent years the Fish and Wildlife Service has been quite successful in detecting major wildlife crime by use of sting-type undercover operations. They have been using the authority contained in the administrative provision of the Appropriations Act each year to make expenditures for undercover operations. While this authority is probably adequate, there are three areas where there is some doubt and specific legislative authority would be helpful to clarify these issues. The first part of the House amendment will provide the necessary legislative authority. It is important to note that, through the appropriations process, Congress retains control over the amount allotted each year to under-cover operations. Also, funds recovered from such operations will continue to come back to the Treasury.

The three areas addressed are:

First, authority to deposit advance of funds in commercial banks or other financial institutions. When the Service does this now they feel they must make complete disclosure to the bank. In small communities this can create security problems for undercover

agents. Specific authority will allow them to keep their identity confidential.

Second, authority to use proceeds of undercover operations to offset necessary and reasonable expenses incurred in such operations. For example, when running an undercover business you cannot just buy illegal wildlife, you must also purchase legal animals or products. When these are later sold, the proceeds are used to purchase additional animals or products. This, in effect, keeps you in business. The Comptroller General has ruled that money received in the course of an ongoing undercover operation need not be deposited in the Treasury until the operation is concluded. Nevertheless, specific legislative authority will help clarify these procedures.

Third, authority to reimburse to current appropriations money expended to purchase evidence and later recovered. This occurs in what is called a buy-bust operation. For example, an undercover agent purchases illegal wildlife with cash and received the merchandise. The violation is complete, the violator is arrested and the money is seized as evidence. The money recovered for evidence is not a miscellaneous receipt, however, specific authority again will be helpful.

The first amendment I am offering today would make a minor change in the House amendment to insure that the clarification of Fish and Wildlife Service authority applies to the National Marine Fisheries Service as well.

The second amendment makes technical and conforming changes to Public Law 97-348, the Coastal Barrier Resources Act.

When Congress adopted that conference report on the Coastal Barrier Resources Act on October 1 there was some question as to whether several areas in Texas were developed or undeveloped. In a colloquy between Congressman Jack Brooks in whose district the affected areas are located and the bill's floor manager, Congressman John Breaux, agreement was reached to reexamine the areas to ascertain their true status. During the October-November recess, information was brought forward to justify minor changes on two maps, TO2 and TO3.

The first map, TO2, includes an area that did not meet the delineation criteria of an undeveloped coastal barrier set forth by the Department of the Interior pursuant to Public Law 97-35. My amendment modifies map TO2 to conform with the delineation criteria.

The second map, TO3, had two small subunits erroneously identified as undeveloped when they were actually developed according to definitions set forth in Public Law 97-348. The amendment deletes these two small areas from the Coastal Barrier Resources System.

These amendments have been cleared on both sides of the aisle and I move their adoption.

• The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 1481) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion to concur.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMERICANS MISSING AND UNAC-COUNTED FOR IN SOUTHEAST ASIA

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 977, Senate Concurrent Resolution 131.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. ROBERT C. BYRD. No objec-

The PRESIDING OFFICER. The clerk will state the concurrent resolution.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 131) to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia.

There being no objection, the Senate proceeded to consider the concurrent resolution which had been reported from the Committee on Foreign Relations, with amendments, as follows:

On page 2, line 12, strike "the President to respond", and insert "both governments to move"; and

On page 2, beginning on line 13, strike "to the indicated willingness of the Lao Government.

• Mr. PELL. Mr. President, I rise in support of Senate Concurrent Resolution 131. I am pleased and proud to be cosponsor of this resolution which reaffirms our commitment to locate and bring home Americans missing and unaccounted for in Southeast Asia, expresses our sincere appreciation to the Laotian Government for recent indications of its willingness to assist the United States in this regard, and urges the Governments of the United States and Laos to move "with all dispatch to cooperate in this humanitarian effort."

Last month, on Veterans Day, the Nation dedicated the first national memorial to those courageous Americans who fought and died in the Vietnam war. This memorial-a sleek, smooth black granite monument-bears the names of some 57,939 Americans who did not return from this tragic war. Of these, approximately 2,500 are unaccounted for in Southeast Asia. For the families and friends of these 2,500 Americans, the agony of the Vietnam war has yet to end. The passage of time has not healed their wounds or soothed their heartache because questions remain about the fate of their loved ones. Until these questions are answered, until the truth is learned and the Americans are returned home, the fear, the emptiness, and the pain of their families will continue, and the last dark chapter of the American involvement in Southeast Asia will not be finished.

The Governments of Vietnam and Laos have a humanitarian obligation to provide the fullest possible accounting of Americans missing in their countries and to return the remains of Americans killed in action. Regrettably, neither of these governments has moved rapidly to fulfill this obligation. As of April 1982, the Vietnamese Government returned only 75 sets of remains, and the Laotian Government returned 4 sets, only 2 of which belonged to Americans. Together, these represent less than 10-percent of the 1,150 Americans who are known to have been killed in action and whose remains have not been recovered. While both governments have continually asserted that no Americans are being held captive within their territories, they have failed to substantiate this assertion by providing information on missing Americans, including a number who are known to have been captured alive.

Despite this poor record, recent development suggest that more cooperation on this important issue may be forthcoming from the Governments of Vietnam and Laos. In September, a delegation from the National League of Families of American Prisoners and Missing in Southeast Asia was allowed to visit both Vietnam and Laos. In October, the Government of Vietnam fulfilled a pledge given to the delegation to return five sets of remains and provide material evidence about three other Americans who are not accounted for.

The delegation received an unprecedented amount of cooperation from the Government of Laos. Laotian officials scheduled meetings, made travel arrangements, and, for the first time, allowed Americans to visit two sites where U.S. military planes had crashed and collect the human remains for identification. I am encouraged by the treatment that this delegation received because it appears to

reflect a new willingness on the part of the Laotian Government to fulfill its humanitarian obligation to assist the United States in locating and returning the estimated 558 Americans who are unaccounted for in Laos. I appreciate this new spirit of cooperation on the part of the Laotian Government, and I hope it will continue.

Since 1975 there have been over 700 reports of sightings of live Americans in Southeast Asia. Despite persistent efforts and careful research, the U.S. Government has, as yet, been unable to prove any reports that Americans are being held against their will in Vietnam and Laos. Although I, myself, am skeptical that there are any Americans still alive in Southeast Asia, I firmly believe that we must continue to investigate these reports and to make every effort to verify them.

Senate Concurrent Resolution 131 was unanimously approved by the Foreign Relations Committee and is now before us for consideration. I urge my colleagues to vote for this resolution. It is our duty, as well as our moral responsibility, to do all that we can to recover the remains of those Americans who died in Southeast Asia and to learn the truth about those who remain missing and unaccounted for. By so doing, we not only close the book on this tragic war but also pay tribute to the many brave American men and women who served the United States in Southeast Asia.

Mr. STEVENS. Mr. President, I ask unanimous consent that the committee amendments be adopted en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are agreed to en bloc.

The question is on agreeing to the concurrent resolution.

The concurrent resolution, as amended, was agreed to.

The preamble was agreed to.

The concurrent resolution and the preamble are as follows:

## S. Con. 131

Whereas locating Americans missing and unaccounted for in Southeast Asia and their return to the United States is, and should be, of primary concern to the Government of the United States and all humane nations and peoples;

Whereas there are currently two thousand four hundred and ninety-three Americans missing and unaccounted for in Southeast Asia, five hundred and fifty-eight of whom are presumed to be located in Laos;

Whereas the Government of Laos has recently indicated, by its reception of a visiting delegation of Americans from the National League of Families of American Prisoners and Missing in Southeast Asia, that the Government of Laos would assist in the humanitarian effort to locate and return Americans missing and unaccounted for in Laos; and

Whereas the United States Government is encouraged by this recent indication of cooperation on the part of the Government of Laos: Now, therefore, be it Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) reaffirms its commitment to locating Americans missing and unaccounted for in Southeast Asia and returning them to the United States;

(2) expresses its appreciation to the Government of Laos for its expressed willingness to cooperate in locating and returning those Americans:

(3) supports the President's actions to locate and return Americans missing and unaccounted for in Southeast Asia; and

(4) urges both governments to move, with all dispatch, to cooperate in this humanitarian effort.11Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

### COMMENDING THE GOVERNMENT OF ZIMBABWE

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar 976, Senate Resolution 500.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 500) commending the Government of Zimbabwe.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 500) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

### S. RES. 500

Whereas two Americans, two Australians, and two British citizens were kidnapped in Zimbabwe on July 23, 1982:

Whereas the Governments of the United States, Great Britain, and Australia have indicated daily their willingness to provide appropriate assistance to the Government of Zimbabwe to secure the return of the captives:

Whereas the primary responsibility in this matter lies with the Government of Zimbabwe;

Whereas the Government of Zimbabwe, together with ZAPU leader Joshua Nkomo, has urged moderation on the part of the kidnappers and sought to win the assistance of local villagers in locating the kidnappers;

Whereas the Government of Zimbabwe has demonstrated its sincerity by offering a substantial reward for information; and

Whereas these actions are important for ensuring the continued safety and eventual release of all the hostages: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Government of Zimbabwe is to be commended for its ongoing efforts to protect the lives of the captives and to bring this incident to a positive conclusion; and

(2) the President of the United States should continue to be supportive of the efforts of the Government of Zimbabwe in

this matter.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he further transmit such copy to the Government of

Mr. STEVENS. Mr. President. move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table

The motion to lay on the table was agreed to.

### DISTRIBUTION OF A U.S. INFORMATION AGENCY FILM

Mr. STEVENS. Mr. President, I now ask that the Chair lay before the Senate Calendar Order No. 975, S. 3073.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3073) to provide for the distribution within the United States Information Agency film entitled "Dumas Malone: A Journey With Mr. Jefferson".

There being no objection, the Senate proceeded to consider the bill.

Mr. WARNER. Mr. President, 3073 is a very short and simple bill to allow domestic release of a videotape produced by the U.S. Information Agency entitled "Dumas Malone: A Journey With Mr. Jefferson.'

This bill meets the Senate Foreign Relations criteria that it be educationally, culturally, or historically significant, and the bill was reported out of committee unanimously last week.

I have requested your attention to this bill during our short session, Mr. President, because both the Smithsonian and Monticello will be holding exhibitions on our great third President, who founded my alma mater, the University of Virginia. These exhibitions are scheduled for early spring, 1983, Mr. President, and thus I ask that we pass this bill in order that this excellent tape may be shown.

I submit for the RECORD my remarks of December 3, 1982, when I introduced the bill.

The remarks follow:

DISTRIBUTION OF U.S. INFORMATION AGENCY FILM

Mr. WARNER. Mr. President, today I am introducing legislation allowing domestic re-lease of the USIA-produced video tape recording, "Dumas Malone: A Journey With Mr. Jefferson."

This recording is an interview with Dumas Malone, the renowned biographer of our second President, Thomas Jefferson,

The purpose for seeking congressional consideration on this matter is twofold:

One, the Smithsonian Institution and the Thomas Jefferson Memorial Foundation are planning exhibits of Gilbert Stuart's "Edgeportrait of Jefferson both here in Washington, at the National Portrait Gallery, and at Monticello in Charlottesville early this spring. In conjunction with these exhibits, the Institution and the foundation wish to show the USIA program. Delay or postponement of this legislation until the start of the 98th Congress would surely preclude showing this program with the Stuart exhibition.

Two. The law establishing the U.S. Information Agency prohibits the distribution within the United States of materials the Agency produces. However, from time to time legislation has been enacted exempting specific works and titles from the prohibition. I believe that the bill is in keeping with the history of exemptions and the new procedures for exemptions adopted by the Committee on Foreign Relations and published in the Congressional Record on March 31, 1982.

In "Dumas Malone: A Journey With Mr. Jefferson," Professor Malone of the University of Virginia is interviewed by Marc Pachter, Chief Historian of the National Portrait Gallery of the Smithsonian Institution. The 89-year-old Malone, who was the recipient of the Pulitzer Prize for history in 1975 and a Presidential citation in 1979, completed his monumental six-volume work "Jefferson and His Times" in 1981.

Filmed on location at the University of Virginia and Monticello in November 1981, the program concentrates on Jefferson's personality and career. Malone and Pachter discuss Jefferson's life from the Declaration of Independence through his 5 years in France, his two-term Presidency, to his retirement at Monticello.

Malone comments on Jefferson's political philosophy; his relationships with John Adams, Madison, Franklin and Washington; the Louisiana Purchase; the Lewis and Clark expedition; and the French Revolution. In addition, Malone reflects on his own role as biographer.

The film was issued for international showing in February 1982.

Release of this work in the United States would enable people all across the country, and especially those viewing the Edgehill exhibit at the Smithsonian and Monticello this spring, to gain richer insights into our second President by the man who knows him best.

As Professor Malone points out in his conversation with Mr. Pachter, the work of more than 50 years and the privilege of reading all of Jefferson's extant correspondence with his family and his contemporaries have created a special understanding of and unique relationship with his subject.

Mr. President, my Virginia colleague in the House of Representatives, J. Kenneth ROBINSON, is introducing an identical bill in an effort to expedite congressional approval. I am joined in sponsoring this measure by Virginia's senior Senator HARRY F. BYRD, Jr., and the three Senate Regents on the Smithsonian's Board: Mr. Goldwater, Mr. Jackson, and Mr. Garn. We urge our colleagues to give early and favorable consideration to this legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as fol-

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding the second sentence of Section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461)-

(1) the Director of the United States Information Agency shall make available to the Administrator of General Services a master copy of the film entitled "Dumas Malone: A Journey with Mr. Jefferson", and

(2) the Administrator shall reimburse the Director for any expenses of the Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the United States Information Agency.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3073

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding the second sentence of section 501 of the United States Information and Education Exchange Act of 1948 (22 U.S.C. 1461)

(1) the Director of the United States Information Agency shall make available to the Administrator of General Services a master copy of the film entitled "Dumas Malone: A Journey with Mr. Jefferson", and

(2) the Administrator shall reimburse the Director for any expenses of the Agency in making that master copy available, shall secure any licenses or other rights required for distribution of that film within the United States, shall deposit that film in the National Archives of the United States, and shall make copies of that film available for purchase and public viewing within the United States.

(b) Any reimbursement to the Director pursuant to this section shall be credited to the applicable appropriation of the United States Information Agency.

Mr. STEVENS. Mr. President, move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

The motion to lay on the table was agreed to.

USE AND DISTRIBUTION OF CERTAIN INDIAN JUDGMENT FUNDS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1735.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representa-

Resolved. That the bill from the Senate (S. 1735) entitled "An Act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims", do pass with the following amend-

Strike out all after the enacting clause and insert: That, notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401, et seq.), or any other law, regulation, or plan promulgated pursuant thereto, any funds appropriated in satisfaction of a judgment awarded to the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims shall be used and distributed as provided in this Act.

Sec. 2. All of the funds appropriated with respect to the judgment awarded the Pembina Chippewa Indians in dockets 113, 191, 221, and 246 (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") among the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe of Rocky Boy's Reservation, the Minnesota Chippewa Tribe, the Little Shell Band of the Chippewa Indians of Montana, and the nonmember Pembina descendants (as group) so that each is allocated an amount which bears the same relationship to such funds as the number of members of such band, tribe, or group who are described under section 3(1), 4(1), 5(1), or 6(1), or 7(a) bears to the sum of-

- (1) the number of members of the Turtle Mountain Band of Chippewa Indians described in section 3(1),
- (2) the number of members of the Chippewa Cree Tribe of Rocky Boy's Reservation described in section 4(1).
- (3) the number of members of the Minnesota Chippewa Tribe described in section 5(1).
- (4) the number of members of the Little Shell Band of the Chippewa Indians of Montana as described in section 6(1) plus
- (5) the number of nonmember Pembina Chippewas enrolled by the Secretary under section 7(a).
- SEC. 3. The funds allocated by section 2 to the Turtle Mountain Band of Chippewa Indians shall be used and distributed as follows:
- (1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Turtle Mountain Band of Chippewa Indians who are living on the date of the enactment of this Act.
- (2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Turtle Mountain Band of Chippewa Indians. The governing body of such band is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for
  - (A) the administration of such band, or (B) social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita pay-

Sec. 4. The funds allocated by section 2 to the Chippewa Cree Tribe of Rocky Boy's

Reservation shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Chippewa Cree Tribe of Rocky Boy's Reservation who-

(A) establish Pembina Chippewa ancestry to the satisfaction of the Secretary, and
(B) are living on the date of the enact-

ment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Chippewa Cree Tribe of Rocky Boy's Reservation. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for-

(A) economic programs,

(B) recreation, or

(C) tribal administration.

Such 20 per centum portion of the principal shall not be available for per capita pay-

SEC. 5. The funds allocated by section 2 to the Minnesota Chippewa Tribe shall be used and distributed as follows:

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Minnesota Chippewa Tribe who-

(A) are designated as Pembina Band Chippewas on the basis of tribal procedures which are approved by the Secretary, and

(B) are living on the date of the enactment of this Act.

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Minnesota Chippewa Tribe. The White Earth Reservation Business Committee is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis sub-

ject to the approval of the Secretary, for-(A) a joint investment and use program for the bands affiliated with the reservation, or

(B) reservation social and economic programs.

Such 20 per centum portion of the principal shall not be available for per capita pay-

SEC. 6. The funds allocated by section 2 to the Little Shell Tribe of Chippewa Indians of Montana shall be used and distributed as follows

(1) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all enrolled members of the Little Shell Tribe of Chippewa Indians of Montana who are living on the date of the enactment of this Act and who would meet the enrollment criteria under section 7(a) of this Act if they were not enrolled members of the Little Shell Tribe of Chippewa Indians of Mon-

(2) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Little Shell Tribe of Chippewa Indians of Montana. The governing body of such tribe is authorized to use the interest and investment income accrued on such 20 per centum portion, on an annual budgetary basis subject to the approval of the Secretary, for-

(A) the administration of such tribe, or (B) social and economic programs:

Provided, That the Secretary shall act on the tribe's petition for Federal recognition prior to September 30, 1985. In the event

that recognition is not approved, the 20 per centum portion shall be distributed in the form of per capita payments (in sums as equal as possible) to those persons who qualify for per capita payments under section 6(1): Provided further, That if the Secretary fails to act on the recognition petition by September 30, 1985, the Secretary shall make a report to Congress on that date outlining the reasons for his failure to act and shall make no per capita payments under this subsection until action on the pe-

SEC. 7. (a) In order to establish eligibility to participate in the distribution of the funds allocated to the non-member Pembina Chippewa descendants under section 2, the Secretary shall develop a roll of all individuals who-

(1) are of at least one-quarter Pembina Chippewa blood.

(2) are citizens of the United States,

(3) are living on the date of the enactment

(4) are not members of the Red Lake Band of Chippewa Indians, the Turtle Mountain Band of Chippewa Indians, the Chippewa Cree Tribe, or the Minnesota Chippewa Tribe, or the Little Shell Band of Chippewa Indians of Montana, and

(5) are-

(A) enrolled, or the descendants of a lineal ancestor enrolled-

(i) as Pembina descendants under the provisions of the Act of July 29, 1971 (85 Stat. 158), for the disposition of the 1863 Pembina Award, or

(ii) on the McCumber roll of Turtle Mountain Indians of 1892, or

(iii) on the Davis roll of Turtle Mountain Indians of 1904, or

(iv) as Chippewa on-

(I) the tentative roll of the Rocky Boy Indians of May 30, 1917, or

(II) the McLaughlin census report of the Rocky Boy Indians of July 7, 1917, or

(III) the Roe Cloud Roll of Landles Indians of Montana, or

(B) able to establish Pembina ancestry on the basis of any other rolls or records acceptable to the Secretary.

(b) The Secreatry shall promulgate regulations regarding nonmember Pembina enrollment procedures and shall utilize any documents acceptable to the Secretay in establishing eligibility of an individual to receive funds under this section.

(c) Funds allocated to the nonmember Pembina descendants under section 2 shall be distributed on a per capita basis to the individuals enrolled under subsection (a).

SEC. 8. (a) Any payment of a per capita share of funds to which a living, competent adult is entitled under this Act shall be paid directly to such adult.

(b) Any per capita share of funds to which a deceased individual is entitled under this Act shall be paid, and the beneficiaries thereof determined under regulations prescribed by the Secretary.

(c) Any per capita share of funds to which a legally incompetent individual or an individual under eighteen years of age is entitled under this Act shall be paid in accordance with such procedures (including the establishment of trusts) as the Secretary determines to be necessary to protect and preserve the interests of such individual.

SEC. 9. None of the funds distributed per capita or made available under this Act for programs shall be subject to Federal, State, or local income taxes or be considered income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or benefits to any person or household participating in any Federal, State, or local programs.

Mr. STEVENS. Mr. President, move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

table.

The motion to lay on the table was agreed to.

### NATIONAL HIGH SCHOOL ACTIVITIES WEEK

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 101.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 101) entitled "Joint resolu-tion designating 'National High School Activities Week'", do pass with the following amendment:

Page 2, lines 3 and 4, strike out (October 19 through October 25, 1981), and insert: 'October 17 through October 23, 1982"

Mr. STEVENS. Mr. President, move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the

The motion to lay on the table was agreed to.

#### 3106-NORTH ATLANTIC SALMON TREATY HELD AT THE DESK

Mr. STEVENS. Mr. President, I send to the desk a bill on behalf of the Senator from Oregon (Mr. Packwoop) and ask unanimous consent that this bill be held at the desk pending further disposition.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so order.

### THE EXECUTIVE CALENDAR

Mr. STEVENS. Mr. President, if I have the consent of my good friend from West Virginia, the distinguished Democratic leader, I ask if it would be agreeable with him if the Senate now went into executive session to consider nominations on the Executive calendar beginning with Calendar No. 1098, National Institute of Handicapped Research, on page 3, all nominees on page 4, page 5, page 6, page 7, page 8, page 9, page 10, page 11, page 12, page 13, and page 14, nominations on the Secretary's desk.

Mr. ROBERT C. BYRD. There is no objection to proceeding.

### **EXECUTIVE SESSION**

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calender beginning with Calendar No. 1098 and including all nominations thereafter, including the nominations placed on the Secretary's desk in the Air Force and Navy

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that those nominees be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominees considered and confirmed en bloc are as follows:

#### NATIONAL INSTITUTE OF HANDICAPPED RESEARCH

Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research, vice Margaret Joan Gian-

#### THE JUDICIARY

Geoffrey M. Alprin, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for a term of 15 years, vice Margaret A. Haywood, retired.

Virginia L. Riley, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of years prescribed by Public Law 91-358, as amended, vice Samuel B. Block, re-

### VETERANS' ADMINISTRATION

Harry N. Walters, of Virginia, to be Administrator of Veterans' Affairs, vice Robert P. Nimmo, resigned.

### DEPARTMENT OF DEFENSE

W. Paul Thayer, of Texas, to be Deputy Secretary of Defense, vice Frank C. Carlucci, resigned.

### Uniformed Services University of the HEALTH SCIENCES

Francis Carter Coleman, of Florida, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for the term expiring May 1, 1983, vice Philip O'Bryan Montgomery, Jr., term expired.

Perry Albert Lambird, of Oklahoma, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987, vice Lt. Gen. Leonard D. Heaton, U.S. Army, retired, term expired.

David I. Olch, of California, to be Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987,

vice David Packard, term expired.

James F. X O'Rourke, of New York, to be a Member of the Board of Regents of the Uniformed Services University of the Health Sciences for a term expiring May 1, 1987, vice Francis D. Moore, term expired.

Mr. STEVENS. Mr. President, move to reconsider the vote by which the nominees were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President. I ask unanimous consent that the President be immediately notified of the confirmation of these nominees.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF HARRY N. WALTERS TO BE ADMINISTRATOR OF VETERANS' AFFAIRS

Mr. SIMPSON. Mr. President, I am very pleased to report that the Committee on Veterans' Affairs has now completed its consideration of the qualifications of Harry N. Walters, the President's nominee to be Administrator of Veterans' Affairs. The committee, by unanimous vote, recommends that the nomination be confirmed.

The position of Administrator of Veteran's Affairs is an extremely important one and the individual who fills it must be ready to accept some awesome challenges and responsibilities. I am convinced that Harry N. Walters has the abilities and the experience to meet these challenges and re-

sponsibilities.

Since June 8, 1981, Mr. Walters has served as Assistant Secretary of the Army for Manpower and Reserve Affairs. In that position, he has been responsible for the supervision of all Army policy pertaining to manpower and personnel management, mobilizamanpower, equal opportunity, quality of life areas, force structure requirements and operational readiness, and management of reserve affairs.

Let me share with you some of his background. In 1977, Mr. Walters purchased and became president and chief executive officer of the Potsdam Paper Corp., Potsdam, N.Y. From 1977 until 1981, he transformed this company from idleness to prosperity in an area of the country plagued by high

unemployment.

Mr. Walters served as a consultant for Howard Paper Mills, from 1976 through 1977 and as executive vice president at the Standard Paper Manufacturing Co., in Richmond, Va., from 1973 to 1976. Prior to that time, he was associated with Plainwell Paper Co., Plainwell, Mich., as their national sales and marketing manager; Kimberly Clark Corp., in Neenah, Wis., as their projects manager for new business development; Kimberly Clark Corp., in New York City as their accounts manager for publication papers; and Pure Oil Co., Miami, Fla., in various sales and marketing assignments.

In 1959, Mr. Walters graduated from the U.S. Military Academy at West Point, N.Y., where he was a standout fullback on Army's last undefeated football team. After graduation, he was commissioned in the infantry and attended the Army Airborne and Ranger Schools at Fort Benning, Ga. He served with the 25th Infantry Division in Hawaii, Laos, and Thailand. He completed his active military service in 1963, but continued active in the Army Reserves until 1965, serving as a commander of a Special Forces "A" team.

Mr. President, the Administrator of Veterans' Affairs is charged with insuring the continued effectiveness and efficiency of the many important programs which serve our Nation's 30 million veterans. In doing so, he must oversee the day-to-day operation of an agency of enormous size and complex-

The VA currently employs more than 220,000 people and has an annual operating budget of nearly \$25 billion. It operates the most comprehensive system of benefits for veterans existing in any nation in the world.

I have a "hands on" knowledge of the difficulties and pressures which face the Administrator of the Veterans' Administration for I came to know both Max Cleland and Bob Nimmo and watched them operate in this very tough task. It takes an awesome amount of courage and dedication. I certainly wish the next Administrator all possible success and pledge to him my earnest cooperation and that of the staff of the Senate Committee on Veterans' Affairs-both majority and minority members-toward meeting the problems and needs of our veterans who have contributed so much to our Nation.

Mr. President, I emphasize my strong support of the nomination of Harry N. Walters to be Administrator of Veterans' Affairs, and I urge my colleagues to support the unanimous vote of the Senate Committee on Veterans' Affairs in confirming his nomination.

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs, I am very pleased to support the nomination of Harry N. Walters to be the Administrator of Veterans' Affairs. I had the opportunity to meet with Mr. Walters in advance of his confirmation hearing and, of course, was present during Mr. Walters' very forthcoming testimony at that hearing on December 8, 1982.

At the confirmation hearing, I made reference to the urgent need for the vacancy in the Administrator's office to be filled in the interest of providing stability in Veterans' Administration top management. Shortly after Mr. Robert Nimmo's October 4, 1982, announcement of his resignation as VA Administrator, I had written to the President in this regard to urge that a nomination be made promptly for that purpose and for the purpose of insuring that a new Administrator is in office during the final stages of development of the President's fiscal year 1984 budget for the VA.

Mr. President, I ask unanimous consent that copies of my opening statement at the confirmation hearing and my letter to the President be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, so ordered.

(See exhibit 1.)

Mr. CRANSTON. Mr. President, Mr. Walters' background includes private and public sector management experience that is much needed by the VA. In addition, he was very impressive in his appearance before the committee. He expressed in a forceful and forthright manner his view that the VA must do its very best to provide benefits and services in a way that is compassionate as well as efficient, and his firm commitment to be the veterans' advocate within the executive branch.

I also found most welcome his determination to take charge of the management of the Veterans' Administration and its \$25 billion budget free of Office of Management and Budget domination and to challenge OMB efforts to control the administration's position on VA budget issues.

Mr. President, I questioned Mr. Walters extensively during the confirmation process-through written prehearing questions, oral questions at his confirmation hearing, and written followup questions. Mr. Walters responded in a most timely fashion to my written questions. Because of the complexity of the issues I had raised on a number of topics and the short period of time that he had to learn about and reflect on those issues, he preferred not to provide definitive responses in some instances. I respect his prudence in this regard. We have agreed that by February 1, 1983, he will provide responses to each of the questions to which he has not as of now provided specific and full answers. With respect to any questions to which he cannot provide such answers by February 1, he has agreed at that point to provide a status report on the subject and target dates for the answers.

This arrangement is fully satisfactory to me. It permits me to support—and indeed to urge—the prompt confirmation of Mr. Walters as Administrator while insuring that the questions I have raised will be answered in a thoughtful, complete, and timely fashion. Once Mr. Walters submits all of the requested answers, the distinguished chairman of the Veterans' Affairs Committee (Mr. Simpson) has agreed that they will be printed as an appendix to a future committee hearing.

Mr. President, on the basis of all the information now available, I believe that Mr. Walters is well qualified for the position of Administrator of Veterans' Affairs. I urge my colleagues to give him their unanimous support, and I look forward to working closely with him upon his installation in office.

### Ехнівіт 1

# OPENING STATEMENT OF SENATOR ALAN CRANSTON

I am delighted to join you, Al, and the other members of the committee this afternoon in welcoming Harry Walters and others to this hearing on his nomination to be Administrator of Veterans' Affairs. Al, I want to thank you for coordinating with me so closely in scheduling this time for the hearing.

I note that Mr. Walters has a fine record of achievement in business and has experience in high public office—this being the second time that he has come before the Senate for confirmation. Thus, his background indicates a capability to undertake major managerial responsibilities, and he'll need that capability at the V.A.

It is important for the effectiveness of the V.A. and the well-being of our nation's veterans that we proceed promptly, as the chairman is doing, with consideration of this nomination. There has been a most regrettable lack of stability in the top-level management of the V.A. Today is the 240th day since January 20, 1981, that the V.A. has been without a fully-functioning administrator—that is, one appointed by this President and who has not announced his resignation.

Today is also the 461st day during this administration—more than two-thirds of its duration—that there has not been both a fully-functioning Administrator and Deputy Administrator at the V.A.

With this lack of stability in mind, along with the very high turnover that has occurred in other top-management positions in the V.A. over the past 23 months, it is my hope that we are now beginning a period of strong, effective, and stable V.A. leadership.

Mr. Walters, in his prepared remarks, very clearly articulates his understanding of the special responsibilities he will have as Administrator to carry out our Nation's commitments to its veterans, and his promise to be an advocate for America's veterans. I am ready to support the new Administrator in his efforts to perform these tasks.

As a new Administrator takes office, he will be facing a number of very important challenges. I would like to comment on three that I believe must be of the highest priority during the early weeks and months. Last week, I submitted to Mr. Walters written questions relating to each of these three matters. I'll be following up on them this afternoon.

First is the administration's F.Y. 1984 budget, which is now in the final, critical stages of development. This is a matter of great importance to all veterans. I am encouraged by Mr. Walters' stated intentions—as reported in the press and in response to a question I submitted in advance of today's hearing—to represent the V.A. vigorously in the final budget negotiations.

Second, with respect to the agent orange issue, it is vitally important that the V.A. move ahead expeditiously-consistent with the rigorous demands of scientific and medical validity-in its efforts to find the badly needed answers to the questions regarding the long-term health effects of exposure to agent orange. As the Senate author of laws mandating the major agent orange study and providing special health-care eligibility for those exposed in Vietnam, I believe that the swift transfer of responsibility for the conduct of that study to the centers for disease control must be placed at the top of this priority list-along with efforts to ensure that all of the V.A.'s activities relating to agent orange are managed effectively.

Third, I believe that it is also extremely important for the new administrator to provide strong leadership with respect to the development of automated data processing capabilities in V.A. medical facilities. The V.A. health-care system is years behind the private sector in gaining the benefits of computerization, which can be a marvelous tool in the provision of health-care services. Unfortunately, as a result of stop-and-go management and bureaucratic infighting, the V.A.'s efforts in this regard have recently been hampered and are now virtually par-

alyzed. These obstacles must be overcome. I believe that the new administrator must ensure that the controversies are resolved, that a firm, consistent direction is established, and that long-overdue progress is made promptly.

made promptly.

Harry, I very much appreciate your efforts in providing answers to my written questions in advance of today's hearing. I realize that you did not have a great deal of time to answer them and am grateful for your cooperation in responding in a timely fashion. Let me also note that I appreciate your not wanting to provide firm, definitive answers at this point regarding all of the issues that I raised. I respect your wanting to have the opportunity to study some of the issues more thoroughly and look forward to receiving your detailed responses in the near future.

In closing, I want to re-emphasize my view that repaying the debts we owe to those who gave of themselves in military service is a continuing cost of our Nation's defense and a fundamental national obligation. The needs of all veterans—and particularly the needs of those who bear the scars of battle and those Vietnam veterans who are still facing difficulties in readjusting to civilian life—are needs to which we must devote our special attention and all needed resources.

The challenge is great and the answers will not be easy, but I pledge to do my best, Harry, to work with you as we carry out our mutual responsibilities.

Thank you.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., October 5, 1982.
Hon. Ronald W. Reagan,

The White House,

Washington, D.C.

DEAR MR. PRESIDENT, Yesterday, you accepted the resignation of Robert P. Nimmo. Today is thus the 176th day on which your Administration has not included a fully functioning Administrator of Veterans' Affairs.

In light of this situation, I am writing to express concerns regarding the selection of a successor to Mr. Nimmo and the development of the fiscal year 1984 budget for the Veterans' Administration.

In March of last year, your Administration submitted extensive revisions of the fiscal year 1982 budget for the VA and other departments and agencies. At the time, the VA was uniquely disadvantaged among the major Executive departments of agencies in not having an agency head appointed by you who could effectively represent it in negotiations with the Office of Management and Budget and White House regarding the FY 1982 budget. As I noted then, that situation left the VA defenseless against numerous unwise proposals to cut VA programs that were incorporated in your FY 1982 budget revisions.

Hence, your FY 1982 budget revisions included cuts of \$406 million and 5,612 full-time-equivalent employees (FTEE's) in VA health-care programs (not including a \$103 million/61 FTEE cut in VA medical construction programs). Under these revisions, funding for the VA's readjustment counseling (Vet Center) program for Vietnam-era veterans would have been terminated on September 30, 1981; two million fewer VA outpatient visits would have been funded; and 1,800 VA hospital beds would have been closed down. Your FY 1982 revisions also included cuts of \$66 million and 2,022 FTEE's in the VA's general operating expenses

(GOE) account—including reductions of 17 percent (115 FTEE's) in the staffing for VA vocational rehabilitation programs for service-connected disabled veterans and of more than a thousand VA regional office employees responsible for counseling and assisting veterans with respect to their benefit claims and for processing and adjudicating those claims.

Fortunately, 85 percent of those cuts was

restored by the Congress.

At Mr. Nimmo's July 9, 1981, confirmation hearing, he acknowledged that these OMB-initiated cuts were "drastic" and "done very quickly". He also noted that he had been asured by OMB that it would allow the VA to make its "own recommendations and not be subjected to arbitrary proposals." He also stated he would challenge major OMB decisions affecting VA programs and, if need be, use his access to the White House and to you to do so.

Mr. Nimmo's resignation leaves the VA in virtually the same situation regarding the development of its FY 1984 budget at this crucial stage in the process as existed in the first two months of your Administration with respect to the FY 1982 budget revi-Thus, I believe that the interests of sions. the Nation's veterans and their survivors and the maintenance of effective VA programs to meet their needs require prompt action to ensure that the priority that VA programs deserve is fully recognized and respected in the context of your FY 1984 budget. I believe that you should take one of two actions: first and far preferably, swiftly nominate a capable, experienced individual as Administrator; or, second, in the absence of such a prompt nomination, provide for full White House involvement in the development of the VA budget, including your close personal scrutiny of that budget.

Regarding the selection of a new Administrator, I believe that the disruptive experiences of the past 21 months as well as immediate budgetary considerations make it imperative that a new leader be promptly selected. You will recall that your first Administrator was not sworn in until six months after your inauguration; the first individual you selected as Deputy Administrator left the VA before taking office; a new Deputy was not sworn in until December 17. 1981; and after the latter's June 25, 1982, resignation, the incumbent Deputy Administrator did not take office until August 30. In addition, eight top-level management officials appointed by the Administrator left their positions within a year. Clearly, these circumstances call for an appointment now that will provide badly needed stability and continuity for VA management.

Accordingly, I strongly urge that you immediately proceed with the selection of an individual with substantial experience in working with VA programs and a demonstrated understanding of and sensitivity to the needs of all veterans, particularly service-connected disabled veterans and Viet-

nam-era veterans.

In the event that you are unable to make such an appointment within the next few weeks, I respectfully urge that you direct White House staff to participate in the preparation of the FY 1984 budget request and that you personally approve it. In my view, your Administration has not to date consistently given appropriate recognition to the high priority that veteran's programs warrant. For example, in May of this year you joined with the Chairman of the Senate Budget Committee in proposing a most in-

adequate, unfair FY 1983 budget for the VA. Under that proposal, no cost-of-living increase would have been provided in compensation rates for service-connected disabled veterans and their survivors or in need-based VA pension benefits for certain wartime veterans and their survivors; and VA health-care, construction, and GOB appropriations would have been frozen at levels substantially below FY 1982 appropriations. I respectfully urge that you ensure that those who were responsible for advising you to support that kind of VA budget not be permitted to shape any similar proposals for FY 1984.

Mr. President, I respectfully submit that events have brought us to so critical a juncture for our Nation's veterans that only your personal attention to their needs will suffice. I stand ready to assist you in any way you may consider appropriate in connection with these matters and assure you that I will cooperate fully in giving prompt consideration to your nomination for a new Administrator of Veterans' Affairs.

With best personal regards,

Cordially.

ALAN CRANSTON, Ranking Minority Member.

The PRESIDING OFFICER. The question is on agreeing to the confirmation of the nomination of Harry N. Walters to be Administrator of Veterans' Affairs.

The nomination was confirmed.

### LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Does the distinguished Democratic leader have anything further at this time? Mr. President, I yield the floor.

Mr. BIDEN addressed the Chair.
The PRESIDING OFFICER. The
Senator from Delaware.

THE RELEASE BY THE PENTA-GON OF CLASSIFIED INFORMA-TION TO THE PRESS

Mr. BIDEN. Mr. President, I notice the presence of the Democratic leader on the floor at this time, and while he is here I would like to ask him if he had occasion to read the stories 2 days ago in the newspapers about a briefing which took place on Tuesday for members of the press at the Pentagon?

Mr. ROBERT C. BYRD. Yes, Mr. President, I did. According to those stories, highly sensitive, classified information was apparently disclosed to members of the press as part of an effort by the administration to, I suppose, persuade the public and, perhaps, Members of Congress to support certain aspects of the defense program.

I find it to be highly unusual, to say the least. I know the Senator from Delaware has done a great deal of work on the subject of classified information, and especially on the subject of leaks, both authorized and unauthorized, and I would like to ask him a question as to whether or not in his view the situation which occurred may have involved any violation of any of the laws of the United States which were designed to protect classified information.

Mr. BIDEN. I am glad the Senator from West Virginia has raised this issue. A number of years ago I had the privilege of chairing the special Subcommittee of the Senate Intelligence Committee which looked into that very question and, in fact, we issued a very extensive report which discussed the subject. The Federal law, as it is presently written, prohibits "willfully" communicating "information relating to the national defense" to "any person not entitled to receive it," the person doing the disclosure "has reason to believe" the information 'could be used to the injury of the United States or to the advantage of any foreign nation." Now let me read you, Mr. Leader, what we concluded in our report:

Under current law, it is not at all clear whether most leaks of information to the media are criminal. To the legal neophyte in this field, it appears that (the law I just read) do(es) address the problem . . . Superficially then, (the) statute seems to punish leaks to journalists as well as spying. However, these statutes are not normally used in cases unless transmittal to foreign agents is involved. Whether they could be used in cases where information is passed to a journalist is unclear from a careful reading of the legislative record.

That is a quote from our subcommittee's report which dealt with unauthorized leaks. Of course the problem which the minority leader has properly raised, which may have involved an authorized leak, complicates the legal question even further. I imagine some would contend that the newsmen, having apparently been selected by high administration officials, may be now considered to have been "entitled" to the information, although I think that's debatable.

At any rate, Mr. President, I would reply to the distinguished minority leader, that it appears doubtful that anyone could actually be prosecuted under existing laws for what transpired at the briefing, and I should note here parenthetically I am really talking about the Pentagon officials more than I am reporters who showed up at this briefing. But I think he would agree with me that what transpired was absolutely outrageous. The administration can apparently engage in "selective leaking" of informationinformation which would probably be extremely helpful to our adversaries in the world. And we in the Congress have to sit here, constrained by these same laws, and not be able to say anything with respect to the merits of what the administration's "leakers" have been saying to the press. I wonder if that problem bothers the leader as much as it does me?

Mr. ROBERT C. BYRD. I was somewhat nonplussed when I read the stories in the press. I was distressed, and I thank the Senator for raising that question. I think he is correct in having raised the question.

I wonder if the Senator feels there should be any need for any investigation on the subject of who authorized the leaks, exactly what information was given out, and what the assessment of potential damage may be to our national security which might

have resulted? understand that this briefing, which was so cavalierly made as a briefing to the newspapers, was similar to the sensitive briefing which was conducted here in the Chamber by the full Senate in closed session some months ago, I recall that on that occasion, and on similar occasions, we took seriously the restrictions which are imposed upon us by the Senate Rules with respect to secrecy. The doors were shut, the galleries were closed, and virtually all of our staff experts were excluded. Admonitions were read to Members of the body. When I was the majority leader I read the admonition in each such instance from the book of rules to the body, and I think the majority leader, who is now of the other party, has done the same with respect to such sessions, and I daresay, so far as I have been able to determine, no word from that Senate secret briefing was ever disclosed to anyone outside the Chamber.

Now we pick up the morning papers and read that much of that same information apparently was given to the

In order that the record may be complete on this subject, Mr. President, I ask unanimous consent that the newspaper articles to which I referred, one from the Washington Post under date of December 5, 1982, titled "Reporters Balk Over Briefing Pact," and another from the New York Times under date of December 15, 1982, titled "Reporters Balk at Secrecy Pledge, Pentagon, in Unusual Move, Asked Journalists To Sign Agreement on Briefing" be printed in the Record.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 15, 1982] REPORTERS BALK OVER BRIEFING PACT

Thirteen reporters were given an off-therecord Pentagon briefing yesterday that contained sensitive information on Soviet military developments, even though the journalists refused to sign an unprecedented "secrecy agreement" requested beforehand by defense officials.

Pentagon spokesman Henry Catto said the briefing was offered "to inform senior defense correspondents as to the extent and trends of the growing Soviet threat insofar as national security would permit." Catto said the strict secrecy sought by the Defense Department was dictated by the need to "protect intelligence sources and methods of collection."

The briefing dealt with Soviet advances in strategic nuclear weapons and conventional forces.

It was set up after reporters had complained to Defense Secretary Caspar W. Weinberger that the defense establishment was not providing military affairs reporters with the kind of information that would enable them to judge the validity of Reagan administration claims of ominous Soviet military advances.

When the reporters arrived at a meeting room before the briefing, they were asked to sign a one-page statement titled "Department of Defense Secrety Agreement."

ment of Defense Secrecy Agreement."

Catto and other officials said that intelligence authorities were insistent on obtaining such a formal agreement from reporters before divulging highly sensitive information to them.

After the reporters unanimously refused to sign, officials reconsidered and agreed to go ahead with the briefing on the understanding that the material would be off the record and usable only as background matter for future articles.

[From the New York Times, Dec. 15, 1982] REPORTERS BALK AT SECRECY PLEDGE: PENTA-GON, IN UNUSUAL MOVE, ASKED JOURNAL-ISTS TO SIGN AGREEMENT ON BRIEFING

### (By Philip Taubman)

Washington, Dec. 14.—The Defense Department today took the unusual step of asking reporters to sign a secrecy agreement before attending a briefing about Soviet military capabilities.

The secrecy agreement stipulated that the reporters never disclose "in writing, broadcast or any verbal discourse" the information they would hear. It also required the journalists to report to the Pentagon any effort made by others to obtain the sensitive information.

When the reporters balked at signing the agreement, senior officials in the department settled for their verbal word of honor.

The New York Times declined to send a correspondent to the briefing because of the restrictive conditions. Richard Gross, a correspondent for United Press International, left the session after the discussion about the secrecy agreement.

## A "CONFLICTING ASSIGNMENT"

According to one reporter who was there, among those who attended it were representatives from the three commercial television networks, The Wall Street Journal, The Los Angeles Times, The Baltimore Sun, The Associated Press and Newsweek.

George Wilson, Pentagon correspondent for The Washington Post, said he did not know about the restrictive rules but had not attended the session because he had a "conflicting assignment."

flicting assignment."
Seymour Topping, managing editor of The New York Times, issued this statement:
"The Times does not enter into agreements that bar a reporter from sharing information with readers or responsible editors. The extraordinary agreement proposed by the Defense Department does not serve national security but simply tends to confuse the issues and consequently the public."

One reporter who was present, Fred Hoffman of The Associated Press, said that he rarely accepted information off the record but thought in this case that it would be educational

### 45-MINUTE ARGUMENT ENSUES

In a scene that some participants later said seemed to be drawn from the pages of "Alice in the Wonderland," the reporters and department officials spent the first 45 minutes arguing over the conditions for handling information that could not be told to the public.

The sequence of events that produced today's briefing began several weeks ago, when Defense Secretary Caspar W. Weinberger invited correspondents who regularly cover the Pentagon to come to his office for a background briefing on military matters.

In the meeting, which was attended by about 15 reporters, Mr. Weinberger said that the Soviet Union posed a serious and omninous military threat to the United States, according to several reporters who attended the session. When Mr. Weinberger was pressed to support the contention, he said he would try to arrange an intelligence briefing on the subject for reporters.

However, officials from the Defense Intelligence Agency and the Central Intelligence Agency, according to Pentagon sources, were reluctant to provide reporters with highly classified information, even on the understanding that the material would not be published or broadcast.

### AGREEMENT PROVES UNACCEPTABLE

The problem was resolved, according to intelligence officials, when the Defense Department then offered to make reporters sign a secrecy agreement that would underscore the off-the-record ground rules of the briefing.

But the agreement drafted by Pentagon attorneys and public relations officials proved unacceptable to the reporters when it was announced today.

When the reporters were admitted to a Pentagon briefing room across the hall from Mr. Weinberger's office, officials handled them a one-page form entitled "Department of Defense Secrecy Agreement." After noting that the reporters would re-

After noting that the reporters would receive "highly sensitive intelligence information which concerns the security of the United States and belongs to the United States Government," the agreement stipulated that the journalists would never disclose the information to anyone, including their editors, in any form. In addition, it called on the reporters to notify the department immediately if anyone attempted to solicit the information from them.

### MODIFICATIONS ALSO REJECTED

When the correspondents refused to sign the agreement, Defense Department officials left the room for 10 minutes, then returned with a proposed modification in some of the language, according to one of the reporters who was present.

The journalists also rejected the modifications, prompting the officials to huddle for another private discussion. After the second break, the officials said they would accept a verbal pledge to abide by the agreement.

Gen. Richard G. Stilwell, Deputy Under Secretary of Defense for Policy, then read a roll-call of the reporters present, asking each if he agreed to give his word of honor not to disclose any of the information, several of the correspondents said. All the reporters present responded affirmatively.

"I've been to a lot of off-the-record briefings but never one where they asked reporters to sign a secrecy agreement," said one veteran Pentagon correspondent who attended today's session. Pentagon officials said they could not recall any previous

effort to gain the approval of reporters for a secrecy agreement.

Mr. ROBERT C. BYRD. Mr. President, I would like to thank the Senator from Delaware for his legal assessment of the issues involved. He has done a lot of good work on this subject in the past. I know that his feelings

are highly respected.

I wonder if the Senator from Delaware would comment on another facet of the situation which bothers me, and that is the apparent politicization by the Pentagon of the intelligence process. I recall how often we have heard the stories about selected leaking during the Vietnam years and how the whole intelligence process was abused at that time. I have complained about such leaks to the press with respect to the Stealth aircraft and upon one occasion wrote to President Reagan to express my deep concern about the apparent leaks in that regard, and asked that the administration conduct an investigation of those leaks, and nothing ever came of the investigation in that instance.

If we are witnessing selected briefing of the media in an effort to "sell" our Nation's defense programs and we are seeing efforts to have the media sign off on secrecy requests, I think that the media has acted properly in balking at that request. I wonder if we have learned anything at all from the

lessons of the past.

Mr. BIDEN. As usual, the Democratic leader goes to the heart of the matter. I think he has raised the most fundamental and serious issue of all. We simply cannot have slanted information, or selected bits and pieces of information, presented to the American people. That is what is so wrong about the business that went on at the briefing. Our Government cannot be in the business of propagandizing to

its own people.

One of the things I would like to point out here is that just prior to that briefing that reporters received at the Pentagon, I, as a member of the Intelligence Committee and the leader, as an ex officio member of that committee, sat in a room, sequestered upstairs under the dome of the Capitol, going through electronic devices as you walked in and being monitored by people inside the room and outside the room, sequestered from the press, and told things that, in fact, were not only what the press was apparently told but more that would least raise questions about the administration's policy, and here the administration comes along through the Pentagon and gives the one side of the issue. making it look like they have, in fact, total justification for what they are going forward with without the benefit of people like myself and the leader and many others, Republicans included, on that committee who have serious doubts about the wisdom of what they presented to us in that closed briefing.

So what we are confronted with is that we on the Intelligence Committee who have access to information-in fact, given the whole picture, in my view, those who doubt the administration's policy are required to remain mute while the Pentagon leaks selective secret information to the press in order to make its case.

I, for one, believe that there should be a full investigation conducted by the Intelligence Committee to get to

the bottom of this affair.

I should note, Mr. President, that I have been on that committee since its inception. The minority leader's predecessor, Senator Mansfield, appointed me to it and the Senator from West Virginia in successive years asked me to stay on that committee. Out there in the hinterlands, whether you are talking to the Veterans of Foreign Wars or whomever, there was the assumption that the people who leak around this body are the Congresspersons and the Senators. We were told, when this administration began its tenure in office, that they wanted to tighten up the rules because leaking was taking place, and leaking was taking place, although they were never able to show one instance of it. from the Intelligence Committee, And here we are back in the process not unlike the one the Senator raised in the Vietnam days of selectively leaking classified information that, in fact, makes the administration's case, but I should note only makes that case partially known.

I trust that the President had no knowledge of this and I would like to assume that he would undertake an in-

quiry, as well.
Mr. ROBERT C. BYRD. Mr. President, I thank the Senator. I, too, would like to hope he had no previous knowledge of it and I would hope that he would make an inquiry on his own. I would be happy to join with the Senator in writing to the President urging him to proceed with an investigation of this matter on his own. I should think he would be disturbed; he should be concerned.

I suggest that the distinguished Senator draft a letter, and I will be glad to join in it, if he wishes, asking the President to proceed to inquire about the matter and conduct an investigation of his own as to how these things happened. They should not happen.

Mr. BIDEN. Mr. President, I will be delighted to do that and I will do that. Mr. ROBERT C. BYRD. I thank the

Senator.

Mr. BIDEN. I thank the distinguished majority leader.

Mr. STEVENS. Mr. President, I sug-

gest the absence of a quorum.

The PRESIDING OFFICER (Mr. ARMSTRONG). The clerk will call the

The legislative clerk called the roll. Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

### EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I am advised that negotiations are still underway. They may or may not well lead to a resolution of at least some of the problems before us.

I ask unanimous consent, Mr. President, in order to create more time for that, that the time for the transaction of routine morning business be extended under the same terms and conditions until not later than 1:45.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SPECTER). Without objection, it is so ordered.

### TRIBUTE TO TENNESSEE HEROINE-RUTH ANN LOWERY

Mr. SASSER. Mr. President, I rise to pay tribute to Ruth Ann Lowery, of Erin, Tenn. This valiant young woman is being honored on December 18 at a banquet sponsored by the Houston County Rescue Squad. The American Red Cross is presenting her with their certificate of merit on that evening.

Due to the quick action by Ms. Lowery, William Lee Hughes of Erin is alive today. Last August 2, Ruth Ann Lowery was quietly doing her job at an Erin restaurant. Then someone sounded the alarm that a man had fallen 35 feet off a highway bridge nearby into the Erin Creek.

Ms. Lowery, trained as a cardiopulmonary resuscitation instructor by the American Red Cross knew just what to do. She sped to the creek and pulled William Lee Hughes to dry land.

He had ceased breathing and his heart was not functioning. The CPR procedures undertaken by Ruth Ann Lowery successfully revived Mr. Hughes. Her timely action literally saved his life.

So, I want to add my tribute to those being paid to Ruth Ann Lowery by the Houston County Rescue Squad, the American Red Cross, the people of Erin, Tenn., and, I am sure, Mr. Hughes himself. She is a brave and gallant young lady who well deserves this recognition.

# TRIBUTE TO SENATOR NICK BRADY

Mr. PROXMIRE. Mr. President, in the 25 years plus I have served on the Senate Banking Committee we have never had a member as clearly well qualified for the job as Senator Nick BRADY. Senator BRADY served in the Senate for only 8 months. As a new Senator and as a new member of our Banking Committee he has been understandably reluctant to move in and "take over," although he certainly has the ability, the intelligence, and the experience to do exactly that. But as a quiet, thoughtful member he has provided the kind of behind-the-scenes advice and understanding of the complications of business and finance that are so essential to this committee that has such a central economic role to play in our country.

Today, the Wall Street Journal carries a short article about Senator Brady, and his evaluation of the strengths and weaknesses of this body. Senator Brady observes that although many Members of this Senate have outstanding ability and intelligence, the place operates very badly in some respects, is sadly wasting time and

energy.

The article by Albert Hunt provides the kind of insights about the Senate all of us can learn from, and I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

An Executive's Inside Look at U.S. Senate (By Albert R. Hunt)

Washington.—When Wall Street pals of businessman Nick Brady ask about his experience as a U.S. senator, they may be surprised by some of his answers.

"the people here are of a higher caliber than I imagined in my fondest dreams," says Sen. Brady, a New Jersey Republican. "But the place doesn't work very well. It is

very frustrating.

Nicholas Brady's expertise, as he is quick to concede, is limited; he only arrived here in April to fill the eight months left in the term of Sen. Harrison Williams, who was forced to resign over his involvement in the Abscam scandal. Still, Sen. Brady notes that his non-political future has been "liberating" in helping him serve in and evaluate the Senate.

Moreover, Mr. Brady's background—he was a managing director of the securities firm of Dillon, Read & Co. and chairman of Purolator Inc. before coming to the Senate—offers an unusual opportunity for a major business leader to participate first-hand in the legislative process.

In a leisurely hour-long conversation, Sen. Brady seems surprised at the intelligence and competence of some of his fellow law-makers. "Many of these senators are as bright, perhaps brighter, than anyone I've known on Wall Street," says Mr. Brady, who expects to return next month to Dillon, Read.

He cites Senate Majority Leader Howard Baker (R., Tenn.) as "one of the most capable leaders" he has encountered in any field. Of the Senate Finance Committee chairman, Robert Dole (R., Kan.), he says, "Watching Bob Dole manage legislation, it's hard to think of any job he couldn't handle." And the Senate Budget Committee chairman, Pete Domenici (R., N.M.), impresses Mr. Brady as a man of "enormous capability" and prodigious work habits.

He also has been highly impressed with several Democrats. He says he often seeks advice from Louisiana Democratic Sen. Russell Long, "who is so knowledgeable about the (legislative) process." On military matters—Sen. Brady serves on the Armed Services Committee—he admits to sometimes being dazzled by the complexities and says he often looks to Sen. Nunn (D., Ga.) for guidance. And he speaks well of the senior New Jersey senator, Democrat Bill Bradley: "I think we've really worked very well together."

### MISUSE OF TIME CITED

Probably more out of politeness than politics, Sen. Brady is reluctant to criticize his colleagues by name. But he has little use for the tactics of the New Right, hard-core conservatives. He recalls with dismay the weeks spent debating abortion and school prayer as part of the debt-limit bill. "As important as those issues are, that was time we could have used on the economy," he declares.

But misuse of time and an inability to focus on significant matters is commonplace in the Senate, Mr. Brady believes. "I have voted over 300 times since April," he notes. "You shouldn't vote on more than 20 or 30 things in a whole year. We waste a lot of time."

The New Jersey Republican concedes that the process is so hectic that he hasn't been able to think carefully about necessary changes. But he has formed some tentative conclusions.

First, he thinks both House members and senators should be limited to 12 years of service. "I know that would lose the valuable experience of the Scoop Jacksons."—Democratic Sen. Henry Jackson, the 30-year veteran from Washington state—"but the reelection business is such a problem here."

### FINANCING CAMPAIGNS

He thinks a panel ought to be named to study Senate processes, including committees and workloads and allocation of time. He says Majority Leader Baker has told him that some former senators already are preparing to undertake this task.

Sen. Brady, a mainstream Republican, also thinks the system of campaign financing needs overhaul. "It's incredible how costly and time-consuming it is to finance a campaign today," he says. He would support requiring federally licensed TV stations to make time available for campaign messages and allowing the use of some public money for congressional campaigns.

Not surprisingly, the Wall Street executive is horrified by the pay here—members of Congress earn \$60,662.50 a year—and thinks salaries ought to be "significantly" increased. "We pay corporate executives and baseball and basketball players and rock stars \$1 million and don't worry about it. But we hold our national legislators to \$60,662.50. That's very shortsighted, and if it continues we'll end up with either only millionaires or people who can't get any other job."

Sen. Brady is amazed at how little the business and political worlds seem to understand one another. "Senators will come up to me and ask, 'Why doesn't Wall Street lower interest rates,'" he says. "And people on Wall Street ask, 'Why doesn't the Senate balance the budget.'" He doesn't offer any solution to these misunderstandings, but he wishes that financial and political leaders would spend more time learning about each other.

On economic matters, he continues to support the basics of Reaganomics, though he favors more emphasis on reducing the budget-deficit than on cutting taxes. And he supports Washington's favorite new whipping boy, Federal Reserve Board Chairman Paul Volcker. "I've told anyone at the White House who will listen that Paul Volcker ought to be reappointed next year," he says. "I don't agree with everything he has done, but overall he has done a great job and his reappointment would be a good signal." Mr. Volcker's term as Fed chairman expires Aug. 1.

While his Senate stint has had its share of frustrations, Sen. Brady will return to Wall Street with very favorable memories of Washington. "I'm not looking to stay," he notes, "but I wouldn't trade my eight months here for any other experience I've had in my life."

AGRICULTURE APPROPRIA-TIONS, 1983—CONFERENCE RE-PORT

#### STATEMENT OF CLARIFICATION

Mr. ANDREWS. Mr. President, I want to clear up a misimpression that was given to this body last night in comments made by the Senator from Missouri, Senator EAGLETON, in reference to language contained in the statement of managers on the conference agreement on H.R. 7072, the fiscal year 1983 Agricultural Appropriations Act.

Senator Eagleron led this body to believe that the language does not affect regulations which were issued by the Department of Agriculture in November of 1980 which imposed a limit on sugar contained in cereals of 6 grams per ounce.

The amendment that I offered and the discussion in conference with the House centered upon these regulations because there is no real scientific basis for imposing such a limit.

The record of the floor debate on this conference report in the other body yesterday clearly demonstrates that the intent of the language—"any modification in the WIC food package not yet implemented"—shows that the understanding we achieved with the House was to delay implementation of those 1980 regulations pending a demonstration that the standards are based on comprehensive scientific evidence.

Mr. President, it makes absolutely no sense for us to say that the standard agreed to by the conferees applies to any prospective changes and not those which are on this day not officially required.

The Department of Agriculture cannot pick and choose which view it wants to follow. It must delay the 1980 regulations in accordance with the

conference report.

Mr. President, following is an explanation of the action taken by the conference committee regarding the WIC food package because there seems to be a lot of confusion and misunderstanding about what our action means. The fact is that USDA took action on the basis of unproven assertions and, in our view, USDA must be more careful and set a higher standard when its actions will adversely affect agricultural markets.

Let me give a bit of perspective.

WIC was created by Congress in 1972 to prevent iron deficiency anemia-which is particularly prevalent in low income women and children because of their high physiological need for iron during years of growth and development.

It is a fact that WIC has improved the iron status of participants, preventing development of anemia or mitigating its dangerous impacts.

The surveys which show that WIC is a success were made during times when there was no restriction of the amount of sucrose and other sugars in the breakfast cereals.

The fortified breakfast cereals provide the only major source of such iron in the WIC food package.

So we must wonder why, on November 12, 1980, USDA issued final food package regulations that imposed such a limit on maximum sucrose content?

The explanatory material which was published with the final rule makes it clear that certain unqualified lay persons had evloved a consensus that breakfast cereals should have no more than 4 to 6 grams of sucrose per serving.

Presweetened cereals were said to cause obesity, diabetes, heart disease, and dental caries. But WIC participants need additional calories, and USDA did not rest its rule on the obesity allegation. Then, since there is no evidence linking current levels of sugar consumption with diabetes or heart disease-or with health conditions of WIC participants-USDA declined to rest its rule on the second and third allegations. This left, as a rationale, the association of sugar with dental caries, although the preamble acknowledges that limiting sucrose content of breakfast cereals will not solve the problem of dental caries.

That is an understatement.

Research on dental caries shows that the absolute amount of sugar consumed is not directly related to the incidence of caries, rather the form and frequency of consumption are much more important. Therefore, a rule which limits amounts, starts off on the wrong foot.

It is also well recognized that dental caries results from dissolution of tooth enamel by acid produced by oral bacteria which act upon any fermentable

demonstrated understanding or our carbohydrate which is consumed and which is retained in the mouth or sticks to the teeth or between the teeth. What, then, is the good of limiting only one substance?

Furthermore, the only research on the incidence of dental caries under conditions that are identical to the patterns of consumption of cereals in the WIC program does not show any association between consumption of presweetened cereals and increased dental caries.

Finally, U.S. Government research shows that the incidence of dental caries in school age children has decreased 25 to 36 percent-depending on age-within the past decade. The problem of dental caries is being solved without Federal Government pronouncements and involvements.

On a more general health level, responsible scientists do not believe that it is possible to impose a limit on a single constituent of a food in order to improve or enhance a total diet, including Dr. Mark Hegsted, who at the time was the head of the USDA's Human Nutrition Center.

USDA, without any scientific data in support of any limit at any particular level, selected the 6 gram level because it would allow a greater variety of cereal choices than the 4 gram limit.

We are led to the inescapable conclusion that the Department's 6 gram per serving limit has no rational basis in scientific research.

Publication of a Government sanctioned restriction on sucrose adversely affects markets for food products and for commodities. Such a restriction, therefore, ought not to be published without good cause and firm support from science

Now sucrose and other sugars have been recognized as safe for human consumption as food for as many years as the FDA has had authority to regulate the safety of the U.S. food supply. Sucrose and other natural sugars are GRAS.

Within the past month, this safe status has been reaffirmed.

Total consumption of sugar has remained approximately the same for 60 years, FDA figures show no increased trends.

Sugar is also a food for the bacteria that causes dental caries, but the amount of sugar is not directly related to the incidence of caries.

Presweetened breakfast cereals as they are typically consumed have not been shown to be associated with an increased incidence of dental caries.

Overall, the incidence of dental caries in school age children has been declining, probably due to the public

health measures of water fluoridation.
The recipients of WIC foods are a special subgroup of the population whose nutritional requirements differ from those of the rest of the population, because, among other things,

they need calories and they need iron. Therefore the dietary prescriptions that might make sense for a middle class, sedentary, affluent group of persons, have little relevance to WIC mothers and young growing children.

While USDA never precisely identified the nutrition education principles it alleges will be violated by consumption of presweetened cereal, the only possible notion is one that says that if a child eats these cereals, then as an adult, he or she will over indulge in other sweets-pies, cakes, cookies, doughnuts. It may be conceded that as an adult, these pies, cakes, cookies, and so forth, should be consumed in moderation, because many adults cannot metabolize extra calories whether from fat, protein or carbohydrates. However, this concession does not supply the missing link in the logic of the assertion-there are no facts to show that childhood consumption patterns-specifically eating presweetened cereals-determine adult consumption patterns. Science has found that human preferences for sweet substances is innate—it is not an acquired or learned preference.

The breakfast cereals are provided by WIC because they supply more than energy. The breakfast cereals supply the only significant source of dietary iron in the food package. Cereal grains are recognized as the preferred carrier of nutrients in our long-standing public health programs of fortification to prevent diseases which have dietary causes.

Fortified presweetened cereals provide the same nutrients as fortified unsweetened cereals and for many children and teenage mothers can assure that cereals-and the iron they contain-will be consumed each day or several times per week.

The prices of cereals cannot justify a limit either. Fortified cereals are generally more expensive, but that is not necessarily related to sucrose content. WIC allows only fortified cereals so that comparing costs of unfortified cereals is misleading.

The argument over cost also presumes that no sugar is added from the sugar bowl. In fact, breakast cereals are consumed with sugar added one way or the other.

We all recognize that admonitions in an appropriations bill have no binding effect on the Department, but we in the Congress have indicated our dissatisfaction with a prescription for WIC foods that on a national basis are not supported by comprehensive scientific evidence. Therefore, should USDA seek to finally implement its 1980 rules, it would be in disregard of the wishes of Congress.

Nonetheless, since the 1980 regulations are final, they cannot be changed except through the rulemaking process of the Administrative Proty to comment and to consider the scientific evidence.

The process requires that the Department publish proposed regula-tions, allow a period for comment, and then publish new final regulations. The difference in this rulemaking as compared to the last round, is that USDA will be required to clearly utilize standards based on comprehensive scientific evidence concerning the food as a whole and not just with regard to a single component.

During the period in which USDA is formulating new food package regulations. States may follow either the prior regulations-with no limit-or the 1980 regulations—with the 6 gram limit. They have this option and will continue to have it until the pending rule is implemented or a new rule is formulated. A new rule will stipulate whether the cap on sugar content will be removed, raised, or lowered.

By its general phrasing, the lan-guage will assure that any future attempts to limit other commodities will be scientifically justified prior to being implemented. This result is not unfair. It is not a capitulation to pressure from any group. But it does assure Government by reason and not by whim.

### SENATOR LEAHY ON THE NUCLEAR FREEZE

Mr. KENNEDY. Mr. President, the greatest peril facing America and the world today is the threat of nuclear war. The already deteriorating stability of the nuclear balance is being further undermined by a new spiral in the nuclear arms race.

On Veterans Day, at Bucknell University, my good friend and colleague from Vermont, Senator PATRICK J. LEAHY, delivered a thoughtful and eloquent speech which addresses this challenge in a straightforward manner. Senator LEAHY calls for a mutual and verifiable nuclear weapons freeze, as a first step toward major reductions. He highlights the vital role that the grassroots campaign for a freeze has played in turning the United States Government's attention toward arms control:

Further shaken by the lurid pronouncements of the Reagan Administration on nuclear war, people began to talk, to exchange ideas and finally, in the local freeze referendums, to act. The movement snowballed until it has gained not only national, but international attention.

As the massive vote on November 2 for a nuclear freeze demonstrates, in the coming months there is going to be an intense debate in the country over how to halt the nuclear arms race. I am convinced that the surprising strength of the movement has already played a positive role in influencing the President to begin the START talks.

Senator Leany is an original cosponsor of the joint resolution for a nucle-

cedure Act, which gives an opportuni- ar weapons freeze and reductions which Senator HATFIELD and I have introduced during this session of Congress. His address merits the attention of all Americans concerned about the fate of their country and the world. I commend this outstanding speech to my colleagues, and ask that it be printed in full at this point in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR PATRICK J. LEAHY

November 11 is a particuarly apt day for Americans to gather for a discussion of nuclear weapons and the future of mankind.

This was once called "Armistice Day" in memory of those who perished in World War I-the war to end all wars. Now, after a second global conflict and some smaller "limited" wars we call it "Veterans Day." But whatever the name, it is a time to think about those who have died in man's endless struggles . . . and to consider whether we, poised on the edge of the nuclear abyss, can find a way to avoid the final catastrophe of human history.

As devastating as it was, the death and de-struction of World Wars One and Two was nothing compared to what the world might experience in a nuclear exchange. I am not going to dwell on the ghastly statistics of nuclear "megadeath." Others are doing a fine job in bringing home to the American people what the effects of a nuclear war would be. Instead, today, I want to talk about what might be done to lessen the chances of a holocaust that will deprive our children and grandchildren of their future.

For far too long, the weapons, strategy and arms control policies of the nuclear age have been the province of political and military leaders, bureaucrats and strategic "experts," while ordinary citizens remained apathetic or overawed by the complexity of the subject.

We simply cannot afford that attitude anymore. In the years after Hiroshima and Nagasaki, many people thought mankind would at least reshape its ideas about war and international relations. Echoing this hope, President Harry Truman once said, "The release of atomic energy constitutes a new force too revolutionary to consider in the framework of old ideas.

But that change of mentality has not happened. Thirty seven years after scientists and soldiers stared awestruck at the first Titanic nuclear blast, we find ourselves instead in the dilemma foreseen by Albert Einstein: "The unleashed power of the atom has changed everything save our modes of thinking, and thus we drift toward unparal-leled catastrophe."

Secretary of Defense Weinberger plans for "protracted" nuclear war in which the United States will prevail (his euphemism for "win") over the Soviet Union-a "win" at a cost of one hundred forty million Americans lives. President Reagan speaks of "limited nuclear exchanges," while his Administration develops "crisis relocation plans" to hold down casualties. The Administration asserts the Soviet Union has a strategic edge in nuclear weapons which has opened a "window of vulnerability." To redress this imbalance, it argues, the United States must introduce a new generation of nuclear weapons to restore a "margin of safety.

Since the late 1940's, we and the Soviet Union have continued to develop, test, produce and deploy more strategic warheads

(now approaching ten thousand for each side) on increasingly accurate missiles and better bombers. The military establishments of both countries continue to reshape strategies and forces away from the deter-rent doctrines of the past. The point is we are captives of weapons technology that is rapidly leading us toward a future in which forces will be on hair trigger alert to wage limited and prolonged war.

Einstein was correct. Our modes of think-

ing have not changed.

Sensing the futility of piling on weapons, American Presidents have struggled consistently since the dawn of the atomic era to gain control of the nuclear competition. Yet, the Limited Test Ban Treaty, the Anti Ballistic Missile Treaty, the SALT I Interim Agreement, and the SALT II Treaty, although important, have not led to a halt or even much of a slowing of the nuclear treadmill. The value of arms control itself has been questioned by many senior officials of the present Administration. In fact, President Reagan has opposed every nuclear arms control agreement ever negotiated by the United States.

What has gone wrong? Can we who believe a nuclear balance exists and that additional deadly weapons will not increase our security do anything to revive hope? I think we can.

Before elaborating on that assertion, let me briefly review the current arms control situation so that we can understand the dimensions of the challenge.

In 1979, the U.S. and the Soviet Union concluded the SALT II Treaty. I strongly supported that agreement, although like many proponents I was disappointed that so little in the way of reductions and limitations had been achieved after seven long years of negotiations. Linking ratification of the Treaty to Soviet actions in Cuba and Afghanistan killed it. That was foolish, because SALT II was in our security interests, and sacrificing it did not moderate Soviet

As you may remember, Ronald Reagan attacked the SALT Treaty as "fatally flawed," but today he has chosen to abide by it informally. His objections were that it apparently gave the Soviet Union too many advantages, especially in land-based missiles with multiple warheads.

He rejects the position of his predecessors that a condition of strategic parity exists. Instead, he claims the Soviet Union has a lead which can be rectified only by a major American buildup, or by a combination of buildup and very substantial reductions in the Soviet ICBM arsenal.

In June of this year, after nearly eighteen months of delay, the Administration finally initiated the START talks with the Soviet Union. Although information is scanty, newspaper reports indicate the positions of the two sides are poles apart. The U.S. has proposed that the sides accept a ceiling of 850 strategic missiles and a reduction to 5,000 ballistic missile warheads, of which no more than 2,500 can be carried on ICBMs. The proposal evidently makes no mention of limits on bombers and cruise missiles in the first phase of negotiations.

The Soviets reportedly are prepared to reduce the SALT II ceiling on missiles and bombers combined from 2,250 to 1,800. But they also want limits on bombers and cruise missiles, and some allowance to compensate

for Chinese nuclear forces.

There is a second set of negotiations as well. These deal with the Intermediate Range Forces deployed in Europe. There,

the United States has proposed to cancel its plans to deploy 464 ground-launched cruise missiles and 108 Pershing II ballistic missiles in Western Europe beginning next year. The condition is that the Soviets totally dismantle their older SS-4s and SS-5s and more modern SS-20s, totaling about 600 or so missiles.

For their part, the Soviets are said to favor a mutual ceiling of 300 missiles on each side, except that the U.S. would have to count its nuclear bombers in Europe and British and French strategic missiles. This would mean no deployment of Pershings and ground-launched cruise missiles. The Soviet argument is that there is a rough INF balance now, and they are prepared to reduce from that base.

I am of course pleased that President Reagan has finally abandoned his belief in linkage and has begun negotiations. It is vitally important that the two superpowers are again talking together about nuclear weapons.

Nevertheless, I am skeptical about prospects for early progress in the START and INF negotiations. Each side seems to be trying to use the negotiations to gain some supposed military advantage. In START, for example, the U.S. proposal would require the Soviet Union to dismantle some 65 percent of its ICBMs and more than 50 percent of its land-based missile warheads. ICBMs constitute more than two-thirds of the entire strategic force of the Soviet Union. There is virtually no chance Moscow will agree to such a reduction, especially since the U.S. could actually increase its present level of ICBM warheads under the 2,500 ceiling. Moreover, the U.S. currently plans to deploy 3,000 Air-Launched Cruise missiles on B-52s and the B-1. The U.S. proposal is clearly tailored not to interfere with the B-1 bomber, cruise missile, M-X and Trident II programs.

The Soviet proposal offers not much more reason for optimism. It would lower the SALT II ceiling modestly in exchange for significant limits on new American ballistic and cruise missiles, which will be technologically superior to anything the Russians have. The Soviet aim clearly is to hold onto their numerical lead in ICBMs while constraining our new programs which will pose a serious threat to Soviet land-based missiles in the 1990s. Interestingly, however, the Soviets have evidently offered an overall limit on the number of deliverable warheads—a warhead freeze, if you will.

Similar criticisms apply to the INF talks. The U.S. "zero deployments" proposal has all the earmarks of a propaganda device to undercut the momentum of the anti-nuclear groups in Europe. I suspect the Administration would be amazed if the Soviets actually accepted. What then would happen to our Pershing and ground-launched cruise missile programs which are nearing deployment? However, the programs are safe, because the Soviet Union is extremely unlikely to dismantle all its new SS-20s, leaving it with no balance to the French and British deterrent forces.

So, the prospect in those talks, also, is prolonged negotiations and stalemate while both sides proceed with deployment plans—that is, if European publics do not force their governments to back out of the NATO modernization program. If that happens as the result of unilateral decisions by the allies and not as the outcome of an arms control agreement, it could be an unprecedented blow to NATO. "Fortress America" tendencies here could be stimulated.

Having painted this grim picture, how do I justify my statement that there is something positive that can be done? It is because of my growing conviction that within the nuclear freeze movement germinates an idea that can recapture the support of the American people for nuclear arms control.

The nuclear freeze effort represents an awakening of ordinary citizens from the passivity and deference of the past on matters of nuclear weapons and arms control. The breakup of the national consensus in support of the SALT process clearly surprised and dismayed a great many people. Further shaken by the lurid pronouncements of the Reagan Administration on nuclear war, people began to talk, to exchange ideas and finally, in the local freeze referendums, to act. The movement snowballed until it has gained not only national, but international attention.

As the massive vote on November 2 for a nuclear freeze demonstrates, in the coming months there is going to be an intense debate in this country over how to halt the nuclear arms race. I am convinced that the surprising strength of the movement has already played a positive role by influencing the President to begin the START talks. Its continued growth represents the best chance of pressuring this Administration to make a genuine effort to conclude a START agreement before the 1984 elections. So, its effect has already been major.

I recognize that President Reagan has set his course against the SALT II Treaty. But, when faced with strong pressures, such as opposition to the grain embargo, he has changed his position. Now is the time for the President to heed the American people. The outpouring of support for a nuclear freeze over the last year in votes ranging from town meetings in Vermont to statewide ballots in Wisconsin and California indicates an intense desire for a halt to the arms race. An important and logical step would be for the President to seek immediate Senate approval of the SALT II Treaty. Ratification of SALT would reassure the American people and our allies, set an interim ceiling on the nuclear competition, and codify restraints and definitions that will be important in shortening the negotiations needed for a mutual, verifiable nuclear freeze.

The most critical question now is whether the freeze idea can be shaped into a negotiating proposal that can be a pragmatic, viable alternative to START. Arms control experts have raised legitimate and difficult questions about aspects of the freeze concept: Is it verifiable? Is it negotiable in any reasonable timeframe? How long would it last? What would come afterwards? Some are striving to analyze these issues and to suggest possible answers.

I believe acceptable solutions can be found to define the scope of a verifiable freeze and to work out how it could set the stage for deep reductions. Much can be drawn from existing arms control agreements. I have seen excellent work, and more articles, seminars and studies are planned.

If you accept that the Soviet Union has some meaningful superiority and that additional nuclear weapons will make the United States safer, I will never persuade you a freeze can make sense. On the other hand, if you think that the mutual overkill capability is so redundant that more does not matter, if you agree that neither side will allow the other to seize any decisive advantage, then I urge you to join in stopping the next escalation of the arms race. Unless

halted, it promises to be the most destabilizing and costly ever. Once taken, it may be impossible to devise verifiable ways to control these new weapons. That is why the breathing space a freeze can give to negotiators is so urgent.

I want to conclude with several observations about a freeze which respond to criticisms I have been hearing:

First, a nuclear freeze is not the trendy new idea some of its detractors seem to believe. The Johnson Administration proposed in 1964 that "The U.S., the Soviet Union and their allies should agree to explore a verified freeze of the number and characteristics of strategic nuclear offensive and de-fensive vehicles." In 1970, the Senate overwhelmingly passed a resolution calling on President Nixon to propose an "immediate suspension by the United States and by the Union of Soviet Socialist Republics of the further deployment of all offensive and defensive nuclear strategic weapons systems, subject to national verification or such other measures of observation and inspec-tion as may be appropriate." What is the ABM Treaty but a freeze on anti-ballistic missiles? The SALT I Interim Agreement was a freeze on the numbers of strategic missile launchers. SALT II froze the numbers of warheads permitted on each type of ICBM, froze the deployment of new types of ICBMs with one exemption on each side, froze the production rate of the BACK-FIRE bomber, froze the production of the SS-16 ICBM or any of its components, froze the construction of SS-18 silos-and this is only a partial listing. The comprehensive test ban negotiation was for a freeze on all nuclear weapons testing.

Second, to commit oneself to a basic arms control objective before having worked out the details of a specific proposal is hardly unusual in the arms negotiation process. In SALT I the U.S. spent six months simply discussing the concept of strategic arms control before serious negotiations even began. The Reagan Administration entered office committed to the idea of deep reductions in Soviet ICBMs and took nearly a year and a half to develop the START proposal. My suggestion therefore is much more radical: Let's use the next year or two to move from the basic idea of freezing the arms race to the shape of a concrete proposal. In that way a realistic alternative will be ready should the START process fail.

Third, I have already made clear my doubts about President Reagan's true feelings on arms control. I do not oppose START, I just do not have any faith in it. I hope I am wrong and that he means to halt and reverse the arms race all in a single step. But, I do not believe he does. So, I reject the argument that my support for a freeze undermines the President. All I have to judge his intentions by is his record—and it speaks for itself.

I challenge all of you to participate in the national debate and contribute your thinking to what can go into a freeze proposal. Political leaders must see a consensus for a freeze so that they will take the idea seriously. Arms control experts and the national security bureaucracy have to grasp that the American public is willing to go far in bilateral elimination of weapons and technology. They must see that it will support an agreement in the face of right wing assaults.

Read arms control literature. The jargon takes some getting used to, but at bottom the main issues are not beyond the comprehension of laymen such as ourselves.

Engage in seminars and study groups on the issues. Support reputable and serious arms control organizations. And above all, keep up the pressure on Washington. Interest in Congress is high because interest in America is high. Do what you can to keep it that way.

Over the coming months, I intend to continue speaking out as I have here today, urging everyone to come forward and engage in this debate. Out of it can emerge the tools this country will need to initiate a genuine disarmament negotiation with the Soviet Union. This is a prerequisite for the survival of our planet.

### RELEASE OF KIM DAE-JUNG

Mr. KENNEDY. Mr. President, I welcome the announcement by the South Korean Government that imprisoned political opposition leader Kim Dae-Jung will be released and that other political prisoners are also being considered for early release. I am heartened that Mr. Kim is being transferred from prison to Seoul National University Hospital for medical treatment, and by indications that he and his family will soon come to the United States.

The imminent release of Kim Dae-Jung, and hopefully other political leaders imprisoned with him in connection with the 1980 Kwangju incident, is a true victory for the cause of freedom and human rights in Korea and in other parts of the world, where a person's crime may be nothing more than the expression of his or her legitimate political beliefs. All of us who have worked so long for this result take heart from this renewed evidence that international public opinion can be effective in saving lives and winning freedom for innocent victims in all parts of the world as long as we persevere together. It is my hope, and the hope of all who care about freedom and democracy in the world, that this action represents only the beginning of decisive movement down the road toward true liberalization in Korea.

Until such liberalization becomes reality, however, we must continue actively to express our concern on behalf of all those who remain imprisoned in Korea on political charges. While we strongly support the security of the Republic of Korea and recognize the close nature of our relationship with that nation, we must continue to offer our constant encouragement to those who pursue freedom in that land. I welcome President Chun's decision, and I hope that he and his government will now follow their own example and release all other political prisoners; permit freedom of expression and participation in the political process; and take such steps as will make sustained progress toward democracy, with the full involvement and support of all the people of South Korea.

### COMPREHENSIVE TEST BAN

Mr. KENNEDY. Mr. President, on July 30 of this year, Senator Mathias and I introduced, together with Congressmen Markey, Bedell, and Leach, a joint resolution to prevent nuclear testing. By calling on the President to resume negotiations for a Comprehensive Test Ban Treaty and to submit the already negotiated Threshold Test Ban Treaty and Peaceful Nuclear Explosions Treaty, this resolution seeks to cool down the arms race, curtail nuclear proliferation and prevent the senseless increases and upgrading of nuclear warheads which are bringing the world to the brink of nuclear catastrophe.

These treaties on nuclear testing offer the opportunity not only to reduce the dangers of nuclear war, but to strengthen the security of our Nation. We welcome the support of almost one-third of this Senate in the present Congress; we intend to reintroduce this resolution early next year and will do all we can to achieve its adoption by the next Congress.

Unfortunately, the Reagan administration has disregarded the strong bipartisan expression of support for a complete end to nuclear testing. In fact, this administration cast the only opposing vote to a recent resolution against nuclear testing overwhelmingly passed by the United Nations General Assembly.

In two extremely thoughtful articles for the New York Times, Tom Wicker has made an eloquent and compelling case for passage of the joint resolution to prevent nuclear testing and for the urgent resumption of negotiations for a Comprehensive Test Ban Treaty. I commend these lucid articles to the attention of my colleagues and ask that they be printed at this point in the Record.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 10, 1982] AFTER MX, WHY NOT CTB?

### (By Tom Wicker)

If only he would recognize it, President Reagan's defeat on production funds for the first five MX missiles gives him an opportunity to stop pursuing a strategic arms race and seek, instead, serious limits on the nuclear arsenals of both superpowers.

Unfortunately, Mr. Reagan reacted angrily and Secretary Weinberger even charged that the House vote was "telling the world we are disarming unilaterally." They made it clear that the President would continue to spend his political capital pushing for a nuclear buildup and the chimera of nuclear superiority.

His ability to keep the MX alive, even to get it built, should not be underestimated, despite the large margin of his defeat. But that margin suggests that Congress, and the public to which it apparently listened, might seize the opportunity to swing the nation to a more promising strategic arms policy.

The first step would be passage of resolutions now before the House and the Senate that call for ratification of the Threshold Test Ban and Peaceful Nuclear Explosions treaties already negotiated with the Soviet Union, and—more important—renewed negotiations with Moscow for a comprehensive test ban treaty (known in arms control jarron as CTB).

Mr. Reagan announced last summer that he would not pursue CTB negotiations. But Congress doesn't have to accept that as the final word—not after the 1982 election returns, the House revolt against the MX and its dubious basing scheme, and the President's demonstrable closed mind on such matters. That he recommended dense pack, for example, despite the opposition of a majority of the Joint Chiefs of Staff and Chairman Townes of his own scientific evaluation group, hardly comments the objectivity of his judgment.

Ironically, the opposition of the Joint Chiefs also was a prime reason—together with the Soviet invasion of Afghanistan—why the Carter Administration pulled back from exceptionally promising CTB negotiations in 1980. When the talks lapsed (they were never formally canceled), Moscow had gone further than before or since in agreeing to significant verification steps:

Seismic monitoring stations on Soviet territory and the international exchange of seismic and other testing data.

The principle of on-site inspections within the Soviet Union to remove any doubts left by technological monitoring.

Moscow had also agreed to suspend its program of peaceful nuclear explosions. A draft CTB treaty actually was drawn up, although some issues remained outstanding. But within the Carter Administration, the Joint Chiefs, the national nuclear weapons laboratories and the Department of Energy, aided by influential members of Congress, put up strong resistance; and the deterioration of Soviet-American relations after Afghanistan temporarily destroyed the opportunity for a treaty.

The Reagan Administration clearly does not want that opportunity revived, since it is committed to a nuclear weapons buildup centered on the MX and designed to overcome what President Reagan keeps insisting (again without the support of the Joint Chiefs of Staff) is Soviet nuclear superiority. The Reagan buildup under which an estimated 17,000 new warheads are to be built, would be impossible if a comprehensive test ban were to be agreed upon.

But Mr. Reagan could not ignore Congressional resolutions to revive the threshold and peaceful explosions treaties, and resume CTB negotiations. The first of those treaties would ban the explosion underground of nuclear weapons in excess of 150 kilotons; the second would outlaw the explosion of any nuclear device of more than 150 kilotons, whether or not for peaceful purposes.

Ratifying these treaties, which are not in themselves vital, would tend to ease Soviet-American tensions, and would be a useful step toward completing the comprehensive test ban, on which such significant agreement already has been reached. On-site inspections, after all, would have represented an unprecedented opening of the Soviet system; and such important Soviet concessions signaled Moscow's willingness to limit strategic confrontation with the United States and nuclear weapons competition. (So had its quick accession to the Limited

Test Ban Treaty after President Kennedy proposed it in 1963.)

A comprehensive test ban, in fact, would put a qualitative cap over the nuclear arms race, since it would effectively prevent either side from developing new weapons or improving old ones. That cap would produce a more stable strategic balance between the superpowers and help clear the way for quantitative limits on nuclear weapons, achieved either through the Start talks in Geneva or a negotiated freeze on production and deployment.

Opposition to CTB nevertheless persists, and not just among those who share Ronald Reagan's belief that the Soviet Union has military superiority, but that he can regain it for the U.S. Details of the argument will be developed in another article.

[From the New York Times, Dec. 12, 1982]

## SMALL RISK FOR BIG GAINS

### (By Tom Wicker)

The United Nations resolved last week, by a vote of 111 to 1 with 35 abstentions, that all nuclear tests should be outlawed. The opposing vote was that of the United States, with Deputy Representative Kenneth L. Adelman repeating the ritual position of the Reagan Administration:

"While a prohibition on all nuclear explosions remains, a long-term United States objective, the United States does not believe that, under present circumstances, a comprehensive nuclear test ban would reduce the threat implicit in the existing stockpile of nuclear weapons."

Translation from Reaganese: the Administration does not want a test ban to interfere with its projected nuclear buildup, which will include thousands of new warheads and is designed to overcome what Mr. Reagan insists against the evidence is Soviet nuclear superiority.

But that "long-term objective" Mr. Adelman so casually dismissed is in fact a 20-year, binding American commitment to achieve a comprehensive nuclear test ban. In the Limited Test Ban Treaty of 1963, both Washington and Moscow pledged themselves "to achieve the discontinuance of all test explosions of nuclear weapons for all time." The Nuclear Non-Proliferation Treaty includes a similar pledge. In the U.N. last week, the Soviet Union voted to honor those commitments; "under present circumstances," the U.S. did not.

It was this country, moreover, that in 1980 backed away from a comprehensive test ban (CTB) treaty with the Soviet Union and Britain, after it had been largely agreed to. That treaty included unprecedented Soviet concessions, including seismic monitors on Soviet territory and the principle of on-site inspections.

But opposition from the Joint Chiefs of Staff and the nuclear weapons establishment was fierce; and the Soviet invasion of Afghanistan then prevented completion of the treaty. Last summer, President Reagan said the U.S. would not resume negotiations for a CTB—hence Mr. Adelman's U.N. vote against a solemn U.S. commitment.

He cited as one reason the supposed problems of verification. But verifying a test ban is much easier than verifying an arms control agreement; seismic techniques are constantly being improved; and any low-yield testing that might go undetected would be of little weapons development value. Moscow's opening of its territory to on-site inspection seems well worth this small risk.

Another objection is the diminution in reliability of existing nuclear weapons that might result from lack of testing; critics fear this could mean a decline in the deterrent power of U.S. forces. But a loss of weapons reliability would equally impair any other nation's confidence in its ability to launch a successful nuclear attack. Besides, in the maintenance of reliability, if not in development, new scientific techniques might partially compensate for the lack of tests.

The deepest fear of CTB opponents is that the U.S. cannot compete with the Soviets in conventional forces, and therefore must rely on nuclear weapons and the threat of nuclear retaliation to maintain American security. But a test ban would reduce Soviet-American tensions and put a cap on the growing size and sophistication of superpower nuclear arsenals, reducing the likelihood of their eventual use. And reliance on nuclear forces is not a useful answer to regional but vital security problems in, say, the Persian Gulf area.

The spread of nuclear weapons to other nations is another profound threat to American security: a CTB treaty would be of overriding importance in stopping such proliferation. Near-nuclear powers like Brazil India, Israel and South Africa have refused to sign the non-proliferation treaty but are committed by their ratification of the Limited Test Ban Treaty to accept a comprehensive test ban. Without CTB, one or more of them is all too likely to move on soon to full membership in the nuclear club.

A different kind of problem would be presented by France and China, if they refused to observe a CTB; the Soviets, in particular, could hardly be expected to discontinue testing if the Chinese did not. Barry Blechman, a former official of the Arms Control and Disarmament Agency, has suggested that this problem could be met by a CTB limited to a specified period during which, if any nations continued to test, treaty signatories could reevaluate their positions.

Besides, as the Center for Defense Information pointed out in its November news letter, no nation agreeing to a test ban could be expected to continue observing it if others refused or violated treaty terms; and determining such violations would be a matter of each nation's judgment.

A CTB treaty—so nearly within reach already—therefore offers only small risks for large potential gains. Mr. Reagan won't pursue them voluntarily, but Congress by joint resolution could put severe pressure on him to do so. That would be a sensible sequel to the House vote against the MX.

### CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Time for morning business has expired. Morning business is closed.

### SURFACE TRANSPORTATION ACT OF 1982

The Senate continued with the consideration of the bill (H.R. 6211).

### UP AMENDMENT NO. 1478

The PRESIDING OFFICER. The clerk will state the pending business.

The assistant legislative clerk read as follows:

Unprinted amendment No. 1478 offered by the Senator from Michigan (Mr. Levin).

Mr. BAKER. Mr. President, I am aware that all time for debate has ex-

pired on this amendment, but I am advised that a compromise arrangement has been worked out.

I ask unanimous consent that there may be 5 minutes of further debate so that the compromise may be explained by the Senator from Michigan and the Senator from Kansas.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Senator from Kansas.

### UP AMENDMENT NO. 1482

(Purpose: To provide for additional weeks of Federal supplemental compensation)

Mr. DOLE. Mr. President, I send an amendment to the desk in the nature of a substitute for myself, the distinguished Senator from Michigan (Mr. Levin), the distinguished Senator from Pennsylvania (Mr. Specter), and the distinguished Senator from New Mexico (Mr. Domenici).

The PRESIDING OFFICER. The 5 minutes will have to be used or yielded back before an amendment would be in order.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order at this time to offer an amendment, notwithstanding that rule.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. Dole), for himself and others, proposes an unprinted amendment numbered 1482.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following:

# ADDITIONAL WEEKS OF FEDERAL SUPPLEMENTAL COMPENSATION

SEc. . (a) Section 672(e) of the Tax Equity and Fiscal Responsibility Act of 1982 is amended—

(1) in paragraph (2)(A)(i), by striking out "50" and inserting in lieu thereof "60";

(2) in paragraph (2)(A)(ii), by striking out "6" and inserting in lieu thereof "8"; and

(3) by striking out subparagraphs (B) and (C) of paragraph (2), and inserting in lieu thereof the following:

"(B) In the case of any State, subparagraph (A) shall be applied—

"(i) with respect to weeks during a higher unemployment period, by substituting '15' for '8' in clause (ii) thereof; and

"(ii) with respect to weeks during a high unemployment period, by substituting '13' for '8' in clause (ii) thereof.

"(C) For purposes of Subparagraph (P), the term 'higher unemployment period' means, with respect to any State, the period"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 4.0 per-

cent;

except that no higher unemployment period shall last for a period of less than 4 weeks. "(D) For purposes of subparagraph (B),

the term 'high unemployment period' means, with respect to any State, the

period-

"(i) which begins with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks equals or exceeds 3.5 percent, but is less than 4.0 percent, and

"(ii) which ends with the third week after the first week in which the rate of insured unemployment in the State for the period consisting of such week and the immediately preceding 12 weeks is less than 3.5 percent; or equals or exceeds 6.0 percent;

except that no high unemployment period shall last for a period of less than 4 weeks unless such State enters a period of higher

unemployment.

"(E) Notwithstanding the provisions of subparagraph (D), any State in which an extended benefit period was in effect under the Federal-State Extended Unemployment Compensation Act of 1970 for any week which began on or after June 1, 1982, and before the week for which the compensation is paid, shall be deemed for any week thereafter, for purposes of subparagraph (E), to be in a period of high unemployment, unless such State is actually in a period of higher unemployment and, if such extended benefit period began prior to the week in which this subparagraph is enacted, clause (ii) of subparagraph (B) shall be applied by substituting '14' for '8'.
"(F) In the case of any State which would.

"(F) In the case of any State which would, for a week, be in a period of high unemployment as that term was defined for purposes of this section as in effect on December 15, 1982, but is not in a period of high unemployment or higher unemployment as those terms are defined in subparagraphs (C) and (D), (and as not a State described in subparagraph (E)) subparagraph (A) shall be applied with respect to those weeks by substituting '10' for '8' in clause (ii) thereof.

"(G) For purposes of this subsection, the rate of insured unemployment for any period shall be determined in the same manner as determined for purposes of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970.

"(H) The amount of Federal supplemental compensation payable to an eligible individual shall not exceed the amount in such individual's account established under this

subsection."

(b) The amendments made by subsection
(a) shall apply to Federal supplemental compensation payable for weeks beginning on or after the date of the enactment of this Act. In the case of any eligible individual to whom any Federal supplemental compensation was payable for any week beginning prior to such date of enactment and who exhausted his rights to such compensation (by reason of the payment of all the amount in his Federal supplemental com-

pensation account) prior to the first week beginning on or after such date of enactment, such individual's eligibility for additional weeks of compensation by reason of the amendments made by this section shall not be limited or terminated by reason of any event, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and prior to the date of the enactment of this Act (and such weeks shall not be counted for purposes of determining the expiration of the two years following the end of his benefit year for purposes of section 602(b) of the Tax Equity and Fiscal Responsibility Act of 1982) eligible for any such additional weeks of compensation if he is engaged in employment for any week after such exhaustion of rights which would have disqualified him for Federal supplemental compensation for such week.

(c) The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Tax Equity and Fiscal Responsibility Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provision of law, if any State fails or refuses, within the three-week period beginning on the date the Secretary of Labor proposes such a modification to such State, to enter into such a modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before such threeweek period.

Mr. DOLE. Mr. President, as I understand, there will be a number of additional Members, including Senator METZENBAUM, who would like to be cosponsors. I would suggest that I may submit a list to the desk at the appropriate time with cosponsors from both sides of the aisle.

The cosponsors of Up Amendment No. 1482 are:

Senators Dole, Levin, Specter, Domenici, Byrd, R., Packwood, Dixon, Durenberger, Riegle, Heinz, Kennedy, Danforth, Moynihan, Chafee, Cannon, Percy, Proxmire, Thurmond, Bradley, Boschwitz, Biden, Grassley, Heflin, Jepsen, Bentsen, Sasser, Sarbanes, Quayle, Lugar, and D'Amato.

Mr. President, let me explain what this amendment does.

The substitue I am offering with my colleague, the Senator from New Mexico, (Mr. Domenici) will provide additional weeks of Federal Supplemental Compensation (FSC) benefits in every State. The substitute differs from the Levin amendment in several important ways.

First, the substitute provides 6 additional weeks of FSC to jobless workers in the States hardest hit by unemployment: States with insured unemployment rates at 6 percent or above. The Department of Labor actuaries estimate that some 28 States will fall into this category. Actually, 29 States . I think Maryland will dip into that category.

Second, for States with insured unemployment rates of 4.5 percent to 6 percent, or those that have been on the Federal/State extended benefit program at any time on or after June 1, 1982: Four additional weeks of FSC. There are approximately 11 States in this category.

Third, all other States (11) will have available 2 additional weeks of FSC.

Finally, the Dole/Domenici amendment has a cost of between \$540 million to \$600 million as opposed to the \$980 million cost associated with the Levin amendment. This is an add-on cost to the original \$2.2 billion price tag for the FSC program. The program will still expire on March 31, 1983.

The Dole/Domenici substitute is superior to the Levin amendment in that it more efficiently targets the extra weeks of benefits to those individuals in the States hardest hit by unemployment. The tiered effect of the original plan is retained and enhanced by the substitute. In fact, the State of Michigan will get 1 more week under our proposal than under the previous proposal. I think that has been agreed to by those who have offered the original proposal.

The substitute also provides these additional benefits to jobless workers who have—or will have—exhausted the current FSC duration. Potentially, jobless workers in many States could receive 16 weeks of FSC benefits. The benefits for other jobless workers will range from 14 to 8 weeks as opposed to the current 8 to 6 weeks.

I urge my colleagues to support the substitute.

Mr. President, I will also include in the Record at this point a list of the 28 States that will get 6 additional weeks, 13 States which will get 4 additional weeks, and the 12 States which will receive 2 additional weeks. We are including the Virgin Islands, Puerto Rico, and the District of Columbia. That adds up to 53 rather than 50.

I ask unanimous consent that that list be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

### ADDITIONAL WEEKS

### 6 WEEKS (28)

Alabama, Alaska, Arkansas, California, Idaho, Illinois, Indiana, Iowa, Kentucky, Maine, Michigan, Mississippi, Montana, Nevada, New Jersey, North Carolina, Ohio, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Tennessee, Utah, Vermont, Washington, West Virginia, and Wisconsin.

### 4 WEEKS (13)

Delaware, Georgia, Hawaii, Kansas, Louisiana, Maryland, Massachusetts, Minneso-

<sup>&</sup>lt;sup>1</sup> Maryland is likely to trigger into the 6-week list by Jan. 1, 1983.

ta, Missouri, New Mexico, New York, North Dakota, and Virgin Islands.

2 WEEKS (12)

Arizona, Colorado, Connecticut, District of Columbia, Florida, Nebraska, New Hampshire, Oklahoma, South Dakota, Texas, Virginia, and Wyoming.

Mr. DOLE. Mr. President, I am happy to yield to the Senator from Michigan.

Mr. LEVIN. Mr. President, I thank the Senator for yielding. I ask unanimous consent that the cosponsors of the Levin-Specter amendment be added as cosponsors to this amendment. I also ask unanimous consent that the senior Senator from West Virginia (Mr. Randolph) be added to that list of cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. LEVIN. I am happy to yield.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. STAFFORD). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEVIN. Mr. President, this amendment does what the earlier amendment did. It adds from 2 to 6 weeks of additional Federal supplemental benefits to the existing unemployment compensation. The number of States benefited in each of the categories has already been put into the RECORD by my friend from Kansas. I want to thank him and the Senator from New Mexico (Mr. Domenici) for their cooperation in this matter. I also thank my friend from Pennsylvania (Mr. Specter) who cosponsored this amendment. Without his help, it could not have been achieved.

Mr. DOMENICI addressed the

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I was pleased to work with the distinguished Senator from Kansas and the other concerned Senators in helping to arrive at a solution. I think it is a good compromise. It helps solve the problem in a very responsible manner from the standpoint of fiscal policy. Instead of costing about \$980 million, this amendment will probably cost about \$540 million.

When you look at the end product, it directs the attention where it is needed most.

My own home State is not a State in the highest tier, we are in the middle tier of this amendment. Thousands of unemployed workers will receive 4 more weeks of unemployment compensation instead of going off the rolls between now and March because of this action.

There are other States, such as Michigan, which will get 6 additional weeks of federally funded benefits.

The reason is because of the very, very high unemployment in the State of Michigan.

Mr. President, I am pleased to be an original cosponsor. I think this is the right thing to do. While we are busy trying to produce a highway bill that would cause some significant increase in jobs, while our major effort in fiscal matters is to stimulate the economy, there can be no question that this approach, until we have something better, is a must. I hope we will pass this amendment. It will contribute greatly to the expeditious passing of the highway bill, which will also produce significant new jobs.

As the Senators here know well, the unemployment rate is now 10.8 percent and about 12 million Americans are unemployed. Many thousands of workers are exhausting their unemployment benefits. The amendment before us addresses this acute problem.

When Congress enacted supplemental employment benefits, it was expected that new employment opportunities would emerge during the program's 6-month duration. This has not yet happened; in fact, unemployment has increased

In many States, the insured unemployment rate is so low—despite high total unemployment—that the State has triggered off the 13-week extended benefit program. This includes my own State of New Mexico. The Labor Department expects many States to trigger back on during the first months of the new year, but that help may be too late for many of our citizens.

There is plenty of time in the next Congress to debate whether or not this program should run beyond March 31, 1983. But it would be particularly heartless during this holiday season to let large numbers of workers exhaust their third and last set of unemployment benefits without Congress acting.

The Dole/Domenici substitute targets additional unemployment benefits to all States, but it gives the most weeks to those States which are hit hardest by unemployment.

Those States with the highest levels of unemployment will receive 6 weeks of supplemental benefits in addition to all of their current benefits. States with middle levels of unemployment will receive 4 additional weeks, and the balance of the States will receive 2 additional weeks.

The benefits provided by this amendment are all in addition to the current three tiers of benefits.

In my own State of New Mexico, 5,000 unemployment recipients will receive 4 more weeks of benefits, instead of going off the benefit rolls between now and March 31, 1983.

This amendment provides the assistance our many unemployed citizens

need, it targets the extra benefits where unemployment is highest, and it does all of this in a fiscally responsible manner.

The PRESIDING OFFICER. All time has expired.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may be recognized for 30 seconds.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Kansas, the distinguished Senator from Michigan, and other Senators for their work in reaching this compromise. I think it is a good compromise. I support it. I think it is a compromise that this Senate ought to accept.

Mr. BAKER. Mr. President, will the Senator yield me 5 seconds?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, I wish to join in extending my congratulations to the Senator from Kansas and the Senator from Michigan, I support this compromise.

Mr. HUMPHREY. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Mr. President, it is clear that the pending amendment will result in greater expenditures. Inasmuch as no budget waiver has been produced, I make the point of order that the amendment is out of order and in violation of section 311 of the Budget Act.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HUMPHREY. Objection.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Specter). Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield to the distinguished chairman of the Committee on the Budget.

MOTION TO WAIVE SECTION 311

Mr. DOMENICI. Mr. President, I move, in accordance with section 1804 of the Budget Act, to waive section 311 with respect to the pending amendment of the Senator from Kansas.

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The question is on the motion. The clerk will call the roll to ascertain the presence of a quorum.

The bill clerk proceeded to call the

roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it

is so ordered.

The question is on the motion to waive.

Mr. HARRY F. BYRD, JR., addressed the Chair.

The PRESIDING OFFICER. Debate is not in order at this point.

Mr. HARRY F. BYRD, JR. Mr. President.

Mr. HUMPHREY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. What is the parliamentary situation?

The PRESIDING OFFICER. A motion to waive the Budget Act is pending and all time has expired.

Mr. BAKER. Mr. President, I ask unanimous consent that there be 5 minutes of debate on this motion.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Reserving the right to object, Mr. President—

Mr. BAKER. I was doing it for you. Mr. HUMPHREY. Mr. President, is not the matter debatable without limit?

Mr. ROBERT C. BYRD. Will the majority leader include in his motion that the time is to be divided?

that the time is to be divided?
Mr. BAKER. Mr. President, I ask
unanimous consent that the control of
time be in the usual form and I assign
control of the time to the Senator
from Kansas.

Mr. HUMPHREY. Reserving the right to object, Mr. President, if the majority leader will yield, will the Chair restate the parliamentary situation?

The PRESIDING OFFICER. When a motion is made which is subsidiary to a nondebatable motion, the motion is not debatable. All time had expired on the underlying Levin-Specter amendment, so no time remained. Now we have a unanimous-consent request for 5 minutes' debate equally divided. That is the pending status.

Is there objection?

Mr. HART. Mr. President, reserving the right to object, would it be in order to make a parliamentary inquiry?

The PRESIDING OFFICER. A parliamentary inquiry is in order.

Mr. HART. Was there not a point of order made by the Senator from New Hampshire upon which the Chair had not ruled?

The PRESIDING OFFICER. There is a point of order pending, but there was a motion to suspend for the budget waiver.

Mr. HART. Would it not be in order for the Chair to rule on the point of order?

The PRESIDING OFFICER. The Chair cannot rule until the motion to waive has been acted upon.

Mr. HART. I thank the Chair.

Mr. BAKER. Now, Mr. President, I shall restate my request, that there be 5 minutes equally divided, with control in the usual form.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I designate the Seantor from Kansas (Mr. Dole) to control the time on this side.

Mr. DOLE. Mr. President, I recognize the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. HUMPHREY. Mr. President, I wonder if the floor managers will explain the grounds on which the Budget Act waiver can be sought? Can we explain to constituents why we are proposing to breach the budget resolution?

Mr. BAKER. Mr. President, will the Senator use his microphone so we may hear his question?

Mr. HUMPHREY. I apologize, Mr. President. Will the floor manager explain to us the grounds for seeking the waiver of the Budget Act and on what

grounds we are proposing to breach the budget?

Mr. DOLE. Mr. President, if I may yield to the distinguished Senator from New Mexico, my grounds were getting on with the bill. His grounds will be technical.

Mr. DOMENICI. Mr. President, my reasons are more than technical, I say to my good friend from New Hamp-shire. The way the Budget Act is drawn, this has been seldom used, but clearly, it was intended for emergency situations. I cannot imagine more of an emergency from the standpoint of unemployment compensation running out and our not yet having in place any jobs bill, our not yet having in place any other fiscal policy, waiting for the next few months to develop it while those kinds of benefits will run out. The Senate does not have to agree with the Senator from New Mexico, who has moved that it be waived. It seems to me to be the clear prerogative of any Member of the Senate that in situations like this, they seek it. That is what I have done.

Mr. HUMPHREY. I thank the distinguished chairman of the Budget Committee.

Mr. President, it is true that there is an economic emergency in this country, but I suggest to my colleagues that we are not going to make it any better by worsening the deficit and increasing the Federal presence in the money market, thus increasing pressure upward on rates.

There has been a lot of pious talk in these last few weeks about unemployment and what we should do about it. If we are really sincere and want to do something about it, let us cut spending and stop spending money we do not have. If this budget waiver is approved and we go further into deficit, that is not going to help the unemployment situation, it is going to make it worse. Any elemental understanding of economics will bear that out, I believe.

I urge my colleagues, if they are sincere about unemployment and sincere about hastening economic recovery, to vote against this budget waiver, to vote against worsening the deficit, and vote against a heavier presence of the Federal Government in the credit markets, against sustaining high interest rates or driving them up once again. We have ample opportunity and justification for cutting spending in many places, but none, in the opinion of this Senator, for worsening the deficit.

The PRESIDING OFFICER. Will the Senator suspend? The 2½ minutes allotted to the Senator from Kansas has expired. The minority leader now has 2½ minutes.

Mr. ROBERT C. BYRD. Mr. President, I yield the control on my side to Senator Long.

Mr. LONG. Mr. President, I yield to the Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I wanted to make a parliamentary inquiry. It may not be necessary for me to have the time.

The PRESIDING OFFICER. The Senator from Virginia is recognized for a parliamentary inquiry.

Mr. HARRY F. BYRD, JR. May I say to the Chair, on December 7, in the Congressional Record, page S. 13988, the chairman of the Committee on Appropriations (Mr. HATFIELD) in a speech in the Senate said this:

Were I so disposed, I, or any other Member of the Senate, could make a point of order against the consideration of this bill or any other measure or amendment which provided any increased spending for fiscal year 1983. This is the so-called non-waivable point of order under section 311 of the Congressional Budget Act of 1974 which is intended to prevent any additional spending if the binding limits on budget authority or outlays of the second budget resolution have been breached.

Then he goes on to say that the Senate accepted a provision by the House which automatically converted the first budget resolution into the binding second resolution on October 1.

My parliamentary inquiry is, is the Senator from Oregon correct in his assertion that the point of order is non-waivable?

The PRESIDING OFFICER. If a point of order is raised by section III of the Budget Act, which is part of title III, section 904(b) provides that the provisions of titles III and IV may be waived or suspended by a majority vote of the Senate.

Mr. HARRY F. BYRD, JR. The Senator from Virginia cannot hear or understand the ruling of the Chair.

The PRESIDING OFFICER. The ruling of the Chair referring to the text is that it may be waived by a majority vote of the Senate.

Mr. HARRY F. BYRD, JR. Even though it is a second budget resolution?

The PRESIDING OFFICER. Yes, It may be waived under section 904(b) as it appears on page 434 and 435 of the Senate Procedure Manual.

Mr. HARRY F. BYRD, JR. Then the assertion made on December 7 by the chairman of the Appropriations Committee, I ask the Chair, is an incorrect assertion when he says that it is a nonwaivable point of order under section 311 because it is a part of a second budget resolution?

The PRESIDING OFFICER. To the extent that the comments made by the Senator from Oregon differ from what the Chair just ruled under the language cited, then the Senator from Oregon is incorrect. The Chair is reluctant to make any blanket categorization of what the Senator from Oregon said, but as to the pending provision it is waivable under the language just cited.

Mr. HARRY F. BYRD, JR. Parliamentary inquiry. Then is the Senator from Virginia to understand that under the Budget Act any point of order is waivable at any point?

The PRESIDING OFFICER. Any point of order raised under items 3 and 4 would be waivable by majority vote of the Senate under section 904 (a) and (b).

Mr. HARRY F. BYRD, JR. Is the motion to waive debatable?

The PRESIDING OFFICER. Normally, the motion to waive is debatable, but not to a subsidiary motion, to a motion to an amendment on which the time has expired, so there is no time for debate.

Mr. HARRY F. BYRD, JR. Parliamentary inquiry. The Senate then finds itself in a position where there is \$500 million involved and no time to debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. HARRY F. BYRD, JR. Another parliamentary inquiry. Had the Senate not agreed to a time limitation on another matter, then this \$500 million amendment would be debatable; is that correct?

The PRESIDING OFFICER. The Senator is correct. Had there been no

time limitation on the Levin-Specter amendment, there would now be no time limitation on debate on the budget waiver issue.

Mr. HARRY F. BYRD, JR. I want to assert then for the future that I will have to object to time limitations if the Senate is going to take up matters dealing with \$500 million of tax funds without a moment of debate on it. I think it is an outrageous way to proceed.

Mr. HUMPHREY. Mr. President, I appeal the ruling of the Chair.

The PRESIDING OFFICER. All time for debate has expired.

Mr. HUMPHREY. Mr. President, I appeal the ruling of the Chair.

Mr. BAKER. Mr. President, I move to table the appeal and I ask for the yeas and nays.

Mr. ROBERT C. BYRD. Is an appeal in order? A motion is before the Senate?

The PRESIDING OFFICER. The Chair has made no ruling at the moment.

Mr. ROBERT C. BYRD, I ask for regular order.

The PRESIDING OFFICER. And there is a motion pending for a waiver.

Mr. ROBERT C. BYRD. I ask for regular order.

Mr. HUMPHREY. Mr. President, I move to table the motion and ask for the year and nave.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona Mr. Goldwater, and the Senator from Pennsylvania Mr. Heinz are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio Mr. GLENN is necessarily absent.

The PRESIDING OFFICER (Mr. DURENBERGER). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 5, nays 92, as follows:

### [Rollcall Vote No. 418 Leg.]

#### NOT VOTING-3

Heinz Goldwater Heinz

So the motion to table the motion to waive was rejected.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

Mr. HUMPHREY. Mr. President, I ask for the yeas on the tabling motion.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

#### CALL OF THE ROLL

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HUMPHREY. Objection.

The PRESIDING OFFICER. Objection is heard. The clerk will resume the call of the roll.

The legislative clerk resumed and concluded the call of the roll, and the following Senators entered the Chamber and answered to their names:

The PRESIDING OFFICER. A quorum is present.

The question is on the motion to table the motion to reconsider.

Mr. HUMPHREY. Mr. President, a point of order. The yeas and nays have been ordered.

The PRESIDING OFFICER. The

yeas and nays were denied.

Mr. HUMPHREY. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER. The question is on the motion to table the motion to reconsider.

Mr. HUMPHREY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

#### CALL OF THE ROLL

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. LONG. A point of order, Mr. President. No business has transpired since the last quorum.

The PRESIDING OFFICER. The denial of the yeas and nays is business for the purpose of calling a quorum. The clerk will call the roll.

The legislative clerk proceeded to call the roll, and the following Senators entered the Chamber and answered to their names:

The PRESIDING OFFICER. A quorum is present. The question is on agreeing to the motion to table.

Mr. BAKER. Mr. President—
The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I withdraw the request for recognition.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

The motion was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The pending business is on agreeing to the motion to waive section 311 of the Budget Act.

Mr. BAKER. Have the yeas and nays been ordered on the motion?

The PRESIDING OFFICER. They have not.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that there be 3 minutes of debate on this motion at this time. I designate the Senator from Kansas to handle the time on this side.

Mr. DOLE. Mr. President, I yield my minute and a half to the Senator from

New Hampshire.

Mr. HUMPHREY. Mr. President, I wanted to point out that the continuing resolution is on the calendar and can be taken up at any time, assuming unanimous consent can be obtained. I want to make sure that my colleagues know that I am not holding up that business or any other important business. I hope the leadership will move to the continuing resolution. We have consumed a great amount of time already and the continuing resolution will certainly consume time.

Mr. President, I yield back the re-

mainder of my time.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, a very agreeable resolution has been reached on the amendment. I would hope when we vote on that amendment, the Senate will approve it. Now I hope we can get on about our business. Senators have the right to vote for the amendment or against the amendment. I think we ought to go ahead with our business and get the continuing resolution up and get out of here. I want to make clear that the Members on my side are ready to vote, We may have a few amendments, but we are ready to vote.

Mr. President, we are ready to vote on this amendment, ready to enter into some kind of an agreement that will see final action on this bill as far as we are concerned, and get on with the continuing resolution, which will expire tomorrow night at midnight.

May I say to the majority leader I am going to have a little meeting in a few minutes to get the consensus on

this side of the aisle.

Mr. BAKER. Mr. President, I will wait with bated breath.

Mr. President, if the Senator will yield, I genuinely thank the minority leader for that information. I share with him the desire that we get on with the business at hand.

Let me say what I hope the situation will be. I hope we can finish the highway bill today. There should be no misunderstanding. If we do not, we will do it tomorrow. If we do not do it then, we will continue with it, as far as I am concerned.

It is important that we do the continuing resolution. As much as I admire and respect the Senator from New Hampshire—and he knows I value his advice—I am not going to take that advice. Mr. President, we are not going to take this measure down to go to the CR. We are going to finish this bill if it is humanly possible to do so, and I think we can do that this afternoon or this evening.

Members should be on notice that when we finish this bill we will go to the CR.

I expect now that we will be in session all night trying to deal with the continuing resolution so that Senators can go to conference tomorrow, on Friday, on both the highway bill and the continuing resolution. I hope that we can get out on Friday night or during the day on Saturday.

Mr. ROBERT C. BYRD. Mr. President, if I have a couple of seconds left, I want to make it preeminently clear that there is no disposition on this

side to filibuster this bill.

Mr. RANDOLPH. Mr. President, who has the floor? Senator Dole? Will the able Senator yield?

Mr. DOLE. I will be glad to yield if I have any time.

Mr. RANDOLPH. Mr. President, I am grateful to the Senator.

Mr. President, I hope every Member of the Senate is grateful for the conduct in this rather turbulent time, in this Chamber, exhibited by the everpatient majority leader. We can vote for or against the highway tax bill. I thank the majority leader for what he has been doing. I also thank the able minority leader for what he has been doing. They are asking Members to vote for or against a highly important highway bill. And Senators Dole and Long are advocating that action. I plead with our diligent colleague from New Hampshire to permit all Senators to vote either for or against the measure. Is there any valid reason why my colleague will not allow that to occur?

Mr. HUMPHREY. Mr. President, if the Senator will yield, is he suggesting that he has never used the rules to delay debate?

Mr. RANDOLPH. No, I never have have always voted for cloture. I was one of the five Members who voted for cloture earlier today. I have never believed in filibustering. In my 24 years in this body I have never used that ap-

proach. The Senator is addressing a colleague who disagrees with the use of filibuster. I believe in debating an issue and then voting up or down. Such a procedure is what the membership wants to do at this time.

I cannot tell the Senator how I feel about the tactics being advanced at the moment. I do not feel unkindly toward anyone, especially in this

Christmas season.

The PRESIDING OFFICER. Time has expired.

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed for 30 seconds.

The PRESIDING OFFICER. With-

out objection, it is so ordered. Mr. DOLE. Mr. President, I thank

the Senator from West Virginia for his kind words.

Mr. President, we have been advised by legislative counsel that there are purely technical changes in amendment which should be made. I ask unanimous consent that those technical changes may be made in the amendment.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

The question is on agreeing to the motion to waive section 311 of the Budget Act. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll. Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), the Senator from Pennsylvania (Mr. Heinz), and the Senator from Maryland (Mr. Mathias) are necessary absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessary absent.

The PRESIDING OFFICER. there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 87, nays 9, as follows:

### NAYS-4

Humphrey Armstrong Byrd. Nickles Harry F., Jr.

### NOT VOTING-3

Goldwater Mathias

So Mr. Dole's amendment (UP No. 1482), as modified, was agreed to.

UP AMENDMENT NO. 1478 AS AMENDED

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. What is the pending business, Mr. President?

The PRESIDING OFFICER. The question is on the Levin amendment, as amended.

Mr. LEVIN. Mr. President, I understand the vote is now on the Levin-Specter amendment, as amended.

America's unemployed are increasingly desperate. This amendment will help a bit. Until jobs are available this is the least we can do.

Conscience requires this extension and the adoption of the Levin-Specter. et al. amendment, as amended by the Dole-Levin amendment.

Every State will now receive from 2 to 6 weeks of additional supplemental benefits.

We need a jobs bill. But until we have the jobs, this is the only decent thing we can do.

My thanks to Senator Specter, Senator ROBERT C. BYRD, Senator Dole, Senator Dixon, Senator Long, Senator DOMENICI, Senator METZENBAUM, and all our bipartisan group of cosponsors, and to Chuck Cutolo of my staff for his extraordinary effort.

Mr. DOLE. Mr. President, I yield briefly to the Senator from Pennsylvania (Mr. SPECTER).

Mr. SPECTER. Mr. President, thank the Senator from Kansas for yielding. I compliment the distinguished Senator from Michigan (Mr. LEVIN) for his leadership on this very important extension of unemployment compensation benefits and for including me as a prime cosponsor under the Levin-Specter amendment.

I compliment the distinguished Senator from Kansas (Mr. Dole) and the distinguished Senator from New Mexico (Mr. Domenici) for their leadership in working out-

The PRESIDING OFFICER. Debate is not in order.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senator may proceed for 30 seconds.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SPECTER. I compliment Senator Dole and Senator Domenici on their leadership in working out this compromise which gives to a State like Pennsylvania and a State like Michigan 6 additional weeks of unemployment compensation. With the tremendous problem that exists in this country, and especially as reflected in the States with high unemployment which have the maximum benefit, this is a very good bill to be passed. I commend all those who had a part in it.

Mr. HEINZ. Mr. President, will the Senator from Kansas yield for 60 seconds.

Mr. JOHNSTON. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The

Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I just want to commend the Senators on the amendment, Senator Levin, Senator Dole, and Senator Domenici, for having worked out the differences that will allow this amendment to become law.

The PRESIDING OFFICER. Debate

is not in order.

Mr. DOLE. Mr. President, I ask unanimous consent that the distinguished Senator from Pennsylvania might proceed for 15 seconds.

The PRESIDING OFFICER. Is there objection? Without objection, it

is so ordered.

Mr. HEINZ. Mr. President, I simply wanted to say that we debated this at length and, frankly, the consideration at length resulted in this continuation. This strikes me, frankly, as the least we can do.

The PRESIDING OFFICER. The question is on agreeing to the Levin-Specter amendment.

The amendment (UP No. 1478 as

amended) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was

agreed to. The PRESIDING OFFICER. The

next act of business is the Boschwitz amendment.

Mr. DOLE. Mr. President, before we proceed to the vote on the Boschwitz amendment, I ask unanimous consent that the distinguished Senator from Alabama and the distinguished Senator from New Hampshire be recognized so they may proceed for 2 minutes on an amendment we have agreed

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. ROBERT C. BYRD. Mr. President, am I correct in saying that there is no time remaining for debate on the Boschwitz amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. So, immediately upon the disposition of the amendment by Mr. HEFLIN, the Senate will vote by rollcall on the Boschwitz amendment?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays on the Heflin amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, in the unanimous-consent request for the Senator from Oklahoma, is it understood no amendments may be offered?

Mr. DOLE. Yes; he is going to have a

brief exchange with me.

Mr. METZENBAUM. I thought he was offering an amendment. Is the Senator from Oklahoma offering an amendment?

Mr. BOREN. No, I am not. I simply wanted to address a question to the Senator from Kansas prior to the vote on the Boschwitz amendment.

UP AMENDMENT NO. 1483

(Purpose: To postpone for 6 months the effective date for expanded information reporting)

Mr. HEFLIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Alabama (Mr. HEFLIN), for himself, Mr. Humphrey, Mr. DeConcini, Mr. Jepsen, Mr. Huddleston, Mr. Nunn, Mr. PROXMIRE, Mr. PRYOR, Mr. RANDOLPH, Mr. SASSER, Mr. ZORINSKY, Mr. DOMENICI, Mr. Dole, Mr. Boschwitz, Mr. Exon, and Mr. LEAHY, proposes an unprinted amendment numbered 1483.

Mr. HEFLIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section. SIX MONTH POSTPONEMENT OF CERTAIN COMPLIANCE PROVISIONS

Subsection (c) of section 309 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by adding at the end thereof the following new sentence: "Notwithstanding the preceding sentence, no return shall be required under section 6049 of the Internal Revenue Code of 1954 with respect to any amount paid (or treated as paid) before July 1. 1983, other than-

(1) an amount for which a return was required under section 6049 of such Code as it was in effect on September 2, 1982, or

(2) an amount paid (or treated as paid) on obligations issued by the person making the payment with respect to which such return is required."

Mr. HEFLIN. Mr. President, this amendment basically would postpone the reporting of informational returns that are required under the law to take place on January 1 pertaining to withholdings by banks, savings and loans, and credit unions. This amendment would postpone that to give them time to read the regulations and know what is in the regulations and be able to comply with them.

Senator HUMPHREY and I had other approaches on this, but we worked this out with Senator Dole.

Mr. President, an entire title of the Tax Equity and Fiscal Responsibility Act of 1982 is devoted to the improvement of taxpayer compliance with our internal revenue laws. In large measure, the provisions of title III of TEFRA represent a sound response to the growing concern over apparently increasing levels of noncompliance.

In the debate over whether we should impose a withholding tax on interest and dividend payments, many of these other compliance measures were either overlooked or given entirely too little attention. One aspect of these proposals that seems to have escaped notice entirely is the speed with which regulations could be issued and the speed with which the new requirements could be implemented. My amendment does not go to the merits of these provisions. Rather, my amendment would simply postpone for 6 months the effective date for implementation of the expanded reporting of interest payments scheduled to go into effect January 1, 1983.

Whatever the merits of this provision, it clearly is not in the best interest of the United States nor of its taxpayers to have this provision take effect before the businesses that must implement it-make it work-can comply with the new requirements. The Internal Revenue Service has done a commendable job of expediting the regulation writing process in this area, but there has been insufficient time for the business community to analyze and comment on the more than 217 pages of regulations issued on November 9. These regulations were printed in the Federal Register for November 15, and many affected businesses and taxpayers have just begun to read and analyze them for application within their own operations.

The expanded reporting of interest, probably the most significant improvement in taxpayer compliance measures, is supposed to go into effect on January 1. I am told that compliance on that date is virtually impossible for almost all financial institutions. The regulations were just published in the Federal Register for November 15. As is the case with many proposed regulations, these raise a number of questions. For example, they require institutions to report interest paid at maturity, or upon redemption, of obligations that were originally sold at a discount. Unfortunately, there is not at present any authoritative source for identifying these obligations. If I deposit a note issued by the Last National Bank of Anytown here in my account at the Senate Credit Union, there is no way for the credit union to know whether that bond or note was originally sold at a discount. Further, if I purchased it on the open market. through a bank or a securities dealer, I will not know whether it was originally sold at a discount. Nonetheless, under TEFRA, the Senate Credit Union-and banks, savings and loans, securities dealers, and credit unions all across the country-are supposed to determine whether it was sold at a discount, compute the amount of interest and discount, and make a record of that amount so it can be reported at the end of the year on my 1099 form. I am not against having this information reported. I think the IRS is entitled to have this kind of information. Unfortunately, financial institutions are simply not in a position to find it out or determine it under present systems. It will take some time to develop some sort of national clearinghouse or system for this information. It strikes me as bad tax policy and bad public policy to have on the books a law that takes effect before anyone can reasonably be expected to comply with it. I am told that many financial institutions will not be able to comply before much later next year, at the earliest. Most institutions, I suspect, are not even aware of this new requirement. According to informal estimates from the Joint Tax Committee, a 6-month deferral of this provision will cost about \$200 million. That revenue figure, assuming that it is accurate, must be based on the notion that all those banks, savings and loan associations, credit unions, and securities dealers will be able to comply on New Year's Day. It just is not going to happen. Why not at least give them a chance to develop their information reporting systems before penalizing them for failure to comply. The penalty is \$5 for each 1099 not furnished, up to a maximum of \$50,000.

I urge my colleagues to support the

adoption of the amendment.

Mr. HUMPHREY. Mr. President, I have an amendment at the desk calling for outright repeal of the withholding of taxes on dividends and interest. I will not be calling that up. I have agreed to forgo that for the time being in order to gain the acquiescence of the chairman of the Finance Committee to the compromise which Senator Heflin has just addressed. I am glad to cosponsor the compromise.

This amendment will at least stave off a problem in the financial institutions with respect to their paperwork.

Mr. KASTEN. Mr. President, will

the Senator yield?

Mr. President, I rise in support of the amendment of the Senator from Alabama. Withholding on interest and dividends has been a bad idea right from the start, and this amendment is a step in the right direction. It would solve one problem financial institutions now face by delaying for 6 months certain January 1 paperwork reporting requirements.

Yet despite this amendment, on July 1, 1983, millions of Americans will still

see their interest and dividend income withheld. Savers across the country are just beginning to realize the heavy impact this new provision of law will have.

Mr. President, Congress still has a chance to prevent the public outcry that will occur next July when withholding on interest and dividends goes into effect.

I have introduced legislation to repeal withholding, and I hope my colleagues will join with me next year in voting to repeal this new regulatory burden.

Withholding is one of the worst things you can do when you are trying to get the economy moving again. Savings and investment are key to economic growth, and the American people now save less than any other people in the Western World. Yet, instead of providing additional incentives to save, Congress voted last summer to literally rob the saver of the benefits of interest compounding and automatic dividend reinvestment by removing 10 percent of the funds in the U.S. savings pool each year. As a result, \$3 billion will be taken out of the private capital market. This is money that would otherwise go to home mortgage loans, job creation, and capital formation.

Withholding will also hurt the elderly and the poor. The Treasury Department has attempted to get around this problem by proposing regulations that exempt older Americans and others who expect to have little tax liability. But it will be up to the individual to get hold of the exemption certificates, and every time he or she opens a savings account, buys a piece of stock or puts money into a money market fund, an additional form will be required. The exemption process will also force many of these people into the taxpaying system who have not been required to file for years.

It is no accident that the American Association of Retired Persons worked to defeat the withholding provision last summer. "We fear the exemption process will frequently fail to operate properly," they argued, "and a serious overwithholding problem will result."

In an attempt to get at the small percentage of taxpayers who fail to report their interest and dividend income, Congress has enacted legislation which will penalize the nearly 90 percent of American taxpayers who have honestly paid their taxes all along. A recent IRS study shows that improved information reporting alone would increase compliance to 97 percent. A simple requirement that the IRS improve the information reporting system would go far in improving compliance without the mess of withholding.

The public outcry is growing. Congress should act now to eliminate the costly and burdensome withholding

system we enacted earlier this year. The amendment before us today will only be the first step in our crusade to remove this new barrier to savings and investment. I look forward to working with senior citizens, savers, investors, and financial institutions across the country as we attempt to repeal withholding on interest and dividends early next year.

Mr. DOLE. Mr. President, I want to thank the Senator from Alabama for his excellent work on this amendment. The conference on this year's Tax Act delayed the effective date for withholding for 6 months. A similar change was not made in the interest reporting requirements. These requirements are closely related to the withholding provisions. Since enactment of the Tax Act, we have learned that many of the same startup problems exist in reporting.

The pending amendment provides the necessary time to work out these problems in an orderly fashion.

Mr. President, I yield 15 seconds to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I have just come to the floor. May I ask the Chair to explain the time situation? Is there a time limitation on this amendment?

Mr. DOLE. Yes.

Mr. ARMSTRONG. I thank the Senator from Kansas. My thought is that it will take a little longer than 15 seconds, so I will state my thoughts after the adoption of the amendment in an after-the-fact fashion.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment of the Senator from Alabama.

The amendment (UP No. 1483) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEFLIN. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

Mr. ARMSTRONG. Mr. President, reserving the right to object, I believe this might perhaps be the opportunity, on a reservation to object to a motion to reconsider, to state my opposition to this, if agreeable to the manager of the bill.

Mr. ROBERT C. BYRD. Mr. President, there is no time for debate on a reservation. How long would it take him?

Mr. ARMSTRONG. I would think no more than 1 minute.

Mr. ROBERT C. BYRD. I have no

The PRESIDING OFFICER. The Senator from Colorado.

reluctantly supported the effort to support withholding on dividends. I did so because it was part of a package of approximately \$100 billion in revenue measures which were the reconciliation instruction presented to the Senate Finance Committee. The committee was required to meet this reconciliation instruction in order to leverage approximately three times as many dollars in spending savings as we were agreeing to meet in revenue

Mr. President, I agreed to that package because I thought the overriding national priority was to bring the deficit down, and it seemed a reasonable compromise. But as I stated at that time, I thought it was an ill-advised action to include the dividend withholding.

May we have order, Mr. President? The PRESIDING OFFICER. The

Senate will be in order.

Mr. ARMSTRONG. My own belief at the time, which has grown stronger in the days since then, is that it really does not make sense to impose this dividend-withholding requirement on the savers and financial institutions of the country. In that sense, I support the amendment which has been agreed to.

I think as we get deeper into it, we are going to find it would be a good idea for us to do away with it altogether, and I hope that would be the consensus when we come back to this issue sometime early next year.

I thank the manager and I withdraw my objection.

Mr. DOLE. Mr. President, has the motion to table been agreed to?

The PRESIDING OFFICER. The question is on agreeing to the motion to table the motion to reconsider.

The motion was agreed to.

Mr. DOLE. Mr. President, do I understand that in the order of business the yeas and nays have been ordered on the Boschwitz amendment?

The PRESIDING OFFICER. Yes. Mr. DOLE. Mr. President, I ask unanimous consent that prior to the vote I may yield to the Senator from Oklahoma for 30 seconds.

The PRESIDING OFFICER. Is there objection? Without objection, it

is so ordered.

Mr. BOREN. Mr. President, I would like to ask the Senator from Kansas with regard to the pending measure about a very favorable reduction in the taxes on large trucks, but I am concerned about the taxes being imposed on truck parts and the burden that might be placed on dealers which sell these truck parts.

Is this a matter that will be looked at in conference, the tax burden on truck parts? We will not necessarily be locking ourselves into this particular

figure; is that correct?

Mr. DOLE. That is a good question. We are not locked in. There is a lot of

Mr. ARMSTRONG. Mr. President, I latitude in the conference. I am certainly aware of the Senator's concerns and will keep them in mind.

Mr. BOREN. I thank the Senator.

BOSCHWITZ AMENDMENT NO. 5600 (Formerly numbered UP No. 1472.) . Mr. GRASSLEY, Mr. President, I rise in support of Senator Boschwitz's package as modified by my amendment. Senator Boschwitz's bill reduces the use fee for the heaviest trucks from \$1,600 to \$1,200. He also increases the classes of trucks to which the parts tax applies. The Finance Committee version taxed all truck parts for trucks weighing over 33,000 pounds at 12 percent. Senator Boschwitz revises this weight limitation downward to apply to all trucks weighing over 10,000 pounds. The Grassley amendment to the Boschwitz amendment provides independent owner operators with a 4-year phasein of this reduced use fee. The definition of independent owner operator is contained within the Motor Carriers Act of 1980, and includes those individuals who own three or fewer power unitstractors-who contracts with shippers to haul goods.

This is an issue of great concern to me and to other Senators from rural States. Independent owner operators haul much of the corn, soybeans, livestock, and other agricultural commodities to market. They serve many of the remote corners of my State. As independent small businessmen and businesswomen, they are struggling to stay in business in a recessed economy. With many trucker's operating at 40 percent of capacity, the imposition of this tax on the smallest segment of the industry, even with the 3-year phasein, would be devastating. For that reason, I worked with Senator Dole and his able staff to devise an amendment to provide some relief for the independent owner operators. Since this amendment was adopted last night on a voice vote as an amendment to Senator Boschwitz's package, I urge your support for the entire measure. This amendment is important to the American manufacturing and farm community because it enables them to efficiently distribute their products and to the American consumer who benefits from lower prices on the items they purchase if we have a healthy and competative trucking industry. Your support of this provision will enable us to achieve these goals.

Mr. BAUCUS. Mr. President, I am pleased to cosponsor the amendment offered by the Senator from Minnesota. The alarm sounded with truckers across the Nation when Secretary Lewis appeared before the Senate Finance Committee to outline the administration proposal for heavy use

and excise taxes.

I think everyone agrees that if we are going to finance the repair of the deteriorating highway system, trucks should pay their fair share. However, when you start discussing a several hundred percent increase on a vital segment of our national transportation system, there is legitimate cause for concern.

The total profit of the trucking industry last year was \$210 million-on \$44 billion worth of business. This represents a return of one-half of 1 per-

Under the current version of the bill, new taxes would result in the collection of \$1.6 billion from the trucking industry. This is 71/2 times the industry's 1981 profits. And the small operators are the hardest hit.

This amendment-to phase in the fee increases over 4 years instead of the 2 now in the bill-is designed to benefit truckers who own one or two

The truck industry, like the rest of our economy, is in a deep recession. With a sizable increase in operating costs, which are represented in these tax increases, truck freight rates have no where to go but up. The other segments of our economy which rely on the trucking industry cannot absorb increased transportation costs.

We cannot afford to increase our already unacceptable unemployment numbers. Many truck operators are already on thin economic ice. We cannot afford to put them out of business and lose the vital service that they provide.

I am sure that all of my colleagues have heard from a large number of truck operators in their States. I believe this amendment goes a long way toward addressing the concerns raised by the trucking industry.

Mr. JEPSEN. Mr. President, I rise as a cosponsor of this change in the user fee structure as proposed by my colleague, the distinguished Senator from Minnesota.

I am sure that all of us have heard from our constituents in the trucking industry about their particular prob-lems at this time, and I need not repeat them here. Because of these problems, I am again sure that all of us share the industry's concern that any changes made in the tax and fee system be fair and equitable.

This amendment, in my opinion, further advances the fairness and equitability of the proposed changes.

It is my understanding that the revenue collected as a result of these changes is not significantly different from that which would be collected as a result of the Senate Finance Committee proposal. This amendment spreads the burden more equitably.

Also, importantly, this amendment recognizes the unique plight of the small owner-operator and gives that person appropriate and proper recog-

In short, this amendment more clearly defines the situation at hand and presents a more equitable solution to the problems which we are address-

Mr. THURMOND, Mr. President, a number of my colleagues and I are pleased to cosponsor this amendment and believe it will achieve a reasonable compromise between the need for increased highway revenues and the concerns expressed by the trucking industry.

Mr. President, this amendment would amend sections 112 and 113 of the bill so as to retain the current rate of tax on truck parts, and phase in substantially reduced heavy vehicle highway use taxes over a 3-year period beginning January 1, 1984.

Mr. President, when this bill was first introduced in Congress, I had grave concern over its potential impact on the trucking industry. The combined effect of deregulation and the current recession has left much of this industry operating at the margin. As originally introduced, this measure would have increased the highway use tax for heavy vehicles by almost tenfold. Such an increased burden at this time could very well have put many trucking companies and independent operators out of business.

With this concern in mind, I had written to the distinguished chairman of the Senate Finance Committee, the Senator from Kansas, requesting that he consider phasing in any increase in the heavy vehicle highway use tax over a 5-year period. This amendment goes one step further, phasing in substantially reduced highway use taxes over a 4-year period.

Mr. President, this amendment should permit ample time for a full economic recovery before the proposed increases become effective. I call upon my colleagues to give this amendment their most careful consideration and support.

Mr. BOSCHWITZ. I ask unanimous consent that the following Senators be added as cosponsors to the amendment: Senators Durenberger, Pres-SLER, GARN, QUAYLE, and NICKLES.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. Mr. President, I am pleased to cosponsor the amendment of my colleague from Minnesota (Senator Boschwitz).

Briefly, the amendment reduces by \$400 the annual highway user tax which will be paid by heavy trucks. Under the amendment the maximum annual fee for the heaviest trucks will be \$1,200, instead of \$1,600 as provided in the committee bill. This is a vast improvement over the \$2,700 tax proposed by the Administration and the \$2,000 called for by the House.

In addition to reducing significantly the size of the tax itself, perhaps just

as importantly, the amendment provides for a 5-year phase-in period.

It would be highly unfair to expect truckers to begin immediately to pay the full tax. It is only proper to allow truckers a reasonable period to prepare for and adjust to this new assessment.

Mr. President, even if the Boschwitz amendment is adopted, and I strongly urge that my colleagues support its adoption, the bill will be far from perfect. Indeed, the increased taxes will still be burdensome on truckers, and I am very concerned about the impact of these charges, particularly upon farmers who must have trucks to operate but who may not use the highways in proportion to the fees they will pay.

Farmers are losing money as it is and increased truck fees can only increase their losses. They simply don't have any net income out of which to pay these fees, nor can they pass on the fees in the price of their commod-

Again, Mr. President, it is unfortunate that our highways are in such sad shape and that we have no free and easily tapped source of revenue to repair them. Adoption of the Boschwitz amendment will not eliminate the hardship on truckers, but it is a large improvement over the committee bill.

If the Boschwitz amendment is adopted and I can be assured that the Senate allocation formulas will be preserved in conference, Mr. President, I will support enactment of the bill.

I strongly urge passage of the Boschwitz amendment to reduce the highway use tax and to phase in the reduced tax over a period of 5 years.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota, as amended. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 96, nays 1, as follows:

### [Rollcall Vote No. 421 Leg.]

### NAYS-1 Hayakawa

NOT VOTING-3

Goldwater

So the amendment (No. 5600) (UP No. 1472), as amended, was agreed to. Mr. BOSCHWITZ. I move to recon-

sider the vote by which the amendment was agreed to. Mr. DOLE. I move to lay that

motion on the table. The motion to lay on the table was

agreed to.

Mr. BOSCHWITZ. Mr. President, I hope that the distinguished chairman of the Finance Committee and the other conferees will note the near unanimity of this vote and that it will serve to give them some direction during the conference.

### RETIREMENT RECEPTION

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I call the attention of our colleagues to the fact that at this moment, from about 4 until 5:30, there will be a reception here in the Capitol for two of our retiring colleagues, Senator HAYAKAWA and Senator SCHMITT, in the Sergeant at Arms office, which is room 321. All Members are invited to that.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. What is pending?

The PRESIDING OFFICER. The second degree amendment of the Senator from Kansas to the first degree amendment of the Senator from Kansas to the Baker substitute.

Mr. DOLE. Mr. President, I want to commend the distinguished Senator from Minnesota, the Senator from Iowa (Mr. GRASSLEY), and other principal sponsors of the amendment that has just been passed by an overwhelming vote, 96 to 1. I think it is an indication of the support this amendment has and should be an indication to the conferees on both sides that we feel very strongly that we should do equity in the conference, as we customarily dc. But in any event, the record vote, I believe, will indicate to the House conferees that the Senate feels very strongly about its position. There are broad differences between the House and Senate versions. Obviously, there will be some changes made in the conference, but it is my hope as a conferee that we will understand that this has been a strong message from the Senate.

Mr. President, we have a couple of amendments that are noncontroversial. They are puppy amendments. They are little dogs. We would like to take care of those at this time. There are two or three of those.

I ask unanimous consent that we might set aside temporarily the pending amendments to consider the amendment of the distinguished Senator from Missouri and that no amendments be offered to the amendment.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

#### UP AMENDMENT NO. 1484

(Purpose: To amend the Employee Retirement Income Security Act of 1974, to defer the requirement of payment of withdrawal liabilities arising as a result of certain withdrawals)

Mr. DANFORTH addressed the

The PRESIDING OFFICER. The

Senator from Missouri.

Mr. DANFORTH. Mr. President, I send an unprinted amendment to the desk on behalf of myself and Mr. Dole and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. Danforth), for himself and Mr. Dole, proposes an unprinted amendment numbered 1484.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(a) Section 4219(c)(2) of the Employee Retirement Income Security Act of 1974, is amended by adding at the end thereof the following new sentence: "With respect to withdrawal liability incurred as a result of the complete or partial withdrawal of an employer from a multiemployer plan, if, on July 30, 1980, the employer announced its intent to cease operations as of August 8, 1980, and, if the employer, by August 8, 1980, began the winding down of business, and completely terminated business by August 31, 1980, no payment shall be required by this paragraph prior to December 31, 1983."

(b) Effective Date.—The amendment shall be effective on the date of enactment.

Mr. DANFORTH. Mr. President, as Senator Dole has pointed out, this amendment has been cleared with Senator Long and Senator Metzenbaum. I believe that it is totally non-controversial. The situation it deals with is as follows. In 1980, Congress

passed the Multiemployer Pension Plan Amendments Act.

The act was passed on September 26, 1980, and generally the effective date was September 26, 1980.

However, the act imposed withdrawal liability for employers who withdrew from multiemployer plans, and that withdrawal liability was imposed retroactively to withdrawals which occurred on and after April 29, 1980, 5 months prior to date of enactment.

This retroactive penalty provision had a disastrous or potentially disastrous effect on a trucking company in Missouri. The situation was as follows: The trucking company was forced by economic conditions to liquidate a subsidiary, which was also in the trucking business, in August of 1980, that is, prior to the enactment of the law but during the time in which the retroactivity was later put into effect.

Six months after the liquidation of the subsidiary, the company was notified by the Central States Pension Fund that it owed almost \$17 million in withdrawal liability to the fund

under the 1980 act.

This amount of liability was nearly three times the total assets of the subsidiary before liquidation, and more than the subsidiary's total earnings in

its 35 years of existence.

Recognizing the inequity of this situation as well as the probable unconstitutionality of this provision, the Committee on Finance unanimously reported out H.R. 4577, and a section in that bill provided for the repeal of the retroactive effective date for early withdrawals which was found in the 1980 act.

I believe it is fair to say there is very close to a unanimous belief in the Senate that the retroactivity feature is not fair, is probably unconstitutional, and that it should be abolished. However, the trucking company in Kansas City in question is now under a plan in which payments of this very substantial \$17 million liability have been arranged, and the result of making such payments would be financial ruin for this company.

We cannot under the unanimousconsent arrangement under which we are operating in the Senate get unanimous consent for the sort of reform and change which we anticipated when we reported out H.R. 4577 from

the Committee on Finance.

However, it is hoped there will be little problem in getting this reform agreed to in the next Congress. However, rather than just do nothing in this Congress, and leave the company in question to a fate of ruin, what this amendment does is to provide that no payment of a penalty will be required until December 31, 1983. Thus, it provides for a 1-year moratorium on the payment. During that period of time interest would accrue to any liability which would subsequently be payable.

This amendment does not in any way prejudge what Congress will do next year. It simply provides Congress with a 1-year period of time in which to address the various issues of economics, constitutional considerations and equity that arise under the 1980 act.

Mr. DOLE. Mr. President, the Senator from Missouri has explained the amendment and the necessity for the amendment. It is an amendment which, I am not certain whether the Senator from Missouri noted, had been addressed by our committee. It is pending on the calendar in another bill, but it is not being taken up because, frankly, we have some Members who object to certain portions of the total amendment. But this is an extremely important amendment, and as the Senator pointed out there was certainly no opposition to the amend-ment. It is an amendment that must be dealt with and should be dealt with this year, and we are prepared to accept the amendment. It has been cleared on both sides.

Mr. WARNER. Mr. President, I rise today and ask unanimous consent that my name be added as a cosponsor to Senator Danforth's unprinted amendment number 1484 to H.R. 6211.

Mr. President, I ask unanimous consent that the remainder of my remarks be inserted as if read at an appropriate place in the Record, just prior to the vote on this amendment.

Mr. President, the amendment offered today by my distinguished colleague from Missouri is one that I whole-heartedly endorse. This amendment makes a technical but significant improvement in Public Law 96-364, the Multiemployers Pension Amendments Act of 1980.

When this bill was enacted into law on September 26, 1980, a retroactivity clause was incorporated which authorizes that an employer that withdraws from a multiemployer pension plan covered under title IV of ERISA is liable to the plan for the portion of the plan's unfunded vested benefits if the withdrawals occur anytime after April 28, 1980.

As a result of this retroactivity clause, certain corporations that ceased their business operations after April 28, 1980 but before the enactment of the law are forced to pay a withdrawal liability, often of significant amounts.

Mr. President, I do not believe it was the intent of Congress to require coproations to make withdrawal liability payments when—at the time they closed their businesses—they acted in good faith in compliance with thencurrent law.

Senator Danforth's amendment merely forestalls any payments due until December 31, 1983. This allows Congress the necessary time to pass corrective legislation on this noncontroversial issue.

This amendment is an important first step in correcting this situation, and I am pleased to be a cosponsor.

Thank you, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment (UP No. 1484) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DANFORTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, we have another noncontroversial amendment which has been cleared on all sides, including "deputy commissioner" METZ-ENBAUM. This is an amendment by the distinguished Senator from South Carolina (Mr. Thurmond).

Let me say while we are waiting for Senator Thurmond to come to the floor for those who are concerned that perhaps not obtaining cloture might be fatal, let me say that by the time we got around to cloture most of the nongermane amendments had been dealt with-not quite but most of them. But I would say that as far as this Senator knows-and we are not encouraging additional amendments, in fact we are discouraging any additional amendments, and we understand the Democrats are caucusing to discourage additional amendmentsthere are only six amendments to the tax title. Five of those, I think, have been cleared. One may require a rollcall vote.

I want to suggest, even though it may not appear that we know what we are doing—and that may be accurate—we have at least worked our way down to only about a half dozen amendments. So I would encourage all those who do not need to offer amendments not to offer them.

Mr. President, I ask unanimous consent that the pending amendments, the Dole amendments, be temporarily set aside so that we may consider an amendment to be offered by the distinguished Senator from South Carolina (Mr. Thurmond), and that there be no amendment to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

### UP AMENDMENT 1485

Mr. THURMOND. Mr. President, I wish to thank the able Senator from Kansas (Mr. DOLE).

I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. Thurmond) proposes an unprinted amendment numbered 1485:

On page 198, line 12, strike the following: "The Secretary, or, on" and insert in lieu thereof: "At".

Mr. THURMOND. Mr. President, I have a letter from the Assistant Attorney General Robert A. McConnell which reads this way:

Washington, D.C., December 16, 1982.

Hon. STROM THURMOND,

Chairman, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pending before the Senate is the Surface Transportation Act of 1982. Section 426 of Amendment No. 1440, set forth at S14630, Congressional Record of December 14, 1982, would divest the Attorney General of some of his authority to conduct the litigation of the United States.

While the Department has no objection to the enforcement authority of section 426. we believe that such must be conducted by the Attorney General. The most effective and efficient means of representing the United States in the courts is to maintain the central authority of the Attorney General. The litigation of the United States is unique from that involving solely private parties. Its impact extends beyond those individuals connected with a particular lawsuit. Its precedential value is significant. To insure that the law is enforced equally and fairly in the courts, the government's litigation must be conducted with uniformity and consistency. This is the policy behind the principle that a single Cabinet officer, the Attorney General, should have responsibility over the conduct of the government's representation in the courts. To detract from this principle raises the potential that individuals will be subject to differing standards.

Accordingly, on behalf of the Attorney General, I urge that section 426 be amended to clarify that any litigation is to be conducted by the Department of Justice.

ed by the Department of Justice. Sincerely,

### ROBERT A. McConnell, Assistant Attorney General.

Mr. President, the only thing the amendment does is on page 198, line 12, strikes the words "The Secretary, or, on" and inserts in lieu thereof "at".

Mr. President section 426 now

Mr. President, section 426 now begins:

The Secretary, or, on request of the Secretary, the Attorney General of the United States is authorized and directed to institute civil action—

And so forth.

All this does would have it read, after we strike out the words "The Secretary, or, on" and we insert "At,"—"At request of the Secretary the Attorney General of the United States is authorized \* \* \*."

It is a very simple amendment, and it accomplishes what the Attorney General wants.

There is no object

There is no objection on the part of anyone I know of.

Mr. DOLE. Mr. President, I share the views expressed by the Senator from South Carolina. This amendment has been cleared, and there is no objection. It is a technical, minor amendment, and we are prepared to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amend-

ment of the Senator from South Carolina.

The amendment (UP No. 1485) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, the Senator from Delaware, Senator Roth, has an amendment which is noncontroversial. He has yet to clear that with the distinguished Senator from Louisiana and he is in the process of doing that. There is an amendment by the distinguished Senator from Pennylvania, Senator Specter, that I have been advised has been cleared with Senator Garn and Senator Riegle which would be taken up at this time. I understand that the Senator from Michigan, Senator Riegle, will have an amendment which we cannot accept on earned income tax credits.

Then there are two foundation amendments, one by Senator Percy and Senator Dixon, and one by Senator Armstrong. I understand there may be negotiations going on with those Senators.

Beyond that, there are no further amendments to this title. I know the Senator from Vermont is waiting patiently and eagerly and with enthusiasm to address title II. There are probably 5 to 10 amendments in that area and some may be accepted.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. DOLE. Yes.

Mr. PERCY. The manager of the bill just stated that there were negotiations going on. I did talk with Senator Armstrong. The MacArthur Foundation amendment has been cleared on both sides. It is a mere extension for 2 years and has been agreed to by the Treasury Department as being a very equitable situation.

The foundation would be in dire distress if we did not act. It has no relationship to any other foundation. I hope the manager of the bill can accept this amendment, and I understand he does support it. It has no relationship to any other amendment that I know of.

Mr. DOLE. Mr. President, if the Senator will yield, the Senator is correct. His amendment has been cleared all around, except the Senator from Kansas was notified by the Senator from Colorado that when that amendment came up he wanted to be notified.

I am just suggesting, as far as this Senator is concerned, that we are prepared to accept the MacArthur Foundation amendment, as modified, as agreed to by Treasury, and as explained by the Senator from Illinois.

But I would indicate that I would have

to give prior notice.

Mr. PERCY. I will ask the cloakroom to notify Senator Armstrong. Just as soon as he comes to the floor and wishes to take this up, I will be prepared to do so. I would also like to advise Senator Dixon so he can be on the floor.

Mr. DOLE. Mr. President, if the Senator will yield. I understand we have notified the Senator from Colorado. I assume he will be coming to the floor momentarily.

In the meantime. Mr. President, perhaps the Senator from Vermont is prepared to move ahead. It is my hope we can complete this bill by early evening.

I thank the Chair and I yield the floor to the Senator from Vermont.

Mr. STAFFORD. Mr. President, I join with my friend, the manager of title I, in the wish at least that we might finish this bill early this evening.

We know of a number of amendments which will lie against title II of the bill, which is the title which was written in the Committee on Environ-

ment and Public Works.

The intent of the Senator from Vermont now is to offer, on behalf of the committee, some committee amendments for the whole committee that are mostly technical and conforming in nature. If there is no objection to doing that, it would be my intent to send the amendments from the Committee on Environment and Public Works to the desk.

The PRESIDING OFFICER. It would take unanimous consent to set

aside the Dole amendment.

Mr. MITCHELL. Reserving the right to object.

Mr. STAFFORD. Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll

Mr. STAFFORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. STAFFORD. Mr. President, in view of the fact that our colleagues on the other side of the aisle are currently in caucus, and out of deference to my dear friend from Maine who is here on their behalf, I will defer offering the committee amendments until my colleagues from the other side of the aisle can be present.

At that time, we will also be ready to entertain an amendment to be offered by the Senator from Indiana (Mr. QUAYLE), which we expect will be noncontroversial as far as the committee

is concerned.

There are two or three other amendments which are noncontroversial that we would be glad to get out of the way

if Senators who have them could be present to offer them when we resume action on the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SIMPSON). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have had an informal conversation with the minority leader and I understand that as a result of a caucus of Democratic Members he may have ideas he wishes to advance on this matter. If he cares to do so, I will be more than pleased to vield the floor.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

PROPOSAL REGARDING HIGH-WAY BILL AND CONTINUING RESOLUTION

Mr. ROBERT C. BYRD. I thank the distinguished majority leader. The Senate is in session today because the President asked Congress to return to deliberate and act on appropriation bills. The distinguished majority leader and the Speaker, meeting together, thought it advisable to propose and enact a highway rehabilitation bill, an infrastructure bill, and to enact a 5-cent gasoline tax.

The President, as I understand it, has supported that proposition. That proposition did not originate here. It is

not our proposal.

That is not said by way of derogation of the proposal. There are a good many Members on this side who support this proposal, some Members will not support it.

Now we are confronted with a situation in which, as of midnight tomorrow night, the old continuing resolution will expire and a lot of things begin to happen. A lot of people, very soon, will not get their checks: Social security recipients, veterans, military, et cetera, et cetera. It is very important that the continuing resolution be acted on by midnight tomorrow.

The majority leader indicated that he was going to do his best to complete action and adjourn sine dine by the 15th, which was yesterday, and, if not by the 15th, by the 17th. He said

that in good faith.

Having been majority leader, I know that one cannot always bring to fruition what one wishes as majority leader because, after all, it is the Senate that makes the final decisions, and the majority leader is but the elected instrument of his party to press the legislation and try to keep the legislative process moving; the minority leader is but the elected instrument of his party to try to cooperate where he can to keep the program moving and see what we can accomplish, of course, in the best interests of the country.

Now, we have come back and we have not acted on appropriation bills alone. We have reached the point now where we are within 36 hours, or nearly so, of the expiration of the continuing resolution. There are a good many amendments on this side of the aisle. A lot of Senators over here want offer amendments; we discussed them in our little caucus, but we have come to the conclusion that it is in the interest of the Nation that we get on with the business of disposing of the continuing resolution, if at all possible, before the expiration at midnight tomorrow. We are also hopeful of the previously announced deadline of the 17th, which majority leader and I both announced after consultation, and he after consultation, I believe, with the Speaker. He can correct me if I am misstating anything. But we on our side of the aisle feel that we ought to get on with the continuing resolution and pass it so that the Government will not come to a stop in the next 48 hours, and that we get action on this bill one way or the other and in a very short time, and that we adjourn sine die and go home.

We have agreed on this side of the aisle to offer no more amendments to the pending measure. We are willing to forgo the offering of any further amendments. We are willing to vote on the pending matter after 30 minutes of debate. But we are willing only to forgo offering amendments on this side of the aisle if those on the other side of the aisle are willing to forgo offering their amendments, so that we vote by 6:30 or 7 o'clock whatever we agree on.

The majority leader is going to have to consult with the Members on his own side of the aisle. But our proposition is that we have 30 minutes of debate, that we forgo offering any further amendments if those on the other side of the aisle will forgo offering any amendments, and then we vote up-or-down on the committee amendment, as amended by Senator BAKER's amendment. and amendments that have been adopted to the Baker substitute and go immediately to the continuing resolution. If the chairman of the Appropriations Committee and the ranking member are ready, we are ready on this side, and we would stay on that resolution until it is acted upon.

Now, if so, we would vote on the substitute Baker amendment as amended, without further amendIn the alternative, if the distinguished majority leader cannot reach a decision among those on his side of the aisle that there be no other amendments adopted, we would urge the majority leader, most respectfully, that he proceed to take up the continuing resolution and let us act on that and get it to conference so that the people who are employed in the Government and those who are in anticipation of checks, and so on, may know that there is going to be no delay.

We offer this proposal in the utmost good faith. I feel confident that the majority leader can obtain passage of the highway bill. We can reach a vote on it, even though a good many Members on our side may vote against the bill. I am confident it would be passed at this time. But the vote would be on the Baker substitute, as amended, with any pending amendments set aside, that we have a half-hour of debate or less and that we forgo offering any further amendments on this side, the other side forgo offering their amendments; that we take up the continuing resolution immediately, and we try to complete final action on that by tomorrow night, and be out at least by Saturday of this week.

I do not think I have misstated the proposition, and I do not think I have omitted anything, and if I have, I look to my colleagues to remind me or to correct me. That is the proposal. I now

yield the floor.

Mr. BAKER. Mr. President, I thank the minority leader and I am grateful for his remarks and the proposal that he makes.

In those remarks he observed that both of us are the agents of our respective parties in the Senate and our fundamental responsibility above all others is to try to arrange in detail the schedule of activities of the Senate, particularly of our legislative endeavors.

He will understand then, Mr. President, when I say that while I yearn for the result that he seeks, I am also committed to the passage of both of these bills, and I think it is entirely

possible to do that.

So the only exception I would take would be his suggestion—and I understand his reason and rationale—that if this agreement cannot be worked out precisely as he has proposed it that we lay aside the highway bill. I frankly do not wish to do that, Mr. President.

As majority leader, I would not propose to do that. But I do agree that there is a chance to finish this measure, this bill and, indeed, just as he has had a caucus on his side to consider this matter, I am fully prepared to do the same on my side. I would certainly not speak for every Member on this side because it is no secret to the world that there is a division on this side on how we should proceed, and an

honest difference of opinion on the relative merits of this bill and the several amendments that have been offered.

We have already done a great deal of work here. We have enlisted a lot of effort. We have lost a lot of sleep. We have adopted a lot of amendments-incidentally, most of them Democratic amendments. But beside that point, Mr. President, I think the proposal that the minority has made has great merit. I think it has great appeal to me. I think it would further and advance my ambition to pass both of these bills which I conceive to be important each in its own right, and I would recommend, Mr. President, that we take time on this side of the aisle to have an informal caucus so that we may consider it, as the minority leader has done in a most responsible way.

In order to gain that time, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 6:30 P.M.

Mr. BAKER. Mr. President, for a whole raft of reasons, including house-keeping detail, I think it would be more convenient if we recessed for a brief time.

I ask unanimous consent that the Senate stand in recess from this

moment until 6:30 p.m.

There being no objection, the Senate, at 5:57 p.m., recessed until 6:30 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. WARNER).

### RECESS FOR 30 MINUTES

The PRESIDING OFFICER. The Chair, on behalf of the majority and minority leaders, states that the Senate will now stand in recess for 30 minutes, without objection.

Thereupon, the Senate, at 6:31 p.m., recessed for 30 minutes; whereupon at 7:01 p.m., the Senate reconvened when called to order by the Presiding Offi-

cer (Mr. Andrews).

Mr. DIXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 7:15 P.M.

Mr. ROBERT C. BYRD. Mr. President, at the request of the majority

leader, I ask unanimous consent that the Senate stand in recess until the hour of 7:15 p.m. today.

There being no objection, the Senate, at 7:03 p.m., recessed until 7:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. Boschwitz).

### SURFACE TRANSPORTATION ACT OF 1982

The Senate continued with the consideration of the bill (H.R. 6211).

AMENDMENT NO. 5599 TO AMENDMENT NO. 5598 (FORMERLY UP NO. 1457 AND UP NO. 1456)

The PRESIDING OFFICER. The clerk will state the pending question.

The legislative clerk read as follows: Dole unprinted amendment 1457 to unprinted amendment 1456.

Mr. DOLE. Mr. President, while we are awaiting the majority leader, I suggest the absence of a quorum.

The PRESIDING OFFICER. The

clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, after the proposal by the distinguished minority leader following their caucus, there was an informal caucus of Republican Senators. I regret to advise the minority leader that it does not appear that at this moment we are able to enter into an agreement. I have at this time no counterproposal to make. I recommend that, in the interest of time, we go forward with the

as we can and get to passage.

We have this to do and we have the continuing resolution to do. I urge Senators to recognize that it is going to take a lot of effort to do both these things in the next day-and-a-half. By the looks of things, we shall be here for the next day-and-a-half, so we shall have that opportunity.

process of the normal course of events

and try to pass as many amendments

Mr. President, I regret that that is the situation. I yield now so that the distinguished managers of the bill may proceed if they wish.

Mr. ROBERT C. BYRD. Mr. President.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader for trying in his caucus. I know he did it in the utmost good faith. I have a feeling that he, himself, if he could have acted alone, would have accepted the proposal because it would have insured the enactment of the highway bill this evening and proceeding immediately to the continuing resolution. I can very well understand his situation.

I hope that, as the evening wears on, the distinguished majority leader would continue—and I say this respectfully and certainly with no desire to be presumptuous—that he continue to consult with his colleagues on his side of the aisle, because I think it is imperative, and I think my colleagues do, that we get on with the continuing resolution as soon as possible.

Most of us do not think—and I do not take issue with the majority leader on this—that it is imperative that we get on with the highway bill at this point. It has a lot of merit in many ways, many of us can support parts of it or all of it. But we do know that the continuing resolution has to pass.

We all agree to that on both sides of the aisle. We do not all agree on both sides of the aisle that the highway bill has to pass now. I hope the distinguished majority leader and his coleagues will, as the evening wears on, continue to consider the proposal that we move to the continuing resolution and begin to act on it—I imagine there would be several amendments to it on both sides of the aisle—and get it to conference as soon as possible and perhaps there will be some opportunities to act on the highway bill while the matter is in conference.

I make the suggestion, not presumptuously, but in the utmost of good faith and with great respect and admiration for the majority leader.

Mr. LONG. Will the leader yield? Mr. ROBERT C. BYRD. Yes.

Mr. LONG. May I suggest that if it can be done, the majority leader give us assurance that when we pass these two bills, at least when we pass these two bills, we are going to adjourn.

Mr. BAKER. Will the Senator yield to me?

Mr. LONG. Yes; I yield.

Mr. BAKER. I can make him the assurance that when we pass these two bills, he will know instantly that we are going to adjourn, because there will be 99 Senators who will have to follow me out the door.

Mr. LONG. That would help.

It would further be good if we could have some understanding that we are going to try to keep irrelevant amendments off these bills. If you include the resolutions, there are almost 200 items on the Senate Calendar. Most are legislative measures, some 18 are bills in conference.

If Senators can do it, they are going to try to take those legislative matters from those bills that are not going anywhere and put them on the bills that are going somewhere, because they would like to have a second shot at getting them enacted. That kind of thing can happen when a Senator gets a call from the House side saying, "Look, if you can pass this provision, we will try to get it agreed to in the House."

What we should try to agree to now, if we can, or as soon as we can, is to hold ourselves to a rule of germaneness on these must bills.

Perhaps the Senators on the other side of the aisle did not see the television news while they were holding their caucus. The TV is giving us a bad time. They showed a picture of the Capitol Christmas tree and said that we are putting ornament after ornament on the Christmas tree. They even described some of the Senators in connection with some of those ornaments. [Laughter.]

If I do say so, they were very unfair to our friend from Ohio (Mr. METZ-ENBAUM). They said he had a big ornament that fell from the tree. [Laugh-

ter.]

The public is not getting a particularly good image of what we are doing when we add all these extraneous amendments.

I have nothing against Christmas trees. In fact, I was the manager of the first Christmas tree bill. [Laughter]

But the press and the media generally, particularly TV, are even now showing a picture of the Christmas tree on the Capitol lawn and describing it in terms of individual Senators and the particular baubles they put on the tree. And if I do say so, it is not complimentary to the Senate.

Several Senators addressed the Chair.

Mr. BAKER. Mr. President, I really appreciate the remarks and the insights of the Senator from Louisiana. As former chairman of the Finance Committee, I must say I am always frightened when I hear Russell Long describe all these parliamentary maneuvers that might be undertaken because they are falling from the lips of a master.

Mr. President, I can assure the Senator from Louisiana that I join him in the fervent wish that we focus our attention on the matters at hand so we can pass these two pieces of legislation and not make an omnibus bill, a carryall for every legislative ambition that every Member has. I say that with no good assurance it is going to happen, but I want to say it anyway. [Laughter.]

Mr. President, with that, I think we ought to use the remainder of our time in legislative endeavors, and I urge the managers of the bill to go on with that.

Mr. NICKLES addressed the Chair. Mr. METZENBAUM addressed the

Mr. BAKER. Mr. President, let me yield now to the Senator from Ohio.

Mr. METZENBAUM. Mr. Leader, I think it is only fair, as we talk about considering all of the amendments, that we ought to fully understand what the parliamentary procedure is. That is that we have before us at the

moment the Dole amendment in the second degree which is the pending business. It is my understanding that the Senator from Arkansas has some very strong feelings about the Dole amendment and has made those views known to one and all. He has indicated that he has the lung power to continue to discuss those matters for quite a period of time.

Now, absent that amendment, no other amendment can be called to the floor in connection with this bill without unanimous consent. I think that the leader on the minority side has made it clear that we on this side have determined that there ought not to be any more amendments and that the leader has indicated that the Members of the minority would not propose any more amendments and would hope that those on the majority side would not propose any more amendments.

I think the leader on the minority side is 100 percent right. I have no reservations in saying that I will use my right as an individual Senator to object to any amendment being brought up the remainder of the evening. I stayed until 2:30 last evening taking up some of the worst rinky-dinks that I ever heard of, ideas that people came up with out of the blue that they could have been talking about for the last 2 years, but in the middle of the night they concluded that these were great measures that the Nation needed so very badly.

Mr. BAKER addressed the Chair.
The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I do not want to treat unkindly my friend from Ohio. I do not mind him instructing me on the rules of the Senate and his prerogatives and I do not want to puncture his balloon, but I assure him there are other things that can be done. And that is not meant as a threat, but simply as an observation of the rules that permit us to move forward and I am committed to do.

Mr. President, I yield to the Senator from Oklahoma (Mr. Nickles) without losing my right on the floor.

Mr. NICKLES. Mr. President, I thank the majority leader. I, for one, would like to compliment the majority leader for his fairness and his openness in working with several of us that have had some problems with this bill. I think there are probably a couple other Senators who have amendments they would like to take up, not necessarily amendments to delay or postpone or even kill this bill, but serious pertinent amendments. I certainly appreciate the cooperation the majority leader has shown myself and other Senators in that regard.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. What is the question before the Senate?

The PRESIDING OFFICER. The question is on the Dole amendment No. 1457.

Mr. BAKER. Mr. President, I yield the floor.

Mr. DOLE. Mr. President, as I understand, there is some opposition to this amendment.

I say to the Senator from Arkansas, has he had any change of heart? Has the Senator had a heart? Let me put it

Mr. BUMPERS. Mr. President, in responding to the distinguished floor manager and Senator from Kansas on his question, I do have a heart. I am trying to save the American people \$200 million. If I could, I would just respond with a question on his amendment.

Mr. DOLE. Just make it brief. I do not want to hear the whole thing again.

Mr. BUMPERS. This morning, when the Senator moved to table the amendment of the Senator from Michigan to extend unemployment benefits, the Senator from Kansas remarked that it would cost \$700 million, and since he did not know where the money was coming from, he was forced to move to table.

Perhaps he could tell us where the \$200 million is coming from for the little amendment he has pending. I know where it goes. I know who gets it. Maybe the Senator could tell us

who is paying for it? Mr. DOLE. I take that reply as an

indication that there is still mild opposition to my amendment. I think we are very close to an agreement if we just find something to agree on. [Laughter.]

That seems to be the one hangup; we just cannot find anything to agree on. But I would say to my friends on the other side, I think, as far as the tax title is concerned, there is no problem foregoing additional amendments. That is the view of the manager of that particular title, even though there are some meritorious amendments that I think probably we could take care of in 30 seconds.

But I know what happens; if you start with one, then somebody else wants one. We did that, as the Senator from Ohio says, until early morning. I cannot speak for others, but I think the one area that I know there is a great deal of concern about is in the area of Davis-Bacon extension. That is not in title I.

So I say to my colleagues on the Democratic side, that as far as title I, which has been the most controversial up to this point, the one we spent about 21/2 days on, we are prepared to agree, if we can agree, title by title. We might be able to chip off a title at a time. There are only four titles. And as I understand, titles III and IV there

may not be any controversy over. So I hope we do not give up on trying to reach some agreement.

On the other hand, as the distinguished majority leader has indicated, there are some Members who feel very strongly that they should at least have an opportunity to raise some amendments. I do not believe any of those with reference to title I are controversial, unless I am mistaken. I am not certain of that. But as I understand it, they may be to other sections of the

So I hope that in the next few minutes we might be able to reach some accord. I might say to my friend from Arkansas, I have come to believe that you cannot pass all your legislative program in 1 year, and that we will be back in 2 or 3 weeks and will have an opportunity again next year not only for the amendment I have an interest in but for amendments that others have an interest in. I am prepared to pull down the amendment, which takes unanimous consent at this time, or dispose of it because I really believe we ought to get on with it.

Mr. LONG. Will the Senator yield? Mr. DOLE. Yes; I yield.

Mr. LONG. It seems to me that we would make great headway if the Senator would ask unanimous consent, and the Senate would agree, that we will consider no more amendments to change the tax law.

Mr. DIXON. Vote on the bill.

Mr. LONG. I would hope we could agree that we are not going to consider any further amendments to change the tax laws upward or downward. It seems to me we would make a lot of progress if we agree to at least that

Mr. BAKER. I agree it is progress. I am satisfied with that right there.

Mr. DOLE. We suggest that. Others say if we cannot agree on all of it or none of it. That might be a legitimate position to have.

Mr. LONG. If we can agree that we are not going to vote on raising or lowering taxes any further, we would

have made some progress.

Mr. SARBANES. Mr. President, if the Senator will yield, there are a number of us who were prepared to forgo offering amendments in an effort to move to a decision on this legislation and then go on to the continuing resolution. I do not think piecing it out achieves that objective. It still could go on indefinitely even if we had only one title left.

Furthermore, someone here who has an amendment perhaps to this title that he is willing to forgo offering is not necessarily satisfied because someone then on the other side can offer an amendment to some other title.

We came back into the special session to do appropriations. That was the reason the President said he wanted a special session and that was

the the reason we were brought back here.

The appropriations are embraced in the continuing resolution which expires at midnight tomorrow night. Are we going to go through this whoop-dedoo on Saturday of closing down the offices across the country that the President did once before when people came in to work and then were sent home? I know it is Saturday so it is not a lot of people but there are some offices that continue to work. Are they all going to be closed down on Saturday morning?

That is the reason we came back. This was an effort on the part of this side of the aisle to try to move on this bill. We were not trying to deny the majority leader that objective which he has. But then we were to get on to the continuing resolution.

Is the manager of the bill suggesting that he thinks that in a little bit of time this agreement not to offer amendments is possible from both

Mr. DOLE. Let me say to the Senator from Maryland we spent all day yesterday on the amendment of the Senator from Ohio. We spent a great deal of time today on one that involves unemployment compensation. I am not quarreling with the results of either one of those except to indicate there has been a great deal of time consumed on this bill and most of it on this side.

It seems to us that there are some Members who have honest-to-goodness amendments they wish to discuss. I am not sure if there are one, two, half

The answer is yes. It seems to me we are very close to agreement. I bet within 5 minutes—maybe not, come to think of it-but it should be possible if we were all reasonable, and we are, that we could agree on titles I, III, and IV, no further amendments to those titles. But I may be mistaken. I think it is worth exploring.

I am suggesting we should not say we cannot do it. In most negotiations an offer is made and a counteroffer is made and then you try to work it out. The offer has been made by the distinguished minority leader in good faith-no further amendments, final passage, which would be fine with this Senator. But as the majority leader has indicated, we could not get total agreement. We have substantial agreement.

Mr. SARBANES. I say to the manager of the bill that on both of the amendments that he referred to, which consumed considerable a amount of time on the floor, it is my recollection that they had sponsors on both sides of the aisle.

Mr. BUMPERS. I might just inject myself into this and I do not mean this to denigrate anyone. But Senators

will recall the Senator from Michigan offered the extension of unemployment benefits this morning and a motion was made to table by the distinguished floor manager which failed. Then a compromise was worked out.

I want to say to the Senator from Kansas he would be very happy to know that NBC has just reported that as being his bill.

Mr. DOLE. Very perceptive. Mr. BUMPERS. So even though it may have originated on this side, the Senator from Kansas gets credit for all those unemployed people who have a little money to jingle in their pockets over the Christmas holidays.

If I may just say one additional thing, and this is not directed at either the floor manager or the majority leader, but I think the point should be made that the agreement that was worked out on this side of the aisle and submitted to the majority was not considerable achieved without a amount of blood on the floor, and I want to say to those who feel very strongly about amendments on that side, there are people on this side who felt equally strongly but who relented and who conceded and agreed to this procedure in the interest of getting on with the Nation's business, getting this bill passed. There is obviously strong support for it, strong bipartisan support for it, and at this moment it is going to pass.

Every Member of this body who has been here for more than 3 weeks knows that anything can come unraveled at any minute when tempers are allowed to flare again, and when personal hostilities begin to manifest themselves on the floor, then any-

thing can happen.

It just occurs to me that I do not consider the offer on this side particularly magnanimous. It is a practical solution out of a dilemma and no one here much likes it, but we all have to give and take.

I had an amendment that I felt just as strongly about as the Senator from New Jersey and we all agreed finally in order to get this bill out of the way we could pass this bill in 10 minutes.

Mr. RANDOLPH. Right.

Mr. BUMPERS. We could pass this bill in 10 minutes. It would pass overwhelmingly and we could be on the continuing resolution immediately after that rollcall and have it finished by noon tomorrow and ready to go to conference.

The American people would surely applaud that, and I think it would be

gratifying to all of us.

Those who feel equally strongly about an amendment on this bill, as the Senator from Kansas has said we are going to be back here very shortly. The Senator from Kansas is going to get a chance, too. I am quite sure his capital gains will be the first bill introduced, and the first bill out of his committee. I am not naive enough to think that I have won this battle once and for all. I know that is the way it works around here.

But everyone ought to be practical enough to understand that this thing can be resolved just if Senators will be willing to be a little more magnanimous and understanding about what we are up against on both sides.

Mr. DOLE. Mr. President, if the Senator will yield so I may respond to the Senator. I do not quarrel with anything he said. It seems to me we ought to try to work this out. We are trying. We had a difficult time as probably some Members in the Democratic Caucus. But I suggest there still is a good opportunity to put it together. I think even if it takes us a little while doing it, we still ought to try. That is the only point I wish to make.

Mr. SYMMS. Mr. President, if the Senator will yield, I wish to thank Senator Bumpers for what he said. I think Senator Long made a very good suggestion. Senator Stafford, myself, Senator Bentsen, and Senator Ran-DOLPH have all put a lot of time in this bill, and I think we all realize we will be back next year; we can start over

and do it again.

I appeal to all of my colleagues on both sides of the aisle. When they think about all the different things that the Federal Government does, some things some of us like and some things we do not like. There is one thing that no country in the world can even begin to match us in America with and that is the freedom we get as individual Americans to go get in our automobile and drive where we want to go, where there is the transportation system that comes with these highways to move commercial transport across this great country.

What we are trying to do here is to allocate a little bit of the Government money that they take from the taxpayers in a user fee to fix up the

bridges and highways.

I have some more amendments. I am not willing to offer them, and I have said this is our caucus. We are very close to solution here. I think Senator Long has come up with a very good suggestion, and I just urge our leadership on both sides of the aisle and all of us to let the cooler heads prevail and move forward and see how far we can get, because I believe maybe by 9, 10, or 11 o'clock we can have this resolved and pass this legislation.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield. Mr. LONG. Mr. President, looking at what was achieved on yesterday, we managed to deal with 29 amendments. Of those 29 amendments, 18 of the 29 were Finance Committee amendments. The Finance Committee portion of the bill is in title I, the first 52 pages of the bill.

I detect that the Senator is willing to make a generous offer to the Senate, that he is willing to forgo action on his own amendment, one that he has committed himself publicly to pass if he can. It seems to me that if we would just get consent that we are not going to consider any more title I or Finance Committee amendments, we would be closing out about two-thirds of the area in which Senators might want to legislate. That still leaves some amendments that could properly be considered in other areas, areas involving the other committees, the Commerce and Public Works Committee.

But I would urge Senators to consider agreeing that we simply will consider no further amendments in the area dealing with the Finance Committee jurisdiction or title I of the bill.

Mr. DOLE. Mr. President, again I would just suggest that might be a good idea, and I want to say in fairness to the others that we have spent most of the time on title I. Maybe we spent too much time, a disproportionate amount of time on title I, so that other Members who had an interest in title II or title III or title IV have not had the opportunity we have had, having more or less dominated, which should not have dominated, the debate for the past 2 or 3 days or nights, and I think the RECORD indicates that 19 or 20 out of 28 amendments and others that were discussed and not disposed of, and I would want to confer with the majority leader. But if there is any disposition at all on that side so far as title I is concerned, I am willing to withdraw my amendment, to do whatever you do with the amendment.

I have another amendment that affects the handicapped that is going to expire on December 31, but we can do it next year, and that would be having the big title out of the way. I do not think Senator STAFFORD has more than, I do not know how many-

Mr. LONG. It seems to me, Mr. President, it would be worthwhile if we could wrap up title I which is where two-thirds of the amendments have been occurring, amendments in the Finance Committee's jurisdiction. I believe the Senate is about ready to do that, and I believe if the distinguished floor manager, the Senator from Kansas, can arrange to get that done we will have gotten most of this job done. I think we will have gotten two-thirds of it behind us, and the rest of it should go fairly easily.

Several Senators addressed Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. Yes.

Mr. HATFIELD. I have just more or less outlined to the Republican Caucus what I would like to now outline to my friends on the Democratic side, and that is I have not chosen the schedule, but I would like to indicate what our schedule is. We have no choice about it. The Senator from Maryland has indicated that this resolution expires tomorrow night at midnight. That means the continuing resolution will have to be taken up whenever this is finished, if it is 9 o'clock, 10 o'clock, 11 o'clock, 12 o'clock, 1 o'clock, the continuing resolution has to be taken up immediately after this is disposed of.

It may take, I do not know, 4 or 5 hours. We have to go to conference with the House tomorrow in order to get some conclusion, and it will take 4 to 5 hours after the conference to get the paperwork done, to get the conference report back to the respective

Chambers.

Mr. CHILES. Mr. President, will the

Senator yield?

Mr. HATFIELD. That is the simple outline of where we are. My friends, on the continuing resolution we have such issues as abortion, MX missile, pay, Ted Turner, and a few other such controversies. So, consequently, I just wanted to put the Senate on notice. I have not determined this, but this is the situation we are in. So the sooner we can dispose of this, the sooner we can get to the continuing resolution, the sooner we can get to conference, the sooner we can pass some kind of a conference report, get it down to the White House and, hopefully pray to God we can get home by Christmas.

Mr. CHILES. Mr. President, will the

Senator yield?

Mr. DOLE. I yield to the Senator

from Florida.

Mr. CHILES. I think the distinguished chairman of the Appropriations Committee has put it exactly where it is. We are going to have a heck of a time passing the continuing resolution, and getting it through conference. The one thing Chairman HATFIELD was kind enough not to say is that it is probably going to be vetoed.

We all know that is going to occur or we have been told that it is because of the jobs bill proposals that are included. There is a jobs bill component in the Senate version of the continuing resolution. I do not think anybody on either side of the aisle thinks we are going to take that out. The Senate has a small jobs bill. There is a jobs bill in the House version of the continuing resolution that is bigger. The President has said he is going to veto anything with a jobs bill. So you have to add one more hurdle to our effort to get the continuing resolution passed. That one additional hurdle is that it will be vetoed and we will have to come back and deal with it after the

But the distinguished chairman kept saying we have to get on with the continuing resolution after we finish the gas tax bill. Now, there is no reason we have to do that. We could start with the continuing resolution now. I think that is what our caucus was about. The work we have come up here to do during the lameduck is to deal with appropriations. That is the work we were called for; that was the work we were told we had to come back for; and that is the work we had not completed earlier because Congress had not finished the appropriations bills. Why are we not dealing with that work we were called here to do?

After we pass the continuing resolution then there is going to be a conference. There is going to be time in between while the conference committee works. During that in between time we could be working on this gas tax bill, if there is anything to work on. We can come back to that. But why in the world at 8 o'clock in the evening before the day when the current continuing resolution is going to run out should we be spending another 5 minutes on this gas tax bill when we know we have got to pass the continuing resolution? We must go through all the issues on the continuing resolution, and the debate we have got to do on that and the conference, which is not going to be an easy conference, and then the veto, and then we must come back and try to keep this Government running. We are being held hostage by the continuing resolution process that faces us. We cannot do our work on the continuing resolution because we are dealing with this gas tax bill. I do not know why that has to be.

I was disposed to vote for a gas tax bill. I was disposed to vote for it. I am not saying I am going to continue to be favorably disposed if we are going to say that the gas tax bill has got to go first and we are not going to do our other more urgent business at the expense of actually going home and spending some time with our families.

My goodness, we have been in session all year. In addition to that a number of us have run for election and had to go through that, and now to go through this—I was not called back here to work on a gas tax bill. I was not told that was what I had to do. We were told we would be out of here by the 15th or the 17th at the latest. We have been here and we have been dutifully. We have dealt with this matter every day. A filibuster on this has not come from our side.

It seems to me we ought to go now to the continuing resolution, start on that, get that done, and let the negotiations go on. The negotiations on the gas tax bill can be going on while we are working on the continuing resolution and if they are close to any kind of agreement then we can come back to the gas tax bill. But let that happen. I am confident that the longer we go on, without getting to the continuing resolution, the more

the gas tax bill is going to begin to lose support. It is going to lose support I am confident from this side, and you may not get a gas tax bill at all if we do not move on and go to the continuing resolution.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. TSONGAS. I was very moved by the appeal by my friend from Oregon, and I would like to help.

It seems to me there are two things that can take place: One, pull the gas tax bill down, get to the continuing resolution or, two, vote on the gas bill now. The decision in both of those lies on the other side of the aisle. The most we can do is do what we did in caucus and that is to say no more amendments, let us go. So my question is why are you talking to us?

Mr. DIXON. Why not say it again? 1Mr. TSONGAS. I am prepared to be irrelevant. I want to go out.

Mr. DOLE. Mr. President, I will give the Senator a live pair. [Laughter.]

Mr. STAFFORD. Mr. President, will the Senator yield to me for a minute? Mr. DOLE. Yes.

Mr. STAFFORD. Mr. President, I thought my colleagues on both sides of the aisle would like to know what we see in the way of action at this time on title II if we go ahead.

There is a total of six amendments which would not require debate and could probably be accepted. There are three amendments, if they are offered, that probably would require debate and might require rollcall votes.

I have not been around here as long as one of my colleagues, but I have been around here long enough to know that a number of other amendments of which I am unaware could apply against title II, the highway part of the bill. But if we are in position to go ahead it would appear to me that, with the exception of one major amendment, the rest of the list facing us on title II would not take a long period to dispose of.

Mr. SARBANES. Mr. President. would the manager of the bill explain why it would not make sense to do the continuing resolution beginning now, finishing it-I think the chairman of the committee said he thought he needed 4 or 5 hours, and that would then allow it to go to conference the first thing in the morning, and you could go back on the highway bill either midnight or 1 o'clock or go back on it the first thing in the morning. We are going to be sitting here tomorrow or whenever the continuing resolution goes to conference in any event. waiting for the conference action, the preparation of the papers, and the return of the continuing resolution.

We could move now to dispose of that and then, as the majority leader sees fit, move back to the highway bill tonight or the first thing in the morning. Perhaps by that time people will see the wisdom of not offering any amendments and we will be able then to go ahead and vote on the highway bill.

Mr. DOLE. That might be an option. But I understand, having been in the House, once they get the continuing resolution, they may all go home. We could still be debating the highway bill. And maybe if the highway bill is not that important, it probably does not make any difference.

Mr. SARBANES. They could do that anyway. The continuing resolution would not get to them until tomorrow evening, as I understand it, even under the best of schedules; is that not cor-

rect?

Suppose we took the continuing resolution up now and completed it this evening at midnight, 1 o'clock, 2 o'clock, whenever, then we would go to conference sometime tomorrow, I take it. Is that correct?

Mr. HATFIELD. That is correct.

Mr. SARBANES. When would the chairman anticipate going to confer-

ence tomorrow?

Mr. HATFIELD. First of all, the House would have to convene to appoint conferees. As soon as the House appointed conferees, we have scheduled a location and everyone is on alert to be ready to immediately go to conference.

I do not know how long the conference would take. It is hard to predict. It depends upon what kind of product we finally come out with on the floor. But, assuming the historic past, we probably could complete the conference in 3 to 4 hours. Then it would take on the average of about 4 to 6 hours, somewhere in that neighborhood, to prepare the report to return to the respective Houses, the paperwork.

Mr. SARBANES. So that would be tomorrow evening, under the best of

circumstances?

Mr. HATFIELD. Exactly, tomorrow evening. Then, we would have to have the House act on the conference report and we would act upon the conference report and send it down to the White House to await the verdict of the White House.

I do not, at this time, feel as certain as I did perhaps a week or so ago that the President would automatically veto it. He may feel it is better for the Republic to get the Congress out of town as quickly as possible. [Laughter.] He may decide to sign it on that kind of a basis and, therefore, if he did we are home free. If he did not, then Saturday becomes a day when we have to go back to the drafting board.

Mr. SARBANES. The President might decide to sign it on some other basis beside that suggested by the chairman of the committee; namely, the substantive content of the continuing resolution being good for the country, as reflected in the judgment of the Senate and the House.

Mr. HATFIELD. I would feel that the product we are offering to the Senate would justify his signature or I would not be here to advocate it. But I am saying, notwithstanding what I may consider as to the quality of the product, for the sake of the Republic, that might even be worth his signature.

Mr. DOLE. In an effort to determine whether we are serious about this, I ask unanimous consent that I might withdraw the amendments pending at the desk in the first and second degree.

Mr. METZENBAUM. Objection.

Mr. CHILES. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. That indicates some-

The Senator from Kansas, of course, could move to table his own amendment, and that motion, I think, would probably pass. But that would open up the bill.

I wonder if we might suggest the absence of a quorum for a few minutes to see if there might be some way to resolve at least a part of the problem. I would like to speak with the majority leader.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ANDREWS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

# SURFACE TRANSPORATION ACT OF 1982—H.R. 6211

The following statements were submitted on the above bill.

GRANDFATHER CLAUSE AMENDMENT TO THE HIGHWAY BILL S. 3043

• Mr. BAUCUS. Madam President, I would like to ask the Senator from Idaho (Mr. Symms) to clarify an amendment which was accepted by the Environment and Public Works Committee. The basis of the amendment sets a national weight standard for heavy trucks at 80,000 pounds. Additional language in the amendment inserts the phrase "which the State determined" to present law.

What is the intent of this language? Mr. SYMMS. Madam President, I thank the distinguished Senator for allowing me to clarify the intent of this amendment. The provision in this bill added by the Environment and Public Works Committee regarding the grandfather clause in section 127 of title 23. United States Code clarifies

confusion which exists in a few States about the proper interpretation of the grandfather clause, differently than the Federal Highway Administration and this has led to confusion and legal proceedings. In one case, in Montana, the FHWA has refused to follow a finding by the Montana Supreme Court as to what was allowed under that State's permitting authority. The FHWA says it is not bound because the trucking company involved did not include it as a defendant in the lawsuit.

The language added "which the State determined" will resolve these outstanding conflicts. It is intended to apply to situations like Montana where a State court, or like Massachusetts, where the State attorney general, or Oklahoma where a State agency, after having carefully considered the facts in that State, is on record as having made a final determination as to what is allowable under the grandfather clause. Certainly, an attorneys general's opinion would be reviewable, with a State supreme court's ruling being the final arbiter of the State law under the grandfather clause.

It is not intended to encourage new debates about exemptions. This is particularly important since the Federal Government is picking up more and more of the costs of maintenance and repair associated, in part, with heavy vehicle use.

Mr. BAUCUS. Does this amendment preclude States from otherwise changing their permit requirements for example, by raising or lowering axle weights or increasing fees?

Mr. SYMMS. No, a State can do whatever it desires as long as it allows vehicles of the weight and size dimensions specified in this legislation or under its original grandfather clause, on its Interstate System. Section 127 becomes in effect, a standard with the grandfather clause allowing States to raise or lower their weights, and such grandfathered weights being a ceiling.

It is my understanding that the grandfather clause applies to, at the most, 16 States: Probably Nebraska, Montana, South Dakota, Oklahoma, Rhode Island, Idaho, Oregon, New Mexico, Utah, Nevada, Massachusetts, Louisiana, Michigan, Hawaii, Washington, and Alaska.

This set of States are the only ones likely to qualify under the State determination process envisioned by the committee in adding the provision; FHWA is certainly encouraged to be actively involved in the State determination process.

Madam President, I hope that this clarification will aid the Senate conferees in adopting the language agreed to in the Environment and Public Works Committee.

• Mr. DANFORTH. Madam President, I rise in support of the Surface

Transportation Assistance Act of 1982. This legislation will provide the needed authorization and revenues to rebuild the Nation's highways and bridges, as well as the public transpor-

tation systems.

The portion of the bill reported by the Finance Committee calls for the setaside of 1 cent per gallon to fund a separate account within the highway trust fund for mass transit. The provision is intended to provide funding for mass transit capital projects, including, as agreed to by the administration, new starts in rapidly growing cities and in older cities attempting to stimulate economically depressed areas.

With respect to new starts, I would like to clarify that the committee intends that, in the making of discretionary grants for new starts, preference should be given to projects which maximize the cost effectiveness of the Federal contribution by, for example, the use of existing infrastructure such as existing track, tunnels, or rights-of-

way.

Madam President, the St. Louis Metropolitan Area, including its Illinois suburbs, has been developing a low-cost approach to the establishment of a modern, urban, light-rail transit system. The project will use existing rights-of-way and existing infrastructure such as the historic Eads Bridge and its adjacent tunnel through down-town St. Louis. The estimated cost of this project is \$135 million, a small fraction of the cost of systems which do not utilize existing facilities such as Washington's Metro system.

Mr. BENTSEN. Madam President, I would like to associate myself with the remarks of the Senator from Missouri. My own State of Texas has a number of rapidly growing cities, such as Houston, whose needs lie primarily in providing new service rather than in rehabilitating older facilities. I am pleased that the legislation before us today recognizes this fact and specifically provides that the funds raised by the bill may be used for new construc-

tion

With respect to the rail project currently being planned in Houston, I am pleased that the Harris County Metro Board is committed to providing a substantial portion of the capital cost of the project with local funds. I believe that this is a responsible course of action which should find encouragement in the Congress and the administration.

Mr. DANFORTH. Madam President, I thank the Senator from Texas for his remarks. I would just ask the chairman of the Finance Committee, the Senator from Kansas, if he agrees that these two proposals are the type of new cost-effective mass transit projects which the committee intends to be given preference in the making of discretionary grants.

Mr. DOLE. That is my understanding of the committee's intent.

FISHERMEN'S EXEMPTION FROM FUEL TAX PRO-POSED BY THE HIGHWAY REVENUE ACT OF 1982

. Mr. COHEN. Madam President, as the Senator from Kansas is aware, commercial fishermen are currently exempt from the 4-cents-a-gallon excise tax that is applied to gasoline which they use for their fishing vessels. This exemption from the fuel tax is offered to fishermen as a qualified business use. Is it the Senator from Kansas' understanding that the Highway Revenue Act of 1982 would extend this exemption to commercial fishermen based upon their qualification as an off-highway business use? And, is it also the Senator's understanding that the exemption for commercial fishermen would be raised from 4-cents-a-gallon, for the gasoline used to power their fishing vessels, to 9-cents-a-gallon exemption as a result of the passage of this measure?

Mr. DOLE. Yes; that is my under-

standing.

• Mr. HUDDLESTON. Madam President, I want to commend the committee for recognizing the Federal responsibility by providing for a Federal lands highway program with authorizations for those roads on or serving Federal lands. The new Federal lands highway program, with its multiyear funding, will provide an essential longrange program to begin addressing the real needs of these neglected Federal facilities. I understand a portion of the park highway and parkway authorizations will be used for repair, restoration, and reconstruction of existing roads and a portion will be used for new construction.

There are four major Federal parkways and park highways which Congress has previously approved and on which work has been started. These are the Foothills Parkway. Cumberland Gap Highway relocation, Blue Ridge Parkway, and the Natchez Trace Parkway. It is my understanding that it is the intent that with the new authorizations provided in the parkway and park highway program that priorities be established with respect to these four parkway and highway projects, such that they will be quickly undertaken and completed prior to the initiation of other new projects which may be eligible for funding under this important pro-

Mr. STAFFORD. That is correct. It is the intent that the authorizations will provide for the early completion of these uncompleted facilities.

Mr. BAKER. I also commend the committee for its work on this program. While it is not necessarily sufficient to take care of all the needs, it does acknowledge the Federal responsibility and will help protect the initial investments to bring the current Fed-

eral highways to safe and maintainable standards and allow for the completion of these urgently needed facilities.

## UNANIMOUS-CONSENT AGREEMENT

Mr. ANDREWS. Madam President, I ask unanimous consent that the Senate temporarily lay aside the pending business and turn to the consideration of the transportation appropriations conference report, H.R. 7019, under a 10-minute time agreement, to be equally divided between myself and the Senator from Florida (Mr. Chiles), or our designees, and that no amendments be in order to the amendments in disagreement; further, I ask unanimous consent that following disposition of the conference report, the Senate resume the pending business.

Mr. ROBERT C. BYRD. Madam President, there is no objection on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF TRANSPORTA-TION AND RELATED AGENCIES APPROPRIATIONS, 1983—CON-FERENCE REPORT

Mr. ANDREWS. Mr. President, I submit a report of the committee of conference on H.R. 7019 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:
The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the Record of December 13, 1982.)

Mr. ANDREWS. Madam President, before I present to the Senate my recommendations on the conference report I would first like to thank Senator Chiles, his staff, and all of the conferees for their assistance in reaching what I believe to be a very good compromise in conference.

Madam President, I am proud to recommend to my colleagues passage of the conference report on the fiscal year 1983 transportation appropriations bill. The bill is \$100 million below the budget request, and provides a lower level of funding than was provided in either the House or Senate

bills. This is in part due to provisions taken care of in the October continuing resolution, but it is also the result of the conferees adopting the lower level of the two Houses on may items.

The Coast Guard is funded at \$2.4 billion, including \$400 million for the acquisitions, construction and improvement of vessels and shore facilities necessary to enable the Coast Guard to continue its fine work.

The bill provides \$625 million for the FAA for facilities and equipment improvments to help implement the national airspace system plan.

Also included is \$700 million for Amtrak and \$220 million for other railroad responsibilites. Urban mass transit is funded at \$3.2 billion, including roughly \$2 billion which will be used for capital improvements in rolling stock, bus facilities and subway maintenance and construction.

The mandatory 102-inch truck width provision and St. Lawrence Seaway debt elimination are also part of the conference agreement.

Madam President, I am pleased to recommend approval of this conference report by my colleagues, and I have assurances from OMB that they will recommend enactment of the bill.

Madam President, I yield to my colleague, the good Senator from Florida.

Mr. CHILES. Madam President, I support the statement just made by Chairman Andrews and would urge the Members to vote for the conference report on the transportation appropriations bill for fiscal year 1983. Senator Andrews and his staff have done an outstanding job on this appropriation bill and have accommodated to the extent possible the interests of all the Members of both sides of the aisle.

The conference committee has made several reductions to the totals that were recommended by both the House and the Senate. The conference agreement before the Members is \$309.2 million below the level approved by the Senate and \$552.6 million below the 302(b) allocation that was provided to our subcommittee. It is also worth noting that the conference agreement is \$102.5 million below the level enacted for 1982 and \$73 million below the level requested by the administration for 1983.

While these reductions have been made, increased funding is still provided for several programs of high priority. For example, recommended in the conference report before the Members is an increase of \$127 million for the Coast Guard over the amounts requested by the administration with \$115.2 million of this increase going for the Coast Guard construction program. These funds are important to permit the Coast Guard to modernize its fleet of cutters which now have an average age of almost 28 years.

The highlights of other increases follow. The conference committee has provided an additional \$100 million for Amtrak which is the amount necessary to permit Amtrak to continue its national system of rail passenger service. The conference committee has also provided increases in programs for the Urban Mass Transportation Administration over the levels requested by the administration in recognition of the importance of maintaining a healthy mass transportation system. For example, the conference committee has recommended an increase of \$85 million for urban discretionary grants; an increase of \$185 million for urban formula grants; and an increase of \$26 million for nonurban formula grants all over the amount requested by the administration.

One additional matter that I know is important to many Members is the interstate transfer grants programs for highways and transit. As the Members recall, the Congress provided funding for these two programs for the entire year of 1983 in the first continuing resolution for fiscal year 1983. Specifically, that public law provided \$518 million for interstate transfer grants-highways and \$365 million for interstate transfer grants-transit. Because these items have already been funded, they are not included in the agreement before the conference Members.

Madam President, that concludes my remarks on the conference agreement, and I will be pleased along with Senator Andrews to help answer any questions that the Members may have.

Mr. ROBERT C. BYRD. Madam President, I commend the distinguished chairman of the Appropriations Subcommittee (Mr. Andrews), and the distinguished ranking member (Mr. CHILES). They have done a masterful job and demonstrated great skill and tremendous patience and extraordinary knowledge of the subject matter, and they came out very will in their conference with the House of representatives.

I express my appreciation and appreciation on behalf of the Senate for the work they have done.

Mr. ANDREWS. Madam President, those of us on the committee certainly appreciate the generous remarks of our good friend and colleague, the distinguished minority leader, a member of our subcommittee. We appreciate the great contribution and cooperation he has given to us as we move through the consideration of these various items so important to various parts of our great Nation.

Mr. ROBERT C. BYRD. Madam President, I thank the Senator.

Mr. DOMENICI. Mr. President, I submit for inclusion in the RECORD, two tables that present the spending and credit totals for the Transportation and Related Agencies appropriation bill for fiscal year 1983 as reported from the committee of conference. The tables follow:

TRANSPORTATION SUBCOMMITTEE—SPENDING TOTALS

[In billion dollars]

	Fiscal year	r 1983
	BA	0
Outlays from prior-year budget authority and other actions completed <sup>1</sup> .  H.R. 7019, conference agreement.  Possible later requirements:	0.9 10.6	12.4
Possible alear requirements: FAA facilities and equipment CAB air carrier payments Total for Transportation Subcommittee First Budget Resolution 302(b) allocation. Possible amount over (+)/under (-).	(2) 11.7 11.8 1	(2) (2) 19.8 20.1 3

Mr. DANFORTH. Mr. President, as the distinguished chairman of the Transportation Appropriations Subcommittee will recall, he and I worked closely together earlier this year to insure adequate preference share funding for specifically designated projects and to insure that such funding remained available until expended. I am now advised that the conferees to the fiscal 1983 transportation appropriations bill have recommended that \$25 million be derived from unobligated balances of preference shares for use for the Chicago Regional Transportation Authority and for Conrail labor protection. I would like to use this opportunity to ask the chairman whether my understanding is correct that in recommending that the \$25 million be derived from preference shares, it is the conferees' intent to use the preference share funds on a temporary basis and then to return a

like amount to the preference share program through the fiscal 1983 supplemental appropriations process.

Mr. ANDREWS. The distinguished Senator from Missouri is correct in his understanding of the conferees' intent. I also would like to assure him that the conferees remain committed to those projects for which preference share funds were earlier earmarked. Of course, we believe it is essential that persons interested in these projects submit applications for the funding as soon as possible.

Mr. MATTINGLY. I have expressed my interest for some time now that the UMTA have the flexibility needed to deal with the diverse needs of this Nation's mass transit systems. I applaud the Senator from North Dakota's efforts to see that a good bill be reported from the House-Senate conference on the fiscal year 1983 Department of Transportation and related agencies appropriations bill. This bill

is a needed step.

But I am particularly concerned that directives given to UMTA by the Senate's report and not discussed in conference be understood by UMTA. Specifically, I am interested in that section of the Senate report that directs that an amount not to exceed \$40 million be available to fund new start projects currently covered by letters of no prejudice expiring in calendar year 1982.

Is it the understanding of the Senator from North Dakota that although this report's language is not contained in the conference report, it is still binding upon the UMTA?

Mr. ANDREWS. Yes, it is, as is the usual procedure on noncontroversial items in either House or Senator re-

ports.

Mr. MATTINGLY. And is it the gentleman's understanding that the UMTA should therefore, in this matter, adhere to the direction of the Senate report subject to the normal reprograming process?

Mr. ANDREWS. Yes, it is. There is nothing in the conference agreement which would negate or diminish the

Senater report language.

Mr. MATTINGLY. I thank the Senator from North Dakota. This is important discretionary flexibility for UMTA, and I am pleased to have this point clarified.

Mr. ANDREWS. Madam President, I move that the Senate adopt the con-

ference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to. Mr. ANDREWS. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Madam President, I ask that the Chair lay before the Senate certain amendments which are in disagreement.

The PRESIDING OFFICER. The clerk will state the amendments in dis-

agreement.

The legislative clerk read as follows: Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 2 to the aforesaid bill, and concur therein with an amendment as follows:

Strike the matter stricken and inserted by

said amendment, and insert:

"\$40,000,000, of which \$1,000,000 shall be transferred and made available to the Motor Carrier Ratemaking Study Commission and"

Resolved. That the House recede from its disagreement to the amendment of the Senate numbered 6 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"HEADQUARTERS ADMINISTRATION"

"(INCLUDING TRANSFER OF FUNDS)"

"For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Coast Guard including but not limited to executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard, \$72,440,000, of which \$14,000,000 shall be derived by transfer from appropriations for retired pay.

Resolved. That the House recede from its disagreement to the amendment of the Senate numbered 11 to the aforesaid bill, and concur therein with an amendment as

follows:

Strike the matter stricken and inserted by said amendment, and insert: "\$50,000,000 together with an amount not to exceed \$4,000,000 which shall be derived from appropriations for retired pay".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as

follows:

In lieu of the sum inserted by said amend-

ment, insert: "\$1,264,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert ": Provided further, That the Federal Aviation Administration shall not undertake any reorganization of its regional office structure without the prior approval of both House and Senate Appropriations Committees"

Resolved. That the House recede from its disagreement to the amendment of the Senate numbered 43 to the aforesaid bill, and concur therein with an amendment as

Restore the matter stricken by said amendment, amended to read as follows: " of which \$10,000,000 shall be derived from the unobligated balances of "Redeemable preference shares": Provided, That such sum shall be considered to have been appropriated to the Secretary under said section 713 for transfer to the Railroad Retirement Board for the payment of benefits under section 701 of the Regional Rail Reorganization Act of 1973, as amended: Provided further. That, for purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 45 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "\$700,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill, and concur therein with an amendment as

Restore the matter stricken by said amendment, amended to read as follows: Provided further, That, of the funds available, \$25,000,000 shall be held in reserve for 6 months after the date of enactment of this Act to be available for the rehabilitation, renewal, replacement, and other improvements on the line between Indianapolis, Indiana, Shelbyville, Indiana, and Cincinnati, Ohio: "Provided further, That, of the funds available, \$5,000,000 shall be made available only for the rehabilitation, renewal, replacement, and other improvements on the line between Attleboro, Massachusetts, and Hyannis, Massachusetts, to ensure that such track will meet a minimum of class III standards as prescribed by applicable Federal Railroad Administration regulations"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 47 to the aforesaid bill. and concur therein with an amendment as follows:

Strike the matter stricken and inserted by said amendment, and insert:

"For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, \$15,000,000. to remain available until expended and to be derived from the unobligated balances of 'Redeemable preference shares', and for necessary expenses to carry out section 1139(b) of Public Law 97-35, \$75,000,000, to remain available until expended and to be derived from the unobligated balances of Payments for purchase of Conrail securities'.

Resolved. That the House recede from its disagreement to the amendment of the Senate numbered 53 to the aforesaid bill, and concur therein with an amendment as

In lieu of the sum proposed by said amendment, insert: "\$1,606,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 56 to the aforesaid bill, and concur therein with an amendment as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 66 to the aforesaid bill, and concur therein with an amendment as

Strike the matter stricken and inserted by said amendment, and insert: "\$23,125,000: Provided, That of the foregoing amount, not to exceed \$10,625,000 shall be made available for the period between April 1, 1983, and September 30, 1983".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 72 to the aforesaid bill, and concur therein with an amendment as

In lieu of the matter inserted by said amendment, insert: "not to exceed \$8,000 for official reception and representation expenses of the Board;"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 93 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"Sec. 322. (a) Any air carrier having a claim for compensation under section 406 or 419(a)(7)(B) of the Federal Aviation Act of 1958, decided by the Civil Aeronautics Board (hereinafter referred to as the "Board") may bring an action directly on the claim in the United States Claims Court as provided in section 10(a) of the Contract Disputes Act of 1978 with respect to claims which have been decided by a contracting officer. Failure by the Board to issue a final decision on a final claim within one year after it was filed with the Board, or by the date of enactment of this section, whichever is later, shall be deemed to be a decision by the Board denying the claim, and will au-thorize an action on the claim as provided in this section. This section shall apply to any claim decided, or deemed to have been decided, by the Board after January 1, 1981, including any claim remanded to the Board by a United States court of appeals, irrespective of when the claim was filed with the Board. Any action under this section shall be filed within one hundred and twenty days after the claim has been decided or is deemed to have been decided by the Board, or within one hundred and twenty days after the date of enactment of this section, whichever is later. Any petition for review of a decision of the Board with respect to any such claim pending in a United States court of appeals on the date of enactment of this section shall be dismissed without prejudice upon motion of the petitioner.

"(b) Except as provided herein, the following provisions of the Contract Disputes Act of 1978 shall apply with respect to any claim to which this section applies as if such claim were a claim with respect to a decision of a contracting officer under section 10(a) of such Act and as if the Board were a contracting officer:

"(1) Section 12, relating to interest, which shall be payable by decision of the Board or the Court of Claims at the rates provided in

such section, not to preceed the date of enactment of the Contract Disputes Act of 1978.

"(2) Section 13, relating to the payment of claims and judgments.

'(3) Section 14(i), relating to the jurisdiction of the United States Claims Court.

"(c) If an administrative law judge has issued an initial decision after a hearing on the record in the case before the Board, the court may, in its discretion, rely upon the evidence adduced at such hearing and may give such initial decision such weight as it deems appropriate."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 96 to the aforesaid bill, and concur therein with an amendment as

In lieu of the section number named in said amendment, insert: "323".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 97 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:
"Sec. 324. No funds appropriated under

this Act shall be expended to pay for any travel initiated after January 1, 1983, by the Administrator of the Federal Aviation Administration as passenger or crew member aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: Provided, That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator within 6 hours local time of the desired time of arrival: Provided further, That this limitation shall not apply to costs incurred by any flight which is essentially for the purpose of inspecting, investigating, or testing the operations of any aspect of the Federal Aviation Administration system designed to aid and control air traffic, or to maintain or improve aviation safety: Provided further, That this limitation shall not apply to costs incurred by any flight in Department of Transportation aircraft which is necessary in times of emergency or disaster, or for se-curity reasons, or to fulfill official diplomatic representation responsibilities in foreign countries: Provided further, That written certifications shall be issued quarterly on all flights initiated in the previous quarter subject to this limitation and shall be made readily available to Congress and the general public."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 98 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "325".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 101 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said

amendment, amended to read as follows:
"Sec. 327. Notwithstanding any other provision of law, the Secretary of Transportation shall approve, upon request of the State of Indiana, not to exceed \$4,000,000, to be made available from funds available for redistribution under 23 U.S.C. 118(b) for the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-LaPorte County Line near Michigan City, Indiana. Such amount shall be subject to the obligation limitation enacted for fiscal year 1983 or any fiscal year thereafter on obligations for Federalaid highways and highway safety construction programs.

SEC. 328. Notwithstanding any other provision of this Act, the Secretary of Transportation is authorized to transfer appropriated funds between the Coast Guard Operating expenses appropriation and the Coast Guard Headquarters administration appropriation and between the Federal Aviation Administration appropriation for Operations and the Federal Aviation Administration appropriation for Headquarters administration: Provided, That the Coast Guard and Federal Aviation Administration Headquarters administration appropriations shall be neither increased nor decreased by more than 7.5 per centum by any such transfers: Provided further, That any such transfers shall be reported promptly to the Committee on Appropriations and the appropriate authorizing committees in the House and the Seante.'

Mr. ANDREWS. Madam President, I move that the Senate concur with the amendments of the House.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

Mr. ANDREWS. Madam President, I move to reconsider the vote by which the amendments were agreed to.

Mr. ROBERT C. BYRD. Madam President. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CORRECTIONS TO CERTAIN BANKING STATUTES

Mr. BAKER. Madam President, there is a matter that has been cleared on both sides for action by unanimous consent, I believe, and I will state a request now for the consideration of the minority leader and other Senators

I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 271 making technical amendments to banking statutes.

Mr. ROBERT C. BYRD. Madam President, I would have no objection, provided the distinguished majority leader will attach to that that there be a time limitation of whatever time he wants, and that no further amendments be in order.

Mr. BAKER. Madam President, I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the resolution by title.

The legislative clerk read as follows: A joint resolution (S.J. Res. 271) to make technical corrections in certain banking and related statutes.

The Senate proceeded to consider the resolution which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment to strike out all after the enacting clause, and insert the following:

Section 1. (a) Section 13(c)(5)(A) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(5)(A)), as added by section 111 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 2. Section 5(0)(1) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(0)(1)), as added by section 112 of Public Law 97-320, is amended by inserting "examination," after "operation,".

SEC. 3. The last sentence of section 26(a) of the Federal Deposit Insurance Act (12 U.S.C. 1831c(a)), as added by section 113(p) of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 4. (a) Section 13(f)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1823(f)(1)), as added by section 116 of Public Law 97-320, is amended by striking out "paragraphs" both places it appears and inserting in lieu thereof "paragraph".

(b) Section 13(f)(6) of such Act (12 U.S.C. 1823(f)(6)), as added by section 116 of Public

Law 97-320, is amended-

(1) by redesignating subparagraphs (C) and (D) as subparagraphs (D) and (E), respectively; and

(2) by inserting after subparagraph (B) the following:

"(C) In the case of a minority-controlled institution, the Corporation shall seek an offer from other minority-controlled institutions before proceeding with the sequence set forth in the preceding subparagraph.".

SEC. 5. Section 406(c)(3) of the National Housing Act (12 U.S.C. 1729(c)(3)), as amended by section 122(f) of Public Law 97-320, is amended by striking out "paragraphs (1) or (2)" and inserting in lieu thereof "paragraph (1) or (2)".

SEC. 6. Section 408(1) of the National Housing Act (12 U.S.C. 1730a (1)) is amended by striking out "mergers or acquisitions approved under subsection (e)(2)" and inserting in lieu thereof "any transaction approved under subsection (e)(2) or (m)".

SEC. 7. (a) Section 408(m)(1)(A)(i) of the National Housing Act (12 U.S.C. 1730a(m)(1)(A)(i)), as added by section 123 of Public Law 97-320, is amended by striking out "subsections (e) (2) and (1)" and inserting in lieu thereof "subsections (e) (2) and (1)".

(b) Section 408(m)(1)(B)(iii) of such Act is amended by striking out "Board of Directors" each place it appears and inserting in lieu thereof "Federal Home Loan Bank Board".

SEC. 8. The second sentence of section 17(a) of the Federal Home Loan Bank Act (12 U.S.C. 1437(a)), as amended by section 127 of Public Law 97-320, is amended—

(1) by striking out "the Administrative Procedure Act" and inserting in lieu thereof "section 553 of title 5, United States Code"; and

(2) by striking out "such Act" and inserting in lieu thereof "section 554 of such title"

SEC. 9. (a) Section 406(f)(5)(C)(ii) of the National Housing Act (12 U.S.C. 1729(f)(5)(C)(ii)), as added by section 202 of Public Law 97-320, is amended by striking out "if" the second place it appears.

(b)(1) Section 406(f)(5)(I) of such Act (12 U.S.C. 1729(f)(5)(I)), as added by section 202 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(2) The amendment made by paragraph (1) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 10. (a) Section 13(i)(9) of the Federal Deposit Insurance Act (12 U.S.C. 1823(i)(9)), as added by section 203 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.
SEC. 11. Section 206 of Public Law 97-320

is amended to read as follows:

# "SUNSET PROVISION

"Sec. 206. (a) Upon the expiration of three years after the date of enactment of this Act, section 406(f)(5) of the National Housing Act and section 13(i) of the Federal Deposit Insurance Act are repealed.

posit Insurance Act are repealed.

"(b) The repeal by subsection (a) shall have no effect on any action taken or authorized pursuant to the amendments made by this title by or for a qualified institution while such amendments were in effect and while net worth certificates issued pursuant to these amendments are outstanding."

SEC. 12. The first sentence of section 5(b)(1)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(b)(1)(b)), as amended by section 312 of Public Law 97-320, is amended by inserting "may accept a demand account from itself and" after "An association".

SEC. 13. Section 204 of the Depository Institutions Deregulation Act of 1980 (12 U.S.C. 3503), as amended by section 327 of Public Law 97-320, is amended by adding at the end thereof the following:

"(4) The transitional adjustment provisions in section 19(b)(8) of the Federal Reserve Act, providing for the phase-in of reserve requirements, shall not apply to an account or accounts established pursuant to this subsection."

SEC. 14. (a)(1) Section 5(c)(3) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)(3)) is amended by adding at the end

thereof the following:

"(D) Construction loans without security.—Investments not exceeding the greater of (i) the sum of its surplus, undivided profits, and reserves, or (ii) 5 per centum of the assets of the association, in loans the principal purpose of which is to provide financing with respect to what is or is expected to become primarily residential real estate where (I) the association relies substantially for repayment on the borrower's general credit standing and forecast of income without other security, or (II) the association relies on other assurances for repayment, including but not limited to a guaranty or similar obligation of a third party. Investments under this subsection shall not be included in any percentage of assets or other percentage referred to in this subsection."

(2) The amendment made by paragraph
(1) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

(b) Section 5(r)(2)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C.

1464(r)(2)(B)), as added by section 334 of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 15. Section 352 of Public Law 97-320, is amended by inserting "Home" after "Fed-

eral" the first place it appears.

SEC. 16. Section 6(m) of the Federal Home Loan Bank Act (12 U.S.C. 1426(m)), as added by section 355(b) of Public Law 97-320, is amended by striking out "Banks" and inserting in lieu thereof "banks or in connection with obtaining a charter from the Federal Home Loan Bank Board".

SEC. 17. (a) Section 5200(b)(1) of the Revised Statutes (12 U.S.C. 84), as amended by section 401 of Public Law 97-320, is amended by inserting a comma before "to the extent specified by the Comptroller of the

Currency".

(b) Section 11(m) of the Federal Reserve Act (12 U.S.C. 248(m)) is amended by striking out in the first sentence "under paragraph (8) of section 5200 of the Revised Statutes, as amended (U.S.C., Supp. VII, title 12, sec. 84)" and inserting in lieu thereof "under section 5200(c)(4) of the Revised Statutes".

SEC. 18. (a) Section 5169(b)(1) of the Revised Statutes (12 U.S.C. 27(b)(1)), as amended by section 404(a) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engage exclusively"; and

(2) by striking out "depository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

(b) The last proviso of section 5136 Seventh of the Revised Statutes (12 U.S.C. 24 Seventh), as amended by section 404(b) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engaged exclusively";

(2) by striking out "despository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,"; and

(3) by striking out "10 per centum of its" and inserting in lieu thereof "10 per centum

of the association's".

(c) The last sentence of section 2(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841 (c)), as amended by section 404(d) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engage

exclusively"; and

(2) by striking out "depository institutions" the third place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

SEC. 19. (a) Section 2(b) of the Act of May 1, 1886 (12 U.S.C. 30(b)), as amended by section 405(a) of Public Law 97-320, is amended by inserting "for a relocation outside such limits" after "stock of such association".

(b) The first sentence of section 5154 of the Revised Statutes (12 U.S.C. 35) is amended by striking out "with any name approved by the Comptroller of the Currency" and inserting in lieu thereof "with a name that contains the word 'national'".

SEC. 20. (a) Section 406 of Public Law 97-320 is amended to read as follows:

# "VENUE PROVISIONS

"Sec. 406. The last sentence of section 5198 of the Revised Statutes (12 U.S.C. 94) is amended to read as follows: 'Any action or proceeding against a national banking asso-

ciation for which the Federal Deposit Insurance Corporation has been appointed receiver, or against the Federal Deposit Insurance Corporation as receiver of such association, shall be brought in the district or territorial court of the United States held within the district in which that association's principal place of business is located, or, in the event any State, county, or municipal court has jurisdiction over such an action or proceeding, in such court in the county or city in which that association's principal place of business is located.'."

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

Sec. 21. Section 4(b)(1) of the Act of March 9, 1933 (12 U.S.C. 95(b)(1)), as amended by section 407 of Public Law 97-320, is amended by inserting "a State or" before "a State official".

SEC. 22. Section 23A (d) of the Federal Reserve Act (12 U.S.C. 371(d)), as amended by section 410(b) of Public Law 97-320, is

amended-

(1) by striking out "except for the purchase of a low-quality asset which is prohibited" in paragraph (1) and inserting in lieu thereof "subject to the prohibition contained in subsection (a)(3)"; and

(2) by striking out "purchasing loans on a non-recourse basis from affiliated banks" in paragraph (6) and inserting in lieu thereof ", subject to the prohibition contained in subsection (a)(3), purchasing loans on a non-recourse basis from affiliated banks".

Sec. 23. (a) Section 412 of Public Law 97-320 is amended to read as follows:

### "VISITORIAL POWERS

"Sec. 412. The fifth paragraph of section 5240 of the Revised Statutes (12 U.S.C. 484)

is amended to read as follows:

"'(A) No national bank shall be subject to any visitorial powers except as authorized by Federal law, vested in the courts of justice or such as shall be, or have been exercised or directed by Congress or by either House thereof or by any committee of Congress or of either House duly authorized.

"'(B) Notwithstanding subparagraph (a), lawfully authorized State auditors and examiners may, at reasonable times and upon reasonable notice to a bank, review its records solely to ensure compliance with applicable State unclaimed property or escheat laws upon reasonable cause to believe that the bank has failed to comply with

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 24. Section 424(g) of Public Law 97-320 is amended by striking out "688" and in-

serting in lieu thereof "668"

SEC. 25. Section 107(5)(A)(i) of the Federal Credit Union Act (12 U.S.C. 1757(5)(A)(i)), as amended by section 507 of Public Law 97-320, is amended by striking out "Association" and inserting in lieu thereof "Adminis-

Section 107(7) of the Federal Credit Union Act (12 U.S.C. 1757(7)), as amended by section 514 of Public Law 97-320, is amended-

(1) by striking out "and" before "(J)"

(2) by striking out "(L)" and inserting in lieu thereof "(K)"; and (3) by striking out "; and" at the end thereof and inserting in lieu thereof a

SEC. 27. The next to the last sentence of section 124 of the Federal Credit Union Act (12 U.S.C. 1770), as amended by section 515 of Public Law 97-320, is amended by inserting "of" after "installation".

SEC. 28. Section 113 of the Federal Credit Union Act (12 U.S.C. 1761b), as amended by section 522 of Public Law 97-320, is amend-

(1) by striking out "directions" and inserting in lieu thereof "direction";
(2) by striking out "unions" in paragraph

(2) and inserting in lieu thereof "union"; (3) by inserting "by" after "interest paid"

in paragraph (9); and

(4) by striking out "meetings" in paragraph (15) and inserting in lieu thereof

'meeting". SEC. 29. Section 202(c) of the Federal Credit Union Act (12 U.S.C. 1782(c)), as amended by section 529 of Public Law 97-320, is amended by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraph (2)".

SEC. 30. The first sentence of section 4(c)(8) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8), as amended by section 601 of Public Law 97-320, is amend-

(1) by inserting ": Provided, however, That such a bank holding company and its subsidiaries may not engage in the sale of life insurance or annuities except as provided in subparagraph (A), (B), or (C)" before "; or (G)"; and

(2) by striking out the proviso at the end thereof.

SEC. 31. Section 701(c) of Public Law 97-320 is amended-

(1) by striking out "both"; and

(2) by inserting ", on," after "prior to". SEC. 32. (a) Section 1(b)(4) of the Bank Corporation Act (12 U.S.C. 1861(b)(4)), as amended by section 709 of Public Law 97-320, is amended-

(1) by striking out "or another" after "insured bank," and inserting in lieu thereof

'a": and

(2) by inserting before the final semicolon the following: ", or a financial institution the accounts or deposits of which are insured or guaranteed under State law and are eligible to be insured by the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, or the National Credit Union Administration

(b) the Bank Service Corporation Act, as amended by section 709 of Public Law 97-

320, is amended-

(1) by striking out "the Financial Institutions Supervisory Act of 1966 (12 U.S.C. 1818(b) et sec.)" in section 7(b) and inserting in lieu thereof the following: "section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818)"; and

(2) by striking out "under this Act" in subsections (d) and (e) of section 4 and insert-ing in lieu thereof "under the law of the

United States".

Sec. 33. Section 4(c)(14)(F) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)), and amended by section 203 of Public Law 97-290, is amended—
(1) by striking out the semicolon at the

end of subparagraph (ii) and inserting in

lieu thereof a period;

(2) by striking out "solely to do business with other banks and their officers, directors, or employees; (II) is owned primarily by the banks with which it does business; and (III) does not do business with the general public" in subparagraph (iii) and inserting in lieu thereof "to engage exclusively (except to the extent otherwise provided by law) in providing services for other depositoorganizations, subsidiaries thereof, and their officers, directors, and employees; and (II) is owned exclusively (except to the extent directors' qualifying shares are required by law) by other depository institutions":

(3) by striking the semicolon and the word "and" at the end of subparagraph (iii) and inserting in lieu thereof a period; and

(4) by striking out subparagraph (iv).

SEC. 34. Section 414(a) of the National Housing Act (12 U.S.C. 1730c) is amended by inserting "(which, for the purpose of this section, shall include a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation)" after "insured institution" the first place it

Mr. ROBERT C. BYRD. Madam President, would the majority leader state the time?

Mr. BAKER. Madam President, I ask unanimous consent that there be a 1-minute time limitation, to be equally divided and controlled.

The Presiding officer. Without objection, it is so ordered.

Mr. GARN. Madam President, during the past few weeks, the Banking Committee, its staff, and our counterparts in the House have been drafting technical amendments to the Garn-St Germain Depository Institu-tions Act of 1982. This effort has been successful largely because of the cooperation of Senator RIEGLE and other committee members and the cooperation of Congressmen ST GERMAIN and STANTON and their colleagues on the House Banking Committee. To them, I extend my personal thanks.

Senate Joint Resolution 271, as amended, contains technical revisions to the Garn-St Germain Act which are necessary at this time. The amendments to Senate Joint Resolution 271 are to reassert, through section 32, that bank service corporations may offer check clearing and similar operational services to State-insured depository institutions and to confirm our intent that the provisions in the resolution—sections 1, 9(b), and 10—regarding the deferral of or exemption from certain State franchise taxes for institutions receiving Federal financial assistance be effective as of the date of enactment of the Garn-St. Germain Act.

There are still other revisions to the act which may be appropriate, but the Senate and House Banking Committees agreed to accept only amendments which are technical and time sensitive.

Most of the revisions in Senate Joint Resolution 271 are merely grammaticorrections. cal or cross-reference Others, such as section 16, regarding the ability of savings institutions to be readmitted to membership in the Federal Home Loan Bank System, are necessary to reinsert language in the act which was inadvertently omitted from or misplaced in the conference report.

Some of the revisions are necessary to insure that there be no misunderstanding as to what the act means. In this regard, section 13 is intended to reaffirm congressional intent that the phasein of reserve requirements under

the Monetary Control Act of 1980 does not apply to money market deposit accounts, established under section 327 of the Garn-St Germain Act, in all depository institutions. Section 13 is not intended to affect in any way the status of existing law regarding reserve requirements for any other categories of deposits or accounts.

Senate Joint Resolution 271 is necessary to insure that the Garn-St Germain Act be implemented properly and that it not be misinterpreted because of some technical deficiency. The provisions are limited in scope and needed at this time, and I urge my colleagues to pass Senate Joint Resolution 271 expeditiously.

I also request unanimous consent that the attached summary of Senate Joint Resolution 271 be printed in full in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

#### SUMMARY OF S.J. RES. 271

(As reported by the Senate Committee on Banking, Housing, and Urban Affairs)

Sec. 1. Confirms intent that deferral of State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such deposits.

Sec. 2. Makes clear the obvious intent that the Federal Home Loan Bank Board has the authority to examine savings banks that convert to federal charter but maintain FDIC insurance.

Sec. 3. Provides correct reference to short

Sec. 4(a). Grammatical correction.

Sec. 4(b). Clarifies that the preference for minority controlled institutions involved in extraordinary acquisitions applies to both commercial banks and thrifts.

Sec. 5. Grammatical correction.

Sec. 6. Corrects improper cross references. Sec. 7(a). Corrects improper cross references.

Sec. 7(b). Corrects reference to Federal Home Loan Bank Board.

Sec. 8. Confirms expanded delegation authority of the Federal Home Loan Bank Board, particularly with respect to informal adjudications.

Sec. 9(a). Grammatical correction. Sec. 9(b). Confirms intent that exemption from State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such

Sec. 10. Confirms intent that exemption from State franchise taxes on deposits during period of federal assistance applies to both interest and dividends paid on such deposits.

Sec. 11. Eliminates inconsistency by specifying that the Title II sunset does not apply to outstanding certificates.

Sec. 12. Specifies power of savings and loans to open demand accounts for themselves

Sec. 13. Provides that money market deposit accounts in all depository institutions will not be subject to the phase-in of reserve requirements under the Monetary Control Act of 1980.

Sec. 14(a). Reinserts the 5 percent construction lending authority inadvertently eliminated.

14(b). Provides correct reference to short title.

Sec. 15. Corrects reference to the Federal Home Loan Bank Act.

Sec. 16. Restores language inadvertenly omitted to allow readmission to Federal Home Loan System membership.

Sec. 17(a). Grammatical correction. Sec. 17(b). Corrects statutory cross refer-

Sec. 18. Confirms intent that bankers' banks can provide services to depository institutions and their holding companies.

Sec. 19. Reasserts that relocation of bank's headquarters within community limits does not necessitate shareholder approval and clarifies that name approval by the Comptroller is not required whan a state bank converts to federal charter.

Sec. 20. Corrects the Revised Statutes reference to make clear that only the last sen-

tence of Sec. 5198 is being amended.

Sec. 21. Clarifies that "a state" as well as a "state official" can declare holidays for national banks.

Sec. 22. Confirms intent that the low quality asset prohibition applies to all Sec. 23A transactions

Sec. 23. Corrects the Revised Statutes reference to make clear that only the last paragraph of Sec. 5240 is being amended.

Sec. 24. Citation correction.

25. Corrects citation to National Credit Union Administration.

Sec. 26. Grammatical and citation corrections.

Sec. 27. Grammatical corrections. Sec. 28. Grammatical corrections.

Sec. 29. Citation corrections.

Sec. 30. Confirms the intent that the limitation on life insurance activities in Title VI is applicable to small bank holding companies.

Sec. 31. Clarifies that the student loan exemption from truth-in-lending applies to loans made on date of enactment.

Sec. 32. Corrects a statutory reference, makes clear that bank service corporations owned by national banks may perform the same services a national bank may perform, and reasserts that bank service corporations may offer check clearing and similar operational services to State-insured depository institutions as well as federally-insured institutions.

Sec. 33. Conforms the language describing bankers' banks in the Export Trading Company Act to the language used in the Garn-St Germain Act.

Sec. 34. Continues the application of Sec. 414(a) of the National Housing Act to savings banks that become FDIC-insured.

Mr. RIEGLE. Mr. President, I rise in support of these technical amendments to the Garn-St Germain Depository Institutions Act of 1982 which have the unanimous support of the members of the Banking Committee on both sides of the aisle.

The procedure that the committee followed in considering these technical corrections was that no technical amendment to which there was objection would be eligible in this joint resolution. These procedures were also followed in discussions with the House on this joint resolution. All interested outside parties have had the opportunity to review these technical changes and we find no objection.

The amendments in many instances correct grammatical or other minor errors which inevitably occur in major legislation. In some other instances

the amendments provide clarity carrying out the clear intent of the law.

Mr. President, I commend this legislation to my colleagues as legislation which will assist in carrying forward the public policies encompassed in the Garn-St Germain legislation.

The PRESIDING OFFICER. The question is on agreeing to the commit-

tee amendment.

The committee amendment was agreed to.

Mr. GARN. Madam President, I move to reconsider the vote by which the committee amendment was agreed

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read a third time, and passed.

Mr. GARN. Madam President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

### ORDER OF BUSINESS

Mr. BAKER. Madam President, it is 10 o'clock at night, and there is much work yet to be done. It appears now we are not able this evening to work out a further arrangement on how we might deal with the surface transportation bill, to my regret. But being realistic about it, as I am, and notwithstanding my reluctance to do so and that of the President to do so, I ask unanimous consent that the Senate now temporarily lay aside the surface transportation bill and proceed to the consideration of the continuing resolution, House Joint Resolution 631.

Mr. ROBERT C. BYRD. Madam President, there is no objection to waiving the 1-day rule on this side. I compliment the majority leader on the action he has requested.

The PRESIDING OFFICER. Without objection, it is so ordered.

# FURTHER CONTINUING APPROPRIATIONS, 1983

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The legislative clerk read as follows: A joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes.

The Senate proceeded to consider the joint resolution.

Mr. BAKER. Madam President, the distinguished chairman of the committee is here and prepared to take his place to manage this bill. Before he does so, I would like to commend the distinguished chairman, the Senator from Oregon, for the prompt and efficient way in which the committee handled this matter and he participated so effectively. I would like to congratulate the distinguished ranking member for his participation and contribution.

I especially call the attention of the Senate to the fact that this continuing resolution was moved from markup in only about 4 hours of deliberations by the Appropriations Committee. That ought to be a model for the Senate as a whole.

It would be my hope that we could work our way through this rather complex and extensive piece of legislation with something even approaching the rapidity that was exhibited by the Appropriations Committee, all of its members on both sides, and the distinguished chairman and ranking member.

I will not now put a unanimous-consent request dealing with the time limitation. I will do so later after the formalities are out of the way and Members have an opportunity to think about it.

But, while we are thinking about it, I would like them also to think about the fact that it is 10 o'clock tonight, that 25 hours from right now the continuing resolution will expire by its terms and must be replaced by a new one, and that we have to act on this resolution and the resolution must go to conference and then be acted on by both Houses, obviously, and reach the President for his consideration, all in the space of 26 hours.

If that is going to occur, we are going to have to get on our horse and ride. I propose, Madam President, that in a short time we gather together and consider a possibility of a time limitation on the bill itself, on debate on the bill, and I would be bold enough to recommend 2 hours on the bill, equally divided, I do not now make that request, but I do urge Senators to consider that possibility.

I would also suggest that we consider the possibility of a time limitation on amendments of 30 minutes on firstdegree amendments, maybe 15 minutes on second-degree amendments, points of order, appeals, if they are submitted, and the like.

I really believe that is the only way we are going to get the work of the Senate done in anything like a suitable period of time, given the constraints we have imposed on us by the calendar.

Madam President, there are technicalities that must be dealt with. There will no doubt be opening statements. So I will not put that request at this time. But, as soon as those technicalities and formalities are out of the way, I will put such a request, or a similar one, and I hope Senators will consider it favorably.

Madam President, I yield the floor. Mr. HATFIELD addressed Chair.

The PRESIDING OFFICER. The

Senator from Oregon.

Mr. HATFIELD. Madam President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 631. We will use as the basis for amendments a committee print, since the ordinary print is not available.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. HATFIELD. Madam President, the Senate now has before it House Joint Resolution 631, making further continuing appropriations for fiscal year 1983. This measure was passed by the House on Tuesday and reported yesterday by the Senate Committee on Appropriations. It provides continuing authority for agencies and departments covered under 10 separate regular appropriations bills, at various spending rates specified by the provisions of the resolution.

The expiration date is September 30,

#### DELAY IN APPROPRIATIONS

Madam President, the Committee on Appropriations does not relish the necessity of bringing this measure to the floor. We do not subscribe to government by continuing resolution. We remain committed to the timely enactment of regular appropriations bills, in order to enable executive officers at all levels of government to accurately predict and efficiently manage their fiscal resources, and to insure close congressional scrutiny and control over the allocation of Federal resources.

But despite extraordinary measures, our committee has been unable to secure passage of all 13 regular appropriations bills. We have reported them all from committee, three have been enacted into law, three more have cleared conference, and a fourth, Interior, is in conference today. Given the circumstances, I believe this is an admirable achievement, and I sincerely thank all of my colleagues on the committee for their dedication and assistance.

But I am most disappointed that we have been unable to enact into law all thirteen regular bills. As my colleagues know, timely action on the bills has been one of my top priorities, and some explanation of our current situation is in order.

There are numerous factors which contribute to the delays in consideration and enactment of regular appropriations bills. One of the most significant of these is the increasing budgetary constraints imposed on discretionary, domestic, and nondefense activities. As these constraints preclude even maintaining ongoing Federal commitments and responsibilities, decisions on adjusting priorities, as well as addressing new issues and problems, become all the more divisive and difficult. The resulting controversy necessarily prolongs the consideration of appropriations measures.

Contributing to the delay is the lengthening period in which it takes Congress to adopt the first concurrent budget resolution, an action which is a prerequisite to consideration of any spending measures, including appropriations bills. This year Congress did not complete consideration of the first budget resolution until June 23, nearly 5 weeks beyond the statutory May 15 deadline. This left Congress in the curious position of consuming 50 percent more legislative days in adopting a general budgetary plan than was left, prior to the start of the fiscal year, for implementing such a plan.

This disproportionate allocation of limited congressional time becomes even more inappropriate in light of how poorly the first budget resolutions have actually served as workable budget plans. Almost invariably, the economic assumptions underlying recent budget resolutions have proven to be overly optimistic, and adjustments quickly become necessary. This is evident in the fact that it has become commonly accepted that not only a second budget resolution be adopted in the fall, but that a third, making still further revisions, must be adopted in the spring. When Congress fails to make such revisions, as has been the case this year, the estimating errors contained in the previous budget resolution become increasingly obvious. Congress is now in a position where any spending measure, including all the remaining appropriations bills, are subject to a point of order on both the House and Senate floors, even though they are within the spending allocations of the budget resolution. This is because the total outlay estimate under the budget resolution has already been breached.

Beyond the procedural impediments of the congressional budget process is still another serious and growing obstruction to the timely enactment of appropriations bills-this is the wide acceptance of the use of appropriations bills as a vehicle for legislative "riders." The inability of the normal authorizing and legislative process to provide an adequate forum in which to address these issues has led to increasing pressure on appropriations measures which must be enacted on a regular basis.

The subjects of these legislative riders range from the divisive issue of abortion to the regulation of used car sales, and now include almost every major concern facing the Congress. The committee has become such an accepted forum for nonappropriations

tempts to modify and revise legislative provisions which were previously en-

acted in appropriations bills.

The growing interest in using appropriations bills as vehicles for legislation only detracts from the primary responsibility of the Appropriations Committee-to provide funds for the necessary operations of the Government. Not only must the committee grapple with issues and provisions outside its area of expertise, it must frequently endure the prolonged debate and consideration surrounding controversial issues.

Our committee believes that it is imperative that these obstacles to the timely enactment of appropriations bills be addressed by the Congress. Unless effective measures are taken to correct these problems only further delays in the consideration and adoption of appropriations bills can be expected in the future. Such delays are the reason that continuing resolutions are necessary, despite the inefficiencies they engender in the management and operation of Government programs.

#### TITLE II

The committee has recommended a separate title providing additional funds to stimulate employment in projobs. Confronting Federal ductive budget deficits of unprecedented magnitude, the committee remains determined to exercise fiscal restraint in all areas of Government expenditures. and firmly believes that the amounts provided in this continuing resolution and the regular appropriations bills reflect this determination. The committee has reported no appropriation bill in excess of its allocation under section 302(b) of the Budget Act, and has gone to some lengths to insure that the bills conform to those allocations.

The committee is deeply concerned, however, that millions of Americans are out of work, and believes that, within the constraints of fiscal prudence, additional funds can and should be provided to employ people in productive jobs. This effort becomes even more important in view of the alarming deterioration of our capital assets and the need to restore the physical

wealth of our Nation.

The committee's recommendations in title II strike a balance between these twin responsibilities of fiscal restraint and increased employment. While making reductions in the amounts approved by the House, the committee has recommended nearly \$1,200 million for a variety of established programs that will create additional jobs in a relatively short period of time and yield tangible benefits of lasting value to the Nation.

# EXPIRATION DATE

As I noted earlier, Madam President, the expiration date on this resolution is September 30, 1983, carrying the au-

business that it now must confront at- thority provided by this measure through the balance of this fiscal year. We have proposed this date with some reluctance, yet believe it is necessary. At the conclusion of this Congress, all appropriations bills, like all other bills, will die. In order for the Congress to resume consideration of regular fiscal year 1983 appropriations bills next year, and enact them into law so that they fall out from under the terms of the continuing resolution, all the bills will have to be reintroduced, reconsidered in committee, and passed by both Houses. That is a most unlikely prospect. Only one bill in the past 15 years has been passed under similar circumstances. With those odds facing us, the committee thought it best to push the regular bills as far in the process as possible, and write the continuing resolution for the full year. This will free us to devote all our attention to the fiscal year 1984 budget process next year.

GUIDANCE TO DEPARTMENTS AND AGENCIES

In order to expedite consideration of this continuing resolution, the committee reported the measure to the floor without a formal written report. This avoids the hindrance of the 3-day rule requirement on reports. The committee has prepared, however, a statement in lieu of a report which has been distributed here in the Chamber. I also ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The committee has adopted this expedited procedure on other occasions, and while we definitely prefer to provide the Senate with formal written reports as is customary, we are completely confident that the directions and guidance given to the various agencies and departments of the Federal Government will be strictly adhered to. And, of course, in those instances in which the continuing resolution references a particular bill for which a formal written report was presented to the Senate, it is expected that the relevant agencies and departments will honor the requirements

stipulated in those reports.

Before yielding the floor, Madam President, I wish to make my customplea concerning extraneous amendments, which is no less sincerely meant for its being so often made. Already I hear those terrible rumors of hundreds of amendments lurking somewhere in the Chamber, and I know from previous hours on these measures that those rumors are likely to come true. A continuing resolution in a lameduck session is a pot of honey that draws many flies. But I do sincerely plead with my colleagues to not regard this resolution as a vehicle for every legislative whim. In the first place, we have very, very little time to complete action on this measure and send it to the President for signature in time to prevent a disruption of Gov-

ernment's operations. Even if we labor here far into the night and tomorrow, it will take an extraordinary effort, and a Saturday session, to prepare for conference, go to conference with the House, prepare the conference report, and have that report adopted in both Houses in time for the President's signature Sunday night. Even then, we will have gone well beyond the deadline of midnight, December 17.

I would further advise my colleagues that many of these rumored amendments will not be well received by our friends in the other body. They are becoming increasingly displeased with the Senate's wanton ways as regards amendments to appropriations bills, and I do not blame them one bit. Time and again, our colleagues on the House side have exercised considerable restraint both in committee and on the floor, striking down appealing but really unnecessary amendments offered by their fellow representatives, only to watch in dismay as the senate embraces those very same amendments.

Of course, the House is better armed with rules than we, but we are not totally bereft, either, and I can assure my colleagues that the House is quite exasperated with our more excessive adventures into legislating on appropriations bills. For that matter, so am I. So, my friends should be advised that this Senate may adopt numerous extraneous amendments, and your conferees will defend them, but they have little chance of survival.

And with that, Madam President, I yield the floor and await the onslaught.

Mr. SARBANES. Will the chairman yield for a question?

Mr. HATFIELD. Madam President, after the comanager makes his opening remarks, then I would be happy to yield to the Senator from Maryland.

Mr. PROXMIRE. Madam President, I will be very brief.

First, I commend the distinguished chairman of the Appropriations Committee, Senator HATFIELD. He has done a really remarkable job in the committee.

As he pointed out, this is an extraordinarily complicated bill. It was handled, as the majority leader said, very expeditiously. I have not seen a more masterful performance by a committee chairman in the many years I have been here.

I might also point out, Madam President, that this is, by far, the biggest committee in the Senate with 30 members. The attendance was remarkable. Three-quarters of the members were present most of the time. So this was given very careful consideration by a very large portion of the Senate already.

Madam President, the resolution we have before us today would continue funding the programs covered by 10 appropriations bills through the end of the fiscal year. Since three of these 10 bills have been reported from House-Senate conference committees and a fourth was completed in conference less than 2 hours ago, the resolution as a practical matter would apply to a total of 6 out of the 13 regular bills falling within the Appropriations Committee's jurisdiction.

The resolution deals with a number of controversial issues such as the MX missile and the pay raise matter. It includes a substantial amount of assisted housing support and a jobs stimulus package. In short, we could easily spend several days debating the many issues dealt with by the legislation.

However, the current continuing resolution expires in less than 26 hours, as the majority leader has told us. To get to final passage of a conference report on the resolution in that period of time will be almost impossible. About the best we can hope for is that by Saturday or Sunday we will be able to pass such a conference report. However even this gloomy timetable will become untenable unless we exercise some restraint in offering and debating amendments. The alternative is to be in session most of Christmas week. Consequently I hope that my colleagues will introduce only those amendments with the very highest priority and limit debate to the maximum extent possible so that the Government can continue to function and we can spend the holidays with our families.

Madam President, I yield the floor. I think the Senator from Maryland wanted to inquire of the chairman.

Mr. SARBANES. Will the chairman yield?

Mr. HATFIELD. I yield.

Mr. SARBANES. Will the chairman inform us which appropriations bills have moved beyond the resolution and, therefore, are not embraced in the resolution?

Mr. HATFIELD. I cannot hear the question.

Mr. SARBANES. Would the chairman inform us which of the appropriations bill have now moved beyond the continuing resolution and, therefore, are not within this resolution?

Mr. HATFIELD. We have the HUD appropriation bill that has been moved ahead and proceeded on the regular, normal schedule. It is not included in this continuing resolution, but there is an amendment that relates to that bill that is included in order to make certain adjustments.

The military construction bill is not in this resolution except as it relates to a jobs section in title II. There we have the money in a jobs measure that would involve military construction for dependent housing on military bases.

The legislative subcommittee bill is not included.

These are 3 of the 13 normal appropriations bills. So we are, in effect, including 10 in the continuing resolution.

Let me add one further point for clarification. We are using a reference in the continuing resolution in order to stay within our 302 target figures in the budget resolution. We are using, in effect, those reported bills from the committee or those that have gone through the conference. For instance, we have just acted upon the transportation bill conference report. We have moved Agriculture through conference. So we would reference those particular bills as they have moved to that point in the appropriations process. The other bills would be referenced on the Senate-reported bill that we have already acted upon on the Senate side.

That puts us then, in a sense, within our 302 target figures, with the exception of title II, which is a \$1.161,000,000 jobs proposal.

I hope that answers the Senator's question.

Mr. SARBANES. It is very helpful.

Have the District of Columbia and Interior bills also gone through the conference stage?

Mr. HATFIELD. That is correct. Interior conference was just completed about an hour ago. We are waiting on the conference report on D.C. appropriations, which will arise probably momentarily. Those bills will be referenced on the basis of the conference report.

Mr. SARBANES. I take it none of those have been signed by the President.

Mr. HATFIELD. The three that I enumerated have been signed into law—HUD, military construction, and legislative. None of the conference reports have been enacted, or any of the regular bills.

Mr. SARBANES. I thank the chairman.

Mr. STEVENS. Madam President, I would like to inquire of the chairman of the committee—if it is possible I hope Members of the Senate will consider this—that we might set up some order for the consideration of amendments.

We have 10 subcommittees that will be dealing with amendments in this bill. We have staffs in each of those subcommittees. As I understand the procedure, unless we set up some order the staffs literally have to be on call on the floor between now and some time Saturday.

In addition to that, the individual chairmen and ranking minority members of the subcommittee will have to be here at all times because an amendment could come up at any time concerning any 1 of these 10 bills.

I would like to suggest that we set up an order to deal with these bills, which is the way we did it in the committee.

For the information of the rest of the Senate, we went through this bill subcommittee by subcommittee and considered the amendments in that order. When the matters concerning agriculture were presented, the chairman and ranking minority member of that subcommittee were there, but they did not necessarily have to sit through the whole committee markup because they feared some amendment might be offered to their sector.

I would like to suggest to the chairman that we follow that procedure and then if there are any amendments that are later brought forward of concern to any one of those sectors they would have to wait until we have gone through all 10. I am not trying to foreclose anyone from offering amendments, but if the amendments are not raised during the time, for instance, the agricultural portion of the bill is before the Senate, they would wait until all 10 had been considered and then they would still be in order. I am not trying to rule amendments out.

Would the chairman of the committee be willing to try to work out something like that?

Again I say this floor is going to be absolutely packed with staff if we have to be prepared at any one time for any amendment that comes to any portion of this bill covering 10 different subcommittees. There will have to be 20 members of the committee on this floor at all times or within reach of the floor leader. When we know we are going into at least a 30- or 36-hour proposition, I think that should not be done. I think particularly the chairman and ranking minority member ought to be able to step out while the chairman and ranking minority member of a subcommittee take up something that they have been particularly working on and not have to be here all the time.

I urge the chairman to ask or inquire if it is possible to get an agreement that we can go through this as we did with our subcommittees. I think it would be very fair. Members on both sides would agree that that would be the fairest procedure we could use and we would foreclose no one from offering an amendment.

Mr. BUMPERS. Will the Senator

Mr. STEVENS. The Senator from Oregon has the floor.

Mr. HATFIELD. I would be happy to respond. First, you have the 89 page document that constitutes the continuing resolution. It is a House vehicle. Therefore, when the Senate acts, we have to amend the House vehicle. What the Senator from Alaska is saying is that on page 2 we may have

an amendment of the committee dealing with agriculture, and then on page 78 we may have another committee amendment dealing with agriculture, perhaps, because of the different structure of the bill. So anyone interested in agriculture would have us go through these one by one.

What the Senator is asking is that we take about a half hour to provide staff an opportunity to go through here, get all of the agricultural issues grouped together, and then we would take commerce next, defense next, D.C., energy, whatever, in the order and breakdown of our subcommittee structure. That would take about a half hour to put all those amendments in all those categories. Then people would know, if they had an area of interest, when that would occur in sequence to the bill.

Otherwise, you are all going to have to stay on the floor all of the time in order to raise your bill or your amendment at the time that we get to that page in the continuing resolution. That is your concern. If there is any interest in that, I have at least kept the issue before us by posing a unanimous-consent request that the committee staff be permitted to put the bill into that form for the purpose of expediting the continuing resolution.

Mr. PROXMIRE. Madam President,

will the chairman yield?

Mr. HATFIELD. I am happy to yield.

Mr. PROXMIRE. I think this is a very, very constructive proposal. I favor it personally, but I want to discuss it with the Democratic leader if the Senator will give us at least a few minutes to discuss it.

Mr. HATFIELD. I shall be happy to withhold for a time for that purpose and yield to the Senator from Arkan-

Mr. PRYOR. Madam President, I think the Senator from Alaska has proposed a very constructive method for dealing with the matter in a short time. But I ask my good friend, the chairman of the Appropriations Committee, at what stage would an amendment under this plan be in order to change the date from September 30, when the resolution expires, back to, say, for example, March 1 of 1983? At what stage would that amendment be in order?

Mr. HATFIELD. Any amendment will be in order even if we put this particular structural proposal into practice; no one is going to be precluded from offering an amendment. The proposal is that as we finish the agriculture section, if there are no more amendments dealing with agriculture, we would temporarily close that and move on to the next one. Then, if someone later on decides they had forgotten that they wanted an agricultural amendment, they would have to wait until the end of the pecking

order, so to speak, and go back to agriculture to get their amendment considered. But we shall consider any amendment and every part of the bill is open to amendment.

Mr. PRYOR. As I mentioned today to the distinguished chairman of the Committee on Appropriations, I am very concerned—in fact, I am obsessed—with the whole concept of a continuing resolution. In this Congress, I am afraid we have made the continuing resolution a rule and not

the exception any longer. It makes me wonder if we are going to be debating here in the next 24 or 26 hours the entire national defense policy of this country, with a very limited amount of debate and, in addition to that, debating that national defense policy with a time limitation; and, adding to that dilemma, trying to decide in this body during this debate what we are going to do about the MX missile, the biggest expenditure we have in our national defense posture. Would we not really be admitting that we are throwing in the towel, having no defense appropriation bill coming before this body before September 30, possibly, of 1983? This worries me, and I think it worries a lot of members of this body. I think we should have a cutoff date of March 1 rather than September 30 of 1983 before we start debating the most expensive and, I think, the most important part of the

Mr. HATFIELD. Madam President, I want to respond to the Senator because I associate myself with his remarks in toto. Let me say to the Senator that the very reasons that he raises here are the reasons why we have used September 30, as the expiration date.

measure before us tonight.

That is, in this particular fiscal year, the appropriations process was so totally thwarted by, first, a budget resolution that came in June, a month overdue; then a reconciliation resolution; then a tax bill; then an urgent supplemental that was vetoed and repassed in a different form; then a supplemental which was vetoed and overridden.

By that time, we were in September and we were considering a continuing resolution. That is what put the whole appropriations process totally behind the eight ball.

What we are trying to do in this September 30 date is consider 1983 a lost cause and to be in position to really strike out in January 1984 for the 1984 fiscal year and maintain a pace with events. Otherwise, I say to the Senator from Arkansas, if we put the appropriations process back into 1983, come next March, we shall be back into a continuing resolution for sure. We will have lost all that time in dealing with fiscal 1984 in calendar 1983 because we are still dealing with the budget for fiscal 1983. So we recommend extend-

ing it to September 30, giving the Appropriations Committee an opportunity in the process to really keep pace with fiscal 1984.

Mr. SARBANES. Madam President, will the chairman yield at that point? Mr. HATFIELD. Yes.

Mr. SARBANES. Will the chairman add to the list of matters that came up preventing our addressing the appropriations issue the fact that we had a debt-ceiling bill on the floor of the Senate from August 16 to September 23, a period of 5 weeks, when we addressed seriatim a series of amendments not germane or relevant or pertinent to the matter of debt ceiling, which occupied the time and attention of the Senate over that critical almost 6-week period? That prevented us from moving some of these appropriations matters forward and defeated the regular process.

I share this concern that since appropriations bills contain very fundamental policy decisions, what we are now doing with respect to the appropriations bills other than the seven which we have discussed—the three that are in law, the four that are now at the conference stage, all of which obtained a regular congressional review. With respect to the other matters, we are addressing really very basic policy judgments in the guise of a continuing resolution. With this date, we are doing it for a balance of this fiscal year.

Mr. HATFIELD. The Senator is right, Madam President; it is not the way to do business.

I also add one further little refinement to that for the Senator from Arkansas: come March, we do not pick up the appropriations bills that we have already acted upon. We have to go back in the new Congress and repass all the appropriations bills and all the conference reports that we have agreed upon up until this point. Remember, the Senate Appropriations Committee has reported all 13 appropriations measures. All we had to do was wait for the House bill to come over here before we could bring our bill out onto the floor.

If the continuing resolution expires on March 30, on all the work we have completed to date, we go back to square one. We do not just pick up the continuing resolution document and the products we have completed in that document, because the House has to go back and reintroduce that bill, repass that bill. We have to do the same to get to conference.

Mr. PRYOR. If I may ask the distinguished chairman of the Appropriations Committee, and I do not know of any Member of this body whom I trust more, believe in more, have more faith in than Senator Hattield: What is there in this continuing resolution to protect us or to protect this country or

to protect the legislative process, and to keep the Pentagon from engaging in the procurement and production, for example, of certain weapons systems if this is all going to be embodied in a continuing resolution? We are going to sit here from now until September 30 and really not answer these questions about the defense needs of America? What safeguard is there to make certain that the Pentagon is not going to go forward with productions of weapons without the direction that can be provided only by a comprehensive Senate debate? Will the Senator please explain that to me, a humble Senator, who is trying to find an answer?

Mr. HATFIELD. I would like to yield to the Senator from Alaska as chairman of the Defense Appropriations Committee to respond to the question.

Mr. STEVENS. Mr. President, would the Senator state that question again? Mr. PRYOR. What is there in this continuing resolution—when we appropriate however many billions of dollars to the Defense Department—what is there to protect against the fact that the Defense Department may go forward with procurement, development, and production of weapons that may not be the will of this body

or the other body?

Does the Senator understand the question?

Mr. STEVENS. I understand the question.

Mr. PRYOR. Where is that protec-

Mr. STEVENS. Madam President, if you examine this bill, you will find that on the House side and on the Senate side in the defense area we have folded in the bill that passed and the bill that was reported to the Senate. It is incorporated by reference and it will become the law. As we come out of conference, we will have a conference report that refers to the provisions that we have agreed upon and, in effect, we will be writing a defense bill.

Mr. PRYOR. That is what I know.
Mr. STEVENS. This is the first time
we will approach it in the way that the
Senator from Oregon has mentioned.
We have literally folded into this bill
the individual bills the subcommittees
have worked upon and if we are able
to get the September 30 date and hold

it there, we will be passing 10 bills in one bill on this occasion.

It is not like the old way of just folding in the numbers. We folded in the limitations not only in the bills but in the reports that accompany the bill as a result of this bill and the approach that is done here.

Mr. PRYOR. We will be, in effect, passing six bills in one bill in about 25 hours with only a few minutes to debate this time tomorrow night on each amendment.

Mr. STEVENS. Let me tell the Senator, when we went home in 1980, we

passed 2 bills and we came back in 1981, and we had to start all 11 bills over again.

We are trying to get away from that this time and finish these bills this year so they will become law and will go to September 30 and we will not have to come back next year and start in on 1983 again. We will be able to deal with 1984.

Mr. PRYOR. Where has the appropriations process gone and where has the opportunity gone to look at each one of these measures and discuss it on the floor of this Senate? Has that disappeared from the face of the

Mr. STEVENS. It disappeared in 1980 when we adjourned for the election in 1980 without having passed but 2 of the bills and when we came back in 1981, we had to start all over again on 11 bills and we spent in 1981 most of our time working on fiscal 1981 instead of fiscal 1982, and we have never caught up with the curve. This bill catches up with that curve. This bill puts us current and if it passes and we keep the September 30 date, we can come back in January and start to work on 1984 and we are not going to be in the same position again because we will be up to date.

I think the Senate owes a great deal of credit to the Senator from Oregon for having worked out an arrangement here, and I hope the Senate will stick to that September 30 date because if we do not, I guarantee you we will be coming back in 1983 and doing just exactly what we did in 1981. We will spend most of our time on the fiscal year we are in and not on our time on the appropriations bills for fiscal year

1984.

Incidentally, the defense portion of this bill would normally be on the floor, say, 4 or 5 hours, 6 hours a day for about 4 days.

We are prepared to stay here 20 hours. There is the same amount of time. We are not going to cut anyone off. There is no time limit here. And we will stay as long as it takes to debate this and get a final continuing resolution.

The Senator from Mississippi is here and I am here, and I hope I am not reading an inference that we are somehow or other appropriating billions of dollars without considering it. The Senate committee reported the defense bill to the floor of the Senate before the election. It was gone into as thoroughly, I think, as any bill in history. And this is the first time in history we ever reported a defense bill ahead of the House of Representatives. And my good friend from Mississippi had some reservations and we finally talked about it and we agreed. We put it out here so we gave the House of Representatives a little bit of encouragement to get us a defense appropriations bill.

We will now go to conference on defense in connection with this bill and this bill will go to September 30 and it is as though we have taken up the bill separately.

Mr. PRYOR. Now the Senate knows as well as I do, that 24 hours from right now we are going to be talking about closing down the Government. We are going to be talking about cutting off social security checks. We are going to be encouraging people to limit their debate to 2 or 3 minutes on a side. It is going to happen. It has happened in the past, and it is going to happen tomorrow night.

We are talking about going home for Christmas, and yet we are about to appropriate the largest amount we have ever appropriated for defense and weapons procurement and to be honest the rest of us, who are not on the Committee on Appropriations, not on the Committee on Armed Services, do not know what is in this piece of legislation.

Mr. STEVENS. If that is the case, then I have to tell the Senate any senator who does not know what is in this bill did not read what we reported to the Senate before the election. The report of the Defense Committee has been before the Senate and the bill has been before the Senate since September.

So this Senator as chairman of the Defense Committee does not like to hear the word that somehow or other the Members of the Senate do not know what is in the report we delivered so you would have time to study it because we foresaw, the Senator from Mississippi and I foresaw, exactly the situation we are in right now that we are dealing with defense in a continuing resolution, and we did not want to be caught without a Senate report and a Senate bill that we could incorporate in here.

So believe me, if there is any Member of the Senate who had not read the bill and had not read the report, this Senator cannot offer an excuse for that Member of the Senate. It has been here. No one should be able to tell me that they do not know what is in the defense bill because I will be glad to get you the report and we will put it on everyone's desk. It has been here now since September and there is no reason to try to tell the public, the people of this country, that we do not know what we are doing.

I can guarantee we are prepared to defend every single page and item in that bill that was reported if it takes 3 days.

Mr. PRYOR. Between now and midnight tomorrow night?

Mr. STEVENS. I am ready to be here. I have canceled my reservations to go back to Alaska, and I have said we are going to finish the bill.

Mr. SARBANES. Madam President, will the Senator yield for a question?

Mr. STEVENS. I yield.

Mr. SARBANES. On the problem that the Senator raises since we go into a new Congress we have to start the bills all over again, as I understand it. That would apply to 6 of the 13 appropriations bills, is that correct?

Mr. HATFIELD. Any that have not

been signed into law.

Mr. SARBANES. They have been signed into law and I take it the Senator anticipates four others will be signed into law. Is that correct?

Mr. HATFIELD. That is correct.

Mr. STEVENS. Madam President, if the Senator will yield, if this bill is signed into law, it covers all 10 and there will be none of them that were not signed into law. This goes to September 30. There will not be any bill that has not been signed into law if this bill is signed.

Mr. SARBANES. I understand that and I recognize the point the Senator is trying to make. I just want to make sure I understand how far it extends.

If the continuing resolution did not run until September 30, essentially it is reasonable to assume that there are six appropriations bills that we would have to start over again in the new Congress. Is that correct?

Mr. HATFIELD. We would have to go back and begin from the point of the continuing resolution at which point it was signed. We would have to repass all of the bills that were not signed into law separately.

Mr. SARBANES. But we would expect there to be six? We expect that

to be six in number, I take it?

Mr. HATFIELD. Assuming that the four that have been completed through conference are signed.

Mr. SARBANES. Is that a reasonable assumption?

Mr. HATFIELD. It is a reasonable assumption.

Mr. SARBANES. I thank the chairman.

Mr. HATFIELD. Madam President, the unanimous-consent proposal that I made or attempted to make on the matter of grouping the amendments has received some objections.

UNANIMOUS-CONSENT REQUEST

So, let me now proceed. We will have

to go page by page.

Madam President, at this time I ask the traditional unanimous consent that the committee amendments be considered and agreed to en bloc, with the exception of the committee amendments on page 2, line 9 through line 19 which is basically a technical amendment; on page 9 beginning with the proviso on line 20 through page 10, line 2, which has to do with the MX missile; on page 18, line 25 through page 19 concluding with the amendment on line 8 which has to do with Clinch River breeder reactor.

parliamentary inquiry.

Mr. HATFIELD. May I complete the list a second?

Mr. BUMPERS. Is the Senator asking unanimous consent for all these committee amendments be accepted en bloc?

Mr. HATFIELD. These are the ex-

Mr. BUMPERS. Oh, those are the exceptions.

Mr. HATFIELD. These are excep-

Mr. BUMPERS. I apologize.

Mr. HATFIELD. On page 57, line 15 through page 53, line 3, which is the FTC question; on page 58, line 4 through line 10, which is the Ashbrook amendment dealing with abortion; on page 60, line 4 through line 25, which is the matter dealing with copyright.

These are the known controversial amendments or sections on which we would expect to have some amendments. These would be the exceptions to the adoption of the committee

amendments en bloc.

Mr. TOWER. Reserving the right to object-

Mr. PROXMIRE. Madam President, it is my understanding that with the unanimous-consent agreement this would be treated as original text for purposes of amendment still, is that correct?

Mr. HATFIELD. Yes. Madam President, there is second part to this. The resolution as amended would be considered original text for the purpose of further amendment, with the understanding that no points of order be considered waived by reason thereof, and that the excepted committee amendments may be temporarily laid aside by agreement of the floor man-

Now, that means that no one is precluded from offering an amendment

on anything.

Mr. TOWER. Reserving the right to object, and I do not intend to object, I just want to make it clear what the ground rules are. The excepted amendments will be not considered than as original text but will be considered as amendments in the first degree?

Mr. HATFIELD. That is correct.

Mr. TOWER. And they can only be amended once in the second degree. However, those that are not excepted would be considered original text for amendment, and therefore could be amended in two degrees, is that cor-

Mr. HATFIELD. The Senator is correct.

Mr. TOWER. May I ask a further question. I believe contained in the consent agreement was a provision that an amendment could be set aside on agreement of the managers. That does not obviate the right of any indi-

Mr. BUMPERS. Madam President, a vidual Senators to object to an amendment, does it?

Mr. HATFIELD. It is not a unanimous-consent requirement. It is a matter of the two managers setting aside, as we have traditionally done.

Mr. TOWER. The point I am making is this. If someone is proceeding on an amendment that he had offered, could his amendment be arbitrarily set aside by the two managers whether the proposer of the amendment agreed to it being set aside or not?

Mr. HATFIELD. No. It is for the purpose of raising the amendment.

Mr. TOWER. I do not object.

Mr. PROXMIRE. Will the manager yield for a question?

Is it possible to conclude the expiration date which Senator PRYOR has raised and title II jobs, which I understand the Senator from Arkansas also would like to have treated the way the other provisions which the Senator listed are treated? In other words, it would have to be added to the bill instead of treated as original text and incorporated.

Mr. HATFIELD. On the date?

Mr. PROXMIRE. That is correct. The date is one. Title II jobs is the other. Is that right?

Mr. METZENBAUM. Reserving the right to object-

Mr. PROXMIRE. Excuse me 1 minute. Th Senator from Arkansas, is that the

Mr. BUMPERS. Mr. Chairman, I have this question.

Mr. PROXMIRE. We are talking about the junior Senator from Arkansas (Mr. PRYOR).

The Senator wants the expiration date, is that correct?

Mr. PRYOR. I am going to attempt to amend the expiration date.

PROXMIRE. The Mr. Senator would like to have that set aside not as a committee amendment incorporated for purpose of amendment but treated as these other exceptions have been, is that correct?

Mr. PRYOR. That is correct.

Mr. PROXMIRE. And then also title II jobs, is that right?

Mr. PRYOR. Title II jobs, I have no problems with that.

Mr. PROXMIRE. All right.

Mr. HATFIELD. We will add the Senator's issue to our exception list. We will add the expiration date.

The Senator from Ohio

Mr. METZENBAUM. Reserving the right to object, and I very well may object, it appears to me that if this unanimous-consent agreement is accepted, the floor is in the posture that only the managers of the bill will have the right to permit an amendment to be offered. I am sure they would be very fair in doing that, but the facts are that no amendment could be called upMr. HATFIELD. No, that is not correct. That is not correct. It simply says that the managers of the bill may set aside the pending exceptions that we have just enumerated. In other words, they are in place. They have to be laid aside in order for a Member to do anything else. The managers of the bill, rather than having to get unanimous consent to lay them aside each time, can temporarily lay them aside to accommodate the Senator from Ohio in offering an amendment rather than asking for unanimous consent.

Mr. METZENBAUM. But is it not the fact that if the Senator from Ohio or any other Senator-and I am not at all certain that I have any amendments, I want to make that very clear. I may have one or two, But I certainly do not have many, and I do not think they will be that controversial. But the point that concerns me is that by this procedure the managers of the bill are in a position to determine whether or not any amendment may be offered because, although you are talking only about the exceptions, the fact is the exceptions will be the pending business, will they not?

Mr. HATFIELD. No. The Senator is

incorrect.

First of all, I say to the Senator, we have 2 years of record on this procedure. Neither the Senator nor anyone in the Senate, I believe, has ever found himself thwarted in offering an amendment. So there is nothing conspiratorial about this. It has been very much the tradition.

Mr. METZENBAUM. I am not sug-

gesting that.

Mr. HATFIELD. The other point I want to make is that we are making these the pending order of business in order to flow this through an orderly procedure. They have to be set aside if the Senator wants to raise an amendment. And we will set them aside. I can give the Senator a commitment now. We will be happy to set them aside, as we have done every time for any amendment over the last 2 years.

Mr. METZENBAUM. Is it the

intent-

Mr. HATFIELD. Under the rules, these come up automatically. What we may not want is to take them up immediately. Some Senator may not want this followed automatically but set aside to let that Senator move on to another amendment.

Mr. METZENBAUM. Is it the intention of the floor managers to bring up these exceptions as promptly as possible and then not have them just hang-

ing?

Mr. HATFIELD. Yes, that would be my hope, that we could get right to them and get those controversial issues behind us so that in the wee hours of the morning we are not trying to debate the most controversial part of the bill. That is the purpose of this.

Mr. METZENBAUM. Having great confidence in the managers of the bill and their fairness, I will not object.

Mr. SARBANES. Reserving the right to object, will the chairman yield for a question?

Mr. HELMS. Will the Senator yield? Did the Senator specify section 142 as an excepted committee amendment?

Mr. HATFIELD. That is the Ashbrook amendment?

Mr. HELMS. Yes.

Mr. HATFIELD. Yes.

Mr. HELMS. I thank the Senator.

Mr. DENTON. Clarification on that same point, Mr. President. Does that mean that section 142 will be subject to a tabling motion?

Mr. HATFIELD. It would be subject to an amendment.

Mr. DENTON. I thank the Senator. Mr. SARBANES. Is it the intention of the chairman that the excepted amendments which he listed would then be offered by the committee as a pending committee amendment to be acted upon by the parties?

Mr. HATFIELD. They would be called up automatically by the order from the Chair.

Mr. SARBANES. And that amend-

Mr. HATFIELD. Unless the managers of the bill were asked to set it aside temporarily to take up some other amendment.

Mr. SARBANES. That amendment will be subject to amendment in one degree, is that correct?

Mr. HATFIELD. That is correct.

Mr. LEVIN. Reserving the right to object, will the Senator yield for a question?

Mr. HATFIELD. I would be happy

Mr. LEVIN. And a suggestion.

The Senator from Arkansas is raising a very critical amendment and I would like to ask the chairman this: If the amendment of the Senator from Arkansas is accepted and this has a shorter date than next September 30, many of these amendments will not even be offered.

The reasons that many of the amendments are going to be offered is it is the only chance anyone is ever going to have to offer an amendment on 10 appropriations bills; this is the ball game, 24 hours.

Now, may I suggest, or at least I should like the reaction of the chairman to a suggestion that the amendment of the Senator from Arkansas to have a March 1 or March 30 expiration date be taken up early because that may determine how many amendments will then be filed.

Mr. HATFIELD. I would like to take that under advisement, to look at the impact it will have on the entire set of amendments. I really do not know how to answer the Senator at this moment. Let me think about it.

Let me say that I have no personal priority as to the order here. We only listed these in the sequence of the pages. We tried to put these together in categories. There were objections. Therefore, now we are having to do the next best thing, take the committee amendments individually by the order of the bill.

Now, in order to get out of that order, we can do anything by unanimous consent short of abolishing the Republic.

Mr. LEVIN. I have no objection to this procedure. It is a very wise one. I am merely suggesting that if you take exception to that and take up the amendment of the Senator from Arkansas, you may find that many of these amendments will never be offered because there will be another opportunity to offer those amendments on a later continuing resolution.

The PRESIDING OFFICER. Is

there objection?

Mr. HATFIELD. Madam President, I have received other objections. I withdraw my unanimous-consent request at this point.

I understand the bill is now open for amendment, so the committee amend-

ments are pending.

All right, now we are in a situation, I want to explain, where we are right back to square one. We start on page 2 with the first committee amendment. We are going to take up the dozens upon dozens of committee amendments, most of which are technical, one by one.

Mr. BUMPERS. Does the Senator yield? Does he have any objection to the unanimous-consent request?

Mr. HATFIELD. Yes, from the minority party. I have been so informed by the minority staff.

May we have the first committee amendment?

COMMITTEE AMENDMENT ON PAGE 2, LINE 8

The PRESIDING OFFICER. The clerk will report the first committee amendment.

The assistant legislative clerk read as follows:

On page 2, line 8, strike "Acts", and insert "Act";

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. PRYOR. Madam President, will the chairman please explain what this amendment does?

Mr. HATFIELD. Will the Senator repeat his question?

Mr. PRYOR. Will the distinguished chairman please explain what this particular amendment does?

Mr. HATFIELD. The first committee amendment is on page 2, line 8 and it strikes the plural "Acts" and it inserts in lieu thereof the singular "Act."

Mr. PRYOR. What does that mean? Mr. HATFIELD. It means there is only one act that is covered under this, rather than the plural "Acts." It is a grammatical, technical amendment.

Mr. PRYOR. I very much appreciate the chairman's explanation. Thank

you.

Mr. HATFIELD. Thank you.

Madam President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment on page 2, line 8, was agreed to.

2, line 8, was agreed to.

COMMITTEE AMENDMENT ON PAGE 2, LINES 9
THROUGH 19
The PRESIDING OFFICER. The

clerk will report the second committee amendment.

The assistant legislative clerk read as follows:

On page 2, strike line 9, through and including line 19.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. HATFIELD. Madam President, this is lines 9 through 19, which deletes the House language, because we have different references on the Senate side. It is a technical amendment. I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment on page 2, lines 9 through 19 was agreed to.

COMMITTEE AMENDMENT ON PAGE 4, LINE 9

The PRESIDING OFFICER. The clerk will report the next committee amendment.

The assistant legislative clerk read as follows:

On page 4, line 9, strike "(1)"

Mr. HATFIELD. Madam President, this is on line 9, and it changes the subsection (1) to subsection (b) because of a few changes that we made prior to it. It is a technical amendment.

I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 4, line 9.

The committee amendment on page 4, line 9 was agreed to.

COMMITTEE AMENDMENT ON PAGE 4, LINE 14
The PRESIDING OFFICER. The clerk will report the next committee amendment.

The assistant legislative clerk read as follows:

On page 4, line 14, strike the comma and all that follows down through and including the sum on line 16.

Mr. HATFIELD. Madam President, on page 4, line 14, this was stricken because objections were raised by the authorizing committee and, therefore, we reinserted it in different language later in the bill.

Mr. PRYOR. Madam President, if the chairman will yield, was this the thing about the United Nations?

Mr. HATFIELD. It is a development program of the United Nations, yes.

Mr. PRYOR. I am a big supporter of the United Nations. Does this hurt or help the United Nations?

Mr. HATFIELD. We earmarked \$140,000 later on rather than \$134,000. Mr. MOYNIHAN. Madam President,

it is difficult to hear.

Mr. HATFIELD. We delete the \$134,000 and we reinsert it at the level of \$140,000.

I move the adoption of the amendment.

Mr. PRYOR. I thank the Senator. The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment on page

4, line 14 was agreed to.

Mr. STEVENS. Reserving the right to object now—I would like just to chat for a minute on it. I want the Senate to understand what you are doing by not granting the unanimous-consent request it is not possible for us to deal with amendments that had to be made to the House form of the bill in two places to take into account the action of one the authorizing committees of this Senate.

Now, this is one of the examples. There is another an endment in this bill that by not allowing us to make it original text and dealing with these matters on an issue-by-issue basis you are going to get yourselves in a real

bad position.

I am also constrained to say that in my 14 years in the Senate I have never seen an appropriations bill approached this way, and I do not understand it, unless I am seeing a filibuster start in a strange way against a continuing resolution. This is something which will set a precedent, and I want to assure the Members of the Senate on the other side of the aisle that I will be here for a long time, and I am not going to forget it. It is going to make the defense bill almost impossible to handle because the amendments we put in here we have conformed to the House procedure rather than our procedure, and our amendments in fact cut this bill in several places, so you are liable to find that although you want to take up a question about the MX all in one instance, you are going to have to take it up in several different places in this bill, and you are not going to be able to reverse it because of the way it is handled.

Mr. HATFIELD. I think this is the best way to proceed until we develop an element of trust in this body, and until we do that we cannot do it any other way.

Mr. SARBANES addressed the

The PRESIDING OFFICER. Is there further debate on this amendment?

Mr. SARBANES. Madam President, I would simply respond to the Senator from Alaska by saying I think what is at work here is we need some time to see whether other amendments should be excepted in addition to the ones listed by the chairman of the committee. I think that is a reasonable request. I think his request in that context is—I take it we will reach the MX on page 9, is that correct?

Mr. STEVENS. Part of it.

Mr. HATFIELD. That is correct.

Mr. SARBANES. It seems to me at that point we are going to have some debate of some consequence.

Mr. HATFIELD. That is correct.

Mr. SARBANES. I think the way we are working to reach that, and after there would have been an opportunity for Members to consider whether they wanted to add to the list of excepted amendments and they would not be adopted en bloc, and I say to the distinguished Senator from Alaska I think that is reasonable and would enable the Senate to move forward on this matter.

The PRESIDING OFFICER. The clerk will report the next committee amendment.

Mr. PRYOR. Madam President, will the distinguished chairman yield? I can assure the Senator I am not leading a filibuster. I can assure him I am trying to cooperate. I can also assure him I am trying to find out what is in this bill that we are going to have a few hours to debate. Would the distinguished chairman tell me how much the continuing resolution represents in terms of dollars?

Mr. HATFIELD. I will be very happy to provide that to the Senator. We will have to compute each of these separate bills in title I and add it to title II. We will get that information.

Mr. PRYOR. Would it just be roughly about 83 or 85 percent of the Federal budget?

Mr. HATFIELD. I did not hear the Senator.

Mr. PRYOR. Would it be about 83 percent of the Federal budget? Is that a correct assumption?

Mr. HATFIELD. I would not want to hazard a guess at this point because we have them scored in different references between a reported bill and a conference report, and in some instances a passed bill. Consequently, we will have to compute those for the Senator

Mr. PRYOR. I would appreciate it.

Mr. HATFIELD. It is approximately \$425.8 billion. That is everything including title II, which is \$1.16 billion.

Mr. PRYOR. I appreciate that.

Mr. HATFIELD. Madam President, may we proceed?

COMMITTEE AMENDMENT ON PAGE 4, LINE 21 The PRESIDING OFFICER. The clerk will report the next committee

amendment. The assistant legislative clerk read as follows:

On page 4, line 21, strike all through page

6. line 24 and insert new language: That, notwithstanding the provisions of this paragraph making amounts available or otherwise providing for levels of program authority, the following amounts only shall be available and the following levels of authority only shall be provided for the following accounts or under the following headings: \$237,423,437 for payment to the "Inter-American Development Bank" not to exceed \$828,137,742 in callable capital subscriptions; \$126,041,553 for payment to the "International Bank for Reconstruction and Development" and not to exceed \$1,530,275,913 in callable capital subscriptions; \$800,000,000 for payment to the "International Development Association"; \*131,882,575 for payment to the "Asian Development Bank" and not to exceed \$2,243,811 in callable capital subscriptions; \$40,000,000 for payment to the "African Development Fund"; \$217,450,000 for "International Organizations and Programs", including the provisions of section 103(g) of the Foreign Assistance act of 1961, of which not less than \$140,000,000 shall be available for the United Nations Development Program. not more than \$37,000,000 shall be available for the United Nations Children's Fund, and not more than \$7,500,000 shall be available for the United Nations Environment Program; \$697,000,000 for "Agriculture, rural development and nutrition, Development Assistance"; \$206,100,000 for "Population, Development Assistance"; \$123,512,000 for "Health, Development Assistance"; \$25,000,000 for "International Disaster assistance"; \$77,000,000 for "Sahel development program"; \$35,403,000 for "Payment to the Foreign Service Retirement and disability Fund"; \$1,450,000 in foreigh currencies for "Overseas training and special development activities (foreign currency program)"; \$2,886,000,000 for the "Economic Support Fund" (without applying prior year earmarking of funds for Sudan and Poland), of which not less than \$910,000,000 shall be available for Israel and not less than \$750,000,000 shall be available for Egypt; \$31,100,000 for "Peacekeeping operations" \$10,500,000 for "Trade and development" \$109,000,000 for the "Peace Corps" \$109,000,000 for the "Peace Corps"; \$395,000,000 for "Migration and Refugee Assistance" (without applying prior year earmarking of funds); \$5,000,000 for necessary expenses to carry out the provisions of title II of S. 2608, as reported; \$367,000,000 for necessary expenses to carry out the provisions of section 503 of the Foreign Assistance Act of 1961 and the provisions of title I of S. 2608, as reported; \$53,700,000 for "International Military Education and "International Military Education and Training"; \$1,300,000,000 for necessary expenses to carry out sections 23 and 24 of the Arms Export control Act and the provisions of title I of S. 2608, as reported, of which not less than \$850,000,000 shall be allocated to Israel (\$1,700,000,000 of the amount provided for the total aggregate credit sale ceiling during the current fiscal year shall be allocated only to Israel), not less than \$50,000,000 shall be allocated to Sudan, and not less than \$400,000,000 shall be allocated to Egypt; \$3,973,300,000 of contingent liability for total commitments to guarantee loans under "Foreign Military Credit Sales"; not to exceed \$200,000,000 are authorized to be made available for the "Special Defense Acquisition Fund"; and not to exceed \$4,400,000,000 of gross obligations for the principal amount of direct loans and \$9,000,000,000 of total commitments to under guarantee loans "Export-Import Bank of the United States": Provided further, That none of the funds available under this paragraph may be made available for payment to the "International Finance Corporation"

Mr. HATFIELD. Actually, the House of Representatives has not passed a foreign operations appropriations bill, but rather it has cited or referenced in its bill a current level of spending for 1982. The Foreign Operations Subcommittee of the Senate has reported a bill, and what we are doing here is deleting the House language as it relates to foreign operations. We are inserting in effect the Senate-reported bill.

That is why we have the deletion of all of these figures. In one sense it is a technical amendment in that we had to substitute a Senate reference for a House reference.

Mr. HARRY F. BYRD, JR. Will the Senator yield for a question?

Mr. HATFIELD. Yes.

Mr. HARRY F. BYRD, JR. Does the Senator from Virginia understand correctly that this amendment represents the entire foreign assistance appropriation bill?

Mr. HATFIELD. It does. But there are some other technical amendments that impact upon the Foreign Operations Subcommittee bill near the end of this bill. This does not include all foreign operations, but it is the bulk of that bill.

Mr. HARRY F. BYRD, JR. How much money is involved in this particular amendment?

Mr. HATFIELD. \$11.5 billion.

Mr. HARRY F. BYRD, JR. \$11.5 billion in this one amendment.

Mr. HATFIELD. That is correctwell, no. I want to make clear to the Senator that a while ago we tried to put all of the parts of the bill dealing with one title in together, but we were denied that. So now we are having to go page by page. This is basically the bulk of the foreign operations bill, but I would not want to tell the Senator that it is the total. The total figure, if I went through this bill and extrapolated everything, would be \$11.5 bil-

Mr. HARRY F. BYRD, JR. As I understand it, the Senator from Oregon will ask for a vote in a moment on this particular amendment.

Mr. HATFIELD. That is correct. Mr. HARRY F. BYRD, JR. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. MATTINGLY). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered. Mr. HARRY F. BYRD, JR. Mr. President, as I understand it, this

amendment will appropriate approximately \$11.5 billion for foreign aid. Now we can get a clean-cut vote on that proposal. The reason it is put the continuing resolution by the House, in my judgment, is that the House did not want to face the issue of voting on foreign aid so they put it all in this great big omnibus bill.

I think the Senator from Arkansas made an excellent case against trying to finance our Government on a continuing resolution.

This item ought to be voted on separately-\$11.5 billion in foreign aid. And that is just one small part of this continuing resolution. I think it is a very undesirable way to handle the tax funds of the American people. It is a very undesirable way to appropriate money. This is a gigantic bill, with huge sums of money in it, representing 10 subcommittees; 10 different appropriation bills wrapped up into this one piece of legislation, and we are asked to vote on it in a matter of hours. It was only submitted to the Senate a few hours ago.

I urge the Senate to defeat this amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 4, line 21. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 57, nays 41, as follows:

[Rollcall Vote No. 422 Leg.]

## YEAS-57

Andrews East Mitchell Armstrong Ford Moynihan Murkowski Baucus Gorton Biden Hart Nunn Boschwitz Hawkins Packwood Bradley Pell Heinz Pressler Quayle Brady Huddleston Humphrey Bumpers Chiles Inouye Riegle Rudman Cohen Jackson Cranston D'Amato Sarbanes Sasser Jepsen Johnston Simpson Danforth Kasten Kennedy DeConcini Specter Stafford Levin Dodd Lugar Stevens Mathias Symms Durenberger Matsunaga Tsongas Eagleton Metzenbaum Weicker

NOT VOTING-

Glenn

Goldwater So the committee amendment on

page 4, line 21, was agreed to. Mr. HATFIELD. I move to reconsider that vote by which the committee amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The

Senator from Oregon.

Mr. HATFIELD. With the counsel of the majority and minority leaders, I would now renew my unanimous-consent request.

Mr. STEVENS. May we have order,

Mr. President?

The PRESIDING OFFICER. The Senator may proceed.

UNANIMOUS-CONSENT AGREEMENT-COMMITTEE AMENDMENTS

Mr. HATFIELD. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc with the exception of the following amendments. I will give Senators the identification not by line, but by the subject-MX, Clinch River breeder reactor, the FTC, the Ashbrook amendment, copyright, the date of expiration, community development, and the FEMA. I further ask unanimous consent that the resolution as amended be considered as original text for the purpose of further amendment, with the understanding that no points of order be considered waived by reason thereof and that the excepted committee amendments may be temporarily laid aside by agreement of the floor managers.

The PRESIDING OFFICER. Is

there objection?

Mr. CHAFEE addressed the Chair.

Mr. PRYOR. I object.

Mr. CHAFEE. May I understand what we are doing here? Does this mean-

The PRESIDING OFFICER. Will there please be order in the Chamber?

Mr. CHAFEE. This means that no other amendments to the total continuing resolution are permitted?

Mr. HATFIELD. Oh, yes. Any amendment is permitted to any section of the bill. We are in effect adopting basically the technical amend-ments rather than going through and changing the word "acts" from plural to singular by a separate action of the Senate on each item. We are accepting these and the whole resolution is open to any amendment at any time because all we are doing is considering it as original text for the purpose of further amendment.

Mr. CHAFEE. So we are not es-

topped in any way?

Mr. HATFIELD. The Senator is not estopped. The Senator is not circumscribed in any way.

Mr. HARRY F. BYRD, JR. Mr. President, reserving the right to object-

Mr. JACKSON addressed the Chair. The PRESIDING OFFICER. Objection has been heard.

Mr. PRYOR and Mr. JACKSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas (Mr. PRYOR) had objected.

Mr. PRYOR. Mr. President, I withdraw my objection.

The PRESIDING OFFICER. Is there objection?

Mr. HARRY F. BYRD, JR. Mr. President, reserving the right to object, may I ask the distinguished chairman of the committee, is the Senate figure for HHS higher than the House figure or lower than the House figure?

Mr. HATFIELD. If the Senator will wait a moment, I will get my chart.

To respond to the Senator from Virginia, the Senate is higher than the House Labor-HHS.

The precise figure of the House bill is \$85.3 billion, the Senate bill is \$89.8 billion.

Mr. HARRY F. BYRD, JR. Will the Senator from Oregon add that to the list of excepted amendments?

Mr. SCHMITT. Will the Senator

from Oregon yield?

Mr. HATFIELD. I say to the Senator from Virginia that there are many amendments that affect that figure which are scattered throughout this bill. There is on one line or no one exception, but the Senator from Virginia would not be precluded from offering

Mr. HARRY F. BYRD, JR. I under-

stand that.

Mr. HATFIELD [continuing]. An amendment on any one part of it.

Mr. HARRY F. BYRD, JR. The Senator from Virginia does not desire to offer an amendment but the Senator from Virginia may desire to vote against the increase proposed by the committee.

Mr. SCHMITT. Will the Senator yield?

Mr. HATFIELD. I wonder if the Senator would not move then to strike the figure at that point in time and substitute a different figure?

Mr. HARRY F. BYRD, JR. The Senator from Virginia does not desire to to that. The Senator from Virginia would only want a vote on the committee amendment which adds money to the hill.

Mr. HATFIELD. What I am saying is that the Senator from Virginia can obtain that very objective-

Mr. HARRY F. BYRD, JR. I understand that.

Mr. HATFIELD [continuing]. By moving to strike.

Mr. HARRY F. BYRD, JR. I understand but I do not wish to utilize that route. I want a vote on the committee amendment.

Mr. HATFIELD. Otherwise, this \$89 billion is scattered throughout this whole bill. There is no one line—

Mr. HARRY F. BYRD, JR. Let me ask another question. Of the 10 appropriations bills included in this measure, how many of those appropriation bills provide a figure higher than the House bill?

Mr. HATFIELD. Agriculture, Commerce, Defense, District of Columbia. energy and water, foreign aid assistance; Interior is now a conference report, so that is not different; Labor-HHS; Transportation is now a conference report that has been agreed to: Treasury, Postal Service and general Government. But let me say to the Senator that there are many reasons for this other than a matter of increase in program. There are scorekeeping differences between the House and the Senate.

There are what we consider to be underfunded or nonfunded programs in the House bill that we had to fund because we did not want to put it over onto a supplemental. So there are many reasons. One cannot just look at the statistics and see this as a contrast. We are really in some ways talking about apples and oranges.

Mr. HARRY F. BYRD, JR. Well-Mr. HATFIELD. We are within the

302 budget resolution.

Mr. HARRY F. BYRD, JR. But the 302 budget resolution in the view of the Senator from Virginia is an excessive and unjustifiably high figure.

Mr. HATFIELD. I understand that, and I would only say that is the guideline the Senate gave to the Appropriations Committee. We could not unilaterally adopt a different guideline than that which was adopted by the full Senate.

Mr. HARRY F. BYRD, JR. As I understand it, the Senate did not mandate that you spend every dollar that was authorized.

Mr. HATFIELD. No. The Senator is correct.

Mr. HARRY F. BYRD, JR. So it appears that the Senate is proposing to spend more money than the House had proposed to spend. That is a bit puzzling considering that we have a Republican dominated Senate and a liberal Democratic domination of the House.

Mr. HATFIELD. May I say to the Senator that one good example is Agriculture. The Senator is a farmer, the Senator would understand this. By the time the House and Senate acted, the administration sent up almost a \$6 billion requested increase to meet the new demand for CCC—Commodity Credit Corporation. The Senate had to take that kind of action in order to

meet the mandated entitlement program, or you might call it that, under the CCC. That puts the Senate at a

higher figure in Agriculture.

Mr. HARRY F. BYRD, JR. Apparently, for one reason or another, in most of these 10 appropriations bills, the Senate figure is higher than the House figure. May I just ask this, that the Senate add to the list of exceptions the HHS.

Mr. HATFIELD. Will the Senator indicate which amendment on HHS?

Mr. HARRY F. BYRD, JR. Whatever amendments add up to \$89 billion versus \$85 billion. There is a \$4 to \$5 billion differential between the Senate and the House. The Senate committee wants to spend at least \$4 billion more than the House of Representatives wants to spend.

Mr. HATFIELD. I say to the Senator that the House of Representatives underfunded entitlements Labor-HHS by \$5.8 billion. The view is they could be handled on a supplemental. The Senate tries to deal headon with the beginning of the fiscal year in order to reach those levels that are going to be required during that fiscal year.

That is one reason why that figure on our side is that much higher than

the House side.

Mr. HARRY F. BYRD, JR. All I ask of the Senator is that he set aside \$89 billion so that Committee amendment can be voted on. The Senate then can vote whether to increase the House spending figure by \$4 to \$5 billion. Mr. SCHMITT. Mr. President, will

the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I yield Mr. SCHMITT. As the chairman has indicated, we worked very closely with the Office of Management and Budget and the Congressional Budget Office to try to come up with what the most realistic figure for entitlement expenditures under the current economic conditions would be in fiscal year 1983. The Senate figure of \$89 billion-plus represents that assessment, and it is \$5.8 billion more than what the House has in their bill. You either pay the \$5.8 billion now or you are going to pay it in a supplemental.

Mr. HARRY F. BYRD, JR. I have

only one simple request.

Mr. HATFIELD. Mr. President, will the Senator yield 1 minute?

Mr. HARRY F. BYRD, JR. I am

Mr. HATFIELD. Let me accommodate the Senator this way. Let me add to my exception list lines 4 to 15, on page 15 of the C.R., the language that references the Senate bill in lieu of the House bill. Then the Senator from Virginia will be able to act upon that at the proper time. That will get, I think, to the crux of the matter that the Senator wants to address.

Mr. HARRY F. BYRD, JR. I thank the Senator from Oregon.

The Senator from Virginia understands correctly that when we get to this amendment on page 15 that a vote against the committee amendment would then put the figure back by approximately \$5 billion.

Mr. HATFIELD. The Senator is correct. It would be the same situation which the Senator moved on the foreign operations bill which \$500 million less in the House reference than in the Senate reference.

Mr. HARRY F. BYRD, JR. I thank the Senator. That will clarify that.

Mr. HATFIELD. Will the Chair now please restate the request?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I thank the Chair. I thank my colleagues in the Senate for agreeing to this.

The committee amendments agreed to en bloc are as follows:

On page 10, strike line 3, through and including line 9, and insert the following:

(d) Notwithstanding any other provision of this joint resolution, such amounts as may be necessary for programs, projects, and activities provided for in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1983 (S.2956), at a rate provided for operations and to the extent and in the manner provided for in such Act as reported in the Senate on September 24, 1982 (Senate Report 97-584), as if such Act had been enacted into law, except that the following appropriations shall be as follows;

Department of Commerce: Bureau of the Census: "Periodic censuses and programs", \$93,744,000, of which \$150,000 shall be available together with \$50,000 from non-Federal sources for a new combined monthly survey

of men's and women's apparel.

Economic Development Administration: "Economic Development Revolving Fund" (Limitation on Loan Guarantees): During fiscal year 1983, total commitments to guarantee loans to steel companies shall not exceed \$20,000,000 of contingent liability for loan principal.

International Trade Administration: "Operations and Administration", \$166,426,000: Provided, That "1982" on lines 13 and 16 on page 5 of the Senate reported bill (S. 2956)

shall be "1983".

United States Travel and Tourism Admin-"Salaries istration: Expenses' and \$8,100,000, of which \$500,000 shall be used only to provide direct financial assistance to the State of Hawaii (which has been declared as a major disaster area by the President) and that such funds: (1) shall be used to supplement and increase rather than replace funds that normally would be used to promote travel by foreign visitors to Hawaii; (2) shall be obligated and expended within 60 days of the date of enactment of this Act; and (3) shall not be used to pay the administrative costs of the United States Travel and Tourism Administration or any other unit of the Federal Government.

Science and Technical Research: "Scientific and Technical Services": Provided, That of the funds appropriated \$475,000 shall be for robotics research and \$700,000 shall be for work in materials science relat-

ed to metals processing.

National Telecommunications and Information Administration: "Salaries and Expenses", \$12,667,000, of which \$502,911 of prior year unobligated balances in the appropriation "Public telecommunications facilities planning and construction" shall be transferred to this appropriation.

Small Business Administration: "Salaries and Expenses" (including transfer of funds), for necessary expenses, not otherwise pro-vided for, of the Small Business Administration, including hire of passenger motor vehicles and not to exceed \$1,500 for official reand representation expenses. \$202,178,000 and for grants for Small Business Development Centers as authorized by section 21(a) of the Small Business Act, as amended \$12,000,000. In addition, \$31,600,000 for disaster loan making activities, including loan servicing, shall be transferred to this appropriation for the "Disaster loan fund".

Department of Justice: General Adminis-"Salaries tration: and Expenses". \$56,741,000.

Legal Activities: "Support of United States Prisoners", \$34,254,000: Provided, That not to exceed \$4,050,000 shall be available for the purpose of renovating, constructing and equipping State and local jail facilities that confine Federal prisoners under the Cooperative Agreement Program: Provided further, That amounts made available for constructing any local jail facility shall not exceed the cost of constructing space for the average Federal prisoner population for that facility as projected by the Attorney General: Provided further, That following agreement on or completion of any federally assisted jail construction, the availability of such space shall be assured and the per diem rate charged for housing Federal prisoners at that facility shall not exceed direct operating costs for the period of time specified in the cooperative agreement; and "Fees and Expenses", \$35,700,000.

Interagency Law Enforcement: "Organized Crime Drug Enforcement", for expenses necessary for the detection, investigation, prosecution and incarceration of in-dividuals involved in organized criminal drug trafficking not otherwise provided for, \$127,500,000, of which \$18,000,000 is to remain available until expended for construction of new facilities and constructing, remodeling, and equipping buildings and facilities at existing detention and correction-

al institutions. Federal Bureau of Investigation: "Salaries and Expenses", \$825,154,000: Provided, That passenger motor vehicles for police-type use may be purchased without regard to the general purchase price limitation for the current fiscal year.

Immigration and Naturalization Service: 'Salaries and Expenses", \$482,917,000.

Drug Enforcement Administration: "Sala-

ries and Expenses", \$248,162,000.

General Provision: Provided, That notwithstanding any regulation, guideline, or rule of the Corporation, the funds provided by this joint resolution for the Legal Services Corporation shall be used by the Corporation in making grants or entering into contracts under sections 1006(a)(1) and (3) so as to insure that funding for each such current grantee and contractor is maintained in 1983 at the annualized level at which each such grantee and contractor we funded in 1982, or in the same proportio. which total appropriations to the Corporation in fiscal year 1983 bear to the total ap-propriations to the Corporation in fiscal year 1982, until action is taken by directors of the Corporation who have been con-firmed in accordance with section 1004(a) of the Legal Services Corporation Act.

Provided further, That none of the funds available under this joint resolution shall be used to sell to private interests except with the consent of the borrower or contract with private interests to sell or administer, any loans made under the Public Works and Economic Development Act of 1965 or any loans made under section 254 of the Trade Act of 1974: Provided further, That sections 106 and 149 of Public Law 97-276, and this subsection in its entirety shall be effective through September 30, 1983.

On page 15, strike line 16, through and in-

cluding line 6 on page 16;

On page 16, line 7, strike "(4)"

On page 16, line 11, strike "That", and insert "That, notwithstanding section 102 of this joint resolution"

On page 16, strike lines 16 and 17, and

insert the following:

activities under the Refugee Act of 1980 and subsections (a) and (b) of section 501 of the Refugee Education Assistance Act of 1980 at the rate of \$670,670,000: Provided, That of the amounts so made available, there shall be obligated for the purposes of section 412(c) of the Immigration and Nationality Act the amount that would be derived from an annual appropriation for such purposes of \$120,000,000:

On page 17, strike line 10, through and in-

cluding line 16;

On page 18, line 9, after "Appropria-tions:", insert the following:

Provided further, That Department Energy, Atomic Energy Defense Activities, shall be funded at not to exceed an annual rate for new obligational authority of \$5,700,000,000, of which not more than \$938,700,000 shall be available for operating expenses-materials production; of which not more than \$275,350,000 shall be available for plant and capital equipment-materials production; of which not more than \$2,710,900,000 shall be available for operating expenses-weapons activities; of which not more than \$611,150,000 shall be available for plant and capital equipment-weapons activities, except that no funds shall be available for Project 82-D-109:

On page 19, strike line 21, through and including line 12 on page 21, and insert the

following:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by \$313,477,865: Provided, That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by \$5,732,355,689: Provided further, That of the budget authority provided herein, \$542,640,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, \$2,096,000,000 shall be for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), and \$1,000,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 14371): Provided further, That of the amounts of contract authority and budget authority authorized by such Act, and heretofore approved in appropriation Acts, any amount of budget authority up to \$1,000,000,000 which was obligated for assistance in financing the development or acquisition cost of low-income public housing in a year prior to 1983 and becomes available for obligation in 1983 shall be made available for modernization of existing public housing projects pursuant to section 14 of such Act and of any amount of such budget authority equal to or in excess of \$1,000,000,000 but not exceeding \$3,000,000,000, 30 per centum of such budget authority shall also be made available for modernization of existing public housing projects and 70 per centum of such amount of such budget authority shall be made available for annual contributions contracts under the section 8 existing housing program (42 U.S.C. 1437f): Provided further, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1983, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1983: Provided further, That the \$89,321,727 of budget authority deferred and made available in accordance with the provisos under the heading "Annual Contributions for Assisted Housing" in Chapter VII of the Supplemental Appropriations Act, 1982 (Public Law 97-257), shall be made available for the modernization of 5,073 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such Act: And provided further, That none of the merged amounts available for obligation in 1983 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439).

#### HOUSING FOR THE ELDERLY OR HANDICAPPED FUND

For an additional amount for direct loan obligations for "Housing for the Elderly or Handicapped Fund" under section 202 of the Housing Act of 1959, as amended, (12 U.S.C. 1701q), \$271,800,000: Provided fur-That Title I of the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1983 (Pubic Law 97-272) is amended by striking out the period at the end of the paragraph under the heading "Housing for the Elderly and Handicapped Fund", and inserting in lieu thereof the following: "Provided further, That notwithstanding section 202(a)(3) of such Act, loans made in fiscal year 1983 shall bear an interest rate which does not exceed 9.25 per centum, including the allowance adequate in the judgment of the Secretary to cover administrative costs and probably losses under the program."

On page 24, after line 11, insert the fol-

## FEDERAL HOUSING ADMINISTRATION FUND

For an additional amount for commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended. \$6,100,000,000: Provided, That section 207(c)(3), the second proviso of section 213(b)(2), section 220(c)(3)(B)(iii), section 221(d)(3)(ii), section 221(d)(4)(ii), section 231(c)(2) and section 234(e)(3) of the National Housing Act are each amended by inserting "(by not to exceed 140 per centum where the Secretary determines that a mortgage other than one purchased or to be purchased under section 305 of this Act by the Government National Mortgage Association in implementing its special assistance functions is involved)" after "90 per centum"

On page 25, strike line 1, through and including line 9, and insert the following:

(h) Such amounts as may be necessary for programs, projects, or activities provided for in the Department of the Interior and Related Agencies Appropriation Act, 1983 (H.R. 7356), at a rate of operations, and to the extent and in the manner provided for in such Act as passed by the United States Senate on December 14, 1982, as if such Act had been enacted into law.

(i) Notwithstanding any other provision of this joint resolution such sums as may be necessary for programs, projects, or activities provided for in the Department of Agriculture, Rural Development and Related Agencies Appropriation Act, 1983 (H.R. 7072), to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (House Report Number 97-957), filed in the House of Representatives on December 10, 1982, as if such Act had been enacted into law.

(j) Notwithstanding any other provision of this joint resolution such sums as may be necessary for programs, projects, or activities provided for in the District of Columbia Appropriation Act, 1983 (H.R. 7144), to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (97-972), filed in the House of Representatives on December 15, 1982, as if such Act had been enacted into law.

(k) Notwithstanding any other provisions of this joint resolution such sums as may be necessary for programs, projects, or activities provided for in the Department of Transportation and Related Agencies Ap-propriation Act, 1983 (H.R. 7019), to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (House Report Number 97-960), filed in the House of Representatives on December 13, 1982, as if such Act had been enacted into

SEC. 129. Notwithstanding any other provision of this joint resolution, there is appropriated to the "Federal Labor Relations Authority", \$15,500,000.

SEC. 130. Notwithstanding any other provision of this joint resolution, \$275,000,000 of the direct loans allocated to Israel under the Foreign Military Credit Sales program shall not be available for disbursement before October 1, 1983, and \$100,000,000 of the amount authorized for direct loans for the Export-Import Bank of the United States shall not be available for obligation or disbursement before October 1, 1983.

SEC. 131. Notwithstanding any other provision of this joint resolution, the Secretary of the Treasury shall instruct the United States executive directors of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the International Monetary Fund, the Asian Development Bank, the African Development Bank, and the African Development Fund to use the voice and vote of the United States to oppose any assistance by these institutions, using funds appropriated or made available pursuant to this or any other Act, for the production of any commodity for export, if it is in surplus on world markets and if the assistance will cause substantial injury to United States producers of the same, similar, or competing commodity.

SEC. 132. Notwithstanding any other provision of this joint resolution, none of the funds appropriated or made available (other than funds for "Operating expenses of the Agency for International Development") pursuant to this Act for carrying out the Foreign Assistance Act of 1961, may be used to finance the operating expenses for the Agency for International Development.

SEC. 133. Notwithstanding any other provision of this joint resolution, none of the funds appropriated under section 101(b) of this joint resolution may be available for any country during any 3-month period beginning on or after October 1, 1982, immediately following the certification of the President to the Congress that such country is not taking adequate steps to cooperate with the United States to prevent narcotic

drugs and other controlled substances (as listed in the schedules in section 202 of the Comprehensive Drug Abuse and Prevention Control Act of 1971 (21 U.S.C. 812)) which are produced, processed, or transported in such country from entering the United States unlawfully.

SEC. 134. Notwithstanding any other provision of this joint resolution, of the new obligational authority appropriated under section 101(b) to carry out the provisions of sections 103 through 106 of the Foreign Assistance Act of 1961, not less than 30 per-cent shall be available for loans for the fiscal year 1983 (funds for such loans shall remain available for obligation until September 30, 1984): Provided, That loans made pursuant to this authority to countries whose annual per capita gross national product is greater that \$795 but less than \$1,285 shall be repayable within twenty-five years following the date on which funds are initially made available under such loans and loans to countries whose annual per capita gross national product is greater than or equal to \$1,285 shall be repayable within twenty years following the date on which funds are initially made available under such loans.

SEC. 135. Payments required by section 4 of Public Law 97-346 with respect to the Vice President, Senators, and officers and employees of the Senate shall be paid from the contingent fund of the Senate out of the account in such fund for "Miscellaneous Items"

SEC. 136. Any commuter authority operating commuter service transfered from the Consolidated Rail Corporation under part 2 of the Northeast Rail Service Act of 1981 shall be subject to applicable laws with respect to such service, including, but not limited to the Railway Labor Act, the Railroad Retirement Act of 1974 (45 U.S.C. 231 et seq.), the Railroad Retirement Tax Act (26 U.S.C. 3201 et seq.), and the Railroad Unemployment Insurance Act (45 U.S.C. 351 et seq.).

SEC. 137. Conrail employees who are deprived of employment by assumption or discontinuance of intercity passenger service by Amtrak shall hereafter be eligible for employee protection benefits under section 701 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 797), notwithstanding any other provision of law, agreement, or arrangement, and notwithstanding the inability of such employees otherwise to meet the eligibility requirements of such section. Such protection shall be the exclusive protection applicable to Conrail employees deprived of employment or adversely affected by any such assumption or discontinuance.

SEC. 138. Notwithstanding any other provision of this joint resolution (a) For fiscal year 1983, any head of an agency or his designee may enter into a contract pursuant to the provisions of section 3(f) of the Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982 (Public Law 97-365). Of the net amounts collected, a maximum of 40 percent may be credited to an agency account from which funds are available for debt collection activities, and the balance shall be covered into the Treasury as miscellaneous receipts, unless otherwise provided by law.

(b) Paragraph (1) of section 3(f) of the Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982 (Public Law 97-365), is amended by adding at the end thereof the following new sentence: "All contracts under this subsection shall be subject to the requirements of sec-

tion 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253).

(c) Notwithstanding any other provision of law, the Comptroller General and the Attorney General shall prepare and publish within 30 days of the enactment of this joint resolution proposed regulations to carry out the provisions of and amendments made by the Debt Collection Act of 1982 (Public Law 97-365) and shall issue final regulations within 60 days of the enactment of this joint resolution.

(h) Section 8344(h)(1) of title 5, United States Code, is amended by inserting "or the Secretary of Defense" after "Administrator. Federal Aviation Administration,'

(i)(1) The amendments made by subsections (b), (c), (d), (e), (g), and (h) of this section shall take effect at 5 o'clock ante meridian eastern daylight time, August 3, 1981.

(2) The amendments made by subsections (a) and (f) of this section shall take effect on the first day of the first applicable pay period beginning after the date of the enactment of this joint resolution.

SEC. 140. (a) ESTABLISHMENT OF CAPITAL CON-STRUCTION FUNDS FOR FISHERY FA-CILITIES

Subsection (a) of section 607 of the Merchant Marine Act, 1936 (46 U.S.C. 1177), is

amended to read as follows:

"(a) AGREEMENT RULES .- (1) Any citizen of the United States owning or leasing one or more eligible vessels (as defined in subsection (k)(1)), or one or more eligible fishery facilities (as defined in subsection (k)(9)), may enter into an agreement with the Secretary of Commerce under, and as provided in, this section to establish a capital construction fund (hereinafter in this section referred to as the 'fund') with respect to any or all of such vessels or facilities. Any agreement entered into under this section-

"(A) shall be for the purpose of provid-

ing-

"(i) replacement vessels, additional vessels, or reconstructed vessels, built in the United States and documented under the laws of the United States for operation in the United States foreign, Great Lakes, or

noncontiguous domestic trade.

"(ii) replacement fishing vessels, additional fishing vessels, or reconstructed fishing vessels, built in the United States, American Samoa, the Virgin Islands of the United States, Guam, the Northern Mariana Islands, or any other commonwealth, territory, or possession of the United States and documented under the laws of the United States for operation in the fisheries of the United States, or

"(iii) replacement fishery facilities, additional fishery facilities, or reconstructed fishery facilities, located in the United States, American Samoa, the Virgin Islands of the United States, Guam, the Northern Mariana Islands, or any other commonor possession of the

wealth, territory, United States, and

"(B) shall provide for the deposit in the fund of the amounts agreed upon as necessary or appropriate to provide for qualified withdrawals under subsection (f).

"(2) In applying paragraph (1)(A)(ii) or

(iii)-

"(A) no withdrawal may be made from a capital construction fund for a replacement or addition purpose involving a used fishing vessel or a used fishery facility unless that vessel or facility will be used in the harvesting of fish from, or for a function described in subsection (k)(12) with respect to, an underutilized fishery;

"(B) withdrawals may be made from a capital construction fund for the purchase of a used fishery vessel or a used fishery facility for any reconstruction purpose, if such reconstruction will contribute to the development of the United States fishing in-

"(C) nothing in this section shall be construed as prohibiting the establishment and use of a capital construction fund-

"(i) with respect to fishing vessels for purposes of acquiring fishery facilities,

"(ii) with respect to fishery facilities for purposes of acquiring fishing vessels, or

"(iii) for fishing vessels and fishery facilities; and

"(D) nationals of the United States and citizens of the Northern Mariana Islands shall be treated as citizens of the United States

"(3) The deposits in the fund, and all withdrawals from the fund, whether qualified or nonqualified, shall be subject to such conditions and requirements as the Secretary of Commerce may by regulation prescribe or are set forth in such agreement; except that the Secretary of Commerce may not require any person to deposit in the fund for any taxable year more than 50 percent of the sum of (A) that portion of such person's taxable income for such year which is attributable to the operation of the agreement vessels or (B) that portion of such person's taxable income for such year which is attributable to the operation of the agreement fishery facilities. For purposes of the preceding sentence, taxable income shall be computed in the manner provided in subsection (b)(1)(A).

"(4) Notwithstanding any other provision of law, any agreement for any of the purposes set forth in paragraph (1)(A) (ii) or

(iii) may be amended in order to-

"(A) allow for the withdrawal of moneys from the fund established by that agreement and the subsequent deposit of those moneys in a fund established, whether by the same or different persons, under another existing agreement, or a new agreement, entered into for any such purpose of purposes: or

"(B) provide that one or more other persons may be permitted to become parties thereto and deposit moneys into the fund established by such agreement; whether or not any of the moneys for deposit are withdrawn pursuant to an agreement amended

under subparagraph (A).

"(5) The Secretary may not require, in the case of any agreement entered into for the purpose of reconstructing a fishing vessel or fishery facility, that a minimum withdrawal be made from the fund. For purposes of this section, the reconstruction or reconditioning of a fishing vessel or fishery facility does not include the routine minor repair or maintenance of the vessel or facility."

(b) DEFINITIONS.-

Subsection (k) of section 607 of the Merchant Marine Act, 1936, is amended by adding at the end thereof the following new paragraphs:

"(9) The term 'eligible fishery facility' means any fishery facility which is located

in the United States.

"(10) The term 'qualified fishery facility' means any fishery facility-

"(A) which is located in the United States,

and "(B) which the person maintaining the

fund agrees with the Secretary of Commerce will be used for one or more of the functions described in paragraph (12).

For purposes of this paragraph, paragraphs (1), (2), and (3) insofar as they relate to a fishing vessel, and paragraph (9), the term 'United States' includes American Samoa, the Virgin Islands of the United States, the Northern Mariana Islands, Guam, and any other commonwealth, territory, or posses-

sion of the United States; and, when applied with respect to a fishery facility described in paragraph (12)(B), includes the fishery conservation zone established by section 101 of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1811).

"(11) The term 'agreement fishery facility' means any eligible fishery facility or qualified fishery facility which is subject to an agreement entered into under this sec-

tion.

(c) TECHNICAL AND CONFORMING AMEND-MENTS.

(1)(A) Subparagraph (A) of section 607(b)(1) of the Merchant Marine Act, 1936, is amended by inserting "(i)" after "(A), and by inserting ", or (ii) that portion of the taxable income of the owner or lessee for such year (as so computed) which is attributable to the operation of the agreement fishery facilities," after "the fisheries of the United States."

(B) Subparagraph (B) of such section 607(b)(1) is amended by inserting "or the agreement fischer" facilities" after "the

agreement vessels.

(C) Subparagraph (C) of such section 607(b)(1) is amended by inserting "or agreement fishery facility" after "any agreement

vessel" each place it appears.

(D) Paragraph (2) of section 607(b) of such Act is amended by inserting "or an agreement fishery facility" after "an agreement vessel" and by inserting "or such facil-

ity (as the case may be)" after "such vessel."

(2)(A) Subparagraph (A) of section
607(f)(1) of such Act is amended by inserting "or a qualified fishery facility" after "a qualified vessel.'

(B) Subparagraph (C) of section 607(f)(1) of such Act is amended to read as follows

"(C) the payment of the principal on indebtedness incurred in connection with the acquisition, construction, or reconstruction

"(i) a qualified vessel,

"(ii) a qualified fishery facility, or

"(iii) a barge or container which is part of the complement of the qualified vessel.

(3)(A) Paragraphs (2) and (3) of section 607(g) of such Act is amended by inserting "fishery facility," after "vessel," each place

(B) Paragraph (4) of section 607(g) of such Act is amended by inserting "fishery facili-

ties" after "vessels.

(4) The terms "fishery facility" and "citizen of the Northern Marianas" as used in this Title shall have the meanings given in Title XI of the Merchant Marine Act of

1936, (46 U.S.C. 1271-1280). (d) Effective date. The amendments made by this section shall be effective upon enact-

ment of this joint resolution.

SEC. 141. None of the funds appropriated by this joint resolution shall be used by the Federal Trade Commission to exercise its authority under section 5 or section 18 of the Federal Trade Commission Act to invalidate any State laws or part thereof, which establishes training, education, or experience requirements for the licensure of professionals (persons who, in the performance of their occupation, are subject to licensure or certification under State law and, as a prerequisite for such licensure or certification under State law, have received a degree from an accredited institution of higher learning or successfully completed a course of specialized training at an accredited education or training facility for health professions personnel operated as an integral part of a hospital) or the permissible tasks and duties which may be performed by profes-

Sec. 142. Notwithstanding any other provision of this joint resolution, the provisions of section 616 of H.R. 7158, the Treasury, Postal Service, and General Government Appropriation Act, 1983, and section 614 of S. 2916, the Treasury, Postal Service, and General Government Appropriation Bill, 1983, shall not apply to funds appropriated or otherwise made available by this joint resolution.

Sec. 143. Notwithstanding any other provision of this joint resolution, no funds made available by this Act shall be used to develop or procure the VIPER light antitank weapon.

SEC. 144. Section 131 of Public Law 97-276 shall be amended by striking "December 17, 1982" and inserting in lieu thereof "Septem-

ber 30, 1983"

Sec. 145. Funds available under this Act may be used by the Department of Defense to enter into purchases of or commitments to purchase metals, minerals, or other materials under section 303 of the Defense Production Act of 1950, as amended, (50 U.S.C. 2093): Provided, That the total funds under this Act for such purchases or commitments to purchase shall not exceed \$50,000,000.

SEC. 146. None of the funds appropriated in this Act may be obligated or expended in any way for the purpose of the sale, lease, or rental of any portion of land currently identified as Fort DeRussy, Honolulu,

SEC. 147. Notwithstanding any other provision of this joint resolution, none of the funds made available by this Act may be used to support active U.S. military personnel stationed on shore in Europe at the end of fiscal year 1983 in excess of the actual number of such personnel stationed on shore in Europe at the end of fiscal year 1982: Provided, That this limitation may be waived by the President upon a declaration to Congress of overriding national security requirements.

Sec. 148. Not withstanding any other provision of this joint resolution, \$422,100,000 shall be available only for the purchase of the Multiple Launch Rocket System under

a multiyear contract.

SEC. 149. The authorization for the water project on Bradly Lake, near Cook Inlet, Alaska described in the plans recommended in the report of the Chief of Engineers contained in House Document Numbered 455, 87th Congress, which plan was adopted and authorized by the Flood Control Act of 1962 (76 Stat. 1180, 1193), is hereby terminated.

Sec. 150. Notwithstanding any other provision of this joint resolution, including section 102, there are appropriated \$7,000,000 for carrying out the Runaway and Homeless Youth Act, which is in addition to amounts otherwise available under section 137 of Public Law 97-276 and under this joint resolution for carrying out such Act.

SEC. 151. For payment to the Alaska Railroad Revolving Fund for capital improvements, replacements, operations, and maintenance \$7,600,000, to remain available until

expended.

On page 87, line 5, strike "in all", through

and including line 19:

On page 87, after line 19, insert the following:

### "SCHOOLS AND HOSPITALS WEATHERIZATION ASSISTANCE

"In order to create productive jobs in manufacturing and installation of weatherproofing products, there is appropriated an additional amount for 'Energy conservation', Department of Energy, \$150,000,000, to remain available until expended for schools and hospitals weatherization assistance as authorized by the National Energy Conservation Policy Act (Public Law 95-619) (42 U.S.C. 6371-6372)."

On page 88, strike line 3, through and including line 14, and insert the following:

## ALASKA RAILROAD

To accelerate the restoration and renova tion of the existing track and attendant structures of the Alaska Railroad during the upcoming maintenance season and to generate substantial new employment on the Railroad. For payment to the Alaska Railroad Revolving Fund for capital improvements, replacements, operations, and maintenance \$26,000,000, to remain available until expended.

COMMITTEE AMENDMENT ON PAGE 9. LINE 8

Mr. HATFIELD. Mr. President, as in the normal course of things, may we in this instance at least go to the next. amendment? Will the clerk state the first excepted committee amendment which is the MX missile?

The PRESIDING OFFICER. The clerk will state the first excepted com-

mittee amendment.

The legislative clerk read as follows: On page 9, line 8, strike "Such", through and including line 13, and insert the following

Notwithstanding any other provision of this joint resolution, such amounts as may be necessary for programs, projects, or ac tivities provided for in the Department of Defense Appropriation Bill, 1983 (S. 2951), at a rate of operations, and to the extent and in the manner and under the authority provided for in such bill as reported to the Senate on September 23, 1982, as if such bill had been enacted into law. Provided, That one of the funds made available for the procurement of the MX missile or for the institution of any permanent basing mode for the MX missile shall be obligated or expended until such basing mode is approved by both Houses of Congress in a concurrent resolution. This proviso shall in no way affect the Research, Development, Test, and Evaluation funds for the MX missile or for any and all basing modes.

### UP AMENDMENT NO. 1486

(Purpose: To place certain limitations on funds for MX missile procurement and research, development, test and evaluation)

Mr. JACKSON. Mr. President, I send to the desk a perfecting amendment on behalf of myself, Senator Tower, Senator Warner, Senator NUNN, Senator Stevens, Senator Sten-NIS and Senator THURMOND.

It occurs on page 9, line 24.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Washington (Mr. Jackson), for himself and Mr. Tower, Mr. Warner, Mr. Nunn, Mr. Stevens, Mr. Sten-NIS, and Mr. THURMOND, proposes an unprinted amendment numbered 1486.

Mr. JACKSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 24, strike the period and insert in lieu thereof the following: as specified in subsection (1) hereof.

None of the funds appropriated in this resolution may be obligated or expended to initiate full scale engineering development of a basing mode for the MX missile, until such basing mode is approved by both Houses of Congress in a concurrent resolution, as specified in subsection (1) hereof.

(1) For the purposes of this section, the term "concurrent resolution" means only a resolution introduced in either House of Congress, the matter after the resolving clause of which is as follows: "That the approves the obligation and ex-

penditure of funds appropriated in Public for MX missile procurement and full-scale engineering development of a basing mode for the MX missile," the first blank space therein being filled with the name of the resolving House, and the second blank space being filled with the public law number of this statute. It shall not be in order to introduce any such resolution prior to March 1, 1983.

(2) A resolution in the Senate shall be referred to the Committee on Armed Services of the Senate. A resolution in the House of Representatives shall be referred to the Committee on Armd Services of the House of Representatives

(3) If the Committee to which is referred the first resolution introduced in the Senate or the House, as the case may be, expressing approval of the obligation and expenditure of funds referred to in this subsection has not reported the resolution at the end of 45 calendar days after the introduction of a resolution pursuant to subsection (1) hereof, such committee shall be automatically discharged from further consideration of the resolution and the resolution shall be placed on the calendar of the Senate, in the case of a resolution of the Senate, or the Union calendar, in the case of a resolution of the House of Representatives.

(4) When the committee has reported a resolution or been discharged under subsection (3) hereof it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged in the House and is privileged in the Senate and is not debatable. The motion is not subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order.

(5)(A) Debate on the resolution shall be limited to not more than fifty hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to is not in order

(B) Motions to postpone and motions to proceed to the consideration of other business shall be decided without debate.

(C) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution shall be decided without debate.

(6) Subsections (1) through (5) are enacted by the Congress-

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described in subsection (b), and they supercede other rules only to the extent that they are inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedures of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(7) (A) The President shall submit a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than March 1, 1983, containing:

(i) a detailed technical assessment of the closely spaced basing system transmitted by the President to Congress on November 22, 1982 or such modifications thereto as the President determines to be advisable;

(ii) a detailed technical assessment of other MX basing systems that might serve as alternatives to the closely spaced basing system transmitted by the President to Congress on November 22, 1982;

(iii) a detailed technical assessment of different types of intercontinental ballistic missiles that might serve as alternatives to

the MX missile; and

(iv) a reaffirmation by the President of his selection of the MX missile basing plan transmitted to Congress on November 22, 1982 or a proposal for an alternative basing

plan.

(B) The President shall also include in the report submitted pursuant to paragraph (A) an assessment of the military capability of each alternative system or missile; an assessment of the survivability of each such system or missile against current and projected Soviet threats: an assessment of the projected cost of each such system or mis-sile and possible upgrades thereof; an assessment of the impact each such system or missile might have on present and future arms control negotiations; an assessment of the geographic, geological, and other qualifications a site for each such system or missile would likely require; an assessment of the environmental impact each such system or missile would likely have; and the identification of possible sites for each such system or missile.

(C) The report required under this subsection shall not be subject to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, relating to environmental impact statements.

Mr. JACKSON. Mr. President, this amendment leaves the Hollings amendment intact but provides for certain supplementary action to expedite the decisionmaking process by the President and by both Houses through affirmative approval of expenditure of the basing and the missile production funds in this particular item of the bill.

Mr. President, the last few days of Senate consultations on the MX missile problem have been encouraging. There is more agreement than initially met the eye. Working together—mostly out of the limelight—we have found widespread agreement on the appropriate action for the Senate to take at this stage.

The Hollings amendment now in the bill would give the Congress the opportunity to make a final decision on the MX missile and basing mode during the next session of Congress. The Senate thus has the opportunity to study and evaluate carefully the MX missile and the Dense Pack plan along with alternatives to both, and the final resolution of these issues would require affirmative action by both Houses of Congress.

The amendment how being offered would insure that the Senate and the House would have at a reasonable point in the next session an opportunity to pass upon the issue of MX without the matter being dragged on and on and the committee resolutions unreasonably delayed and possibly filibustered.

Under this amendment the President is instructed to report to Congress by March 1 on a new assessment of the various missile and deployment alternatives, with whatever proposal for a basing plan he wishes to make. The President's proposal would then be considered under the expedited procedure rules and would go into effect only if approved by a majority vote of both the House and Senate.

I believe the majority of the Senate agrees on these three fundamental

points.

First. This Nation must fortify the land leg of its strategic deterrent.

The triad of land-, air-, and seabased forces continues to be essential for stable deterrence. If we give up on the ICBM's, the Soviets can focus increased attention on neutralizing our bombers—which already are not our surest suit. With only one strong leg of the triad then remaining, the door is open to a massive Soviet concentration of resources and know-how to put our sea-based missile force in full jeopardy.

No one contests the fact of expanding Soviet offensive capabilities and the consequent rising vulnerability of Minuteman. Most in Congress recognize the requirement for strategic modernization, including a follow-on land-based ICBM. The House vote last week to delete funds for putting into production the first five MX missiles was mainly a revolt against the proposed Dense Pack deployment modenot against the missile. In this body, the opposition to including MX funds in the appropriations bill has not come so much from opponents of the missile as from those who are reluctant to fund the missile production when the mode of deployment is still in ques-

Second. There is very general agreement that the Dense Pack plan for de-

ployment is problematical.

Clearly, Congress needs the opportunity to carefully evaluate the Dense Pack scheme in relation to possible alternative modes deployment. A reasonable period for review ought to allow development of the necessary consensus on the most effective way to preserve the land-based deterrent.

Given the technological sophistication of Soviet weapons and our own Nation's defensive posture, we cannot expect any basing mode to be altogether invulnerable. The adversary's offensive posture has the obvious advantage. At best we will get a partial solution to the problem of vulnerability. But we should be able to settle on a way to base the missile that will substantially complicate Soviet offensive expectations and contribute decisively

to Kremlin respect for our strategic deterrent.

Third. There is no disagreement about the central importance of the current U.S.-U.S.S.R. arms reduction negotiations and about the goal we seek. We want to achieve mutual arms restraint and balanced verifiable arms cuts. We want to reduce weapons, to bring existing nuclear forces down to lower and lower levels of equality. Such differences of view as may exist go to the question of how to get there.

But few in the Congress will argue that we will get there by unilaterally abandoning the modernization of our strategic deterrent. Indeed, the chances for real arms reductions will be severely lessened if we ever adopt policies of one-sided disarming.

If the Kremlin sees us allowing the serious deterioration of our ICBM force, what incentive will it have to agree to mutual ICBM reductions? If NATO governments become convinced that America does not have the will to maintain and modernize its strategic deterrent, what will stop them from rejecting deployment of the Pershing II and the Cruise missile, thus bringing the MBFR negotiations to a fruitless end?

A vote on this MX matter cannot be separated from the larger issue of American foreign policy, including the current arms reductions negotiations in Geneva. I have always believed that for an American President to be effective at the conference table, he must have substantial bipartisan support.

Mr. President, it is high time we revived the practice of bipartisanship in national security that marked this country's remarkable achievements in World War II. What an era—Harry Truman, George C. Marshall, Robert A. Lovett, Senator Arthur Vandenberg, and all the others—that made possible especially the Marshall plan, NATO, and the other programs that provided for postwar security.

Why not stand now in that great and effective tradition? The issue before us is a good place to start. In fact, we have started. Intense bipartisan consultation in the last few days has brought us along as far as we have come. I recommend and urge that we continue in that spirit.

The VICE PRESIDENT. The Senator from Mississippi.

Mr. STENNIS. Mr. President, let me state to the membership that I will be quite brief here. But this embodies the subject matter that I think is the foremost question before any Chief Executive of our great Nation as to what he is going to do, try to do, and keep on trying to do with reference to some kind of a helpful, effective arms limitation over which we can have some surveillance and the capacity to tell whether the other side is cheating. That is what I told President Reagan

before he was sworn in, in answer to a question that he asked me as to what I thought was his most important, among his most important, problems.

So, Mr. President, this is a matter where we must stand together, as the Senator from Washington says, and I think we have a great deal of misunderstanding, lack of understanding, abroad among our people today, and it is something that is growing unfortunately. We have gotten off the track in some way.

The facts are—and I speak with all deference to the House of Representatives, their good intentions—I, too, think most of those votes there were prompted by a belief, a disbelief, at least in the adequacy of the basing mode. But it was a great mistake to take all the money out for this necessary front-running missile that we are depending on to furnish the leadership before the world—not just the U.S.A. but for the world.

If we are not going to furnish it—and the President of the United States is not the spokesman for it—then pray tell who is? There is none left. He has already announced that he is going to the conference, has his representatives there now, and this MX—there has been no objection particularly to it in its technical aspects—but this MX is the centerpiece of his presentation.

He might have spoken too quickly, he might have made that a little too strong—I do not think he did—but granting that he did, nevertheless, that is fixed and that is firm and that is our policy and that is our position.

When the executive branch of the Government goes to this spot, after having spoken like he has, and set the terms, then the legislative branch must absolutely back him up regardless of party, regardless of everything else. So that is what is really at stake in this whole problem.

I agree we ought to try again as to the basing mode, and I am not happy with the situation there. But so far as the MX is concerned, that is the big question. Our Armed Services Committee has gone over this for 10 years and it has been approved and reapproved over and over again. So for this added reason that I have emphasized, let us stand firm here with this money and set up the ritual that we will be certain to have the legislative power here to kill off any filibuster or anything like that.

Now, personally I felt, and I have been in this thing from the first base we ever built for any kind of missile of this type, been active in it, and I look upon the value as a deterrence, and we have got to go forward with that. There is not going to be any second chance I am afraid should anything set up. Deterrence is our mission. We carried it out splendidly, and this triad, which has already been men-

tioned here, has been a great deal of that formula.

I repeat, there are two fundamental reasons for moving ahead with the MX missile at this time.

First, the MX missile program is a key underpinning to the American position at the negotiating table with the Russians for reducing nuclear weapons. Most people, in our country and among our allies, want some form of progress-success-in our efforts to limit nuclear weapons. For my part, I told President Reagan before he was sworn in as President that I thought the most important work he could do-the most important problem he would face during his 4 years—would be on the question of a successful arms limitation agreement on which surveillance could be achieved. That should be a No. 1 priority. The United States sent a team to Geneva with a proposal for the Russians that we both make major reductions-about one-third-in the number of nuclear warheads on each side. I understand that both we and the Russians have been negotiating seriously about these matters and the Russians have made a counterproposal.

The MX missile is at the center of the American position in these negotiations. It may not be well understood why this is the case. The American proposal would cut both sides down to 5,000 ballistic missile warheads on no more than 850 land- and sea-based missiles, with no more than 2,500 of those warheads based on land.

At present, we have about 7,000 warheads on 1,600 missiles, including 2,150 warheads based on land. If this proposal would be adopted without the MX missile, the U.S. deterrent against the 5,000 remaining Russian warheads would be greatly weakened. In the 1990's under this START proposal but without MX, we would either be relying on the aging and vulnerable Minuteman force together with a very few Trident submarines or we would effectively abandon the Triad and rely on a still small number of submarines which could become vulnerable to Russian antisubmarine weapons. This would not appear to be a strong American position for deterrence against 5,000 Russian warheads that would remain under the American proposal at the START negotiations. It is doubtful that any American President could settle for that kind of agreement and get it ratified in the Senate. Therefore, if MX is canceled and there is no alternative, the American position at the arms limitation talks would be undermined, set back, and perhaps canceled out. I for one do not want this to happen.

There should be no excuses for American termination or delay of these important negotiations. The American people and the people of the world expect progress and we must

give the President the tools to make this progress. Canceling or limiting or tying down the MX missile will remove an essential tool in the President's toolbag for these negotiations.

The second reason to move forward with the MX is that there is no real alternative at present. Cutting MX without an alternative simply means a weaker military position. The MX missile is the only major program that is well along and is aimed at improving the land-based missile portion of our triad. Land-based missiles are the area of greatest Russian strength in the nuclear field and we cannot let that part of our deterrent fall behind without increasing the risk to the other parts of our triad. If one part of our triad becomes weak and easy to destroy, it lessens the chances that the other parts of the triad are an adequate deterrent. The MX program, which has been controversial since its inception in 1974, is aimed at protecting the power of our land-based missiles which are an essential element of the triad along with the new B-1 and Stealth bombers, the new Trident submarines and submarine missiles and the new families of cruise missiles of all types.

In summary, the MX missile has been approved by vote after vote in committee and on the floor every year since 1974. We have already spent over \$4 billion on its development and testing and it is now ready to begin production. There has been trouble with the basing mode for a long time. The basing mode still needs to be perfected. But we must not ask too much of the basing mode-I doubt that anything can be made totally invulnerable to huge nuclear weapons. But the basing mode can make the price of attack so high that it would help protect the other parts of the Triad by using up large amounts of their nuclear capacity. If that happens, deterrence is strengthened, especially within any limits that would be established by arms control agreements. Finally we must move forward with the MX missile.

I hope and pray that we make this strong and firm and go all out and get this thing settled, clear up the minds of our people, let all nations that are with us know we are going to do these very things, and the adversary will be convinced also.

I thank the Chair,

The VICE PRESIDENT. The Senator from Texas.

Mr. TOWER. I want to commend the Senator from Washington (Mr. Jackson) for the role he played in drafting this amendment and putting it together that achieves in my view a very desirable end.

It is an amendment that has bipartisan support. Many people were involved in the creation of it, including the distinguished Senator from Georgia (Mr. Nunn), the Senator from Alaska (Mr. Stevens), the Senator from Virginia (Mr. Warner). We even consulted some Senators who are not in agreement with it and, as a matter of fact, they made some very useful input, they made a contribution to what was put into the amendment so, perhaps, there is even more bipartisanship in it than might be apparent at the moment.

We did consult with the distinguished Senator from South Carolina (Mr. Hollings), the Senator from Michigan (Mr. Levin). They will have to speak for themselves on their views on this issue, but I want to assure the Senate that a number of people were consulted and every effort was made to craft an amendment that could be agreed to by a number of people who have a great interest in the defense of the United States, but also who can look beyond the pure military aspects of what we do with strategic systems and consider the impact on foreign policy, the impact on arms control.

The administration has endorsed this amendment because it does require us to revisit the matter of a basing mode and to come up with a decision on it and, at the same time, preserve the production money for the missile in the bill, even though it is finished.

I think the administration believes that it must have this position if a negotiated position in Geneva is to be preserved. I have discussed this matter with General Rowney, who is our START negotiator. I think that what we do here tonight, if we do the wrong thing, could have a profoundly adverse impact on our efforts to negotiate strategic arms reductions with the Soviets and theater nuclear arms reductions with the Soviets. By preserving the production money, we indicate that we do have a will and determination and, by providing for an expedited procedure, that we intend to make a decision on the matter.

To me, this reinforces the efforts of our negotiators in Geneva to try to reduce the vast stockpiles and the stabilizing weapons in the arsenals of the Soviet Union and the United States. It is a statesmanlike amendment. It assures the Senate of an opportunity to vote on this matter again in the future. It permits us to engage in rather intensive inquiry and research into the issue and to be able to face the matter intelligently.

So much that has been said about basing systems in recent days stems from information that is probably superficial. About all most people know about this basing mode or even some of the alternatives are what they read in the newspapers or hear on television, which are not always reliable sources of information on military matters, without inquiring into some

of the classified aspects and some vital intelligence that bears on the matter.

So I hope that the Senate will act favorably on this to not only provide for us the time to study the matter but assure the public, and assure our friends and adversaries alike, that we will act.

Mr. President, if I could have to attention of the distinguished sponsor of the amendment, there is a provision here that restricts the funds for production and also for fullscale engineering and development. Let me ask the Senator from Washington if it is not his understanding that we are not proscribing the fabrication of RDT&E missiles in support of engineering and test programs needed to prove out the MX missile; that that is only operational missiles that are proscribed?

Mr. JACKSON. That is correct; no question about it.

Mr. MOYNIHAN. Will the Senator from Washington yield for a question? Mr. JACKSON. Yes.

Mr. MOYNIHAN. Could I confirm with the Senator my understanding that, if we adopt the arrangement as provided in the joint resolution, it will require a positive vote by both bodies of the Congress with respect to a proposed basing mode, a vote of approval by both, in order for the production of the missile and its employment to go forward?

Mr. JACKSON. The Senator is correct.

Mr. STEVENS. Will the Senator yield?

Mr. JACKSON. I do not have the floor.

Mr. INOUYE. Mr. President, I ask unanimous consent that Mr. John Hardy of the Commerce Committee be permitted privileges of the floor.

The VICE PRESIDENT. Without objection, it is so ordered.

The following proceedings occurred after midnight:

Mr. STEVENS addressed the Chair.
The VICE PRESIDENT. The Sena-

tor from Alaska.

Mr. STEVENS. Mr. President, I want to thank the Senator from Washington for his comments and my

want to thank the Senator from Washington for his comments and my good friend from Mississippi also. I do think that it is good that we demonstrate bipartisanship in this area.

I would like to point out to the Senate another point of view about this amendment from the point of view of one who, along with my good friend from Mississippi, must face next year the question of the 1984 appropriations bill. We will be having hearings in the early part of the year, in February or March.

We have to decide what rate of spending will be permitted in procurement, in R&D, for 1984, and we hope to have a recommendation to the Senate so we can act on it I hope much earlier in the year next year. We will be able to do that if we catch up

and carry this to September 30 in any event but I know we will be able to do it if we could get some of these decisions made.

But, Mr. President, in this bill, the House is providing \$2.5 billion for research and development. We recommend just \$60 million less than that for research and development.

Mr. President, the Congress must face up to the question of whether or not we are going to accept any basing mode for MX soon enough for us to make a decision as to whether we should continue spending money for research and development of a missile if we are never going to be able to find a place to deploy it.

Now, I want the Members of the Senate, even those who oppose the procurement money, to consider what I am saying. Next year we will be facing another request for more R&D money on top of this R&D money. Unless we get this decision made on the President's request for the basing mode early enough next year, we are going to be appropriating more money for R&D, more money into this missile which may never find a home unless we approve a basing mode.

Now the amendment of the Senator from South Carolina is an amendment that requires the congressional approval of the basing mode. Notwithstanding the fact that we got into a parliamentary situation in the committee where I tried to postpone the delay of that being considered until here on the floor, the Senator from South Carolina knows that he and I discussed this last week and I approved that approach. I think the Congress ought to be involved in approving the basing mode.

The amendment now that has been offered by the Senator from Washington, basically what it adds is a fast track concept of getting us to a decision on that issue early enough next year so we can make intelligent decisions for the 1984 appropriations process. I appeal to the Senate to think of the money that is going into the R&D. This bill has, as I said, coming even from the House, \$2.5 billion in R&D for this missile.

Now I believe that we ought to set up a circumstance, as we adopt the amendment of the Senator from South Carolina, so that we can be assured that the President's recommendations will be fully reviewed. This amendment of the Senator from Washington triggers a timeframe for review by the Congress and mandates that we must make a decision and that we make a decision early enough so we can go into the concept of what will our strategic missile force be like in terms of the 1984 bill.

Now, perhaps that is too pragmatic, but I think it is one good reason to adopt this fast track approach. If you look at that amendment, basically what it adds is the Legislative Reform Act or the Budget Act concept for a fast track, a decisionmaking process for the House and the Senate, but the timeframe for debate is much longer than any other bill which the Congress has passed. There will be adequate time to debate the basing mode, but we will be forced to decide. And that is what I ask the Senate to do, to adopt now a timeframe for decision on the MX so those of us who look at these R&D requests can decide whether we should continue to appropriate money for R&D on the MX.

The money is here. Even the House agrees this year we should continue

the R&D.

I think that this R&D at this rate is excessive if we are not going to deploy the MX. I think we should consider soon this basing mode. I think we should have an entirely open mind about the basing mode decision. This amendment of Senator Jackson requires the President to submit once again to us a decision on the basing mode or a series of options on the basing mode. But at the very least, this Congress must decide whether it is going to allow the administration to go ahead with the deployment of this missile. If it is not, we must stop spending the money on the R&D and go to something else that makes some sense as far as our strategic missile force is concerned.

Mr. JACKSON. Will the Senator

yield?

Mr. STEVENS. I yield to the Sena-

tor from Washington.

Mr. JACKSON. Mr. President, I have at the desk a modification of my amendment. I ask the clerk to read it. The VICE PRESIDENT. The modi-

fication will be stated.

The legislative clerk read as follows:
(1) on page 2, line 3 I would delete "March
1, 1983" and substitute for that date the
phrase "the receipt by the Congress of the
report of the President required under subsection (7)."

(2) on page 3, line 15 delete the word "later" and substitute transfer "earlier."

The VICE PRESIDENT. The

amendment is so modified.

Mr. JACKSON. Mr. President, if the Senator will further yield, the purpose of this amendment is to give to the President the necessary latitude to go beyond March 1, should that be his decision. In other words, he is to submit not earlier than March 1, 1983. I think that gives all parties, meaning the President, the House, and the Senate, greater leeway to deliberate on this matter. I would hope that that would clarify some questions.

Mr. STEVENS. Will the Senator answer me one question? The Senator has not changed the 45-day

requirement.

Mr. JACKSON. No, sir. Mr. STEVENS. He would still be requiring the committees to act within 45 days after introduction of a resolution of approval?

Mr. JACKSON. That part does not change, but the President is not forced to act by March 1. Many feel, I would say to my good friend from Alaska, that that might not be an adequate period of time for the President to be in a position to submit a final proposal.

I yield to the Senator from Georgia. Mr. NUNN. If the Senator will yield, we can clarify this with a hypothetical. As I understand the proposal, he is saying that the President would not be able to submit a plan on February 1 and kick off a 45-day period, thereby giving us a compressed time frame.

Mr. JACKSON. The Senator is correct. He could not submit a plan prior to March 1, but he is not obligated to

submit by March 1.

Mr. NUNN. He could not submit one on February 1 which would kick off the time frame, but he could submit one on March 1 or thereafter.

Mr. JACKSON. That is correct. Mr. NUNN. And the 45 days would then start running.

Mr. JACKSON. That is correct.

Mr. NUNN. And he could conclude it on May 1 or June 1. We are not telling the President when he has to decide. We are saying, "Mr. President, we want you to review it and take whatever time you need, and once you decide, submit it and the Congress will come to grips with you."

Mr. JACKSON. The Senator is cor-

rect.

Mr. ROBERT C. BYRD. Would this be forcing the President's hand, forcing him to submit a proposal no later than March 1, by March 1, which might not properly be thought out? I think that would be most unwise.

This does not preclude him from submitting it on March 1, but he could submit it in June, July, or August, whenever he wishes. It still contains

the expedited procedures.

Mr. JACKSON. The Senator is correct. There has been some criticism about the March 1 deadline that we would have required. This way the discretion is left to the President in that regard.

Mr. BENTSEN. Will the Senator

yield?

Mr. JACKSON. I yield.

Mr. BENTSEN. Is that the only major difference between the committee amendment as it now is and the Hollings amendment?

Mr. JACKSON. No, the major difference is that the Hollings amendment provides for a concurrent resolution, I believe I am stating it correctly, without expedited procedures. The point is that—

Mr. BENTSEN. That means it could be subject to filibuster.

Mr. JACKSON. That is correct. Our procedures provide for 50 hours of debate in the House and Senate and

then it must come to a vote. It is simply a codification, as the Senator knows, of the Reorganization Act procedures relating to various programs that we have followed in the past.

Mr. BENTSEN. Let me ask, then, how the Senator answers the argument of the Senator from Alaska that this would bring about an early decision and, therefore, they would have the time to make their decision on future reserach and development if the President is allowed to defer what he proposes? Does that work contrary to what you are tying to achieve?

Mr. STEVENS. Will the Senator yield to me?

Mr. JACKSON. Yes.

Mr. STEVENS. If the President deferred his recommendation on basing mode he, in effect, would be forestalling further R&D, in this Senator's opinion. It is up to the President to get us a decision soon so we can review this and decide whether or not we are going to base this missile according to his recommendation. If we turn it down, I want to tell the Senator, I am going to start leading the fight to stop putting up money for research and development on this missile. The Senator from Georgia, the Senator from Texas, and I have had discussions on this. We cannot continue to pour money into research and development of a missile we may not be able to deploy.

I think the amendment of the Senator from Washington says the President does not just have to give it to us on March 1. I think he will give it to us as soon as he is allowed, under this amendment, and that we would have 45 days. I would anticipate a resolution of approval would be introduced almost immediately and we are triggering, in effect, 45 days after March 1 with the Senator's amendment.

Mr. JACKSON. I would add one other thing. The amendment that we have before us that was sponsored here as an add on is more restrictive than the Hollings amendment. We, in effect, fence in part of the R&D funding. I will refer to the specific language, which is on the first page of the amendment. "None of the funds appropriated in this resolution may be obligated or expended to initiate full-scale engineering development of a basing mode for the MX missile."

The Hollings amendment does not restrict that funding; we do.

In other words, they cannot go ahead and start spending money—say they have decided on plan X—before there is affirmative action by the Congress. They cannot go to a full-scale engineering development. It is further restrictive.

Mr. HOLLINGS. Will the Senator from Washington yield?

Mr. JACKSON. Yes.

Mr. HOLLINGS. As I understand the situation, on page 9, beginning at line 20, is the committee amendment, and the chairman of the committee knows that we have adopted that amendment. The amendment of the Senator leaves undisturbed the language that none of the funds made available for the procurement of the MX missile or for the institution of permanent basing mode of the MX missile shall be obligated or expended until such basing mode is approved by both Houses of Congress in a concurrent resolution.

The amendment of the Senator does

not affect that.

Mr. JACKSON. We leave that.

Mr. HOLLINGS. I do not see why the Senator says it is more restrictive. Mr. JACKSON. I say the amend-

ment of the Senator from South Caro-

lina as reported-

Mr. HOLLINGS. That is what I just read. You say it is more restrictive because you refer to full-scale engineering or operational basing mode. The committee amendment says basing mode.

Mr. JACKSON. The answer is the Senator's amendment does not restrict

R&D funding

Mr. HOLLINGS. Right.

Mr. JACKSON. Ours does. That is the difference.

Mr. STEVENS. Mr. President, will the Senator yield?

The VICE PRESIDENT. The Senator from Washington has the floor.

Mr. STEVENS. Will the Senator

from Washington yield?
Mr. JACKSON. Yes.
Mr. STEVENS. I say to my friend from South Carolina and to my friend from Washington that it appears there is a redundancy in the two amendments. The amendment of the Senator from Washington, as I understand it, does go further. The amendment of the Senator from South Carolina says institution of any permanent basing mode and the amendment of the Senator from Washington says obligated or expended to initiate any full-scale development of a basing mode.

The Senator from Washington is talking about the whole question of engineering development of any basing mode.

Mr. HOLLINGS. That is right.

Mr. STEVENS. The Senator from South Carolina is talking about the institution of that one after engineering. So the Senator from Washington is more restrictive in terms of expenditure money that we have provided in this bill.

Mr. JACKSON. The Senator is correct.

Mr. EXON and Mr. HOLLINGS addressed the Chair.

The VICE PRESIDENT. The Senator from South Carolina.

Mr. HOLLINGS. Quickly to the point, Mr. President, I shall not sup-

port this amendment because it is not really necessary. That becomes more evident as our colleagues adjust and turn in every way to really expedite the procedures. They do not expedite the President. In all our conferences on resolving this issue, we were expediting the administration that they should definitely come in no later than March 1.

That is fundamentally different now, because in those conferences, we were talking about ways to expedite the President. Now you can hear the argument by the distinguished Senator from Alaska, we have to have a firm commitment quickly because we are liable to get into the problem of continually appropriating research and development money.

On that point, hopefully, we shall always continue to appropriate R&D money with respect to strategic missiles as we make improvements to them-as we have just recently in the R&D on the Mark 12-A warhead that we put on the Minuteman III.

I do commend the fact that we now have stated, as the distinguished Senator from New York emphasized, several substantial changes in the approach of this administration and the socalled bipartisan group to get out of the problems of Dense Pack.

We started with that so-called bipartisan group opposing our amendment outright. The distinguished Senator from Texas, the chairman of the bipartisan group that compromised with themselves said, first, we ought to have a one-House veto. I said under no circumstances would we agree to the negative approach.

Then they agreed to the affirmative approach, but still by one House. Then they agreed to both Houses.

Then we changed and got down to what I really think all of us were interested in, that you could not make a survivable mode out of Dense Pack, and that what we really needed was further research and development regarding the missiles themselves.

Somehow, during the last decade after SALT I, we got concerned about the size and the throw weight of the Soviet SS-18. We decided we were going to get a big missile, with just that same throw weight, with that much megatonnage and destructive power.

Then Congress, in its wisdom, the year before last, started discussing survivability. And while we were on survivability, no one really thinks that you can knock out all the Minuteman III's in one strike. As the years progress, missile accuracy through extensive R&D is developed on both sides. The accuracy of the Soviet strike force could knock out, first by 1986, 60 percent; by 1987, maybe 70 percent. No one thinks that by 1990-95, they could knock out 100 percent. There could still be up to 100 missiles with perhaps 300 warheads. To that degree, I guess, they may be characterized as survivable. But with 90 percent vulnerability, we say they are vulnerable. As a Congress, we say let us solve that problem and move forward with a survivable basing mode.

Mr. President, let us examine the study made by Dr. Charles Townes and the special blue ribbon panel on MX that was formed by Secretary of Defense Weinberger. And incidentally, when the Armed Services Committee had its hearing, he is one witness they did not present. Dr. Townes and his blue ribbon group studied some 31 different basing modes. Members of that blue ribbon panel will tell you that if there could be a bottom of a list, Dense Pack may be leading the charge; it was never seriously considered. We learned as Senators, some 10 years ago, when we debated the ABM system, and went along with the antiballistic missile treaty, that the radar and the oversaturation of the attacking forces seriously erodes the capability of the protective radar systems of any ABM system. The one way to make it viable, of course, was to spread it—disperse it.

That is a reason, we had our Minuteman or strategic field dispersed over thousands of miles, from Montana to Arkansas. We would never have gone along with all of our eggs in one basket. No one with the best interests of our national security at heart will come to this Congress and say, let us "Dense Pack" the Minuteman. If we really wanted 1,000 warheads, 100 missiles times 10 warheads, that would be put on the MX, we could just take 300 Minutemans times 300 warheads for a total of 900, or almost the same amount. We know, incidentally, that we can put seven warheads on the Minuteman III. We have tested it, it has worked. So we could take just a partial grouping of the Minuteman and move for the survivability discussed by President Reagan about a month ago on national TV saying MX is a must.

We could easily take the Minuteman and Dense Pack it. They do not recommend that. They do not believe in their own recommendations. The fact is that we had an election on November 2 and the message went out across the land and to the administration as well, Mr. Vice President, that the defense expenditures of this Nation were going to be looked at in a very objective and reasoned fashion, we are going to see whether or not they could really be justified. We are not going to be signing blank tickets any longer.

I followed candidacies in numerous States, along with members of the administration, the Cabinet, the Vice President as well. After those elections on November 2, some 62 of those who voted in the House on the side of Dense Pack are lameducks. Thus, the MX opponents are going to get 62 new

votes on this same debate.

The Air Force came to the administration and said, "Heavens, we have been working on this new missile, and if we do not get it now, right now in this lameduck session, we are never going to get it." And then they violat-ed the intent of this Congress in the Nunn-Cohen amendment of last December 1981. At that time, we supported an amendment that provided that R&D funds for basing the MX could be used for basing in existing silos that had not been superhardened; the temporary basing system had to be compatible with the permanent basing system; and we also required the Secretary of Defense to recommend a permanent basing system by July 1, 1983.

If my colleagues had an MX missile delivered today and you were ready to base it, you could not, under the administration's submission, you could not base it earlier, under their own

plan, prior to December 1986.

That is assuming you can harden those silos by that time. Dr. Townes does not assume that. On the contrary, he wrote a very special letter that the Secretary of Defense classified. I can address my comments to those things in the letter that have been put in the public domain. I appeared on TV with the Secretary of Defense. He said he did not think I had seen the letter, but if I had, it was classified. He said, "Oh, by the way, and here is what it says." So he starts putting those things regarding the missile hardening into the public domain. The fact is I have the letter right here, and Members of the Senate have all seen that letter. They realize that the blue ribbon panel and every expert involved has said that you could not get that degree of hardening by that particular time of 1986.

Back to the original point. If you had it accomplished by that time, there is no need to buy a missile now. This missile could be produced in about 24 months. You would not really need to let the contract prior to 2 or so years before that, by mid 1984, from the December 1986 period. So the truth of the matter is that under the approach of the Armed Services Committee and this Congress, we had hoped to determine the basing mode in the orderly process. The orderly process was by July of next summer, when the President was going to make

his submission.

The Armed Services Committee with orderly hearings in the Senate and in the House would then make their recommendation and we could put the money into the 1984 Defense Appropriations Act commencing October of next year. They could then go ahead and negotiate the contract.

Now we have a big charade of speeding up the President. That is all to

give some kind of credence to the fact that this is what they call a bipartisan compromise. I oppose the amendment because it really shows the President and this administration is totally unprepared to make any submission by March 1 unless they are going to say take what we give you. You look at the Secretary of Defense, barely briefed one afternoon, he agreed to Dense Pack. And the Commander in Chief, the President of the United States, while telling the Secretary of Defense he was rather fatigued that afternoon, said go right ahead with MX even though he was not briefed very thoroughly. Now, if they are going to use that approach, they can give it to us by January 1, the same decision.

But what the good Senators from Texas, from Washington, from Georgia, from Alaska, and all are really asking for—and this I think is an accomplishment—but I do not think it can be accomplished by March 1—is a detailed technical assessment of the closely spaced basing system, a detailed technical assessment of other MX basing systems, a detailed technical assessment of different types of intercontinental ballistic missiles, and a basing plan or an alternative basing

plan.

Now we are making progress. I do not think this time and exercise has been wasted. I think we realize, as I started to say a moment ago, that having been taken in too much with respect to the SS-18, we are now in a very deliberate and calm way looking at survivability. We know the SS-20 is survivable because we do not know where it is and do not know how to hit it. If we are going to have a survivable basing mode without an ABM system and without all of this chicanery and contorted kind of description, let us do it. Something interesting surfaced in a column by George Wilson in the Washington Post two mornings ago. It concerned where the U.S.S.R. might bring in those deep Earth-penetrating missiles and then explode them all at one time. Do you know what Dr. Keyworth of the Department of Defense retorted to that? "We will put rocks around the silos and when they hit those rocks they will skip off," it is just like rocks skipping across the top of the water.

I thought until I read that item that our real problem was hardening, but now this wonderful Defense Department has found rocks that warheads

will skip off of when hit.

And then someone said, "Well, maybe they will come in and lower the warheads in parachutes. Oh," he says, "we have thought of that. We will put out antiaircraft guns and we will shoot the missiles down."

Now, do you want that duty, sitting around with an antiaircraft gun? I served in one of those outfits in World War II. Can you not see them sitting around waiting for a nuclear missile to shoot it down? [Laughter.]

I will never forget during World War II. I was on duty and we had this German submarine pack nearby and just to keep ourselves amused we told stories. We told how the green paint division, was really going to take over our particular duty and it would spread paint in a large circle all over the top of the water. And when the German submarines started surfacing to site the target, they would never know when they reached the top because the paint would cover the periscope. As a result they would keep on coming up and we would sink the submarines with antiaircraft guns. That is the same kind of mentality now in the DOD. Now we are all talking serious business. That is the kind of ridiculous mentality that I am ashamed of in our Pentagon. So when we come around and fuss about our own Senators and talk about time and dates, the reality is that you finally come in a way to no date for the President, which I think is proper, and I think the 45 days is improper for both bodies of Congress.

I do not have any idea what the House is going to agree to. But all this language is unnecessary. We do not have to have any long filibuster over a particular missile. We have broken filibusters on many, many important questions. But more than anything else, you and I both know, if the President of the United States called the distinguished Speaker of the House and said, "On a national security matter I want this matter considered,' TIP O'NEILL is going to call it and have it considered over on the House side. That is the way to do business. But this small clique is exercising around, compromising with themselves, racing all about like it is something meaningful when in fact it is not necessary and in some sense harmful to the orderly procedures that we set out in that appropriation bill when we called for a July submission last year.

There was no reason other than that election on November 2 for the bum's rush and the full court press that we have been through on the MX missile in the lameduck session. We said we were going to have the lameduck session, and I heard the President himself so state, for all these economic measures, enterprise zones, and balanced budget amendments to the Constitution. He was not talking about this until he saw the results of the November election. We should not sit any later tonight with this particular amendment. If they want to vote it in, there is not any damage done in the sense that the main portion of our amendment-and it was a bipartisan move with the distinguished Senators on the other side of the aisle, Senator HATFIELD, Senator Andrews, Senator SPECTER, and Senator WEICKER. We all

got together realizing that Dense Pack ought to be dealt with directly. That is what the committee amendment does.

This is the end of Dense Pack. If you want to join into the expedited procedures, take a good look at this particular amendment. They make this as part of the rules of the body. You cannot have a motion to reconsider. You must do this and you must do that. They call it boiler plate. I am afraid the Speaker of the House of Representatives will call it insult.

I think we should move on and not try to get into a big struggle like something really was done when the fact of the matter is we want this administration to go back to the board and start looking and finding what Congress asked for, a survivable missile and a

survivable basing mode.

On that basis, I never did include all of this language in my amendment because I thought it was unnecessary. I did talk to the Senator from Alaska, as he reminded me, and conferred with him many times. Senator Levin and many of us met together and at one time under language drawn by the distinguished Senator from Virginia, Senator Warner, we were ready to get together. But when we get all of this detailed folderol, which is the best word I know for it, it is going to get us in trouble in the conference. We might as well as get rid of it now, in my opinion, but it will not change the basic thrust of what is in the committee amendment, namely, that we have put Dense Pack to bed and let us go now and get a survival missile and a survival basing mode.

addressed Several Senators

Chair.

Mr. TOWER. Mr. President, I ask for the yeas and nays on the amendment.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

The VICE PRESIDENT. The Senator from Texas has the floor.

Mr. TOWER. Mr. President, the distinguished Senator from Georgia I think is seeking the floor, and I certainly do not want to detain him because he has been a key player in the formulation of this amendment and his leadership has been invaluable.

I wish to say one or two words. Some of the things that were said about the basing mode here tonight I think reinforces the notion that we are going to have to look carefully and we are going to have to discipline ourselves. all of us here, not only those of us on the Armed Services Committee and the Appropriations Committee, and look closely at any basing mode proposal.

It is easy to make anything look ridiculous that is arcane and not easily

understood and, in fact, I do not think the press has adequately treated of the various aspects of this basing mode or some others.

As a matter of fact, I do not know of anyone who has ever won a Pulitzer Prize by saying something nice about a

weapon system.

I think it is incumbent on us, therefore, to get the information out and get it to the Members of the Senate. In fact, although it sounds funny soft landers can be defeated by a phalanx system. I am an old World War II antiaircraft gunner. I would not want the duty to try to intercept the soft landers, not just because of the nature of the duty but because I was such an ineffective antiaircraft gunner that I am sure that we would all be dissolved in a nuclear explosion if I were relied on in that instance.

But as far as other aspects of this thing are concerned, deep penetrators can be defended against. As a matter of fact the Soviets have even proposed banning deep penetrators in our stra-

tegic arms negotiations.

Furthermore, a ballistic missile defense system, if it conforms to the provisions of the ABM treaty, can only be used effectively to defend closely spaced basing because we are limited to 18 radars and 100 interceptors and its greatest effectiveness as a growth option for a survivable system would be closely spaced basing.

There are many aspects of this that we need to look at, and I hope that we will deliberate on this matter carefuly

in the weeks to come.

The VICE PRESIDENT. The Senator from Nebraska has been seeking recognition.

The Senator from Nebraska is recognized.

Mr. EXON. I thank the Chair.

Mr. President, what is the parliamentary situation right now? Is the amendment offered by the Senator from Washington amendable?

VICE PRESIDENT. The amendment is not amendable.

Mr. EXON. In a word, I anticipated that, and I thank the Chair.

Mr. President, without losing my right to the floor, I wish to inquire if I might from my friend from Washington if he could answer a few questions for me.

In the first instance, is the amendment that he is offering essentially the amendment that was described in a memorandum that was sent around to the various Senators signed by Senator Jackson, Senator Tower, Senator Nunn, Senator Warner, and Senator STEVENS? Is that the amendment that is not amendable at this time?

Mr. JACKSON. Essentially, the question whether it is course. amendable or not. As the Senator knows, it is in accordance with the parliamentary rules of the Senate.

Mr. EXON. I am aware of that.

Mr. JACKSON. I do not have anything to do with what is in the rule.

Mr. EXON. No. That is right. I understand that.

Mr. JACKSON. Yes. It is essentially the same. I did modify the amendment. There was not an immediate date certain for the President to submit the proposed plan. I did provide in the amendment on behalf of my colleagues that the President could not submit it before March 1.

Mr. EXON. I understand that. I think that was a good amendment.

Mr. JACKSON. Right.

Mr. EXON. That the Senator from Washington accepted. I was seeking the floor on numerous occasions, I will advise the Chair, so that I could ask the Senator from Washington to agree to additional amendments before the yeas and nays were requested. I was prevented from doing that, let the record show.

It is my understanding of the rules of the Senate that it would be possible, if the Senator from Washington was so inclined, that he could accept further amendments to his amendment if it were his wishes. Is that true?

JACKSON. My amendment could be perfected by modification. I can modify the amendment but amendment to the amendment would not be in order, being an amendment in the third degree.

Mr. EXON. I will state I am afraid my friend from Washington did not understand. I said that I was attempting to get the attention of the Senator from Washington to ask him to amend his amendment as he did with regard to the date before the yeas and nays were requested.

Mr. JACKSON. Does the Senator mean modify the amendment?
Mr. EXON. Modify the amendment.

Is the amendment still amendable?

Mr. JACKSON. May I say I meant no discourtesy. I did not know the Senator from Nebraska was asking me to yield to him.

Mr. EXON. I understand that. I was just addressing myself to the Chair.

Mr. JACKSON. All right.

Mr. EXON. The Senator will let me ask this question. I hope the Senator from Washington knows the Senator from Nebraska has been struggling with this particular issue for a long, long time. I would hope that my colleagues in the Senate would realize and recognize that we are about to make a very, very important decision with regard to the overall defenses of the United States of America.

Now, I am not here to make any representation as to who should be protected, who is right and who is wrong, what amendment would best indicate that the United States of America is not the best protected because I think that is what we all want in this body. But I think that we have to be afforded all of the information, the total information, if you will, before this body and our sister body in the House of Representatives are in a position to make the important determination that expressly will be made when we get the report back that I think is well intentioned and reasonably well framed in the amendment offered by the Senator from Washington and others.

I am hopeful that, and I think the Senator from Washington knows full well, in the opinion of the Senator from Nebraska that the focus is not broad enough or well defined as it should be in the amendment that was just offered by the Senator from Washington. There are other Senators in this body who have been working with the Senator from Nebraska on this very point. For some reason that I cannot understand, there seems to be a movement in some quarters to restrict terminology that we use in requesting this study.

I would ask at this time, so that it might be possible for the Senator from Nebraska to join in support of the amendment offered by the Senator from Washington, if the Senator from Washington could agree to a modification of his language with some very simple but very important matter that I think should be addressed by the Senate after we get the information back.

It is the old situation, I suggest, Mr. President, that if we do not ask the right questions are we going to be assured that we get the right answers on which to base the important decisions that will be ours when this comes back. I am not critical of the amendment offered by the Senator from Washington, but only from the standpoint that I do not think it goes far enough to insure that we get the right information.

Simply said, and I will be glad to send the language over, but let me read it at this time. It is very simple and it addresses some specific questions that I think we need answered in specifics from the President and the Pentagon before we make the decision then, hopefully, we will make some time next year. These questions are not spelled out in the amendment offered by the Senator from Washington, and if I could have the attention of the Senator from Washington I would like to read some very simple but important language that the Senator from Nebraska would like to have the Senator accept and amend his amendment so that the Senator from Nebraska can support it.

It reads this way—in other words, it is exactly like you have it.

Mr. JACKSON. I have a copy of it here. Please, go ahead and read it.

Mr. EXON. You have a copy of it?

Mr. JACKSON. Yes, I think I do. Go ahead.

Mr. EXON. Well, the copy I have says:

The report required under this section shall further include a comparative detailed technical assessment of alternative programs including acceleration of the Trident II program to provide target coverage equivalent to that of the MX missile system, acceleration of the cruise missile and manned strategic bomber programs particularly the Advanced Technology Bomber, enhancements and improvements to the Minuteman missile force, and development and deployment of a land-based missile system in deep underground basing, multiple protective shelters and closely spaced basing incorporating mobility and deception, a road mobile missile smaller than the MX and a common missile for land and sea deployment.

That is it. It is simple, it is self-explanatory, and I think it would be tremendously helpful to this Senator and to all of the other Members of this body if we could simply incorporate the language I have just outlined.

I would ask if the Senator from Washington would agree to accept that as a part of his amendment.

Mr. JACKSON. May I first respond to my good friend from Nebraska, because he has been a most conscientious student of strategic policy, and I commend him for it. He has been very active in the committee.

You will recall that on the amendment that I have submitted it states:

The President shall submit a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than March 1, 1983, containing

and then I go down to:

A detailed technical assessment of different types of intercontinental ballistic missiles that might serve as alternatives to the MX missile.

I think the only problem I would have is the area of the role of the bomber. We are dealing here basically, I would say to my good friend, with the issue of ballistic missiles, intercontinental ballistic missiles. So we should not get off onto the assessment of the advanced technology bomber, for example, and other aspects relating to the cruise missile, which is not a ballistic missile. I could accept the amendment-it would take unanimous consent—I could accept the Senator's amendment with that deletion so that we do not get into the question of the advanced technology bomber. If the Senator would modify that and confine it to the missile I would accept it. Would the Senator so modify it?

Mr. EXON. I would agree to so modify it. I would think it would be better if we left it in there. Let me say

this before I agree to that. Mr. JACKSON. Yes.

Mr. EXON. What I am trying to do, and I think what we are falling into is a trap by not doing, is to try to take a look at the broad picture of the defenses of the United States of America

Anyone who is planning for the future defenses of the United States of America without at least considering the Stealth bomber cannot be very well-informed. I think we should look at the total picture and not simply isolate and talk about the MX or some portion of it as if we were in a vacuum. I think that is one of the problems we have had so far in the MX debate that there seems to be a tendency that either you are for the MX in toto and, therefore, you get a white hat, and if you are not for it in toto you get a black hat.

I suggest that that is not the proper way to insure the proper return for the taxpayers' money when we are looking to the important matter of the defense of this country.

But I would simply say that in an attempt to be reasonable, if the Senator will agree to accept that, deleting the advanced technology bomber—and the Senator said the cruise missile, is that right?

Mr. JACKSON, Yes, I am trying to confine it, I will say to my good friend, to the ballistic missile because that is what we are talking about.

Suppose the amendment, which would appear at an appropriate place under (7) would include the following provisions:

(iv) a comparative detailed technical assessment of alternative programs including acceleration of the Trident II program to provide target coverage equivalent to that of the MX missile system, enhancements and improvements to the Minuteman missile force.

I am striking out "acceleration"—

Mr. EXON. I understand.

Mr. JACKSON. And then go on for the remainder of that.

Mr. EXON. I thank my friend from Washington. With that understanding—

The VICE PRESIDENT. Is there objection to the modification?

Mr. STEVENS. Mr. President, reserving the right to object, and I shall not, for clarification: There is a provision for an assessment of the environmental impact each such system or missile would likely have. We are not adding a system, we are still talking about the ballistic missile system, and nothing else?

Mr. JACKSON. We are confining it to the ballistic missile system.

Mr. WARNER. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. WARNER. I have two versions. Mr. JACKSON. One is a list of items that the Senator from Nebraska—

Mr. EXON. If I could clarify that, I think the Senator from Virginia has an old copy.

Mr. WARNER. I wanted to make certain of that.

Mr. EXON. What I sent to the Senator and what the Senator read from was a condensation of it.

Mr. WARNER. The question I ask of the Senator is with respect to the timeframe within which this report is to be made. It would be my suggestion that it would be parallel with this amendment offered by the Senator from Washington, as amended.

Mr JACKSON. Let the record show it would be a part of the report referred to under (7) which reads as fol-

lows:

The President shall submit a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than March 1, 1983, containing

So that this language would appear in that list of items at an appropriate place.

Mr. WARNER. I would find that satisfactory.

Mr. JACKSON. Mr. President, I ask unanimous consent that I may modify my amendment in accordance with the proposal made by the distinguished Senator from Nebraska.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it

is so ordered.

Mr. JACKSON. I thank the Chair. Mr EXON. I thank the Senator.

Mr. JACKSON. I thank my friend from Nebraska, and I appreciate it very much.

The VICE PRESIDENT. Will the Senator send the modification to the desk?

The modification is as follows:

On page 3, after (7)(A)(iii), insert the following:

(iv) a comparative detailed technical assessment of alternative programs including acceleration of the Trident II program to provide target coverage equivalent to that of the MX missile system, enhancements and improvements to the Minuteman missile force, and development and deployment of a land-based missile system in deep underground basing, multiple protective shelters and closely spaced basing incorporating mobility and deception, a road mobile missile smaller than the MX and a common missile for land and sea deployment.

Reletter "(iv)" as "(v)".

Mr. NUNN. Mr. President, the hour is late and we have a lot of work in front of us. I will just take a very brief period of time.

MX-THE QUESTION OF SURVIVABILITY

Mr. President, during the Defense appropriations debate last year, I said that the issue of the MX was one of survival—survival of the missile and possible survivial of strategic stability.

I stated on December 2, 1981, that there was considerable doubt in my mind about the wisdom of proceeding with an MX program if reasonable survivability could not be assured. Unfortunately, 1 year later, we face the same situation.

The issue of the MX is still one of survival but there is an added meaning to this term now. Not only do we need to be concerned about the MX in the context of nuclear stability or nuclear exchange, but we should be concerned about the survival of the MX in the budget and its place in the strategic force modernization program.

The first question of survivability of the MX cannot be resolved at this time and, thus, I do not believe we should proceed with any MX missile procurement.

While we should not proceed with the procurement of the MX missile at this time, we should preserve its place in the budget so its capability could be added to our strategic arsenal should the questions about its survivability be favorably resolved next year.

Now is not the time to argue about how the MX got in the deep ditch that it is in; now is not the time to point any fingers of blame; now is the time to recognize that the modernization of our strategic forces is a serious matter with complex implications and deserves to be treated as such.

Congress has a responsibility to examine this latest MX proposal in an objective and thorough manner and approve or disapprove in a timely fashion. This deliberative and objective process is just not possible in a lameduck session and certainly it is not possible in any debate tonight. The Senate Armed Services Committee, through no fault, had but several hours of a not very productive hearing on this matter; the House did not hold one hearing prior to the vote.

I have indicated from the outset that I have an open mind on the closely spaced basing proposal, and in my judgment, both Congress and the executive branch have certain responsibilities related to the MX at this juncture.

For the executive branch, there is a responsibility to objectively reexamine the basing proposal for the MX as well as modifications and possible alternatives and to provide Congress with this analysis early next year. There is a responsibility to conduct a comprehensive analysis and recommendations on alternatives should the MX program not be approved.

As part of this analysis, the executive branch has a responsibility to insure that no options—including mobility and deception—are precluded in this study.

In terms of the legislative branch, we have a responsibility to preserve the national security options in the strategic force area while the executive branch conducts their reexamination.

We also have a responsibility to insure that MX procurement not proceed until we can have reasonable assurance of both its survivability and its contribution to stability at the strategic level.

In my judgment, the bipartisan compromise amendment offered by Senators Tower, Jackson, Stevens, Warner, and myself as well as others and supported by the administration

insures that all these responsibilities will be met.

It insures that a comprehensive reexamination of the land-based portion of the triad occurs and is reported to Congress on March 1, 1983. It insures that no procurement money will be spent on the MX missile unless both the House and Senate give positive approval. It insures that Congress will act in a reasonable timeframe after additional information is available and the congressional hearing process has a chance to be completed. It neither prejudges the MX issue nor provides the green light.

With these factors in mind, I agreed to support this compromise approach.

However, let us not delude ourselves if this compromise is approved. The MX debate will commence next year with the scales tipped heavily against it. The executive branch and the Congress must face the reality of this situation, and we should not allow ourselves to be in the position next spring of deciding on the MX without an ability to consider alternatives should it not be approved.

For this reason, I have stressed in discussions with the administration and my colleagues the need for the Department of Defense to conduct just such an examination.

I have in mind a comparative analysis of the current strategic program and such alternatives as acceleration of the Trident II program, acceleration of the cruise missile program and the manned strategic bomber programs. In addition, there should be an examination of options to enhance our existing Minuteman force and to develop other land-based systems in various deployment modes.

We should not permit a stalemate situation to develop and for the MX to die a lingering death on the vine. Our national security requirements demand that the executive branch and the legislative branch follow a reasoned and responsible course through this MX dilemma, and I believe the compromise approach represents the best way given current circumstances.

Just as I asked the question a year ago, will we preserve the options necessary to insure that the appropriate decisions on the strategic force modernization program can be made in a timely manner, I pose it again tonight. My answer this time is the compromise approach.

I commend the Senator from South Carolina for proposing that the production money for the missile not be allowed to be expended until such time as we find a basing mode, because I think he is precisely right on that. It we are not going to find a way to make this missile survivable, than it opens up a number of questions and it changes the whole history of the MX. It changes the original reason for the

MX and it makes us, I think, rethink all of our strategic program and also it makes us rethink a great number of our arms control premises.

I also wish to commend the Senator from Nebraska for expanding the horizon here of the alternatives that the administration will be required to submit.

I also thank the Senator from West Virginia. The suggestion he made about changing the March 1 date had made a great contribution because we are now saying to the President of the United States that we want you to submit another basing mode, or at least reconsider the one you already submitted if you are going to resubmit it, but we are not going to put a limit on you; it is up to you when you submit it.

I think the President is going to be savvy enough to realize that this is going to probably be the last chance for the MX. If this basing mode does not work, if this basing mode is not acceptable to the Congress, then the MX, I think, has to be rethought and we have to begin to think about alternatives, and that is where the Senator from Nebraska has aimed his remarks. So we begin to look at those alternatives and I think that will be done, hopefully, under this amendment.

Mr. President, I just wish to say that the President of the United States has made some very significant concessions in the last couple of weeks. He has conceded that the money will be spent for producing the missiles, he has conceded it will require an affirmative approval of both the House and the Senate, and he has also agreed to resubmit his basing mode, and he has agreed to reexamine that.

Now, I think those are very significant concessions by the President and the executive branch. What he is basically asking in exchange for that is that the Congress deal with it when it comes here, that we not prolong it, that we not stretch it out over the year. Really, the only difference between what the Senator from South Carolina and the Senator from Oregon (Mr. HATFIELD) are proposing and what the Jackson amendment proposes is whether or not we expedite the procedure whereby the Congress comes to grips with this overall, very important question. But I think that is a reasonable request from the President. I think it is a reasonable part of the compromise.

I believe the Senator from South Carolina posed the question: Why should we do that? Why should we have an expedited procedure? Well, I would just like to make a couple of points.

We have been working on this missile now since 1974. We have expended, in round figures, some \$4 billion, and we have not built one. And we do

not have a basing mode yet. \$4 billion is a lot of money.

is a lot of money.

Under the Hollings amendment, it is as restricted as it is under the Jackson amendment. But, nevertheless, we are leaving the research and development money in the bill. Under the Hollings amendment, it says go ahead and have research and development. How much is that research and development? Is it not a few million dollars. It is \$750 million for 1983.

Now, the question comes: Do we want an expedited procedure once we get the final offer on the MX basing mode, or do we want to let it go on and on and on? And it is going to go on and on and on, and we are going to spend more and more money.

The Senator from South Carolina, I think, makes a telling point when he says that it is going to be hard to find someone to take the duty of going out there and manning those antiaircraft guns to shoot down nuclear weapons. I think that is a very telling point and not completely facetious. But we, I think, need to make sure that we do not have research and development about how you harden the personnel tanks or whatever they are going to be for the people who are going to try to shoot down those missiles.

I will guarantee you that the R&D money will be extended if we let it set there and go on and on and on. I think we need to come to grips with it.

But, even more importantly, why do we have an expedited procedure? I think it is even more important that, as a nation, we decide what we are going to do with our strategic forces. If we let this MX question go on and on, we are going to have a very difficult time with any arms control negotiations.

The administration has made it plain that their arms control position in Geneva is based on the assumption that they are going to have 100 MX missiles. If we are not going to decide that issue in the near term, if we are going to let it linger, it is going to affect the ability to negotiate, it is going to affect the substance of the Geneva proposals, and it is going to certainly affect the perception in the world about U.S. consistency and where we are headed.

One final point: We are not the only one looking at this MX missile and what we are going to do with this. The other people are not confined to the Soviets. Our allies in Europe are looking at us very closely now because they have impending some very difficult political decisions about whether to go forward with the Pershing II missiles and the ground-launched cruise missiles. I think it is essential that we recognize that this is a decision that is being watched not only by our adversaries but also by our allies and if we are going to kill the MX missile, then we ought to find an alterna-

tive and we ought to find that alternative over the next several months.

It is absolutely essential—and this is why I disagree with the House action—it is essential the word go out, if we are not going to have an MX program, that we do have a coherent, overall strategic plan. We should not have a vacuum in this very important area.

So, for those reasons, because the President has made some significant concessions and asked that we deal with the problem in an expedited fashion and because of the immense importance that all of these decisions play in arms control, I think it is essential that we go along with this compromise.

Again, I commend the Senator from South Carolina, because, in effect, his amendment in this, the heart of the amendment is going to be carried no matter if the Jackson amendment carries or it does not. The Hollings amendment is preserved in the Jackson amendment, and I think that is a very significant achievement, preserving the right of the Senate and preserving the right of the House and requiring that we take another look and the President take another look at this very important question.

Mr. President, I yield the floor.
Mr. HATFIELD addressed the

The VICE PRESIDENT. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I will only raise a brief word in opposition to the Jackson modification, and that is that this is probably not the appropriate time to raise this argument, considering what we have just been through. Anyway you look at it, we are circumscribing the parliamentary procedures of the Senate by these expedited procedures; that is, we are circumscribing the normal rights that are extended to all Members of this body. We sought not to do that, even for such a thing as a gas tax. And perhaps at this moment in time that might be the argument in support of Senator Jackson's amendment.

I still think that something of this magnitude, where we find ourselves in the process of trying to create an orphan missile—something that could, in effect, destabilize the whole arms control picture. All of these factors lead me to believe it is inappropriate at this time to circumscribe ourselves down the road 3 or 4 or 5 months from now. This will prevent us from taking up the matter in other than a normal legislative parliamentary manner.

I am not going to belabor the argument. I only want to say that I do feel it inappropriate to support the Jackson expedited procedures at this time. That in no way threatens a filibuster. I have not filibustered on some of the weapons programs about which I feel

very strongly because I believe there is a time when the majority must work its will.

At the same time, I do not want to deny any Member of this body the opportunity to utilize certain legislative parliamentary procedures this far in advance of knowing what the issue is. That is the only reason I would

That is the only reason I would oppose the Jackson amendment at this

time.

Mr. LEAHY addressed the Chair.
The PRESIDING OFFICER. The
Senator from Vermont.

Mr. LEAHY. Mr. President, I would like to speak for just a few minutes. Two days ago I voted in the Appropriations Committee in support of Senator HOLLINGS' amendment on the MX missile. We adopted the Hollings amendment in the Appropriations Committee.

Once again, I offer my support to the Hollings amendment on the MX missile. I would have preferred an unequivocal no on Dense Pack here and now, because it is so patently unworkable. However, this is one of those times when the best is the enemy of the good. The Hollings measure at least makes spending on MX production and basing contingent on congressional approval of a basing mode. Even if the President comes back with Dense Pack next year, I believe it is now dead.

It is unfortunate that we probably will not have a straight vote on the Hollings amendment, notwithstanding the Appropriations Committee's action. Because of that, I think there will be a lot of votes against the amendment of Senator Jackson and others.

The Senate's decision on Dense Pack foreshadows the most important strategic issue the United States faces in this decade: Should or can the United States maintain a triad of ICBM's, SLBM's and heavy bombers, or has the time come to begin phasing out land-based missiles?

Unfortunately, that central issue is not being heard in this argument to-night.

In my remarks, I will confine myself principally to whether Dense Pack makes technical, cost, or policy sense. I do not intend to discuss in any detail whether the United States needs a new land-based missile at all. That is a fundamental question concerning the future of the strategic triad about which there has as yet been no informed debate. I will offer a suggestion at the end of my remarks on how the country might address in a bipartisan way the role of land-based missiles in the future. However, I am deeply concerned that a missile with the first strike potential of MX would accelerate the trend toward improved nuclear war-fighting capabilities. Both sides are already moving in that direction, and MX could setoff an unrestrained counterforce race that would be gravely threatening to strategic stability.

WILL DENSE PACK WORK?

The purpose of Dense Pack is to provide survivable basing for the MX at the time of its projected introduction in 1986 and beyond. If it is to be judged viable, each of three critical questions must be answered with a confident yes. An uncertain or equivocal answer to any of them means Dense Pack must be found wanting technically.

First, will fratricide work as predicted—or, more accurately, will the Soviets be sufficiently fearful it would work that they would be deterred from attempting an attack on Dense Pack?

Second, can MX's silos be sufficiently hardened against blast and other effects of nuclear explosions to withstand a Soviet attack?

Third, can the United States be confident that it will anticipate Soviet threats to Dense Pack with sufficient leadtime to devise, fund, test, and implement countermeasures at a bearable cost?

With my colleagues on the Select Committee on Intelligence, I have spent several hours with administration strategic, military, intelligence, and scientific experts on these questions. In those discussions, without going into highly classified exchanges we had. I was forcefully struck by the extraordinary dependence of Dense Pack's effectiveness on unknown and untested physical phenomena, subjective judgments about Soviet capabilities, and best guesses about future technologies, both on our side and on the Soviets. If we go ahead with Dense Pack as the President wants, it will be an act of faith, not a decision based on tested technology and verified facts.

Let us look at the first uncertainty. Fratricide obviously is key to Dense Pack survivability. If this theory does not work as claimed, Dense Pack is not viable.

There is no doubt that nuclear explosions will deflect, destroy or otherwise render arriving warheads harmless. But precisely how and to what extent it would do so, and how significant this would be in disrupting a determined, large-scale attack, remains highly uncertain. There is no consensus among the experts, and for good reason. The Limited Test Ban Treaty of 1963 prohibits all atmospheric nuclear explosions, so most knowledge about nuclear effects must come from computer simulations and models, test with high explosives, and physics theory. Without actual nuclear explosions under carefully controlled test conditions, it is difficult, if not impossible, to answer questions about fratricide conclusively. This country cannot afford to commit itself to a major strategic program on the basis of untested theory.

Hardening silos to unprecedented levels is also a critical—and unproven—factor in Dense Pack survivability. The Defense Department contends its studies show unheard-of hardness is now possible; Conveniently, these gratifying results are being attained—and leaked to the press—just as the President is trying to go ahead with Dense Pack.

Many scientists, including Dr. Charles Townes, chairman of the scientific Task Force set up to advise Secretary Weinberger on MX basing, have revealed serious doubts that hardness desired by the Air Force can be achieved by MX's scheduled introduction in 1986. According to press reports Dr. Townes has written to Secretary Weinberger that even if hardness targets are achieved on schedule, this will not be enough. Even if current Minuteman silo hardness were tripled or quadrupled, this would not protect MX from large Soviet warheads. A 25 megaton SS-18 warhead detonated on the Dense Pack field would create a crater approximately one-half mile in diameter, encompassing at least three or four silos and covering with several feet of earth some six to eight adjacent ones.

The third significant uncertainty concerns me greatly as a member of the Select Committee on Intelligence. If the United States decides to build Dense Pack, the Soviets may begin work on new warheads designed to overcome fratricide, such as earth penetrators, soft landers and maneuvering, terminally guided reentry vehicles, all with special fuzes for simutaneous detonation.

The United States cannot afford to prepare for every conceivable contingency. We must know far enough in advance what options the Soviets have decided upon in order to have time to field effective countermeasures. The future survivability of Dense Pack will be heavily dependent on timely intelligence about emerging threats. This will be a heavy burden on our intelligence capabilities, though one which I believe they are capable of bearing. However, I believe it would be most unwise to make the survivability of a central U.S. strategic weapon so dependent, not on its inherent technical capabilities, but on assessments of future Soviet intentions.

The administration asserts that Dense Pack will meet survivability requirements at a cost of about \$26 billion. However, this estimate excludes additional silos for deceptive basing, expansion of the force size, ballistic missile defense, or other countermeasures against future Soviet threats. Even Dense Pack's supporters admit that without countermeasures it will become vulnerable to new Soviet weapons by the mid-1990's. According to the administration, countermeas-

cheap-\$2 to \$3 billion for an additional 100 silos, and some \$9 to \$12 billion for an antiballistic missile force that would remain within ABM Treaty limits.

I dismiss these numbers. With inevitable cost overruns, the true cost of Dense Pack and future countermeasures will probably exceed \$50 billion. By contrast, four additional Trident submarines with Trident II missiles will buy as much capability, with assured survivability, at a fraction of the

DENSE PACK UNDERMINES ARMS CONTROL

In addition to disturbing technical unknowns and uncertainties, Dense Pack raises major arms control problems. Building silos for Dense Pack could destroy the current tacit understanding not to undercut the SALT II Treaty, which bans construction of fixed ICBM launchers. The United States and the Soviet Union could be left with no limits at all on offensive strategic weapons. Dense Pack threatens the SALT Antiballistic Missile Treaty as well. If the United States were to opt for an ABM defense of Dense Pack, the ABM Treaty would have to be renegotiated-thus opening the way for the Soviets to demand concessions. Minimal, uncertain and short-lived gains in ICBM survivability are not worth risking a treaty which is so important to national security and stability.

President Reagan argues that going ahead with MX in Dense Pack is necessary to give him a bargaining chip in the START talks. Everyone is familiar with the history of bargaining chips. We seem to be on the verge of deploying some of them now. In any case, the President's argument is not logical, since his START proposal would permit all U.S. strategic programs, in-

cluding MX, to go forward.

The bargaining chip ploy is pernicious, as Ambassadors Gerard Smith and Paul Warnke, negotiators of SALT I and II respectively, have pointed out. As one committed to the concept that rational arms control can serve the Nation's security, I reject it. This country should pursue arms programs that contribute to its security, not for leverage in negotiations. If an arms control agreement is concluded that maintains or enhances security, then otherwise useful programs can be safely limited, canceled, or reduced. Proceeding with a foolish program in the hope that it will be given up in arms control is a recipe for being stuck with a flawed weapon.

Mr. President, Dense Pack is not acceptable on technical, cost, or policy grounds. President Reagan should recognize the futility of trying to gain approval of a basing mode which a majority of the Joint Chiefs of Staff, several former Secretaries of Defense, the House of Representatives, the best sci-

ures will be relatively simple and entific minds in the country, and, in my opinion, a majority of the American people all oppose. Instead of turning against such massive opposition, he should turn to the real question of whether there is any role for landbased missiles in our strategic Triad.

PROPOSALS FOR A NATIONAL COMMISSION ON THE STRATEGIC TRIAD

I urge President Reagan to take this great issue, which is so fundamental to the Nation's security, out of the heat of partisan politics. Strategic deterrence is a task which must transcend party advantage and narrow military service considerations. We need a broad national consensus on what the country should do about the strategic Triad, the role of land-based missiles. and the future of nuclear deterrence. Events have shown clearly that another technical study by Defense experts will not do.

Before the coming Presidential campaigning season begins-and it just about has-and bipartisan cooperation becomes unlikely, I believe President Reagan should name an independent, bipartisan, blue ribbon commission on the future of the strategic Triad. Its members should be drawn from the best military, scientific, arms control, intelligence, and analytical talent the country has to offer, and with balanced representation from both political parties. Its aim should be to prepare an objective assessment of the strategic Triad, including whether land-based missiles can continue to play a vital part in the national securi-

There are ample precedents for such an examination of a critical national issue. Perhaps such a commission would conclude that land-based missiles make such a unique contribution to deterrence that some way must be found to base them survivably. If so, basing modes hitherto thought politically infeasible, such as road mobile, might become nationally acceptable. Perhaps an objective study would show America's safety requires that the day of the ICBM begin drawing to a close. But, I do not believe the country will get an objective answer until the entire issue is lifted out of political, service, and bureaucratic politics.

Might I say in conclusion, Mr. President, that such a commission appointed by President Reagan, with the kind of mandate I have described, would give far more illumination to the country on this great issue than any debate we might have on narrowly drawn amendments late in the evening on a continuing resolution that really should not even be before us.

CRANSTON addressed Mr. the Chair.

Mr. VICE PRESIDENT. The Senator from California.

Mr. CRANSTON. Mr. President, I had intended to offer an amendment to provide that the Senate act as the

House acted on this matter, striking money for procurement. Those who were joining with me in this amendment were Senators Mathias. Kenne-DY, PELL, PRESSLER, INOUYE, RIEGLE, MATSUNAGA, BAUCUS, METZENBAUM, MELCHER, EAGLETON, PRYOR, PROXMIRE, and Harr. It was also supported by other Senators.

Due to an unusual parliamentary situation that developed when this bill was taken up, such an amendment is not now in order.

In order to provide an opportunity for a vote identical to the House position, I intend to move to recommit the bill to the Committee on Appropriations with the following instruction: That the committee report the bill back to the Senate forthwith, provided that the amendments already agreed to by the Senate shall remain agreed to and with the accepted committee amendments as they were reported to this bill on December 15 still acceptable, and with the following amendment, which is the amendment I would have offered:

On page 9, line 13, insert the following sentence after the period: "Notwithstanding any other provision of this Act, the amount appropriated for Missile Procurement. Air Force, is reduced by \$988,000,000: Provided. That none of the funds appropriated by this Act shall be available for the procurement of any MX missile: Provided further, That none of the funds appropriated by this Act shall be available to conduct any research, development, test, or evaluation in connection with a closely spaced basing mode for the MX missile.".

Mr. President, all this motion proposes is that the bill be recommitted and reported back forthwith, which, as we know, can happen instantly if so voted in the same form as was reported on Wednesday, along with one new committee amendment that I shall explain shortly.

I am taking this unusual procedure or parliamentary route because the committee amendment striking the House language on page 9, lines 8 through 13, was agreed to by the Senate through a unanimous-consent request which was unclearly made and to which I would have objected had its intent been made clear. Hence, it is not open to me to amend this underlying House language as I and others had intended to do. So that the first vote on the MX would be, in effect, identical to the position that the House took in this bill; that is, to delete all funds for MX procurement.

The motion to recommit has the same effect as would have been had by such an amendment to the underlying House text, now struck out by the Senate by the unanimous-consent request, which I daresay most Senators did not know occurred or did not know the import of in terms of its consequences.

Let me stress again that this motion to recommit would leave the bill and the Appropriations Committee amendments intact in all other respects. Let me explain the reasoning that has led me and others to offer this amendment.

The purpose of our amendment is to halt production of the MX missile now, once and for all. I believe the time has come for us to face the fact that the MX missile, in whatever configuration and in whatever basing mode, will not enhance our security as a Nation. In fact, I believe it will do the opposite. There is no reason to earmark additional appropriations for its production. There is every reason to sustain the strong bipartisan House vote deleting production funds.

The bill before us still appropriates \$988 million for MX missile production. It is a step back from the courageous position taken by the House. It is another decision not to decide on

the matter of the MX.

We have been wrestling with the MX issue for nearly a decade now, but no Pentagon official has successfully answered the question, How do we securely base this missile? Or, more im-

portant, why do we need it?

The time has come to stand up and be counted on the basic question of whether we should continue the MX folly or whether we should spend our taxpayer dollars on more responsible defense and social efforts; or whether that money should not be spent at all as part of our crucial efforts to reduce our enormous deficit.

More than 30 basing modes—more than 30 basing modes—for the MX have been considered and rejected one by one, one after the other. Among the American people, the project has become something of a joke. But in our criticism of the ridiculous, unworkable, and indefensible Rube Goldberg basing schemes, we have lost sight of a more fundamental question: Why do we need the missile itself?

Earmarking production funds for the MX—even conditional funding will not make us more secure. It will only breathe new life into a dangerous and expensive nuclear weapons program which serves no constructive

purpose.

What is the mission? I ask you, what is the mission of the MX that the Reagan administration is so eager to fund? Is it to insure deterrence, mutual assured destruction, and thus to prevent a deliberate decision by an adversary to launch a nuclear war?

No. That is not the reason. Reagan administration officials have sought to redefine deterrence so as to require more nuclear-war-fighting capabilities. They have specifically justified the MX production funding request on the basis that the United States needs more hard-target-kill capabilities, more counterforce weapons to threat-

en hardened Soviet missile silos and command and control centers. This Reagan administration position is a radical departure from three decades of U.S. strategic doctrine. The bipartisan doctrine of deterrence has held that U.S. security in the nuclear age can best be assured by having an unquestioned ability to respond with devastating nuclear force to a surprise attack. We have this without the MX. But now administration spokesmen are trying to redefine deterrence as requiring us to beef up our capabilities to fight "limited" nuclear wars and to produce a new missile that is widely viewed as a first-strike weapon.

Mr. President, regardless of whether we in the Congress or those in the Reagan administration view the MX as a first-strike weapon or not, we must be realistic and recognize that undoubtedly the Soviets will see it as a first-strike weapon. A missile with the MX's characteristics and capacities makes no sense as a retaliatory weapon, so the Soviets must conclude that we want it for first-strike pur-

poses.

This essential point has been argued most cogently in a December 13, 1982, New York Times article by Herbert Scoville, Jr., former Assistant Director of the Arms Control and Disarmament Agency and Deputy Director for Research of the Central Intelligence

Agency.

Dr. Scoville explained why the MX makes no sense as a retaliatory weapon. I ask each of my colleagues to listen carefully to this particular point, why this is not a retaliatory weapon, why it will be viewed by the Soviets as a first-strike weapon, with dangerous consequences for us. Just listen to this brief extract from Scoville:

Even if the Air Force's optimistic predictions for Dense Pack were fulfilled-if 50 of the 100 MX missiles did survive and were launched against the Soviet missile siloshow could the administration expect them to destroy the Soviet missiles? By the time our MX warheads reached their targets, the silos would be empty. The Russians would have launched part of their force in their first strike, and certainly they would not leave those missiles in their silos to be de-stroyed once they knew our retaliatory attack was underway. As soon as their warning systems told them that we had sent our missiles toward the Soviet Union, Moscow would launch every remaining missile it could get out of the ground. Launching an MX retaliatory attack against Soviet silos would thus only insure that every single warhead the Soviet Union was capable of launching would be dispatched toward every American target the Russians could find.

The Russians must see that the MX missile system could pose little threat to its land-based missiles unless it were used in a first strike. They must therefore assume that under some circumstances, the United States would actually launch such a strike—and undoubtedly their military plans are based on this assumption. They have no choice but to prepare themselves to pre-

empt an American attack—to beat us to the punch. Thus, the administration's claim that we must build the MX to maintain our deterrent is totally illogical. Instead of making nuclear war less likely, it can only increase the chance that this ultimate horror will take place.

The Reagan administration originally claimed it had to have the MX missile to close the "window of vulnerability."

Reagan officials stacked outrageous conjecture on top of ill-informed speculation on top of unrealistic assumption and claimed that the United States was open to Soviet nuclear blackmail in the early to mid-1980's. Then in his November 22 MX Dense Pack sales pitch to the Nation, President Reagan was silent on the window of vulnerability.

The President shifted ground and talked of the need to have an invulnerable land-based nuclear deterrent—and proceeded to propose a basing scheme which a responsible majority of the Congress have concluded is clearly vulnerable to the farfetched scenario it is designed to protect against.

On certain occasions, in its desperation the administration has pleaded that the MX is needed for an arms control negotiating bargaining chip. For example, during President Reagan's December 10 press conference on MX, he argued that a vote against MX production today is a vote against arms control tomorrow. This has been perhaps his most disingenuous and dangerous argument.

If we legitimately need the MX for national security reasons, no President should bargain it away. But the fact is that we do not need the MX missile.

The history of arms control is replete with bargaining chips that never got bargained away, that were deployed, leaving a less secure, more dangerous world. In fact, the problem of ICBM vulnerability which the MX was originally designed to cure was caused by a bargaining chip that President Nixon never cashed in at the SALT negotiating table—the MIRV warhead, which we and then the Soviets deployed.

It is particularly misleading for the Reagan administration to suggest—as it did on the eve of the House debatethat it needs the MX as a bargaining chip. Administration spokesmen have privately assured Senators in classified briefings that President Reagan would never back away from his commitment to deploy the MX. This should be clear from the President's START proposal, for which he claims he needs the MX. Even if the Soviets accepted the President's initial START offer in toto, the United States would not be barred from full deployment of the MX-some bargaining chip.

Then, too, there is the absurdity of continuing to spend still more billions

of dollars on a perilous and destabilizing nuclear bargaining chip. Thus I am not surprised that the administration is now backing away from the bargaining chip pitch.

We have already spent \$4.4 billion on MX R&D. The administration proposes to spend another \$26.4 billion on MX Dense Pack. With inflation, a likely ABM system and cost escalation, a more realistic price tag is \$40 billion. To continue to appropriate such exorbitant sums for a system we may never deploy—while we have close to 20,000,000 Americans unemployed or underemployed and a \$200 billion annual deficit—would be terribly irresponsible.

Ultimately, we will have to face these realities. It is becoming increasingly apparent that the MX missile will never be built and will never be deployed. The basic question before us today is: How much more money are we going to waste on this unnecessary weapon? The 245 Members of the House—including 50 Members of the President's party—who stood up to the President's pressure on this tough issue were a courageous vanguard. We should not undercut them.

There are practical calculations on the best use of our defense resources which compel us to reject the MX missile now. But there are also serious considerations with respect to the future of arms control which we must weigh.

President Reagan came to office having opposed every single arms control treaty ever negotiated by past Republican and Democratic Presidents. And yet under great pressure from the Congress, he pledged last March that he would do nothing inconsistent with the ABM and SALT II treaties so long as the Soviets adhered to them.

The MX-Dense Pack proposal of the President, however, threatens virtually every major strategic arms control treaty the United States has ever signed with the Soviet Union. MX-Dense Pact deployment would be a clear violation of the SALT II prohibition on construction of new fixed site ICBM launchers. To test the terribly shaky assumptions about missile fratricide upon which the entire MX-Dense Pack concept relies, there should be immense pressures from the Pentagon to resume atmospheric nuclear testing on a large scale. This would undermine the limited test ban treaty. And because so many administration officials believe the Dense Pack system would never work without an ABM system, its deployment anticipates a breach of the ABM treaty-our most effective cost-saving accord to curb the arms race.

The United States already has some 30,000 nuclear weapons.

We have more than 2,100 intercontinental ballistic missile warheads.

We have more than 4,700 submarine launched ballistic missile warheads.

We have more than 2,500 strategic bombs for airplane delivery; we have some 15,000 battlefield and tactical nuclear weapons; we are building a B-1; Trident subs; and Pershing II's, GLCM's, SLCM's, and ALCM's.

We are engaged in a perilous and costly nuclear arms race with the Soviet Union which daily presents us with the threat of planetary extinction.

How will a Senate vote keeping alive MX missile production improve this grave situation?

Now is the first opportunity Senators have to vote to kill MX missile production. There is a debate throughout the country, but the Senate has never had an up-and-down vote on the future of the MX. The country is also activated by the proposal of a bilateral, verifiable nuclear weapons freeze. More than 20 million Americans have voted on this issue this year: 60 percent in support. Yet the Senate has not taken the matter up. Together with Senator Pell, I offered the Kennedy-Hatfield nuclear freeze language in a Senate Foreign Relations Committee markup, but the resolution addressing this issue has not been taken up by the Senate leadership. We may fail to kill the MX this morning. We may leave its ultimate fate to a conference committee or to a vote sometime next year, but the MX is not likely ever to be deployed.

I urge each of my colleagues to think seriously about how long we should delay this decision. I believe the time to cut our losses and to end the MX program is now, right now. So I urge my colleagues to support our motion to recommit the effort to delete MX production funds unconditionally, to support the House action and to uphold responsible defense and

arms control policies.

Mr. President, before closing, I wish to pay tribute to two of our colleagues and friends, Mark Hatfield and Fritz Hollings. Their strong and effective leadership in fashioning a substantial Appropriations Committee majority from Senators in both parties has helped to move us closer to stopping the MX once and for all. The Cranston-Mathias amendment seeks to build upon their work and delivered the coup de grace by endorsing the House decision to delete MX production funds.

I yield to the Senator from Connecticut.

Mr. DODD. I thank the distinguished Senator from California for yielding.

Mr. President, I should like to join with him this evening in this unique procedure that we are using to bring this matter to a vote. Had it not been for this procedure, the issue of whether or not we decided to move forward

with the procurement of the MX missile would have been avoided altogether. We are going to have that chance now.

Mr. JOHNSTON. Will the Senator yield for a question at that point?

Mr. CRANSTON. I have the floor, I yield to the Senator for—

Mr. JOHNSTON. Point of order.

Mr. CRANSTON. I do not wish the floor. I am glad to yield.

Mr. JOHNSTON. Point of order. The Senator cannot yield the floor except for a question?

The VICE PRESIDENT. The Senator is correct.

Mr. CRANSTON. Can the Senator phrase his statement as a question?

Mr. DODD. I will conclude this with a question.

We are now going to have, I believe, and I am sure the Senator will agree, the opportunity this evening, to vote up or down the procurement of the MX missile?

Without the procedure that the Senator from California has provided us, that opportunity would have been avoided altogether. And so, Mr. President, I am delighted to be able to join with the Senator from California in this effort.

I ask the Senator from California, is it not true that the Dense Pack-MX system is typical of what is wrong with the way we build our strategic forces in the very first place? I ask him further whether or not he believes it is wrong in the most fundamental sense that the arms race has forced its own logic on the whole procedure? It is not the thinking man who controls the acquisition of new arms systems, but it is the self-generating pressures of the arms race that forces man to spend more and more of his scarce resources in pursuit of this or that strategic illusion.

Mr. President, as Members of our Federal legislature, we certainly have no heavier responsibility than to guard the security of our Nation.

We wish to have the United States the most secure nation on Earth.

My interpretation, however, of this responsibility involves making choices. This is what we are not doing tonight, making hard choices, instead of a chain of affirmation for every new scheme thought up by our military strategists.

There is no reason why we should not reject doing the same tonight.

I do not believe there is a majority coalition in this body that would support Dense Pack. What we are doing is delaying a decision we virtually all have made and have made sometime ago. We have decided this missile is no good unless we have a basing mode that is worthwhile. We have all decided, or at least the majority did, that this basing mode is not working.

There is nothing in our Constitution which prohibits the President from coming back tomorrow, next week, next month, proposing a basing mode and, if it enjoys majority support of this Congress, then we will move forward.

Why do we need to delude people by putting aside almost \$1 billion and then saying to the President: Come up back here with a plan and in a certain amount of time we will respond to that plan either favorably or unfavorably?

It seems that we are just playing a game, dragging around a dead cat. This issue is really dead in the minds of the American public. We are playing a game at 2 o'clock in the morning that does not deserve to be played.

The House of Representatives did the right thing. Fifty-one Members of even the minority party in that body said it is not a good idea, that we

should reject it.

Yet tonight we are going forward, and we are going to say what we would never say in any other area of our Federal budget. We are going to give you \$1 billion, fence it in, put it aside, set up this escrow, call it what you will, and then we are going to play this for as many weeks or months as it takes to build a political consensus, not an intelligent technical consensus, because I do not believe in the next few weeks or next few months we are going to arrive at any better decision than the last 7 years and \$4.5 billion have provided us.

That is really what the choice is, what the Senator from California is proposing with this motion to recom-

mit.

I am delighted to be able to sponsor it, and I hope the majority of colleagues here support it when the motion comes up.

Mr. KENNEDY. Mr. President, will the Senator yield for a question?

Mr. DODD. I yield.

Mr. KENNEDY. I have asked if the Senator would include me as a cosponsor of the particular motion that the Senator from California is offering, and I understand that he will.

Mr. CRANSTON. I will. I do.

Mr. KENNEDY. Mr. President, the hour is late, and we have heard, I think, for the last 2 hours an interesting debate about what we are going to do or what we may not do if the President of the United States submits a particular proposal to the Congress of the United States over the period of the next 3 months on this particular weapons system.

But is it not true, and I ask the Senator from California this particular question, initially, that over the period of the last 5 years under two Presidents of different parties that the Joint Chiefs of Staff and the best of our military experts and the best of our civilian experts have been focused

on the issue of how to make this missile virtually invulnerable and have been focused on the issue of the basing mode and that we have brought to bear in this country the very best in terms of the military planners, those who have the knowledge and the technical ability, to focus on this issue of basing and over the period of the last 5 years they have finally submitted a program which, as I understand, was rejected by a majority of the Joint Chiefs of Staff, the Dense pack proposal, which is an alternative to the previous administration proposal which provided for a mobile missile? I understand that over the period of the last 5 years both the Democratic administration and the Republican administration have not been able to get the Joint Chiefs of Staff to agree on the basing mode.

Is that the Senator's understanding? Mr. CRANSTON. That is my understanding. Meanwhile we have spent \$4.4 billion.

Mr. KENNEDY. Furthermore, do I understand whether we follow the Jackson proposal or the Hollings proposal, effectively what we are saying to the American people, if we follow those particular recommendations, is that somehow we think that in the next 3 months this President is going to be able to go back to the drawing board and come back with some kind of a proposal that will be acceptable and that we are basically making a presumption in favor of that prospect, even though over the period of the last 5 years, the best Republican and Democratic administrations have been unable to do so?

Mr. CRANSTON. That is correct, and Senator Hollings graphically described how this President will probably go about making that decision.

Mr. KENNEDY. Mr. President, according to my understanding over the period of the last several years both administrations have considered the various basing modes of launch under attack (LUA), orbital based, shallow underwater missile (SUM), hydra, orca, ship—inland, ship—ocean, sea sitter, wide body jet (W.B.J.), short takeoff and landing (STOL), vertical takeoff and landing (VTOL), dirigible, midgetman, hard rock silo, hard tunnel, south side basing, sandy silo, commercial rail, dedicated rail, offroad mobile, ground effect machine (GEM), road mobile (Minuteman), road mobile (new missile), covered trench, hybrid trench, dash to shelter, mobile front end, pqol, minuteman/ MPS, MX/MPS, continuous airborne aircraft, deep underground basing, ballistic missile defense (BMD), and now Dense Pack?

Is that roughly the understanding of the Senator from California?

Mr. CRANSTON. That is my understanding. Mr. KENNEDY. Finally, I would like to ask my friend and colleague from California this question. We have heard a great deal on the floor of the Senate tonight from those Senators supporting the proposal of the Senator from Washington or the Senator from South Carolina, about national security.

Does he really believe that our national security is enhanced by the Congress of the United States earmarking some \$1 billion and fencing it, however you want to categorize it? Does he really believe our national security is going to be enhanced by earmarking money for a missile whose mission has yet to be defined and that somehow this is going to enhance our position with the Soviet Union? If they have had any chance to read this discussion or debate or to follow the discussion in the Armed Services Committee, do you think that they believe we have found some kind of a system by which this particular missile can be effectively deployed for our national security? Does the Senator from California believe that our national security is going to depend on accepting the Senator from Washington's amendment or the Senator from South Carolina's amendment?

Mr. CRANSTON. No, I do not.

Mr. KENNEDY. Finally, is it the Senator from California's understanding that in his recent press conference the President of the United States actually removed the MX from the bargaining table in the Strategic Arms discussions with the Soviet Union? That is my understanding and I believe that to be the fact.

So, Mr. President, just finally, as I understand, in response to the arguments that have been made here about the MX being an additional bargaining chip, that is bunk. It will not even, according to this President of the United States, be on the bargaining table.

I believe, Mr. President, with regard to enhancing the security of this Nation at this particular time that that argument, given this record, is bunk as well.

I welcome the determination of the Senator from California and the Senator from Connecticut and the other cosponsors of this for really facing this Senate up to what is at issue, and that is whether we are going to move ahead with the production of a missile without a mission and a missile which I do not believe is going to increase the security of this Nation.

Mr. CRANSTON. I thank the Senator for his forceful and incisive analysis of the situation, and I thank him for his partnership.

I yield to the Senator from Rhode Island.

Mr. PELL. Mr. President, I am a strong supporter of the amendment proposed by the Senator from California (Mr. Cranston) deleting production funds for the MX missile and money for Dense Pack basing.

I know that many of my colleagues will oppose funding of the MX because of their concerns over what appears to be a fundamentally wrong-headed basing scheme. I share their concerns about Dense Pack. However, I believe that a plan so misbegotten as Dense Pack was almost to be expected, given the requirement to find a home for the MX. The basic problem that brings us to this debate is not Dense Pack, which is only a symptom, but MX, which is the problem.

I was frankly astonished Tuesday by Secretary of Defense Weinberger's response when I asked him in a Committee on Foreign Relations hearing whether the administration, in its nearly 2 years in office, had ever given any serious thought to the abandon-

ment of the MX.

The Secretary's answer was, "No, I do not think so." He mentioned only some consideration of a common missile for submarines and land-based silos. But it was clear that this administration is taking a solid position in favor of the MX, for better or for worse.

I conclude that, if the administration is incapable of considering alternatives to the MX, the Congress has a duty to the American public to do so. We should start right now by firmly denying production funds and money for Dense Pack basing. Frankly, I wish the Senate and the House would go the whole distance and delete all MX funds.

To me, there are several compelling

reasons to take this step:

First, the MX is a tired answer to a problem that will not go away. That problem is the theoretical vulnerability of land-based missiles. Absent a truly mobile and survivable system, land-based missiles are going to be thought vulnerable by a sizable number of defense strategists. I am not at all convinced that the vulnerability threat is nearly as real as some think. However, the simple truth of the situation is that if we go ahead with MX or some other basing scheme, we will condemn ourselves to continuous and needless public debate, constant worry over the viability of our deterrent, and the expenditure of countless billions to solve a problem which appears to have no solution.

Second, it should be clear to all of us that there are many uncertainties. No one really knows how the Soviets would be able to attack Dense Pack late in this decade or in the 1990's. Accordingly, no one really knows how effectively Dense Pack could survive attack. Clearly, the Pentagon is lobbying heavily to convince us that Dense Pack is an ingenious scheme and that the Soviets cannot cope with it. Who

among us doubts that the Pentagon is viewing our own programs most optimistically and downplaying the possible reaction of the Soviet Union? Of course, we all know that, if we were to deploy MX and Dense Pack, the song would change most dramatically in several years and we would hear of the dire threat to Dense Pack that must be countered with the expenditure of additional tens of billions.

Third, MX and Dense Pack would undermine existing arms control agreements and jeopardize any hope of meaningful arms control agreements in the future. Clearly, the administration thinks MX and Dense Pack would be useful in negotiations, but it could never be a bargaining chip, because it would never be cashed in. Accordingly, the Soviets would be faced with the development of major new weapons system they believe is contrary to SALT I and SALT II. The administration may play games with terms like "launchers," "silos" and "canisters," but no one can doubt it is a game which would worry us greatly if initiated by the Soviets. Thus, MX and Dense Pack would do violence to the fragile fabric of SALT, which the President has pledged not to undercut, and raises real questions about the future of strategic arms control. If antiballistic systems were sought for Dense Pack, there is no question in my mind, having reviewed the 1972 ABM treaty and the 1974 protocol, that development of a new complex in Wyoming is not consistent with the understanding between the parties and would require us either to go back to the Soviets for modification or to abrogate the treaties.

Fourth, against the background of our current economic woes and projected deficits, the throwing of our treasure into more land-based missiles seems almost staggeringly misguided. We know that the MX will cost at least \$26 billion more. Although the administration has studiously avoided any indication that Dense Pack must be defended by ABM's, Secretary Weinberger cited the fact that Dense Pack "would be more easily defended" by an ABM than other basing modes. An ABM could add \$10 to \$20 billion.

Mr. President, there are other strong arguments against MX and Dense Pack. I can see no equally compelling arguments in favor.

I am convinced that our best course would be to rely for our deterrent on the very potent and much more survivable sea-based and air forces. If, in the end, we turn completely away from large land-based missiles, we will have removed the targets in our heartland which are thought to be so inviting to our adversaries. If we had no hard targets such as missiles in reinforced silos, the utility of the Soviet land-based forces would be diminished.

What a step for stability that would be.

Now is the time to call an end to the nuclear arms race and then to move ahead with reductions and other measures to insure that nuclear weapons will never again be used. As temporary custodians of our wondrous country and planet, we owe it to our children, our granchildren and their children to pass on the precious heritage that we have been so fortunate to inherit.

Now is the time to act. Tomorrow it may be too late.

Thank you, Mr. President.

Mr. CRANSTON. I yield to the Senator from New York and then to the Senator from Louisiana.

Mr. MOYNIHAN. Mr. President, could I ask the Senator from California is it his understanding that the President has indicated that the administration will abide by the terms of the SALT II treaty even though it has not been ratified?

Mr. CRANSTON. Yes.

Mr. MOYNIHAN. Is it my understanding that the Senator from California feels that the Dense Pack proposal to the degree that it adds new launchers would, in fact, violate the SALT II treaty?

Mr. CRANSTON. Yes, because they would be fixed-site launchers.

Mr. MOYNIHAN. Fixed-site launchers, which are fixed under SALT I and that carries forward. May I say I agree with him completely.

Could I then ask him in this most solemn of relations between ourselves and our adversary, the Soviet Union, if we have openly advocated a missile system which violates almost the first subject of the armament negotiations, which is the number of launchers, will our Nation not be profoundly inhibited and deeply disabled in calling attention to Soviet violations of the SALT agreements and insisting on conformity?

Will we not, in effect, have given up that right ourselves having in the instance most openly violated that?

Mr. CRANSTON. Yes; we will.

Mr. MOYNIHAN. Would that not be a very grievous loss? It is one thing not to have passed that treaty but at least we could abide by it.

Mr. CRANSTON. I would agree totally with the Senator.

Mr. MOYNIHAN. Would the Senator do me the honor of putting me down as a cosponsor?

Mr. CRANSTON. I would be delighted to do so.

I yield to the Senator from Louisiana

Mr. JOHNSTON. I thank the Senator for yielding for a very basic question, which is this: If the Jackson-Nunn amendment be defeated, would not the Senator's amendment be in order without having to refer this

matter back to the Appropriations Committee?

Mr. CRANSTON. Well, the desire of the proponents of this approach was to have the first vote on this if we could arrange it to come out that way.

Mr. JOHNSTON. In other words, what the Senator is saying—he is not upset with the parliamentary rules; he just wants to displace the order of consideration by referring it back to the committee. That is all that this is about, is that not correct?

Mr. CRANSTON. Yes; certainly.

I yield to the Senator from Mary-

land, who is my prime cosponsor.

Mr. STEVENS. Mr. President, I am going to object unless we are going to have questions now. This is control of the floor at 2 o'clock in the morning, and we are going to be here until 6 o'clock tomorrow night on defense alone if it keeps up this way which is

sort of wearing.

I think the Senator from California may yield for a question and I would like to hear the question before I—I reserve the right to object to this yielding without the right of his losing the floor because if he yields for more than a question he is going to lose his right to the floor.

The VICE PRESIDENT. The Senator is correct. The Senator form California has the floor and is permitted

to yield for a question.

Mr. CRANSTON. I beseech my partner from Maryland to make his re-

marks a question.

Mr. MATHIAS. I do have a question to the Senator from California. It is a question that arises from the fact that I support his motion.

The question really is not whether we are to maintain a strong nuclear deterrent, but, I ask the Senator from California, whether or not the production of an MX constitutes an essential addition to the deterrent. Does this add anything to the deterrent which has been reliable for 37 years?

Mr. CRANSTON. I believe that rather than adding to our deterrent it adds to the invitation to the Soviet Union to make a first strike.

#### THE MX MISSILE

Mr. EXON. Mr. President, the United States currently stands at a crossroads with regard to the future of our nuclear deterrent forces.

As the United States invests in the necessary modernization of its strategic nuclear deterrent, it is imperative that this effort be undertaken in a militarily sound manner which takes into account the other steps which are vital to enhance our conventional forces as well as the necessity to remain compatible with arms control objectives. The overriding consideration must be that we not consider the MX missile system in isolation from our overall defense capabilities—present or future.

Of the several steps outlined in the administration's strategic forces modernization program announced in October 1981, the question of the MX missile has engendered the greatest amount of dispute. For almost 10 years, this Nation has attempted to solve the dilemma of the vulnerability of our land-based intercontinental ballistic missiles. It is now time to enter the final stage of this policy development process and move ahead aggressively to solve this problem within the context of our overall strategic deterrent and defense needs.

Our current strategic nuclear triad of forces has evolved over time into a system which has served us well. It consists of three legs—land-based missiles, submarine-launched missiles, and air-breathing systems. The value of this triad is being exemplified today as our current, relative weakness in land-based ICBM's is being compensated for by our superior submarine, bomber, and cruise missile forces.

The Soviet Union, on the other hand, has placed approximately 75 percent of its strategic forces in land-based ICBM's which has served that nation's objectives to date, but which should work to their increasing disadvantage over time. The U.S. triad

should be retained.

Nevertheless, it is time for the United States to reevaluate the functions within the triad. The entire debate surrounding the MX to date has centered around the principle of retaining the primacy of land-based ICBM's within our nuclear forces structure. Since their advent, landbased ICBM's have been the only triad component encompassing prompt-response, hard-target kill weapons. This has remained so because of previous technology; command, control, and communications deficiencies within the sea-based leg; and the relatively slow flight times of air-breathing systems. Some of these constraints will, in the near term, no longer apply and the United States must consider adjusting to these developments as we modernize our deterrent.

To continue to rely to such a great extent on fixed, land-based ICBM's in view of Soviet strength in this area may not be to our advantage. We must stop playing into Soviet strengths and begin taking advantage of our own strengths and Soviet weaknesses.

The United States has not yet developed a proven solution to the vulnerability of fixed, land-based ICBM's. Numerous studies and concepts have been found deficient on military, fiscal, environmental, or political grounds. Previous attempts to utilize mobility and/or deception have not succeeded for one or more of the same reasons. It must be remembered that the new, 10-warhead MX missile was always intended to utilize mobility and be deceptively based. The latest plan,

closely spaced basing, embodies neither of these founding principles and its concept of survivability is new, untested, unproven, and raises serious questions in several areas—not the least of which is the issue of near-term antiballistic missile deployment. At first look, it represents an attempt to find a solution to a problem within parameters which may be too restrictive.

Rather than continuing to rely so heavily on large, land-based ICBM's, given their inherent vulnerability problems, it is time to investigate changing the functions within our triad. Before the end of this decade, technology will no longer mandate that land-based ICBM's be the sole hard-target kill, prompt-response weapons in our strategic forces. With the advent of the Trident II (D-5) missile, this function has already been accelerated and its initial operating capability is now expected within 2 years of that of the MX. Communications with our submarine force is already highly reliable and current programs already initiated and being planned can and will make this communications enduring in wartime.

Our submarines at sea are currently invulnerable and are expected to remain so into the foreseeable future. It may be preferable to emphasize the basing of our prompt-response, most flexible deterrent force in a currently invulnerable basing mode rather than continuing to retain this function in a basing mode beset with vulnerability problems caused by the one area of soviet strategic primacy—their land-based missiles.

Mr. President, it is time to stop downplaying the capability of our current nuclear force. They are most capable today and the United States is not inferior to the Soviet Union in this overall category. Our greatest area of concern, nevertheless, is what to do about the vulnerability of land-based missiles. Our entire deterrent is in the process of being modernized and, therefore, the issue of land-based missiles is but one of many in the overall scheme of this modernization. It is important, but not the issue of most critical importance, to the virtual exclusion of all others.

Since closely spaced basing has not been proven—or rejected—as a viable MX basing mode, what is the best course of action? To decouple the missile and basing mode is not prudent. These two aspects have never been, and should not now be, separated. What good is a new, 10-warhead MX missile without a survivable and acceptable basing mode? It makes no sense to this Senator to procure the MX and then possibly have it become a "sitting duck" to accurate and large Soviet ICBM's which ae already deployed.

We must not forge that the President overruled the recommendation of three previous Presidents and our uniformed military leadership in October 1981 when he ordered the interim deployment of the MX in existing Minuteman silos, delaying until late 1984 a decision on permanent basing. Congress rejected that ill-advised plan and, instead, mandated a December 1, 1982, decision on MX basing. The President has now proposed closely spaced basing and it is the Congress turn to work its will on his recommendation.

To repeat what I said earlier, Mr. President, we must not decide on the MX and its basing mode in isolation. I believe we ned to retain the nuclear triad. I believe that the research, development, testing, and evaluation of the MX missile itself should continue without interruption-including the MX flight test program due to begin early next year. Nevertheless, I also believe that the actual procurement of operational MX missiles should not of forward until Congress has had the opportunity to evaluate all feasib's plans for the basing of the MX in conjunction with the other portions of our strategic deterrent. After all, the President made this decision just weeks ago based on his own internal study. We cannot, and should not, be required to ratify it immediately-in isolation.

The Congress must be afforded the opportunity to examine alternatives to the MX in closely spaced basing. We need to examine further acceleration of and reliance on the sea-based leg of the triad with the coming of the Trident II missile. We need to examine improvements to our bomber and cruise missile forces on top of those already planned. We need to further examine closely spaced basing, as well as other land-based deployment modes for the MX. And we need to examine possible alternatives to the MX itself, including a smaller and mobile ICBM. Our amendment will accomplish this goal within an acceptable timeframe.

Mr. President, it is not only our right but our duty and responsibility to request an examination of these alternatives and to withhold judgement on the MX until we have them. This is not a new request and certainly these kinds of comparisons already exist. This is not a tactic of delay. We simply need to have this information before us to make an informed judgment.

I assure you, Mr. President, the sky will not fall in during this short interim period.

In closing, I want to emphasive that the objective here is to modernize our strategic nuclear deterrent in the most militarily effective and cost-efficient manner possible. Congress shares that responsibility with the President. It is spelled out in our Constitution. The choices are not easy—but neither is the world in which we live.

Mr. MATHIAS. Having in mind that this is a missile that has yet to be flight tested, is it not exactly what its name implies, MX, missile experimental? Is this the time to be investing in it? I might elaborate that question by saying that although I can envision circumstances that might require producting a new land-based ICBM, I have to confess I am less than sanguine about spending \$988 million to produce a weapons system that has no home.

It is not—and I ask the Senator from California—possible that the MX has become the "Flying Dutchman" of our time? After considering 34 different basing modes, is it not true that we still have not found it a home?

Mr. CRANSTON. That is true, and the administration apparently recognizes that because the bill, if our amendment is adopted, will still contain \$1.7 billion for MX missile R&D. I have never heard of a situation where it is desired to spend that much on R&D but also go into production.

Mr. MATHIAS. Well now, one final question, Mr. President: The President of the United States has suggested a possible remedy to this situation. His proposal is to delay production of MX until the 15th of March, when he hopes that a suitable basing mode will have been found. Now that, I think, is a step in the right direction.

But maybe we need to do more than take a step. We need to do more than tiptoe when you have the recent testimony of the Secretary of Defense, who indicates that the Pentagon has no fallback position, has no alternative to Dense Pack. The question I am asking is, should we not take more than a small step, a tiptoe, should we not take a quantum leap to deal with this problem?

Mr. CRANSTON. Yes; we should, and that is what we are proposing.

I want to answer a question that was asked by the Senator from Alaska during the debate. The amendment that I am proposing in the form of a recommital motion does not strike the R&D that is in the measure. It leaves that intact, except it prohibits R&D, as does the House action, for the so-called Dense Pack approach.

As a result of all this, Mr. President, I now move to recommit the bill to the Committee on Appropriations with the following instruction that the committee report the bill back to the Senate forthwith provided that the amendments already agreed to by the Senate shall remain agreed to and with the excepted committee amendments as they were reported to this bill on December 15 still excepted and with the following amendment:

On page 9, line 13, insert the following sentence after the period: "Notwithstanding another provision of this Act, the amount appropriated for Missile Procurement, Air Force, is reduced by \$988,000,000: Provided, That none of the funds appropriated by this Act shall be available for the procurement of any MX missile: Provided further, That none of the funds appropriated by this Act shall be available to conduct any research, development, test, or evaluation in connection with a closely spaced basing mode for the MX missile."

Mr. President, I ask for the yeas and nays on the motion.

The VICE PRESIDENT. Will the Senator send his motion to the desk.
Mr. CRANSTON. Yes.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Mr. President, I very reluctantly rise at this hour in the morning to oppose the motion offered by the Senator from California. I do so as probably the original Member of this body to offer a specific action against the MX missile. I did so by offering a reservation to the SALT II treaty in the last Congress. That reservation was not only the MX missile, but all the counterforce weapons. So I will take no back seat to anyone in this body as far as being a consistent opponent of the MX missile. But the logic and timing totally baffle me on this particular motion, at this hour and under this circumstance, and I will tell you why.

I will tell you why. This is a conferenceable item. The House has deleted those funds. Do not tie our hands here by raising this issue and failing. Let me tell you I know what the head-count is on this issue. Send us to conference with the House, which has, in my view, the right position, and have a record vote that ties our hands as conferees.

I am laying out the strategy. I am not trying to play hide and seek with anybody here. I hope that we go to conference and that our position in the Senate committee, which was 16 to 12 for the Hollings amendment, will yield to the House position. But if you lock us into a record vote here, we have less likelihood of sustaining that position in conference.

Now, let me say further that I have no reason to believe there is any evidence that the two Houses will agree to a basing mode by a joint resolution. There is the burden of proof at this point on anybody who raises this.

I think it is one thing to ring up the pennants on the yardarm and call for the battle, but I would like to know where the troops are before we charge into battle.

This is ill-timed and it is not organized. I do not think we ought to put ourselves out here in that kind of a situation and strengthen the hands of those who want to go ahead with this MX missile.

THE CRANSTON-MATHIAS AMENDMENT

Mr. CRANSTON. Mr. President, I ask unanimous consent that Senator Gary Hart be added as a cosponsor of the Cranston-Mathias amendment to be proposed to the continuing resolution. I am pleased to have the support of Senator Hart, who has been a leader in our efforts to delete all production funds for the MX missile.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. MITCHELL. Mr. President, this continuing resolution contains \$3.437 billion for the MX program. Of this amount, \$2.449 billion will fund further research and development on the missile and its basing system, and \$988 million will fund the purchase of the

first five of the new missiles.

The question before the Senate is whether or not the Congress should approve the \$988 million for the five missiles before agreement has been reached on the means of basing the new weapon.

I oppose providing the funds necessary for the Department to purchase the new missiles. Accordingly, I have joined as a cosponsor of Senator Cranston's motion which would strike all

MX procurement funding.

My primary reason for opposing the inclusion of MX procurement funds in this resolution is my belief that our Government should deal with MX as a unitary system, comprised of a missile component and a basing component. I agree with those who argue that it makes no sense to construct one component when the other component is still on the drawing board, and is the subject of substantial criticism from well-informed, responsible members of the military, scientific, diplomatic, and legislative communities.

On November 22, President Reagan announced his intention to base the missile in a pack of fixed silos located in close proximity. Since that announcement, many serious questions concerning the basing arrangement have been raised and a number of deficiencies in the proposal have been

identified.

The list of Dense Pack critics grows longer each day. Nobel physicist Charles Towne, who chaired the President's basing evaluation panel, doubts whether the silos can be hardened enough to insure the missiles' survivability. Three of the five military Chiefs of Staff remain unconvinced that this basing scheme meets the missiles' requirements. Two former Secretaries of Defense, Dr. Harold Brown and Dr. James Schlesinger, are critical of the plan.

Brown labeled it "vulnerable."
Schlesinger wrote:

Even if the silos hardness design were actually achieved the Soviets have available to them measures to counter Dense Pack within a few years of initial deployment. Either earth penetrators or other innova-

tions (not yet discussed in open literature) would permit silo destruction.

The administration, in response, has to date failed to make its case for the basing plan. The administration's failure has led Members of Congress, many of whom in the past have been supportive of the President's strategic arms policies, to question the entire system. The December 7 House vote against the missile component of the system reflected this increasing skepticism on the part of the Congress.

I do not suggest that Congress has made a final decision, nor that the President has lost the battle for the MX system. That is not the case. If it were, three of our committees—Armed Services, Foreign Relations, and Intelligence—would not have begun, or have scheduled, hearings concerning the feasibility and implications of the

basing arrangement.

I am suggesting that this body is not yet in a position to appropriate funds to produce MX missiles. As long as our committees are gathering information, are evaluating this information, and are preparing recommendations for the full Senate, this body should not commit itself to building the missiles.

Second, I oppose MX missile funding at this time because I disagree with President Reagan when he insists that these five missiles are needed by U.S. arms negotiators at the Geneva Strategic Arms Reduction Talks (START).

In the last 2 weeks, President Reagan has repeatedly emphasized that his arms control negotiators require the U.S. procurement of MX missiles in 1983 as a "bargaining chip" in Geneva.

Interestingly, the President has done this at the same time he has sought to avoid discussing the viability of the basing mode which he is proposing

I have reviewed the President's bargaining chip argument, and have concluded that it is illogical and contra-

dicts the historical record.

It is illogical because we live in an open society which thrives on free and vigorous discussion of public policy issues. To the extent that the Soviet Government has diplomatic representatives here, the congressional debate on issues such as the MX is known to the Soviet Government. If this Congress approves the purchase of the missiles and yet cannot agree whether or not they are needed, or how they shall be deployed, what weight can a procurement decision—standing by itself—have with the Soviets?

I agree with former arms control negotiators Gerard C. Smith and Paul

Warnke who have written:

The MX missile program should not be justified as a useful bargaining chip in discussions with the Soviet Union. It should be examined for its impact on our national security, on a more stable strategic balance and on the hope for nuclear arms reductions.

The bargaining chip argument in support of MX procurement is especially ironic when one examines past U.S. experience. Nonclassified sources estimate that today the nuclear superpowers possess between them roughly 14,000 independently targetable (MIRVed) warheads. A MIRV'd warhead is one of a group of warhead carried by a single missile. Each warhead in the group can be directed at a different target upon release from the launching missile.

In 1971, David Packard, President Nixon's chief arms control negotiator told the Congress that "MIRV is a very important bargaining chip."

Now we have 14,000 MIRV'd warheads. And both the United States and the Soviets are planning to build more.

Ten years ago cruise missiles also were offered to the Congress as muchneeded bargaining chips. The Congress gave approval to development of cruise missile technology and production followed. However, this process did not result in the winning of Soviet concessions at the bargaining table. Instead, the result was the addition of cruise missiles to our ever-growing nuclear weapons arsenal.

A fundamental weakness in the bargaining chip argument for MX stems from the fact that the Geneva negotiations—even if the President's START proposal prevails—would leave MX wholly untouched. Does the President, or his negotiators, need as a bargaining chip \$1 billion worth of MX missiles when the stated U.S. objectives for the talks do not envision any reduction in the MX system, or limitations on MX deployment, in exchange for Soviet concessions? The answer, obviously, is "No".

A third reason for stripping this resolution of MX missile production funding relates to the fact that the Dense Pack basing arrangement may violate the letter and spirit of the SALT I agreement to which the United States is a party, and the provisions of the SALT II agreement which President Reagan has pledged to follow as long as the Soviets do likewise

Dense Pack may violate SALT I because an expected second phase of this basing arrangement would require the deployment of an antiballistic missile system which is prohibited under the terms of the 1972 pact. These termsand those of a subsequent protocolstringently restrict ABM deployment by prohibiting either the United States or the Soviet Union from installing ABM systems on more than one site each. The Soviets chose to defend Moscow with their system. The United States decided to defend a field of Minuteman ICBM's at Grand Forks, N.D. After a year in operation, and an expenditure of \$5 billion, the

Grand Forks ABM site was deactivated.

Our Government cannot switch its ABM site from Grand Forks to the proposed Dense Pack site in Wyoming, without either violating SALT I or getting the Soviets to agree to a treaty amendment. If the long-term deterrent value of MX based in a Dense Pack depends on protection by an ABM system, as many defense specialists—including Armed Services Committee Chairman John Tower—believe, the Congress must address the arms control ramifications which will result from U.S. withdrawal from the ABM agreement.

Our Foreign Relations Committee also will have to determine if SALT II's terms would be proscribed by the establishment of a Dense Pack ABM. SALT II bars the construction of new fixed missile silos. MX in Dense Pack is an intercontinental ballistic missile in new fixed silos. While the President may claim that the United States at some later date could mobilize the missiles and their launching "capsules," such mobility is clearly not readily available, nor would it be achieved for the \$27 billion which the President says his system will cost.

The high-price tag of the MX system is the fourth reason for my decision to oppose the procurement of the missiles at this juncture. In many respects, what U.S. military planners want from the system is the greater uncertainty which it alledgedly would create for their Soviet counterparts. Even if Members of the Senate accept at face value the claim that the existence of greater strategic uncertainty on the part of the Soviets will enhance U.S. security, we have to ask ourselves if the benefits are worth the costs.

A total of \$27 billion is only the starting price. If MX advocates have their way and add more missiles and more silos later in this century, or succeed in supplementing the basing arrangement with an ABM system, the \$27 billion figure will climb sharply. In a period when most economists are in agreement that the Federal deficit will exceed \$180 billion this fiscal year, can we afford to commit our Nation to such an expensive system?

Senator Jackson, whose advocacy of a strong defense cannot be challenged, has focused on the question of how long the MX in Dense Pack can be expected to serve our Nation's defensive needs. On a recent edition of NBC's "Meet the Press," Senator Jackson stated:

I think the basic problem in terms of the budget is that the current proposal would become operational in '86, '87 and would be reasonably secure for four years. That's a lot of money to pay for a four year survivable program.

Mr. President, I believe deeply in a strong America, and my record in this body as a supporter of realistic defense authorization and appropriations measures reflects this belief. I am not able, however, to support the MX system as long as the deterrent value of the system remains in doubt, the survivability of the missile component is in question, and the relationship of the system's deployment to the administration's arms control negotiations remains unclear.

The case for MX has not been made. As a result, I cannot support the provision in this continuing resolution of funds to construct the MX missile.

Mr. LEVIN. Mr. President, I support the motion to recommit, to delete funding for initial production of the MX missile. We do not have a basing mode which is survivable, cost-effective, and economically feasible, and it simply makes no sense to begin procuring any of these missiles. Putting in production without a basing mode is worse than putting the cart before the horse.

It is building a multibillion-dollar cart without knowing if there even will be a horse.

Doubts increase daily as to the cost, effectiveness, survivability, technical feasibility, deployment schedule, and arms control implications of Dense Pack. Until and unless these massive doubts are resolved—and they cannot be resolved until late next year after lengthy congressional hearings before at least four committees—it is fiscally absurd to appropriate any money to begin MX production.

There are few defense programs about which there is so much disagreement and controversy as the MX missile and its Dense Pack basing mode.

Three out of the five members of the Joint Chiefs of Staff—our Nation's highest military officers—have recommended against deploying MX in Dense Pack. The chairman of the special Pentagon advisory panel which studied Dense Pack, Dr. Charles H. Townes, has expressed serious doubts about this basing mode.

In fact, Dr. Townes' letter to Defense Secretary Weinberger sharply contrasts with the optimism expressed by the administration about Dense Pack's effectiveness, survivability, cost, and schedule.

His letter, which I hope all my colleagues will read in its classified form, provides strong and persuasive evidence against congressional approval of such a basing mode at this time, if ever.

Earlier this week, I learned from the Air Force that during the next 4 years, Dense Pack will cost the American taxpayers almost \$7 billion more than was included in the President's 5-year defense plan for MX when he submitted that program to Congress earlier this year.

Thus, Dense Pack makes the already outrageously expensive Reagan 5-year

defense plan another \$7 billion more costly to our hard-pressed citizens.

If the President is to restrain Pentagon spending to within his 5-year plan—which itself exceeds our congressional budget resolution in 3 of those 5 years—he will have to cut other military areas. Or he will add \$7 billion to the deficit.

Yet the way the Reagan administration has structured its fiscal 1983 defense budget, with all its up-front obligations for big-ticket weapons programs like the MX, the B-1B bomber, and the two nuclear aircraft carriers, the only way it will have any flexibility to make up for additional Dense Pack costs will be to slash combat readiness and troop levels.

Considering this administration's overemphasis on nuclear weapons, it will have to pay the Dense Pack bills by slicing into the muscle and bone of our conventional forces. It is no wonder that the Chiefs of the Army, Navy, and Marine Corps could not support Dense Pack.

The Senate should call a halt to this disastrous course by eliminating initial production of the MX missiles from the fiscal 1983 defense budget. This will give Congress the opportunity to reconsider this program, especially in light of the questions about Dense Pack, and to decide whether there are better, less expensive ways to maintain the land-based leg of our strategic triad.

And remember most of the additional \$7 billion cost of Dense Pack will hit American taxpayers squarely in the face during the very years our economy will be struggling the most to overcome the astronomical Federal deficits caused by Reaganomics.

Given all of Dense Pack's flaws, this is nothing short of piling military disaster on top of economic disaster. Furthermore, the worst might be yet to come, because the Pentagon's most credible and independent cost-estimating office—the Cost Analysis Improvement Group, or CAIG—has yet to examine MX/Dense Pack to evaluate the Air Force's figures.

When CAIG examined the B-1B bomber program's purported \$20.5 billion price tag, it estimated that flying turkey instead could cost as much as \$27 billion. And those estimates are in constant, fiscal 1981 dollars, not the inflated dollars we actually will spend.

If CAIG even investigates MX/Dense Pack, we might see those costs escalate faster than the Soviets are expected to be able to develop and deploy weapons able to defeat Dense Pack—and that is depressingly fast.

MX/Dense Pack may well be another cost fiasco like the B-1B bomber, and our economy and taxpayers can scarcely afford to pay for unnecessary spending of any shape or variety.

In addition, the estimate that there now is a \$7 billion shortfall for MX/ Dense Pack in the 5-year budget plan does not include any additional funds for expansion of the basing mode or the deployment of a ballistic missile defense for it. These two steps will be necessary to increase MX/Dense Pack's already tenuous survivability. according to many experts, and they will cost tens of billions of dollars

We will hear protests from the Pentagon from the Air Force that Dense Pack costs less than those of other unproposed successfully schemes-that it will cost "only" \$26.4 billion in uninflated, fiscal 1982 dollars. The Air Force probably will claim there is no \$7 billion shortfall in the present budget plan, either.

How they will be able to make such claims with any confidence escapes me, because not even Doctor Townes' Defense Science Board was able to pinpoint Dense Pack's costs just 2 short months ago. In two of the very few unclassified passages of its report, this prestigious group of experts stated:

The Closely Spaced Basing (Dense Pack) concept is in an early stage of development. Consequently cost, time and effectiveness estimates are still not firm as this report is being written. In particular, several of the key parameters of the concept are still changing \*

And, "\* \* \* the definition of the system, its effectiveness, and its costs are still not complete."

Since this report was submitted, we have learned that the Air Force still does not have a specific design for the Dense Pack, superhardened silos, the key to the system's supposed survivability and effectiveness. Without this, it cannot have a firm idea of how much Dense Pack will cost.

The average American would not buy a new car, a major appliance, or a new home without having a firm idea of how much it would cost to buy, operate, and repair that purchase for the many years that he or she would have

The American Congress should not pay the downpayment on a multibillion-dollar missile system, which is what approving missile production money this year is—a downpayment without receiving better cost estimates about Dense Pack.

At the very least, we should be finally prudent and insist on more independent cost estimates from the CAIG, and from the General Accounting Office, our own accounting watchdog.

I and several of the other Senators supporting either eliminating or "fencing" MX missile production money in fiscal 1983 have asked GAO to conduct a full investigation into all the claims about Dense Pack. We have requested that this examination be conducted on the highest priority and most urgent available to Congress until some time Dense Pack. next year.

It would be a shocking abdication of decisionmaking congressional our powers if we approved missile production money based solely on information from the executive branch about Dense Pack's costs and supposed effectiveness. At the very least, we should wait until our own investigative agency, GAO, has completed a comprehensive, independent evaluation of the MX program and this latest basing mode proposal.

Congress first opportunity to fully consider and responsibly evaluate MX/Dense Pack will come next year during its hearings on the fiscal 1984 Defense budget request. There only has been time for one hearing so far on Dense Pack by the Armed Services Committee, and the news was very bad at that session.

The many contentious and complex issues surrounding Dense Pack have momentous military, fiscal, and arms control implications. In this extremely tight budget year, we cannot justify to our constituents approving MX missile production money on the basis of one hearing, which raised serious doubts about it.

We have had no opportunity yet to hear from Dr. Townes, who has expressed such deep skepticism about Dense Pack, or from any of the other members of his Defense Science Board, whose report raises so many doubts about the system. Other outside experts should be called to testify.

We surely should not approve missile production without hearing from such individuals, because all we have now upon which we can base our decision are self-serving claims from administration witnesses. These claims border on the absolutely unbelievable in certain cases, and they must be resolved before we proceed with missile production.

For example, at our hearing, the President's science adviser, Dr. George Keyworth claimed that there was no room for disagreement within the American scientific community about the feasibility of Dense Pack-at least, and I quote Dr. Keyworth: "not among those who have studied the issue carefully."

Besides the appalling arrogance of this statement, one is prompted to ask whether Dr. Keyworth thinks that Dr. Townes, a respected physicist from the University of California and Secretary Weinberger's personal choice to head two MX studies for the Pentagon, has "studied the issue carefully."

We all know Dr. Townes has done so, and even a superficial glance at his letter to Secretary Weinberger-provided to me by an official DOD courier from the Pentagon's Legislative Liaison Office, by the way-demonstrates

basis, but even so, results will not be how strong is his skepticism about

Other committees also need to become involved in examining Dense Pack, because its implications also fall into the jurisdictions of the Appropriations, Foreign Relations, and Intelligence Committees. The Senate should have the full benefit of the special expertise of each of these committees before it approves MX produc-

It makes no fiscal and military sense to procure MX missiles until we know whether Dense Pack is survivable. Congress went on record against any nonsurvivable basing mode when it passed the Cohen-Nunn amendment late last year.

After 15 years and more than 30 studied basing modes, the Air Force and three Presidential administrations have failed to develop a basing mode which is credible to the American people-to say nothing of the Soviets-which is militarily, politically, or financially acceptable and which does not retard arms control.

Now we are being asked to approve production of missiles based on a deployment scheme which was developed less than 8 months ago after some miraculous study results about hardening and fratricide first surfaced in the middle of last year.

Before June of this year, everything we were told by the Pentagon about hardening was that technical limits prevented building silos much above 5,000 pounds per square inch (PSI) hardness, and that fratricide provided no margin of safety against Soviet warheads.

Now we are being told that, based on some new revelations, that it may be possible to harden silos to previously unheard of levels and that the Soviets cannot overcome fratricide.

The world of hardening and fratricide has turned upside down in 6 months, Mr. President. We cannot approve missile production until we have investigated this astounding turn of events much more thoroughly.

At least we should not approve those missiles, because their survivabilityand indeed possibly the survivability of our Nation-is being placed on the alleged success of theories and techniques which are so complex and interrelated that, if one factor is out of position, the entire basing mode comes crashing down like a house of

We are being assured that the Soviets cannot and will not be able to defeat Dense Pack for many years after it is deployed, based on our best intelligence estimates of Soviet capabilities. Yet I believe there are disagreements within the intelligence community about this which suggest that Dense Pack may well be vulnerable much earlier.

Congress must resolve those doubts before funding the first MX missiles, so we can learn if Dense Pack even will survive long enough to justify its huge costs. If the Soviets are able to develop ways to defeat Dense Pack shortly after it is deployed, thus forcing us to spend additional, untold billions of dollars developing "counter countermeasures" to stay ahead of them, then we will be running in place and getting nowhere, militarily. Economically, we will be running a race into the poorhouse.

These staggering economic costs for Dense Pack and MX also must be weighed against the "opportunity costs" we might have to pay by diverting scarce defense dollars away from other, more survivable strategic forces and from our conventional forces, where our military needs are greatest.

Congress needs to hear directly from each of the members of the Joint Chiefs of Staff to determine why each of them voted as they did about Dense Pack. We may well learn that our overall military strength will be weaker if we deploy MX in Dense Pack, because we will not have the resources to put our conventional forces "house" in order, as NATO Commander Gen. Bernard Rogers is urging.

Improving our conventional forces will do much more to increase our national security and that of our allies than will throwing billions of tax dollars away on the unneeded or unworkable strategic nuclear weapon system which MX/Dense Pack has become.

Before it approves any MX missile funding, Congress also needs to consider fully the arms control risks of Dense Pack, and whether it is compatible with existing arms control treaties, which the administration has pledged not to undermine.

These arms control risks are not just a matter of some idealistic pursuit of the vestiges of détente. They carry severe military consequences.

The Soviets are in much better position to expand their nuclear forces by building more missiles, adding more warheads, and deploying an antiballistic missile system, than is the United States. If this administration believes we are strategically inferior now, an incorrect self-delusion, it would find us even further behind the nuclear 8 ball if its MX plans forced the abandonment of SALT I, SALT II, and the ABM Treaty. Ironically, its MX decisions would undercut the strength of our nuclear deterrent forces, instead of reinforcing those forces, to say nothing of handing the Soviets a major propaganda victory in a jittery Europe.

This administration already has aided and abetted the Soviets enough in the past by playing into their hands with loose talk about limited nuclear wars, nuclear demonstration shots and "dirt and door" civil defense schemes.

Congress must resolve those doubts Deploying MX in a way guaranteed to efore funding the first MX missiles, undermine arms control would only two can learn if Dense Pack even will compound past mistakes.

Speaking strictly about arms control, we also have heard many statements from the administration that it is necessary to buy MX missiles in fiscal 1983 to permit our negotiators to bargain from a position of strength in the arms talks with the Soviets.

If we do not have the MX, we will have no "bargaining chips" with the Soviets we have been told repeatedly. To me that implies that we intend to give up the MX if the Soviets are willing to give up something in return. However, the President's chief negotiator at START, Lt. Gen. Edward Rowny, has unequivocally rejected the nation that we will give up the MX by stating to our committee:

MX to me is not a bargaining chip. I will repeat that: It is not a bargaining chip. I am convinced that we need it for our security.

I would remind the Senate that there are plenty of other weapons in this defense bill which represent to the Soviets both potential bargaining chips and a sufficient demonstration that we are serious about maintaining our strategic nuclear strength.

The \$2.5 billion we intend to spend on continued MX research and development, including the beginning of a 20-missile flight test program ought to be a sufficient bargaining chip and show of strategic will. We do not need the missiles for that.

More importantly, there are hundreds of cruise missiles, the advanced technology bomber, improvements to our B-52's and Trident submarines and Trident missiles to demonstrate our strategic improvement program. The Soviets are probably much more worried about Trident submarines and Trident II missiles—strategic systems they cannot target—than an uncertain MX/Dense Pack arrangement which they will be able to attack.

Trident II by itself is more of a bargaining incentive to the Soviets, and there are billions in the fiscal 1983 budget to demonstrate that to them. Five MX missiles without a home will not be very impressive to them at the START talks.

These contradictory statements about whether MX is a bargaining chip are a perfect example of the way the administration is trying to sell MX/Dense Pack and of why the case for approving missile production just does not add up. Until Congress sorts out the facts from the fiction, and I think there is much more of the latter than of the former, we should put such a decision on "hold."

Some final words about the way this administration is approaching the entire strategic nuclear issue reinforce why Congress should pause long and hard before approving missile production

When he announced his MX decision, President Reagan said that preventing conflict and reducing weapons were the most misunderstood issues of our time. Referring to the disagreements among the experts about whether the MX missile is even needed and whether Dense Pack would work, he said:

The result is that many Americans have become frightened and, let me say, fear of the unknown is entirely understandable. Unfortunately, much of the information emerging in this debate bears little semblance to the facts.

These comments by the President are ironic, because a large part of whatever fear, ignorance, and confusion that may exist about our nuclear deterrence policies and strategic weapons programs can be attributed to him and his administration.

For instance, the President says he wants to reduce the vulnerability of our land-based missiles, but he proposes to put the MX in a fixed basing mode whose survivability is, at best, dubious:

The President says he wants arms control treaties and will not undermine those already signed, but the MX/Dense Pack violates SALT I and SALT II and ultimately could lead to the abrogation of the ABM Treaty;

The President says the Soviet Union spends more on defense than we do, but a comparison of the amounts spent by us and our NATO allies with what is spent by them and their allies shows that we spend more;

The President says that the Soviets are ahead of us in virtually every measure of military strength. Yet the former and current chairman of our Joint Chiefs say they would not swap our military capability for that of the Soviets.

The President's news of our total military inferiority also came as a surprise to the Library of Congress, which at my request consulted Defense Department and Defense Intelligence Agency information to produce a list of at least 20 important measure of military power by which the United States and its allies possess a decided advantage over the Soviet Union and its allies.

These measures are in both the strategic and conventional forces areas, and I will insert them for the record at this point.

The list follows:

#### MEASURE OF MILITARY POWER

	U.S. position	Soviet position	U.S. advantage
Strategic nuclear forces:		1134	100
Total warheads and bombs	9,662	7,060	+2,602
Total missile warheads	7,128	6,735	+393
Total MIRV'd missiles (IC/SL)	1,056	980	+76
Total MIRV'd SLBM's	496	208	+288
Total SLBM warheads	4,976	1,433	+3,543
Total heavy bombers, including LRA		-	
Backfires	316	235	+81
Tanker aircraft (active reserve)	621	50	+571

MEASURE OF MILITARY POWER-Continued

Sources: Library of Congress based on Defense Department/Defense Intelli-gence Agency data.

Mr. LEVIN. The Secretary of Defense says that "we have virtually stood still over the years" in improving our strategic forces. Yet since 1970, we have made major improvements in at least 11 critical strategic nuclear areas, including deploying the 550 new, multiple warhead Minuteman III missiles and doubling the destructive power of more than half of those with new, improved warheads.

We also improved the guidance systems on these missiles to make them more accurate. We deployed 496 new, multiple warhead Poseidon submarinelaunched ballistic missiles and the first of the new Trident I submarinelaunched missiles. The construction of nine new, more capable and quiet Trident submarines was approved.

The bomber leg of our triad was improved greatly by deployment of 1,150 new, nuclear short range attack missiles aboard our B-52's, and we began the air-launched cruise missile program.

When you compare the growth in missile warheads between the United States and the Soviets between 1970-81, you actually discover that the United States added 5,254 reentry vehicles, some 235 more than did the Soviets, who added 5,019.

The United States also outpaced the Soviets in the growth of bomber delivered weapons by adding some 486 more bombs and air-to-surface missiles

during these last 12 years.

Overall, the United States added 721 more nuclear weapons to its strategic arsenal than the Soviets added to theirs, according to the Library of Congress, which also Defense Department and Defense Intelligence Agency information to compile these figures I have cited.

That is not a bad performance for a nation which supposedly stood still during this period in the arena of strategic nuclear weapons.

I would like to insert into the RECORD at this point the list of at least 11 significant strategic actions the United States took during this period of alleged dormancy.

The list follows:

U.S. STRATEGIC FORCE IMPROVEMENTS SINCE 1970

Deployment of 550 new, multiple warhead Minuteman III ICBMS, 1970-75.

Deployment of 496 new, multiple warhead Poseidon SLBM's, 1970-77. Deployment of first new, multiple war-

head Trident I SLBM's, 1979.

Deployment of about 1,150 new, nuclear short-range attack missiles aboard B-52 bombers, 1970-76.

Accelerate full scale engineering development of MX missile, 1979.

Completed R&D and initiated production of air launched cruise missiles, late 1970's.

Doubled yield/destructive power of Minuteman III warheads by beginning deploy-ment of hundreds of new Mark 12A reentry vehicles to replace existing, less capable RV's, 1970's.

Upgraded guidance systems of Minutemen III ICBM's with new NS-20 inertial system

to improve accuracy, mid-1970's.

Upgraded silo hardness of Minuteman ICBM silos to reduce vulnerability to nuclear bursts and installed titanium shrouds on missile nose cones to reduce vulnerability to electromagnetic pulse from nuclear explosions, mid-1970's.

Approved construction of nine new Trident submarines and began construction of at least seven of these new, more capable and quiet strategic missile ships, 1973-79.

Began R&D on avionics modernization program for B-52 bombers, late-1970's.

Mr. President, to add to the incoherence of it all, while the President says we are in a position of nuclear inferiority to the Soviets, he is unilaterally dismantling our Titan II ICMB's which have the most powerful warheads in our nuclear arsenal and contain one-third of our land-based megatonnage. And he is doing it not for safety reasons, but according to testimony before our committee, to make relatively small budgetary savings.

A decision of such momentous defense, fiscal and arms control ramifications as MX/Dense Pack should not be based on gross misstatements of our military capabilities and misleading exaggerations of those of our adver-

Instead of closing a "window of vulnerability," the President is opening a window of incredibility by painting a distorted picture of American weakness and Soviet strength. He is increasing our insecurity by overemphasizing doomsday nuclear weapons which soak up billions of dollars from needed improvements in our conventional military capability.

The question is not whether we need to be strong enough to deter the Soviets. We do. The question is whether Dense Pack adds to or subtracts from our security. The question is whether Dense Pack solves the perceived ICBM vulnerability problem or whether it compounds it by substituting one fixed land based missile for another, with the new one being a "first strike" weapon more likely to attract a preemptive Soviet strike in time of crisis, thereby making us less secure than we are now.

It is time for the President and his administration to stop the scare tactics that only increase the misconceptions and misunderstandings-and the fear of the unknown-which the President decries

Congress own credibility in the eyes of our hard-pressed taxpayers is at stake in making the MX decisions-to say nothing about the credibility of the President and the Air Force. I think the President and the Air Force will have to do a much better-and much more straightforward-job of demonstrating that this missile and its Dense Pack basing mode truly are needed before Congress risks its own credibility and the trust of the American people by approving this weapon system.

Mr. KENNEDY. Mr. President, I support this motion to eliminate all production funds for the MX missile. The House of Representatives has already taken the essential step of denying production funds, and the Senate should do the same.

The time has come to put the administration out of its misery on the MX. This weapon is a missile without a mission. It is in trouble in Congress because neither the Reagan administration nor any previous administration has been able to devise a satisfactory rationale for the missile or a satisfactory method for protecting it.

The failure of Dense Pack is the latest and clearest sign that the Pentagon has been unable, even after several years of study, to develop a realistic basing mode. In fact, this is the 34th basing mode that has been studied for MX, and we are no closer to an answer today than we were when the missile was first proposed.

MX has also become a symbol of what is wrong with this administration's nuclear arms control strategy and its proposals for a massive military buildup. Their schemes, which entail the largest peacetime increase in military funds in our history, amount to spending for the sake of spending, without clearly stating what defense strategy we are pursuing, without explaining why particular weapons are needed, and without generating the sort of broad national consensus that is essential if the Nation is to have confidence in our strategy not only for national security, but for survival in this increasingly perilous nuclear age. The idea that more spending makes more security has led the Reagan administration to try to produce the MX, regardless of wheth-

er it could be protected.

The MX is part of the administration's dubicus program to build more and more nuclear weapons-at an incredible cost of \$180 billion over 5 years, and at the expense of the readiness of our conventional forces and our pressing economic needs. At last, Congress is beginning to understand that the Reagan administration has abdicated its responsibility on national security by advocating a blank check military buildup. It is up to Congress, therefore, to set our defense priorities straight, before the current round of excessive spending further distorts our economy and undermines the bipartisan consensus we have long had in all parts of this country for a responsible defense policy.

I support a strong national security-and needed improvements in our military forces. But we must oppose this administration's indefensible increases in defense spending. cannot counter the Soviet threat by bankrupting and Sovietizing the American economy; we must not break the budget in order to pay military

waste that weakens the Nation. In a desperate attempt to salvage MX, the Reagan administration has also resorted to the shallow argument that the missile is needed to shore up our bargaining position in arms control talks with the Soviet Union. In recent years, however, we have learned again and again that the last refuge of an administration in trouble over defense policy is to invoke the discredited doctrine of bargaining chip diplomacy. For over a decade, the nuclear arms race has been heedlessly perpetuated by this dubious theory; inevitably, each side feels forced to match new and threatening weapons systems with escalations of its own. A decade ago. MIRV's were defended as a bargaining chip for the SALT I talks. While the talks were stalled, the United States proceeded to deploy MIRV's-and then we were told that they were too important to bargain away.

And now, after its latest flip-flop on MX, it appears that the administration has actually been using the bargaining-chip theory as a bargaining chip with Congress, not the Soviets. This week, President Reagan declared that the MX is not on the negotiating table in Geneva after all, and that it

will never be traded away.

Let there be no mistake-while the United States builds its MX missiles, the Soviet Union will not stand idle. As recent history demonstrates, the Soviets are prepared to match us every step and every missile of the way in the futile, costly, and increasingly dangerous pursuit of the phantom of nuclear superiority. You do not have to be an Isaac Newton to understand the

first law of motion in the nuclear arms race-each action by one side will be matched by a reaction by the other

What President Reagan seems to be suggesting is that the United States must threaten the Soviets with another escalation of the arms race in order to achieve any progress on arms control. The effect of this will only be to drive the arms spiral ever upward. rather than stop it where it is at the present level of essential nuclear parity.

Rarely, if ever, has there been such disagreement in the country over the issue of national defense. Indeed, the administration itself is seriously divided over whether its Dense Pack proposal will actually work. A majority of the Joint Chiefs of Staff seriously questioned the survivability of Dense Pack. So has Dr. Charles Townes, the distinguished scientist who headed the President's independent evaluation team. In light of these serious doubts, there is no justification for placing the \$26 billion burden of financing this missile on the backs of American tax-

In a sense, the straw that finally broke the MX camel's back is Dense Pack, the incredible basing mode that was proposed by the administration and that has brought well-deserved national ridicule upon it. On its face, it is absurd to put all our MX missiles in single basket, where they will become nothing more than nuclear sit-

ting ducks for Soviet hunters. The purported theory of Dense Pack is that if MX silos are spaced close together, than attacking Soviet missiles will be destroyed or deflected by the so-called principle of fratricide, under which the blast and radiation from the first Soviet missiles would prevent subsequent Soviet missiles from reaching their targets. Dense Pack has been criticized primarily because fratricide is just a theory, and nothing more. It is an untested and untestable phenomenon that is inherently unreliable as the basis for a serious decision on nuclear policy and national security.

In addition, Dr. Townes criticized Dense Pack because we might not be able to build adequately hardened silos by the time the MX missile is deployed. If so, one medium-sized Soviet warhead could destroy several MX shelters, and such warheads could be detonated far enough apart in the Dense Pack field to minimize the ef-

fects of fratricide.

Knowledgeable critics also believe there are other approaches which the Soviets could use to avoid fratricide and defeat Dense Pack. They could carry out an attack over time, destroying parts of the Dense Pack field in successive waves. And to insure that the United States did not fire its surviving MX missiles before later stages of the attack, the Soviets could deto-

nate nuclear weapons high above the field, generating radiation, blast, and turbulence that would destroy U.S. missiles if they were luanched. In effect, MX missiles would be pinned down in their silos, vulnerable to the next round of Soviet warheads.

Another tactic the Soviets might use would be to attack the Dense Pack field with very large warheads, such as the 20-megaton warheads that the SS-18 is said to be capable of delivering. Since one of these warheads could be used to destroy three or four shelters, extreme accuracy would not be required. Even if every U.S. missile silo were not destroyed, such a Soviet attack would bury them in rubble, making it virtually impossible for the United States to retaliate with MX.

If Soviet missiles could be timed to explode simultaneously, they could hit Dense Pack and avoid fratricide entirely. Although the administration claims that the Soviets currently do not have the capability to achieve the precise timing for such an attack, clocks accurate to a millionth of a second are already commercially available.

Other experts suggest that the Soviets could use "soft-landed" warheads that would hit the ground without exploding and could then be detonated simultaneously. Alternatively, the Soviets might develop "earth-penetrating" warheads that would not explode until after they had burrowed into the ground, where they would be shielded from the effects of other warheads.

Finally, even if Dense Pack can be made to work initially, there is little doubt that the Soviet Union will eventually develop measures to overwhelm the system. The testimony of the Joint Chiefs of Staff strongly suggests that Dense Pack would guarantee survivability for only 4 years.

Given the inherent weaknesses of Dense Pack, it seems likely that the Reagan administration has a secret and even more expensive agenda. behind its current MX plan. If the Soviets develop effective countermeasures, the United States will in turn seek additional means to protect MX, such as a new ballistic missile defense. This in turn would most likely entail abrogation of the ABM Treaty, one of the few real successes in the long struggle to achieve meaningful nuclear arms control agreements with the Soviet Union. By pressing forward with MX and jeopardizing the ABM Treaty, the administration would launch yet another escalation of the arms race-and this time the escalation would take place in both defensive and offensive weapons systems.

In sum, MX puts us on the path of a dangerous and destabilizing new round of the nuclear arms race, and that is a path which the United States should not take.

(The names of Mr. MOYNIHAN and Mr. MITCHELL were added as cosponsors of the motion to recommit.)

Mr. CRANSTON. So, Mr. President, we have had enough on this discussion. I believe I am not precluding anyone from speaking, but I move to table the Cranston motion, and I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient

second.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Oregon (Mr. HAT-FIELD) to table the motion to recommit of the Senator from California (Mr. CRANSTON). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is necessarily absent.

The VICE PRESIDENT. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 70, nays 28, as follows:

#### [Rollcall Vote No. 423 Leg.] VEAS\_70

	I EAS-10

## NOT VOTING-2

Goldwater

So the motion was agreed to. Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JACKSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Mr. President, I believe the matter now before the body is the Jackson amendment

The VICE PRESIDENT. The Senator is correct.

Mr. LEVIN. Mr. President, we are now moving to change Senator Hot-LINGS' amendment in the Appropriations Committee. The Hollings action in the Appropriations Committee was and is the high watermark in the very basic battle against the basing mode which really threatens our own securi-

This seemingly sound amendment of Senator Jackson makes a serious change in the Hollings amendment. The change is all wrapped up in two little worlds. It is called "expedited procedures." The Senate, under the Jackson amendment, gives up in advance-gives up in advance-the traditional rights of debate in this body that it would take 60 Senators to cut off. These traditional rights are changed, the rules of the game are changed, on the most important weapons system that we will probably ever vote on in our Senator careers.

I hope that we will keep the Hollings amendment, the committee amendment, and defeat the Jackson amendment and not change the rules of the game on this of all missiles, of all systems, of all votes. This needs a fullblown traditional Senate debate and does not need a change of the rules in

advance of that debate.

Mr. President, I hope that we will defeat the Jackson amendment.

Mr. EAGLETON and Mr. STEVENS addressed the Chair.

The VICE PRESIDENT. The Senator from Alaska is recognized.

Mr. STEVENS. I yield to the Sena-

tor from Wyoming.
The VICE PRESIDENT. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I rise in support of the Jackson amendment and to address the issue of MX funding, not simply because it is one of the most important questions that many of us will be asked to address during our time in this Chamber, but also because the President's decision on MX would seek to place my home State of Wyoming in a primary role in the Nation's defense

I am proud to say that Wyoming has always participated very willingly in the Nation's defense. Warren Air Force Base was activated on July 4, 1967, as Fort Francis E. Warren. In the 1800's it was a cavalry post and has changed its primary function a number of times in the intervening years—but has never slackened in its resolve to assist in providing for the Nation's defense.

We are now the center of the "scorecard" of the Soviet Union, the massive bullseye. That is not an extraordinary feeling for us, because we were the first State to have the Atlas missile in

1957. We have the Minuteman missile at this time.

I have a great deal of personal ambivalence about the MX. The ambiva-lence is not so great with regard to Dense Pack. I have a lot of trouble with that.

I can assure you that I have the same strong emotional and human feelings that have been expressed to me by many hundreds of my fellow Wyomingites since the President's recent decision. I feel the same ambivalence-the same tearing of loyaltiesthe same difficulties with the assessment of our priorities. And while it is most difficult to express these sentiments in a single statement, I do believe that the vast majority of my fellow Wyomingites recognize our Nation's need for a strong defense, and are willing to "do their share." At the same time, we must be assured that a major expense and a major defense system such as this will provide all of the protection and the deterrence, that we so obviously must have-and do so without waste and without the critical disruption of our lives or our environment. That is indeed human nature for we wish to be assured that any system deployed will continue to provide a deterrence for a reasonable period of time-and that without question the presently untried fratricide theory will work.

Only a very few days have elapsed since the full details of the MX Dense Pack basing plan and the site selection were made known to all of us. Now it falls upon us to fund or to deny those funds for implementation of this system. Wyoming is fully prepared to perform its defense duty, but it seems to me that many important questions have yet to be answered about Dense Pack basing. I, for one, would want to feel that this body made its crucially important decison only after a full and most careful analysis of this incredibly technical proposal.

To make a hasty judgment, to use this occasion as simply an opportunity to rattle the cages of the full birds over at the Pentagon, to flex congressional muscle-or to do any of this for reasons other than out of the most serious and sincere concern for the defense capability of our Nation-would be most reprehensible and irresponsible. This is not a time for posturing. This is not a time for "politics as usual." This is a time for the elected representatives of the people of the United States to be quite thoughtful and serious about its defense needs and to very seriously weigh with extraordinary care the many and varied consequences of our decision.

Beyond the technical questions that are posed by MX and its basing mode, we now find ourselves faced with an unusually awesome moral responsibility. We all yearn to reduce worldwide nuclear weapons—to reduce the specter of global holocaust. It is so ironic that we must now ponder the production of the most destructive force yet known to man in order that we might preserve peace. But I feel it must be done. It must be done logically and responsibly—but it must be done.

I hear very clearly those expressions which are often presented to me that we must take the first step in arms reduction-that we must at some point say "enough is enough" and that we must move toward weapons reduction even if it means placing us, initially, at risk. Ah, if only that could really be an effective way to reduce our supply of arms and the daily threats to our existence and our cherished way of life. But the government we are dealing with in the Soviet Union does not quite share our regard for human life and human rights. Its stated support for arms reduction does not carry the same meaning as we attach. History has certainly shown us that we cannot and must not base our defense on the simple assurance that they will "follow our lead." One need only cast a brief glance into more recent history to learn how the Soviets respond to those who seek freedom, but who are weaker than themselves. I suggest to those who would base our defense policy on "faith," visit with the people of Afghanistan, Poland, Czechoslovakia, and Hungary about "faith" in the Soviets' good intentions.

I have recently heard from a great many of the established organizations and the newly emerging groups who say they oppose funding for the MX because they "want peace." So do I. So does everyone in this Chamber, and almost every person in our Nation. But when one looks beyond the well meaning slogans and the catch phrases, we find there is much more to assuring the peace than simply commending it to those who would destroy us. Our choices are not easy. They are difficult morally. They are difficult technically. They

are difficult politically.

One point must be clearly made: I do not desire any form of "arms race." I desire that we do only what needs to be done—no more. I do not desire to achieve a position of awesome superiority with the Soviet Union—as that might well only launch them in the same direction. We must first strive toward a position of equality and then begin the effort of mutual and fully verifiable arms reduction.

I believe the Pentagon has well demonstated one fact: That we have now slipped into a position of defense vulnerability. I agree with the President that an effective land based missile is still necessary as the "third leg" of our defense Triad. To those who point to the total volume of our arms and say. "We now have all of the weapons to destroy the Earth many times over—

why do we need more?", I respond that the total "megatonnage" of our defense means little to us if we have not the means of assuring our enemies that we also possess the capability of protecting those arms from a first assault and also the willingness and ability to then use them. That is a key to this debate—for that is deterrence. Without real deterrence, it makes little difference how many tons of weapons and warheads we own.

I think we often find that we overlook the broad perspective when dealing with this sensitive issue. There are many ways in our free society that a proposal such as this one can be stopped or deferred. We have the means to halt a project based on objections to minor elements of an overall plan. That is the way it must be in a free society-but I would caution my colleagues to well recall that the Soviet Union has no such system-no such checks and balances. Its people are not "consulted" on such issues and its government's motives are not openly discussed-and are certainly not subject to debate and common acceptance. Recall that theirs is a system of government that by its very design is able to more readily pose a threat to the rest of the world.

I do have some very real concerns over the prospects of constructing the MX in our "own backyard"-concerns over the possible use of prime agricultural land that could be taken for the placement of the system-concern over the environmental damages that could occur during construction and dozens of other concerns-yes, those questions must be resolved. The Pentagon has assured me that each and every one of our concerns about environmental and social impacts that are being expressed by Wyoming's people are being most carefully reviewed, and that each and every one of the sensitive environmental laws which I helped to enact when I was a member of the State legislature will be fully respected and observed if the MX is deployed near Cheyenne. Those are truly significant problems, but problems that can be dealt with-problems that we can solve, problems over which we have control.

Of primary importance now is for us to maintain a broad view of the entire issue and understand that some sacrifice, some commitment may be necessary for the common good. And if we allow ourselves the provincial expression of saying, "not here—not this—not now"—then I feel we must also ask the questions, "then where—and what—and when?"

Consider that we now ask many other NATO nations of the world to accept U.S. defense systems that are designed for our protection as much as for their own. Are we to reject the placement of similar systems on U.S. soil? We cannot simply designate

someone else somewhere else to be the world's traffic cop. I believe that we must commit those resources and render those sacrifices that are absolutely required in order to preserve our society. We must match our commitment to the scope of the threat. No more, no less.

Some say it is a violation of God's will to amass nuclear arms that are designed to take the lives of other human beings. But would God's will be done if those who truly believe in Him, who spread His word, who do His work, fail to defend themselves and are therefore sponged from the face of the Earth by those who do not believe in Him-those who will not even allow others to speak and spread His wordthose who will not carry on His work? Can that really be God's will? I do not even suggest that I know the answer to that one-but it is a theological and practical question worth pondering.

Consider also in this great debate the multitude of basing modes for the MX that have already been presented—and rejected. Our Nation has pondered the basing of the MX missile in planes, on ships, in deep holes, shallow holes. hardened holes, dirigibles, in trenches, on rail cars and in a number of other ways. And for one reason or another—whether political, financial or technical—each of those plans was eventually scrapped.

If we were to deny this awesome weapon-even as reluctant as we may be to be forced to produce and deploy a destructive force of this magnitudewhat then do we deploy? I feel the people of our Nation believed the President when he said we need a land-based missile that would be resistant to attack and would be able to survive a first assault-for without that we would have no deterrence. We must have the clear assurance that war will not be waged by our enemies because of their knowledge that it cannot be won by them. So I ask again, if not MX-what? If not nowwhen? If not Dense Pack-then what? And with Reagan to the proposition that this is a first-strike weapon. If it were a first-strike weapon, we would just put it out in a clump of sagebrush and cover it with a cottonwood and have it there. That is not what it is. Therefore, I think it is a necessary part of our armaments.

Let me quote from a recent editorial in the Wall Street Journal. It refers to our need to determine alternatives if we are to deny the present proposals and states:

The important point is to recognize that there are alternatives to the MX, if only we were willing to seize them. That is the real lesson of the House vote, and learning it is the most important step we can take to enhance our national security. Unhappily it seems more likely that nothing will be learned, that the MX will be killed but nothing will take its place, that we will continuously that the MX will be killed but nothing will take its place, that we will con-

tinue to allow the quest for mirage-like agreements to cloud our thinking. If that is the outcome, the vote against MX will be precisely what President Reagan called it, a grave mistake and grievous error.

I also recall a statement of one of my Senate colleagues early in my tenure here when he was giving an address to a sincere group of persons deeply concerned about peace in the world. He said essentially that there are things that are worse than war and they are slavery, bondage, torture, loss of freedom, and it is well to keep those elemental things in consideration in the national debate.

I have not enjoyed the task of sorting through the MX in the State that I love, grew up in and was raised in, and which, in the most awesome scenario, would be just a hole in the ground. This will give us time to reflect and review. I shall support the amendment and I thank my colleagues for their courtesy.

The VICE PRESIDENT. The Sena-

tor from Missouri.

Mr. EAGLETON. Will the Senator from Alaska answer some brief questions?

Mr. STEVENS. I shall be happy to. Mr. EAGLETON. Will the Senator inform us how much has been spent on MX to date in previous appropria-

tions? Is it \$4 billion-some-odd? Mr. STEVENS. That is roughly the

amount, yes. Mr. EAGLETON. The bill before us, focusing only on R&D, how much is in this bill for R&D on the MX?

Mr. STEVENS. \$2,449,300,000 for R&D, of which \$1,674,300,000 is for the missile R&D and \$775 million is

for the basing mode R&D.

Mr. EAGLETON. If the Hollings amendment—the Hollings amendment is in the bill, but if the Hollings amendment, as soon to be perhaps amended by the Jackson amendment, is adopted, is any of the R&D money for the basing mode fenced in?

Mr. STEVENS. It is my understanding that only approximately \$215 million of the basing mode R&D could be spent under the interpretation of the Jackson amendment that I give it.

Mr. EAGLETON. So if the Hollings-Jackson amendment becomes law, then that \$775 million—about \$550 million of that cannot be spent because the Senator said \$215 million could be spent.

Mr. STEVENS. That is my under-

standing, yes.

Mr. EAGLETON. What will the \$215 million that is in the bill for R&D on MX basing mode be spent on?

Mr. JACKSON. Mr. President, will the Senator yield for a clarification?

Mr. STEVENS. Yes, Mr. President, I think the Senator could get the clarification better from Senator Jackson. There has been a change in this amendment since we had our conference. It is my understanding-I ask

the Senator from Washington, was my first answer correct?

Mr. JACKSON. There are estimated to be \$215 million available for the ongoing R&D in basing. The \$500 million is fenced under my amendment. It is not fenced under the Hollings amendment.

EAGLETON. The Senator fences \$500 million. My question is, if you fence \$500 million of the \$775 million in that account, what, then, is the other \$257 million or thereabouts going to be spent on?

Mr. JACKSON. \$215 million—I do not recall whether it is \$715 million or

\$775 million.

Mr. EAGLETON. Well, around here, \$50 million here and there does not amount to much.

Mr. JACKSON. Under our amendment, about \$215 million is available for the R&D ongoing work on the basing. The rest of it is fenced.

Mr. EAGLETON. Could the Senator from Alaska or the Senator from Washington or the Senator Texas tell me what the \$215 million unfenced is going to be spent on when this bill becomes law?

Mr. JACKSON. The \$215 million will be used to continue looking at various other alternative proposals.

Mr. EAGLETON. Basing modes. We are talking basing modes. But the amendment that we have offered prohibits any full-scale engineering and development on any mode, any mode.

Mr. STEVENS. The Senator is right. I would say to the Senator from Missouri that the emphasis should be that the money is available for any basing mode but it cannot be used for a fullscale engineering of any basing mode.

Mr. EAGLETON. But \$215 million. nonetheless, is going to be spent researching yet another basing mode? Will we include the 33 on the list that has already been previously mentioned by Senator Kennedy and others?

Mr. STEVENS. I would say to my friend that it could be spent. Whether it will be spent in this time frame is an entirely different question. I have no idea how much could be spent between now and March, and I would doubt not very much of this money because there is already carryover money from the previous appropriation.

Mr. JACKSON. May I further respond. It is my understanding that the \$215 million is adequate to take care of the R&D on the various alternative basing modes into the spring. We made these changes in the Hollings amendment because the Hollings amendment leaves open the \$700 million-odd for R&D in connection with various basing modes.

Mr. EAGLETON. My next question to the Senator from Alaska. In the bill there is then \$1.6 billion-plus for the

MX missile itself, R&D? Mr. STEVENS. R&D?

Mr. EAGLETON. \$1.6 billion-some-

Mr. STEVENS. That is right, \$1,674,300,000 for R&D for the missile.

Mr. EAGLETON. Would it be the opinion of the Senator from Alaska that if the ultimate decision within the next 6 months or thereabouts, less than 6 months, was that there is no defensible basing mode for the MX, a considerable amount of that \$1.6 billion that we are about to appropriate was wasted?

Mr. STEVENS. I would say that it would have been wasted if it had been spent but this is money which probably could not be spent by the time the decision will be made, and that is why I want the timeframe I say to my friend. Let me finish on just one thing because the Senator has his finger on the very thing that has bothered me. That money will build about 20 missiles. I want to repeat that. It will build 20 missiles for testing. What is the reason for us to continue building them if we are not going to have a basing mode? Let us decide the basing mode question as early as possible without a filibuster and make the deci-

As I said before, if it is the decision of the Senate and the Congress that there is no defensible basing mode system, I am going to join whoever wants to help in canceling that money for the continuing R&D of this missile. Now, we might shift it over to another missile system and, as I say, the Senator from Georgia and I discussed this. He has some good ideas in this area if we have to abandon this mis-

Mr. EAGLETON. Does not the Jackson modification make it possible to further postpone the ultimate decision on the MX basing mode?

Mr. STENNIS. No. I do not think so. Mr. JACKSON. On the contrary. May I answer?

Mr. STENNIS. Yes.

Mr. JACKSON. On the contrary. A decision is forced under the expeditied decision.

Mr. EAGLETON. By what date? From the President.

Mr. JACKSON. I modified at the suggestion of a number of Senators the mandatory requirement that the President submit it by March 1. We have said that it should not be earlier than March 1. So there will be some discretion. On the other hand, if you leave it stand the way it is, the money can go on and be spent the whole year on the basing mode without coming to any decision. The \$700 million we are talking about.

Mr. EAGLETON. I like the facet of your amendment, but under the other part the President might not send up his final recommendation, say, until July 1.

Mr. JACKSON. That would be, I think, something that I would not agree with. I think the real danger is that they might try and move too fast.

Mr. EAGLETON. The point I am making is the longer we postpone the day of reckoning, the longer we postpone the ultimate decision. We all know in this Chamber what that ultimate decision is going to be. I do not think there is anyone in the Chamber who disagrees as to what the ultimate decision is. There is no basing mode for MX; that the more money we appropriate in this bill for R&D will be wasted. So we will add to the \$4 billion-plus that has been spent in previous years a pretty good hunk of money out of a billion-six for R&D on the missile and probably \$215 million on the basing mode. Delaying the decision, which is what in essence we are doing with this little game we are playing here, is a very, very costly game and a very, very costly delay.

Mr. HART. Will the Senator yield? Mr. STEVENS. Mr. President, there is no decision for R&D. There is money in the House bill and money in the Senate bill. On the point of my good friend of the timeframe for the decision, as far as the Jackson amendment, it forces us to a decision early next year.

Mr. HART. Will the Senator from

Alaska yield for a question?

Mr. STEVENS. I am happy to yield. Mr. HART. Will the Senator from Alaska or the Senator from Washington or any other Senator remind the Senate of the terms of the SALT II treaty with regard to the testing of new missile types?

Mr. STEVENS. I would have to tell the Senator I do not have that text with me. I would be happy to get it. but I do not have the text with me.

Mr. JACKSON. As I recall, it was limited to certain variations in the configurations of the ICBM's. I believe the relevant reference is to paragraph 9 of article IV of the treaty which results in limitations at a later stage of the test flight sequence.

Mr. HART. It is the recollection of the Senator from Colorado that each side under the terms of the agreement, which both sides have agreed to live up to informally, was that each side was limited to the testing of one new

ICBM type.

Mr. STEVENS. I would say to the Senator from Colorado that the staff informs me that it contemplated one new type and at the time the discussion was about the MX type.

Mr. HART. Would the Senator from Alaska be able to inform the Senate of when the Air Force intends to flight-

test the MX?

Mr. STEVENS. I am told sometime

in January, February.

Mr. HART. Therefore, would it not be correct if in fact the Air Force undertakes that test and completes it that that would in effect be the missile type that the United States would stand them, because they both deal

be entitled to under the terms of the SALT II agreement?

Mr. STEVENS. I do not think testing is acceptance; no. I think we could test any number.

Mr. HART. Of course, the agreement permits us to test any number, but once a missile type is tested, then it is assumed for the purposes of the treaty that any further missile that is deployed is a missile of that type.

Mr. STEVENS. It is test and deploy, as I understand it, and therefore the mere testing would not be the selec-

tion of that one type.

Mr. HART. It would not represent the selection of that one type but for purposes of the counting rule under the SALT agreement, there is an assumption on both sides that if that missile is tested a deployed missile is assumed to be of that type or at least that capability.

Now, let me, if the Senator will indulge me, explain to our colleagues what that means. By the time, under this provision, the Senate of the United States is called upon to be presented by the administration a basing mode or a final decision on deployment, this missile will have been flight tested and for purposes of that agreement there will be an assumption at least by the Soviet Union that any future ICBM is an MX.

What that means, if I understand the situation, is that any further study by the Air Force, the Defense Department, or the administration, or anyone else, on a common missile or a socalled road mobile missile, or any of the other alternatives, is academic for purposes of an arms-control agreement.

Mr. STEVENS. I am informed that the Senator's conclusion is not correct because it does not count in terms of this limitation until it is selected and deployed. The money that is fenced is the missiles for deployment. The money for R&D are missiles for test. Those test missiles are not counted in the system until you actually select it for deployment.

We have no money here for deployment. We are not intending to deploy it until the basing mode is selected.

I remind the Senator that during the last few weeks I was the author of the amendment that prohibited putting money into a single basing mode R&D concept, so we always had our R&D going at more than one basing mode so we would not lose totally the investment in R&D in the missile if we ended up with a basing mode that was rejected. We would have nothing to fall back on.

We are about the situation we are in now. We are going to review all the other basing modes, but this concept the Senator raised is not in any way affected by the Jackson amendment or the Hollings amendment, as I underwith money that, by definition, is in the bill and is spent and would not be available for expenditure for missiles for deployment. In other words, we would be prohibited from making the decision under the treaty until the basing mode is approved. That is my understanding.

Mr. HART. I appreciate the comments by the Senator from Alaska. I think a more authoritative view will disclose that, once a certain threshold is passed of testing of a new type, that for purposes-if the Senator from Utah would like to join us in colloquy we will be glad to have him.

Mr. GARN. I spent a lot of time with the Senator from Colorado debating the issue 3 or 4 years ago.

Mr. HART. I do not believe this issue has been debated in any case.

Mr. GARN. I wish to point out that I said to the Senator from Colorado the Soviets are testing two or three right now.

Under the Senator's interpretation, right now the Soviets are in absolute violation three or four times over for the new generation of missiles they are testing.

Mr. HART. I think I am still discussing with the Senator from Alaska.

The Senator from Colorado is not suggesting a violation of the treaty. The Senator from Colorado is suggesting, for purposes of counting rules and SALT I and II, that after a certain threshold is passed a testing of a new type the only way to verify any arms control agreement is to presume that the next generation of missiles deployed are the missiles of that type. Otherwise, there is no way to carry out an arms-control agreement.

I am not saying anyone violated the treaty, but if any Senator intends to vote on this proposition knowing that a flight test of MX is scheduled for February of next year and believes that that missile can be voted against in March and not complicate profoundly the problems of agreeing to an arms-control agreement, whether you call it SALT II or START or anything else, then that Senator is badly deluded because there is a serious problem involved here.

I would finally just say to the Senator from Alaska or ask, if I may, whether after voting on the Jackson amendment it would still be in order at some time before the disposition of this resolution to offer an amendment

on the MX question.

Mr. STEVENS. It is my understanding, in answer to that question, it would be possible to reach the money that is in the bill for R&D or for the procurement money—that would be fenced by this action-but the other money would be reachable. I would only say to my friend that the money that has already been available for expenditure under existing law is the money that is going to be used in January and February for the testing. None of the money before us would be affected. That money is already there and is available for expenditure for that testing.

Mr. HART. If I may clarify that, the Senator from Alaska is saying that funds are already authorized and appropriated for flight testing of the MX and are not included in this resolution.

Mr. STEVENS. The existing continuing resolution allowed them to continue at the R&D at a little bit higher than the prior rate and they have money, and it is being committed. It is money that is being committed already for that testing.

Mr. HART. I thank the Senator.

#### MX STRATEGIC PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Nation's strategic posture in relation to the Soviet Union has been the subject of mounting confusion over the last few months. The need to modernize our strategic arsenal, particularly our land-based ICBM's and our bomber forces, has been apparent for some time. Yet, the decisions which have been made by the President, at the recommendation of Secretary of Defense Weinberger, have led to uncertainty and serious controversy.

This confusion has been generated partly by overly alarmist presentations and rhetoric by the administration regarding the strategic balance. It has been accompanied by what now appears to be an ill-advised formulation for basing the MX missile. A torrent of criticism, even ridicule, has greeted the Dense Pack basing plan announced by the President on November 22d of this year. It has been revealed that the plan has been recommended, not only over the very serious reservations of the chairman of the blue-ribbon commission created to examine basing options, but also over the objections of a majority of the Joint Chiefs of Staff.

The result is that the Congress is being placed in the position of having to second-guess, to reevaluate the administration's recommendations in the strategic area. Some may question how technically capable Congress is of fully evaluating the various options presented to us by the executive branch. Yet, it appears that we have little choice. The ineptitude shown by the administration in formulating a rational defense plan for the Nation has contributed greatly to the nearly complete unraveling of the national consensus for higher levels of defense effort, which the administration enjoyed 2 years ago. We have seen a squandering of enormous faith and good will toward major increases in defense spending. It is becoming increasingly difficult now, I am afraid, to retain the confidence of the American people and the Senate in the ability of

the Department of Defense to fashion an appropriate, cost-effective series of priorities in the defense area.

The President recently made a televised presentation to the American people on the Nation's defense posture. The sweeping implication of the presentation was that we have become inferior to the Soviet Union, and are slipping further behind in all defense categories. Such a proposition is subject to dispute.

It is true that the Soviets have more missiles (1,398) than does the United States (1,052). These strategic missiles have substantially more throwweight and twice the number of reentry vehicles than do ours. Specifically, the Soviets now are fielding some 5,500 reentry vehicles, while the United States

While this imbalance in land-based missilery is worrisome and needs correction, it should not obscure the fact that the United States has a decided advantage over the U.S.S.R. in bombers in terms of numbers, payload, and penetration capability. Further, we are modernizing our bomber force with Steath techniques, thus assuring our lead in this area for the foreseeable future.

Furthermore, the United States has a decided advantage over the U.S.S.R. in submarine-launched ballistic missiles—the most survivable leg of the triad. We have substantially more reentry vehicles in this prong of the triad, 5,400 of them, with greater accuracy than the Soviets, who possess 1,900 such vehicles. Also, our submarines are far quieter and more difficult to detect than are the Soviets.

In addition, we are now placing cruise missiles into our operational inventory, far ahead of the Soviets.

The sum total of strategic reentry vehicles indicates that the strategic balance is, indeed, one of rough parity. The United States has a total of some 7,650 strategic reentry vehicles, the Soviets some 7,400.

Despite this parity, modernization of the land-based missile leg of the strategic triad is essential. Abandonment of the land-based leg would not leave the Nation with a Dyad providing acceptable deterrence against Soviet aggression. Instead, it would allow Soviet targeting to proceed against the bomber leg, throwing that prong of the arsenal into question as well. There is, therefore, a continuing need to engance U.S.-land-based ICBM survivability. Although it is probably impossible to ever achieve invulnerability for U.S. ICBM's-indeed, pursuing the illusory goal of invulnerability would simply push the arms race to new heights without any resolution-it is imperative to first, complicate Soviet target planning; second, raise the level of uncertainty over Soviet ability to achieve a knockout of our land-based forces in a massive surprise attack;

and third, force continued large Soviet investments directed at putting our ICBM's at risk.

The MX is an attempt to reach these land-missile enhancement objectives. Abandoning the MX without formulating another solution to growing Minuteman missile vulnerability is unacceptable.

The difficulties in reaching an agreeable MX basing method over the last few years may be a result of improper sizing of the missile. The difficulties might be alleviated with development of a smaller missile allowing easier deception and mobility techniques. A number of alternatives to the MX have been proposed over the last several years by various Senators. In the event that the Senate is unable to arrive at a consensus over an acceptable basing mode for the MX, an evaluation of several other missile proposals should be made available by the Department of Defense. Such studies should be mandated now so that they are available during the same timeframe that we are examining Dense Pack and other MX deployment options.

Thus, I am particularly pleased to cosponsor the study amendment which is being offered by Senators Nunn and Exon, which requires a complete evaluation of alternative MX basing modes and missile designs by DOD. This would frame the Nation's strategic debate in a very responsible and comprehensive way next spring, and I think it would begin to remove much of the confusion which now is fogging up the Nation's strategic program.

Given the uncertainties over the basing proposal for the MX, it appears illogical to procure the missile while the evaluation of basing alternatives proceeds. Indeed, it is entirely possible that an alternative to the MX itself will find a consensus over the course of the next year. Therefore, I would congratulate the efforts of the distinguished Senator from South Carolina (Mr. Hollings) in fashioning a positive fence around the procurement funds until Congress has had a full opportunity to examine these matters. I would also support efforts to insulate the Senate's deliberations in this area from the threat of a filibuster. The Nation's strategic posture cannot be allowed to atrophy because of the actions of a small minority in the Senate to frustrate our decisions in this area. Nevertheless, this is a complex and difficult area, and we will need ample time to deliberate the options which present themselves. Our deliberation, therefore, should go forward in a timely way. The Senate should not allow itself either to be stampeded or frustrated.

Appropriate consideration must be given to the arms-control impacts of

the administration's strategic recommendations. I fully supported the President's initiatives in moving to the negotiating table on both intermediate range weaponry in the European theater and strategic weaponry. We all want those talks to be successful. Without an arms-control framework, no U.S.-land-based missile system will be survivable in the long run. Restraint is needed, through an armscontrol framework, in order to retain a

viable land-based system. The administration has maintained that if the Senate does not give it production funds for the MX missile, its hands will be tied in Geneva. Just this week, I welcomed the statements by the President that he would accept a positive fencing arrangement for production money. This is a very welcome position by the administration. I would hope that the administration will no longer threaten the Congress with jeopardizing the achievement of arms-control agreements with the Soviets. I would point out that, first, the administration has not always been an ardent promoter of arms talks with the Soviets. It was only after a great deal of pressure from many Senators, as well as the activities at the grassroots, that the administration got serious about arms-control negotiations. Second, the administration overlooks the fact that its Dense Pack proposal may reasonably be interpreted as a violation of the SALT II Treaty draft-which the administration has said that it and the Soviets are both abiding by. Administration officials, such as Messrs. Nitze and Rostow, testified during the hearings on the SALT II Treaty that the vertical multiple-protective shelter proposal of the Carter administration was unquestionably a violation of SALT II fixed launcher limits. Now these same officials cannot possibly maintain that Dense Pack, which is clearly a less mobile system than the protective shelter proposal, does not violate SALT II limits. They cannot have it both ways.

Furthermore, there are clear indications that, in order for Dense Pack to be a viable system, it will need to have an anti-ballistic-missile point defense system protecting it. This, of course, would completely render a dead letter the treaty we have signed with the Soviets banning such systems.

And so, the administration cannot argue that by holding up the MX basing mode the Senate is hurting our negotiating efforts, while that very proposal belies this Nation's commitment to arms control.

The administration has also advertised the Dense Pack system as a vital bargaining chip for use in Geneva. Presumably, it could be traded off for something valuable that the Soviets are deploying. But how valuable is a bargaining chip that does not work?

The distinguished Senator from Washington (Mr. Jackson), one of the most knowledgeable in this body on these matters, has stated that the Dense Pack basing system would be secure against Soviet attack for perhaps 4 years. The system would cost at least \$30 billion, probably substantially more. That is a high price to pay for a 4-year life-too high. Dr. Charles Townes is reported to have written to Secretary Weinberger, indicating that Soviet countermeasures to Dense Pack might be developed almost simultaneously with our deployment of the system. How valuable is such a marginal proposal, then, as a bargaining chip? If it is so marginal, a fact which hardly would escape Soviet planners, then what would the Russians really be willing to give up in return?

I suppose that if we in the Senate were afraid of being accused of hurting our arms-control negotiators in Geneva, we should just go along with any scheme the administration sends up to us. Then we would not, however,

be doing our job.

It should not be too much to ask for a system that is first, workable; that is, enhances the survivability of our land-based ICBM's; second, cost effective; that it will work for considerably longer than 4 years; that will help build arms-control agreements and not put them in jeopardy; and, last, that has been very thoughtfully constructed with the technical problems worked out to an acceptable range of risk. On none of these counts does the Dense Pack program appear to score very high. The Senate will, indeed, have to get into this program in substantial depth.

I am pleased to announce that the Senate Intelligence Committee, at my request, has agreed to do a detailed report on various aspects of the MX basing proposal, including Soviet countermeasures, the question of silo hardening, and the issue of ballistic missile defense. I ask unanimous consent that the text of the letter I recently wrote to both the chairman and ranking Democrat on the Intelligence Committee asking for this work be inserted at this point in the RECORD. I believe the study will be of substantial assistance to the Senate in sorting out the complicated issues which we will be confronted with early next spring in making a final decision on Dense Pack.

The letter follows:

U.S. SENATE, OFFICE OF THE DEMOCRATIC LEADER, Washington, D.C. December 8, 1982. Hon. DANIEL PATRICK MOYNIHAN,

Vice Committee on Intelligence, Washing-

ton, D.C.

DEAR MR. VICE CHAIRMAN: The President's recent selection of the "Dense Pack" basing mode for the MX missile presents Congress with defense decisions of momentous military, fiscal, and arms control ramifications. Therefore, it is important that Congress have as much solid information as possible

about the strengths and weaknesses of the selected basing mode to demonstrate to the American people that scarce defense dollars are being spent prudently. Since several of the critical factors influencing our eventual resolution of this question directly involve intelligence data and analyses, the Select Committee will have a unique role to play in our deliberations.

Accordingly, I think it would be extremely helpful for the Senate to have a classified independent study and analysis prepared by the Intelligence Committee of all the available intelligence information on this subject, including assessments which bear

upon:

The survivablity of the missile in the "Dense Pack" basing mode, both with and without the protective features of an antiballistic missile system in association with

Likely Soviet reaction to their strategic programs to deployment of MX in the "Dense Pack" basing mode, including their ability to develop effective countermeasures to it: and

Present hardness of Soviet silos and the U.S. ability to exploit and improve upon Soviet hardening techniques to achieve the "superhard" levels required by the Air Force for "Dense Pack" configuration.

Your Committee's guidance in these areas is needed for the Senate to make a prudent and responsibile decision about MX and "Dense Pack," and I look forward to receiving it.

Sincerely.

ROBERT C. BYRD.

NEW SOVIET MISSILE DISINFORMATION

Mr. SYMMS. The Soviets have used disinformation recently in order to conceal two of their violations of SALT II, and a prominent U.S. newspaper was the victim.

The Washington Post of December 8, 1982, and December 10, 1982, contains an interesting new case of Soviet disinformation. A story by Dusko Doder, datelined Moscow on December 8 entitled "Soviets Seen Near Arms Escalation" stated:

But Ustinov's warning that the Soviets would match the MX with a similar weapon closely followed the disclosure that the Soviet Union had tested a new intercontinental ballistic missile within the past three weeks. The Soviet missile is believed to be the SS-16 . . . military specialists here believe that Moscow has a powerful incentive to deploy a new and mobile intercontinental ballistic missile . . . experts here say the main reason the Soviets have refrained from developing the SS-16 fully is that its deployment would drastically reduce chances for future arms control agreements with the United States. (Italics added.)

On December 10, 1982, The Washington Post stated:

An article Wednesday about Moscow's attitude toward the MX missile program incorrectly suggested that the latest Soviet missile test involved a mobile SS-16 rocket. U.S. sources said the rocket involved was a version of the larger SS-19 (Italics added)

The Soviet disinformation consists of the fact that Soviet military specialists in Moscow stated that the new Soviet ICBM being tested was the mobile SS-16. Further, the Soviet military experts were trying to imply that the alleged SS-16 testing being resumed had been interrupted for several years due to Soviet concern over the negative impact of such testing upon arms control. Thus, the Soviets were trying to argue that they had previously exercised arms-control restraint by not testing their mobile and unverifiable SS-16 for several years.

Why would the Soviets try to mislead the United States about the new missile they are testing? There are several reasons for them to try to hide their equivalent to the U.S. MX. First and most significantly, Soviet testing of their new medium to heavy ICBM is being done with full encryption of its telemetry and thus in violation of the SALT II Treaty. (See attached newspaper article.) SALT II states in paragraph 3 of Article XV:

Each Party undertakes not to use deliberate concealment measures which impede verification by national technical means . . .

More specifically, the Second Common Understanding to paragraph 3 states further that:

Each Party is free to use various methods of transmitting telemetric information during testing, including its encryption, except that, in accordance with the provisions of paragraph 3 of Article XV of the Treaty, neither Party shall engage in deliberate denial of telemetric information, such as through the use of telemetry encryption, whenever such denial impedes verification of compliance with the provisions of the Treaty," (Italics added.)

In regard to the new medium or heavy Soviet ICBM being flight-tested, the United States needs to be able to verify launch-weight, throw-weight, number of warheads, number of stages, type of propellant, and diameter of stages. All of these characteristics of the new Soviet ICBM now being flight-tested are being concealed from U.S. verification monitoring due to the almost total Soviet telemetry encryption.

The second reason that the Soviets would want the U.S. public to believe they were testing their mobile SS-16, rather than a new medium-heavy ICBM to replace the SS-19, would be

in order to allay U.S. alarms about reports of SS-16 deployment activity at their Plesetsk Test Range. There have been reliable reports that the Soviets have deployed up to 200 mobile SS-16's at their Plesetsk Test Range, in flagrant violation of the SALT II Treaty. Reports of resumed SS-16 testing would allay these reports of SS-16 deployment. Now that the Pro-

tocol to SALT II has expired, SS-16

flight testing is no longer prohibited. In sum, the Soviets have given the Washington Post disinformation on their new ICBM for two purposes: To at least temporarily cover up their new medium-heavy ICBM testing in violation of SALT II, and also to mask their SS-16 deployment activity equally in violation of SALT II. The Washington Post has admitted that it was

fooled, thus implicitly conceding the effectiveness of Soviet disinformation.

Mr. GRASSLEY. Mr. President, in approaching the subject of funding for the MX missile system, I would first stress that whatever our position may be regarding development of a new strategic weapons system, we must rededicate ourselves as leaders to support carefully crafted mutual arms restraints and verifiable arms reductions. The balance of strategic power is very delicate and necessitates our concerted efforts.

I must also stress that our Nation's economy is in a very delicate condition. Our care in deciding the appropriateness of particular spending measures is being carefully scrutinized by the American people, for we are stewards of the Nation's trust.

The measure presently under consideration would prohibit the full-scale expenditure of funds for the MX missile production program unless both Houses of Congress have passed resolutions approving a Presidential plan delineating a specific basing mode. This compromise approach to the MX program has resulted from careful analysis and strenuous debate. I believe it is strategically sound because it provides an opportunity for extensive analysis of the strengths and weaknesses of this proposed strategic system. The compromise is also economically rational because funds are not being appropriated for an MX basing system that has narrow support.

As this body debates the issue of funding the MX missile system, \* would without hesitation suggest that there is no one in this great body who relishes the very sobering task of analyzing and critiqueing a strategic nuclear weapon system with such potentially awesome destructive capability as the MX system. Undoubtedly there are Members of this Senate as well as the House who know very personally that war is indeed hellish, some carrying permanent scars from those experiences. All of the Members of Congress would surely hope and pray, especially at this time of the year, for peace to reign on Earth; not merely a cessation of conflict, but a peace based on twin foundations of liberty and justice. We would often wish that the world did not daily face active threats to peace; indeed, we wish that the delicate balance were not broken so often by violence and conflict between parties. We would wish that trust between nations would be the most evident characteristic of their relationships; yet truces and agreements collapse daily or simply remain tentative proposals. And of course, wishing does not make it so.

The reality of the world cannot accurately be pictured as a place where all problems are tidy and neat; where all solutions are obvious to all parties at all times. When facing the complexities and sobering realities of the prospect for the MX missile system, we must approach the issue with totally realistic appraisals of the strategic situation in the world. What is that situation? From 1950 to the early 1960's the United States enjoyed a strategic superiority over the Soviet Union with balanced defenses and a strong counterforce capability. The development of the defense triad system of: First, bomber force; second, land-based missiles; and third, submarine-launched missiles took shape as the Soviets pressed to establish a strategic force with long-range bomber production, increased deployment of intercontinental ballistic missiles, increased spending in research and development and development of four new ICBM's. In the midsixties the United States began to deemphasize defense of facilities and counterforce capabilities while pursuing arms control. In that same period the Soviets set in motion a program of increased ICBM deployment greater than the United States, emphasizing concerted development of accurate, survivable, and massively retaliatory nuclear systems. From the late 1960's the strategic situation transformed noticeably. In 1968 Secretary Robert McNamara froze landbased missiles at 1,054, where they remain today. No new U.S. strategic bomber has been built and B-52's, which once numbered 1,300 and now number only 316, are older than any of the servicemen flying them. Total U.S. nuclear megatonnage has shrunk by more than 50 percent since 1968 and the Polaris submarines of that era are rapidly becoming obsolete. Additionally, since 1962 U.S. defense spending in constant dollars has remained remarkably constant and the proportion of defense spending devoted to nuclear forces has remained near 9 to 10 percent, the United States has for years essentially allowed the Soviets to catch up in nuclear power. The Soviets have answered the near-freeze by the United States with sharp increases in strategic systems. Secretary of Defense Harold Brown once described the U.S. experience with the Soviets in this way: "When we build, they build. When we stop building, they build." In the past decade alone, the Soviets have outspent the United States for strategic systems by over \$290 billionenough to pay for the entire B-1, MX and Trident programs three times

The debate about the necessity of the MX missile system must be viewed against this historic and strategic backdrop. It should also be noted that the MX system has a long history. Presidents Nixon, Ford, and Carter urged development of a new strategic system, which would eventually allow older, more numerous land-based mis-

siles to be phased out. Many in Congress during that same period have strongly urged that the MX system be developed, based on the analyses of technical strategic experts. However, care must be taken in analyzing the appropriateness of funding at such levels as we are here considering.

I opposed the previous plan submitted by President Carter which would have established a race-track basing mode. It appeared to be environmentally, socially, and economically unsound. I have also expressed concern about the Dense Pack basing mode recently submitted because of its narrow support in some technical and military circles. Though there may be broad agreement about the need for an effective strategic deterrent. I for one will not simply throw dollars at the problem. Until there is a convincing case made for a survivable missile in a survivable basing mode I will not blindly support a large production program for the MX missile system. Our economy is too deeply recessed and our strategic problems are too serious to allow this body to incautiously appropriate funds for a basing program that is ill-conceived and narrowly supported. I will support the compromise agreement which appears to be strategically and economically most reasonably crafted.

WE MUST SUPPORT THE PRESIDENT'S MX DENSE PACK DEPLOYMENT DECISION

Mr. SYMMS. Mr. President, I rise to support President Reagan's MX Dense Pack deployment decision. We need to deploy the MX in order to preserve world peace and international security. All Americans and all Senators are in favor or peace and international stability. MX deployment serves the cause of peace. There are several major specific reasons why I support the President's MX deployment deci-

First, the MX missile, independent of its basing mode, will contribute significantly to the deterrence or a possible soviet first strike. In this way it helps preserve world peace.

Second, MX has the capability to redress the Soviet counterforce preponderance. In this way MX will bolster deterrence and peace.

Third, MX is the only weapon system available from 1986 to 1990 which can counter the huge Soviet SS-18 and SS-19 force. It is needed to Soviet counterforce balance the threat.

Fourth, MX in Dense Pack deployment will have greatly enhanced hardness, which will greatly increase uncertainty for Soviet target planners at relatively low cost to the United States here again, it will bolster deterrence and peace.

Fifth MX, will motivate the Soviets to begin meaningful arms reduction talks. Arms control negotiations, of course, serve the cause of peace.

Sixth, the U.S. creation of a survivable ICBM capability will enhance strategic stability, and make nuclear blackmail, crisis, and war less likely. Seventh, a U.S. failure to deploy MX

on American soil now would make deployment of long range theater nuclear forces in Europe more difficult if not impossible.

Mr. President, I have several additional specific reasons for supporting President Reagan's decision to deploy the MX. These are as follows:

First, if we do not deploy MX, we would acquiesence in the Soviet Union's massive strategic buildup during the past decade of SALT. During the same period, America unilaterally restrained its own strategic forces significantly.

Second, if we do not deploy the MX. we will codify and make permanent dangerous Soviet strategic advantages. Soviet strategic superiority threatens world peace.

Third, we need to deploy MX as a replacement for aging and vulnerable U.S. systems such as the Titan II and Minuteman ICBM's.

Fourth, we would undercut NATO deterrence if we fail to deploy MX.

Fifth, failure to deploy MX would hopelessly reduce U.S. bargaining leverage in arms control negotiations, because U.S. unilateral restraint would prevent us from having any systems to trade

Sixth, failure to deploy MX would undermine U.S. leadership of the free world and would damage the cohesion of the NATO and United States-Japanese alliances. This would be a setback for world peace.

In sum, a few additional important facts related to MX deployment need to be stressed:

American defense spending has been relatively level over the years, while domestic spending has increased by three times;

Our strategic forces are a small part of our defense budget, and cost less now than in the sixties:

The Soviet Union has spent far more on military, in particular strategic forces, than the United States;

Our nuclear stockpile has declined significantly in numbers and total megatonnage since midsixties;

We have fewer nuclear missiles and bombers than in the sixties;

Modernization of our strategic forces

is long overdue: Programs must be funded now for our defense into the 21st century.

Here are some further facts detailing Soviet strategic buildup and U.S. restraint:

Since SALT I was signed in 1972, the U.S.S.R. has spent approximately \$140 billion more than the United States on strategic forces.

U.S.S.R.: In the last 15 years, 68 SSBN's deployed in five new or improved classes.

United States: Now deloying Trident submarines, the first SSBN's built since 1967.

U.S.S.R.: Since SALT I, about onehalf of SLBM force replaced with three new SLBM types: A new SLBM type is being tested.

United States: One new SLBM deployed.

U.S.S.R.: Since SALT I, essentially entire ICBM force replaced with 10 variants of three new ICBM's.

United States Minuteman III modified, but no new ICBM's deployed.

U.S.S.R.: Since Salt I. over 250 backfire bombers with inherent intercontinental range.

United States: No new intercontinental bomber in over 20 years.

U.S.S.R.: Since SALT I and ABM treaty, substantial ABM upgrade of single permitted site.

United States: Only ABM site, dismanted in 1976.

Most United States strategic launchers are obsolete. Here are the facts on the relative age of U.S. strategic forces:

Twenty-two percent of American warheads are on ICBM's. Of these, 23 percent are on ICBM's over 15 years old; none are on ICBM's less than 5 years old;

Fifty percent are on submarines. Of these, 92 percent are on submarines 15-20 years old:

Twenty-eight percent are on bombers, which average about 20 years old;

Only 4 percent of total U.S. warheads are on launchers less than 5 years old; 77 percent are 15 years or older:

In contrast, Soviet warheads are on modern launchers;

Seventy-two percent of Soviet warheads are on ICBM's. Of these, 89 percent are on ICBM's less than 5 years old, and 99 percent are on ICBM's less than 10 years old;

Twenty percent are on submarines. Of these, 99 percent are less than 10 years old;

Eight percent are on bombers. Of these, 55 percent are on backfires, which average less than 5 years old:

Fully 70 percent of total Soviet warheads are on launchers less than 5 years old; 95 percent are on launchers less than 10 years old.

As a result of its massive buildup of strategic forces, the already tremendous Soviet advantage will continue to increase. Modern, powerful, and survivable Soviet forces would be effective for many years, while a large portion of American forces will become ineffective due to obsolescence and Soviet defensive measures.

As I have stated, since SALT I was signed, the U.S.S.R. has spent \$140 billion more than the United States on acquisition of strategic forces.

If the United States spent this \$140 billion, Soviet strategic spending advantage, this would be enough to:

Modernize all U.S. strategic offensive forces: 100 modern land-based missiles (MX); 100 modern bombers that can defeat Soviet defenses and provide the flexibility of a manned penetration; 3,200 air-launched cruise missiles to provide a highly accurate system capable of penetrating Soviet air defenses; 20 modern, quiet submarines (Trident), equipped with longrange missiles that allow the submarines to patrol in home waters.

Modernize our air-defense system to counter the growing Soviet bomber threat: 12 airborne warning/control systems (AWAC's); 5 squadrons of modern interceptors (F-15); an "over the horizon" radar to improve early warning; improvements to the longrange early warning radars (DEW line); reduce vulnerabilities on our command and control communications and intelligence infrastructure; and defend MX against a ballistic-missile attack.

The MX deployment program would cost only \$26 billion over the next 10 years, an average of only \$2.6 billion per year.

Aging American strategic forces cannot maintain deterrence indefinite-ly.

Here are the facts on our SSBN's/SLBM's.

Most American SSBN's face block obsolescence in early 1990's.

SLBM range must be extended by Trident II missiles in order to increase survivability of submarines.

A large, vigorous Soviet antisubmarine warfare program would be largely unaffected by freeze.

Here are the facts on our ICBM's. Minuteman is vulnerable and incapable of attacking sufficient Soviet hard targets to maintain deterrence.

Here are the facts on our bombers. The Soviet air defense system is massive, and is the most effective air defense system in the world.

The Soviets have 5,000 radars, 2,500 interceptors, and 10,000 SAM's.

ALCM is needed as standoff weapon. B-1B is needed to escape destruction on ground and to penetrate.

Mr. President, one of the virtues of the MX ICBM in the Dense Pack deployment mode is that it violates the unratified SALT II Treaty. The Soviets have been flagrantly violating the SALT II Treaty since late 1979. Over 10 separate Soviet SALT II have been documented and reported in the press. SALT II has been made a dead letter by the Soviets. Their massive SALT II violations are indisputable. Thus the time has come for America to cast SALT II aside and deploy MX.

Regrettably, President Carter and President Reagan have defied the Senate's prerogatives in contravention of the treatymaking power of the Consti-

tution. Both President Carter and President Reagan committeed the United States to compliance with the SALT II Treaty, without the advice and consent of the Senate. This U.S. SALT II compliance policy under the Reagan administration began March 1981, with a State Department announcement that the United States would not undercut the SALT II Treaty, as long as the Soviets did not undercut SALT II. But the U.S. Constitution says nothing about giving the Soviets a role in deciding whether or not the United States ratifies and complies with a treaty. Moreover, the Senate has a voice in U.S. treaty compliance. Further, on May 30, 1982, President Reagan himself stated:

As for existing strategic arms agreements, we will refrain from actions which undercut them so long as the Soviet Union shows equal restraint.

SALT II is an existing arms control agreement, although it is an unratified treaty. The U.S. Constitution states that:

He (i.e., the President) shall have power, by and with the advice and consent of the Senate to make treaties provided two-thirds of the Senators present concur...

This constitutional language is being contradicted by the President's policy that the United States not undercut SALT II contingent upon similar Soviet behavior. Further, the word "undercut" could even be interpreted to mean that the United States is bound to comply not only with the precise provisions of SALT II, but also with the undefined "spirit" of SALT II as interpreted by the U.S. President or even the Soviets. Thus, the President's policy of not undercutting SALT II is in effect Presidential ratification of the SALT II Treaty, committing the United States to compliance with SALT II's provisions. Not only have the Soviets officially never informed the United States that they will not undercut SALT II, but they are in fact undercutting SALT II with their many SALT II violations.

Thus, the Soviets have all the benefits of U.S. compliance with SALT II, while they themselves have accepted no obligations.

The President's policy of compliance with the unratified SALT II has official, even legal, status as a Department of Defense directive. Department of Defense Directives 5100.7 and 5100.72, and Air Force Regulation 28-1, require U.S. compliance with the unratified SALT II treaty. Further, these directives require quarterly reports from the military services on U.S. compliance with the unratified SALT II treaty

There are many examples of U.S. unilateral compliance with the unratified SALT II treaty. The following listing is probably only partial:

First. The U.S. unilateral deactivation of 292 strategic delivery vehicles— 160 Polaris SLBM's, 54 Titan II

ICBM's, and 80 B-52D bombers—counted in the SALT II treaty and in its data exchange, an integral part of the treaty.

Second. The U.S. modification of B-52 bombers to carry "strakelets" on those models which are also being equipped with air-launched cruise missiles. These "strakelets" are supposed to be "functionally related observable differences" required by the unratified SALT II, and they cost about \$80 million.

Third. The U.S. redesigning of the B-1B bomber in order to carry two fewer air-launched cruise missiles, 20 instead of the 22 each is capable of carrying, in unilateral compliance with the unratified SALT II Treaty.

Fourth, the U.S. cancellation of deployment of 50 or 100 stockpiled Minuteman III ICBM's in compliance with the unratified SALT II Treaty's ceiling of 1,200 MIRV'ed missiles.

Fifth. The U.S. limitation of the throw weight of the MX ICBM to somewhat above 3,600 kilograms, in compliance with the unratified SALT II Treaty.

Sixth. The U.S. limitation of the launch weight of the MX ICBM to 90,000 kilograms, in compliance with the unratified SALT II Treaty.

Seventh. The U.S. limitation of the number of warheads on the MX ICBM to 10, instead of 14, in compliance with the unratified SALT II Treaty.

Given the above seven examples, President Reagan's decision to deploy the MX in the Dense Pack basing mode is not surprisingly being justified as being in compliance with the unratified SALT II Treaty. Both Defense Secretary Weinberger and Assistant Secretary Perle argue that MX Dense Pack does not violate the SALT II Treaty. Thus the United States has constrained its strategic forces in eight significant ways. The administration argues that the MX canister, not the silo, is the launcher, and that this launcher is mobile. This argument, however, would be much more credible if the number of silos was greater than the number of canisters, and if the MX transporter-erector was also capable of launching the missile from its canister.

Instead, there are planned to be 100 canisters deployed in 100 silos. There is no reason to move each canister, because there are no extra silos, which in addition are to be very close together. Moreover, the canister can not launch the missile from the transporter-erector. Indeed, the only way the missile will be launched operationally will be from its silo. Indeed, logic and all observable characteristics of the MX Dense Pack suggest that the silo is the fixed ICBM launcher.

But article IV of the unratified SALT II Treaty states that:

contruction of additional fixed ICBM launchers

(2) Each party undertakes not to relocate fixed ICBM launchers.

Thus, each of the 100 new MX Dense Pack silos would violate either one or the other of the above provisions

In addition, article V, paragraph 2, of the unratified SALT II Treaty states that:

. each party undertakes to limit launchers of ICBM's and SLBM's equipped with MIRV's, and ASBM's equipped with MIRV's, to an aggregate number not to exceed 1,200.

Due to the fact that at least seven Trident submarines carrying 168 MIRV'ed SLBM's are already under construction, the United States will be exceeding the 1,200 MIRV'ed missile ceiling with MX Dense Pack by as early as 1984, when the construction of the 100 MX Dense Pack silos will have to begin for them to be operational by 1986 as planned.

Thus we must conclude that MX Dense Pack will violate both article IV and article V of the unratified SALT II Treaty.

But the Reagan administration argues, incorrectly and contrary to the observable facts, that MX Dense Pack is in compliance with SALT II.

In sum, one of MX Dense Pack's virtues is the fact that it violates the unratified SALT II Treaty. Thus if MX Dense Pack is deployed, the unratified SALT II will have to be declared dead.

Section 33 of the Arms Control and Disarmament Act of 1961 states:

No action shall be taken under this or any other law that will obligate the United States to disarm or reduce or to limit the armed forces or armaments of the United States, except pursuant to the treaty-making power of the President under the Constitution, or unless authorized by further affirmative legislation by the Congress of the United States.

Strictly interpreted, section 33 states that Presidential policies to limit U.S. strategic force levels in compliance with expired or unratified SALT Treaties are both contrary to the law and inconsistent with the Constitution.

Thus MX Dense Pack has finally made the unratified SALT II Treaty a dead letter. The seven other examples of Reagan administration compliance with the unratified SALT II Treaty are equally contrary to the law and inconsistent with the Constitution.

The Soviets themselves have been behaving as if the SALT II Treaty was dead since late 1979. President Reagan recognized the existence of Soviet SALT II violations when he stated on May 9, 1982:

So far, the Soviet Union has used arms control negotiations primarily as an instrument to restrict U.S. defense programs, and in conjunction with their own arms buildup, as a means to enhance Soviet power and prestige. Unfortunately, for some time suspicions have grown that the Soviet Union

(1) Each party undertakes not to start has not been living up to its obligations under existing arms control treaties.

> President Reagan is right. The Soviets have been violating the SALT II Treaty. The following examples of Soviet SALT II violations have been reported in the press, and are well known:

> First, the reported Soviet rapid reload and refire exercises for their giant SS-18 cold-launched ICBM.

> Second, the reported Soviet covert deployment of the camouflaged and concealed mobile SS-16 ICBM's at the Plesetsk test range. This activity is similar to the Soviet illegal deployment of 18 SS-9 ICBM's at the Tyuratam test range during SALT I.

> Third, the Soviet deployment of AS-3 Kangaroo air-to-surface missiles on 100 TU-95 Bear intercontinental bombers in violation of several provisions of SALT II. This is also a Soviet falsification of the data exchange, calling into question all Soviet-supplied data.

> Fourth, the continued almost total encryption of telemetry signals from the following Soviet missile programs: The SS-NX-20 SLBM, the SS-NX-19 SLCM, the SS-18 MOD X ICBM the SS-20 IRBM, and now the new Soviet medium-heavy ICBM equivalent to the U.S. MX. This encryption is in violation of several provisions of SALT II.

> Fifth, the fact that all Soviet camouflage, concealment, and deception is intended to deliberately interfere with U.S. national technical means of SALT verification-satellite reconnaissanceand therefore constitutes another Soviet SALT II violation. This violation is confirmed by a Soviet military dictionary dated as early as 1966, which states explicitly that all Soviet interference with satellite reconnaissance is deliberate.

> Early in the Reagan administration, in January 1981, President Reagan called Soviet leaders liars and cheats who commit any crime to advance their objectives. In the same press conference, President Reagan declared that SALT II was unverifiable. President Reagan's concern that SALT II was unverifiable was fully consistent with his campaign statements opposing SALT II as "fatally flawed, unequal, destablilizing, and unverifi-able," His concern was also fully consistent with the Republican platform's tough arms control section, which was reaffiremed by President Reagan after the election.

Thus if the Soviets are flagrantly violationg SALT II, the United States should also cast SALT II aside and

deploy MX Dense Pack. Mr. QUAYLE. Mr. President, the question of what to do with MX is surely one of the most difficult to face Members of Congress in many years. To put the issue in the proper perspective for today's vote, it is important to look at the circumstances of this vote.

Last month President Reagan proposed to the Congress that we approve the necessary money to procure the first five operational missiles and provide for the basing of the MX missile in the closely spaced basing scheme. This proposal was submitted in reponse to a December 1 deadline which was set by the Congress.

What does that proposal mean? What does it require of the Congress? First of all, it means that we have a proposal before us on a matter of the very greatest importance to our national security which must be taken very seriously. Second, while it certainly does not mean that we ought to rubber stamp it just because the President proposed it, neither does it mean that we should prejudge it without giving it a fair hearing or reject it without knowing the facts.

I have personally spent a considerable number of hours in the past several weeks trying to understand the pros and cons of this issue. My preliminary study has convinced me that I need to know a great deal more before I will be prepared to vote inteligently on this issue.

There are a number of people who apparently have already rejected the Dense Pack basing scheme as one that technically will not work, is too expensive, it is wrong because it "puts all our eggs in one basket," is a destabilizing first-strike weapon, or violates existing treaties. Some of these arguments may turn out to be valid, but I am, frankly, disappointed that there has been so much "jumping the gun."

For the same reason I was disappointed by last week's House vote deleting the \$988 million in procurement money. While I understand the reasons why so many House Members voted to delete the money, my disappointment lies in the fact that the Members were required to vote up-ordown on an issue for which they were simply not fully prepared.

As I mentioned earlier, the President's proposal was submitted to meet a congressional deadline. Thus, I hardly think it unreasonable that the Congress now set a deadline for itself which will allow adequate time to examine the President's proposal and alternatives to it.

There are a number of very important questions which need to be answered before we can intelligently act to accept or reject the President's proposal. Until and unless we devote the needed time to carefully examine the proposal, we act irresponsibly if we reject the proposal out of hand. While I am strongly opposed to a Congress which rubber stamps important matters the executive branch proposes, I am just as strongly opposed to rejecting important proposals without adequate consideration. I particularly believe that to be the case in a matter of such great importance as the modernization of our strategic forces.

Let me suggest some of the questions which I believe must be examined during the next several months:

Has Soviet deployment of accurate SS-18 and SS-19 missiles changed the strategic balance and put the United States at risk? If so, what response is needed?

Is a triad really needed to assure deterrence or is it reasonable to rely on a strategic force consisting of bombers and submarines?

Is the 1986 date for initial operational deployment of the MX missile critical in closing the "window of vulnerability" or can we wait for the 1989 deployment of the Trident D-5 missile?

Is a missile with rapid response and hard target kill capability like the MX needed for deterrence? Is its first strike capability a destabilizing factor?

How important is the question of vulnerability of each component of the Triad? Must all three legs be equal?

Will closely spaced basing really work? Can the required hardening be achieved? Can we be confident about the effects of fratricide? Does the effectiveness of Dense Pack require that it be deployed in more than one field, with deception and with an ABM system? Does our uncertainty about Dense Pack mean a similar Soviet uncertainty and thus make closely spaced basing an effective deterrent? What about the Soviet counters—can they achieve them and when?

If closely spaced basing is rejected, what then? Do we wash our hands of MX? Are there better alternatives?

If there are none, is it better to proceed with MX in Dense Pack and rely on the uncertainty factor or should we just press forward with our R&D efforts?

What about the cost? Can we afford \$26 billion or more or is it something we must spend to insure the continued security of our Nation?

What will be the impact of MX—either approval or rejection—on the START and INF negotiations in Geneva? What about the "bargaining chip" issue—is this a reason for approving MX or should it be treated as just a side benefit of the approval of a system we really need? What about the ABM and SALT treaties?

There are undoubtedly other important questions to be examined. My purpose in enumerating these is to suggest the immense importance of this issue and the need for time to examine it. In an editorial piece in this past Sunday's Washington Post, retired Gen. Maxwell D. Taylor argued against the need for the MX. While I am not prepared to accept his final conclusions about MX, I fully agree with the test which General Taylor proposed be applied to MX and all major weapon systems. He stated:

My argument is that Congress should make it a practice to evaluate the essentiality of the MX and all other controversial programs of high dollar value prior to voting on them. Then, regardless of other possible motivations, Members of Congress could tell their colleagues, the media and their consciences: "I voted for (or against) weapon A or program B because of solid evidence that it is (or is not) essential to our national security."

It is for precisely that reason that I urge the Senate adopt the amendment proposed by Senator Jackson and others which would leave the money for MX procurement in the bill but fence it by prohibiting obligation or expenditure until the adoption by both Houses of Congress of a resolution of approval. With the expedited procedures provided in the amendment there would be ample time for the Congress to examine the kinds of questions I have suggested need answering and then to vote up or down on the issue.

I urge my colleagues to support this amendment. This is not a matter of victory for the President or defeat for the MX opponents. It is simply a vehicle which will enable the U.S. Senate to meet its responsibilities on a very important issue. We cannot do so in the hurly-burly of this lameduck session. And we cannot do so by rejecting MX now or by fencing off the money into the indefinite future. We need time to study the issue—which this amendment will give us—and then the guarantee that we will have the opportunity to vote our decision.

I strongly urge support for the Tower amendment.

ower amendment.

# THE JACKSON MX AMENDMENT

Mr. THURMOND. Mr. President, I rise in support of the proposed amendment. It is in the best interest of our national defense to proceed with production funds for the MX missile. Due to public and congressional concern about the missile and the proposed basing scheme, however, the best course of action for the Congress is to legislate the restrictions outlined in the proposed amendment.

This allows the administration ample time to evaluate its decisions and provide further information to the Congress. Additionally, it sets a definitive timetable for consideration of the issue and final approval or rejection by the Congress.

Although I favor providing production funds without restrictions, this proposal is the most acceptable and responsible alternate course of action for the Senate.

Mr. President, I feel that the Congress as a whole has failed to give this issue the attention necessary to render a fair judgment.

The MX program has been before the Congress for a number of years, but suddenly there is a rush to terminate the program. There have been great condemnation of closely spaced basing, yet a majority of the Members of the Congress has not received the detailed briefing that the Air Force presents on the issue.

Mr. President, it is an unfortunate circumstance that this issue is clouded by uninformed negative public sentiment. I would like to read you a quotation from a prominent American:

The United States is a preeminently christian and conservative nation. It is far less militaristic than most nations. It is not especially open to the charge of imperialism. Yet one would fancy that Americans were the most brutally bloodthirsty people in the world to judge by the frantic efforts to disarm them both physically and morally. The effect of all this unabashed and unsound propaganda is not so much to convert America to a holy horror or war as it is to confuse the public mind and lead to muddled thinking in international affairs.

A few intelligent groups who are vainly trying to present the true facts to the world are overwhelmed by the sentimentalist, the emotionalist, the alarmist, who merely befog the real issue which is not the biological necessity of war but the biological character of war.

Those words which are pertinent today, were spoken by Douglas MacArthur in 1935. We are confusing public sentiment with necessity.

Our land-based ICBM force no longer affords us a second strike capability because of its vulnerability, yet we are here arguing about terminating a program that previously has had strong bipartisan support.

I can imagine what our NATO allies must think of our resolve. The United States talks NATO into allowing ground launched cruise missiles and Pershing II missiles to be deployed in Europe to offset Soviet theater nuclear forces, and now the United States is hesitant to modernize its land based ICBM's while the Soviets maintain a constant pace upgrading their Strategic Rocket Forces.

It is no wonder that our allies doubt our reliability and our integrity.

A serious question that we as leaders must ask ourselves is, "What will the Soviets do in response to our action?" Many people hope that the Soviets would respond with a similar gesture, but I doubt it.

President Carter terminated the B-1 program unilaterally and the Soviet ambassador to the SALT talks was asked what the Soviets would be willing to concede. His reply was, "We Soviets are neither pacifists nor philanthropists."

Mr. President, I have served in the Senate for 28 years and have watched the strategic relationship between the United States and the Soviet Union with interest. In the last 18 years alone, from 1964 until the present, the United States has had five Chief Executives. They have had to manage defense spending through a consensus in Congress and justify increased defense spending against increased spending

for social programs. With those five Presidents came five strategies for dealing with the Soviets. Conversely, from 1964 until a few weeks ago, the Soviets had only one leader. The Soviets had no debates over defense spending being too high at the expense of social programs.

The result has been a disparity of military capability in favor of the Soviets. The Presidential election of 1980 was a mandate to alter this disparity, and MX is a vital part of the modern-

ization program.

Mr. President, I urge my colleagues to support the amendment in question so that the Congress can make its final decision in a timely manner.

Mr. PERCY. Mr. President, I regret that many citizens who are in good conscience involved in the movement for arms control and peace are viewing the choice between the Jackson amendment and the House action as one which supposedly indicates whether you are for or against the MX. I would emphasize that the House action leaves intact the \$1.7 billion for research and development on the MX missile. It did not kill the MX; indeed, it leaves intact more MX moneys than it deletes. Moreover, the Jackson amendment has a more restrictive fence on the R&D funds earmarked for the basing mode. The Cranston/ Mathias amendment would have restricted \$560 million of these funds until April 30, but at that time they would become automatically available. By comparison, the Jackson amend-ment restricts \$715 million in R&D funds for basing-not \$560 millionand these funds would become available only if both Houses vote affirmatively to release them. Lastly, I would point out that where the Cranston/ Mathias amendment would have deleted the missile procurement funds without directing any studies for possible alternatives, the Jackson amendment would allow the Congress the benefit of deciding the ICBM modernization issue next spring with all possible missile and basing options detailed by the administration in its report. In summary, I do not regard the Jackson amendment as a cover for giving the President more time to sell Dense Pack, which I believe from a practical standpoint is dead. I believe it will in fact occasion a far more fundamental and comprehensive reexamination of where we go from here with the ICBM leg of the strategic triad. It is a responsible approach, one which appropriately addresses the seriousness of the issue before us.

Mr. STEVENS. Mr. President, have the yeas and nays been ordered?

The VICE PRESIDENT. The yeas and nays have been ordered.

Mr. DURENBERGER. Mr. President, I rise very briefly.

Mr. President, I rise to compliment those of my colleagues, and I think it is most of them, who have been sitting here since about 20 minutes to 12 participating in one way or another in this discussion.

I think it has been an informative discussion. We have heard from all of the Presidential candidates and from a

lot of just plain Senators.

Mr. President, the Congress has been handed a unique opportunity to test its own role in the shaping of American security policy. No matter which of the alternative resolutions considered here tonight is adopted, it is clear that Congress will have the opportunity—if it seizes it—for a full and comprehensive debate over some very fundamental issues. We have needed such a debate for some time, and I hope we take advantage of it.

When addressing a system as complex as the MX missile—a weapons project which has been around for some 10 years—we too often focus on only a part of the issue at any given time. We seldom have the opportunity to take a comprehensive look at an entire range of interrelated issues. Instead, we focus on only those particular aspects which appear topical at a given time. The longstanding controversy over basing systems provides a good illustration.

I thought the Senator from Nebraska made one of the major contributions here this evening by expanding on the scope of the report which the President must provide to Congress.

I think perhaps if we had a little more time and it were not the middle of the night others of us might have made other contributions to that

report language.

There is far more to the MX missile system than how it is based. But it has proved nearly irresistible to focus on only such things as the various proposals designed to reduce ICBM vulnerability. Worse, it has proved nearly irresistible to reduce a highly important argument to the level of caricature. If we are to decide whether we need an MX missile system, we should do so on the basis of an informed discussion, and not simply a throwaway phrase like "Dunce Pack." We should get down to the issue that several of my colleagues have put their finger on: the national security policy of the United States.

We have seldom looked at all aspects of the MX question simultaneously. So we find ourselves in the awkward position of having nearly produced a missile about which there is divided opinion, and having done so without examining our rationale, much less having found a basing mode which can be widely supported.

No matter which amendment passes tonight we have the opportunity to overcome these kinds of intellectual problems. One thing is clear: We will have a debate, and it will be compre-

hensive and final.

So what does that mean when we take up this issue next year?

It means first and foremost that this is not an area in which there is any particular "expertise" as that term is customarily used.

Our Nation's security is a function of many different things: The health of its economy; the political will of its leadership; the support and unity of its citizens; the state of its alliances and its diplomacy; the credibility of its defenses—all its defenses, and not merely a few examined in isolation.

Security is not simply a function of strategic nuclear weapons. It is a complex mix of every fiber and every element of our Nation, as expressed in and guided by overall policy. And it is that policy which we are sent here to make. The opinion of an engineer is no more or no less valuable than the opinion of a military officer or an economist or a farmer or a businessman or a philosopher on this matter. A debate about our overall security policy will of necessity involve all of us here, and it will ultimately involve every citizen. It will not be and cannot be confined simply to people who know everything there is to know about the MX missile or about silo hardness. What does all this mean in terms of the particular questions we should examine?

It means, for instance, that we must be cognizant of the economic costs involved in this missile system and in its likely successors as time goes on. We must answer once and for all whether our security will be enhanced or degraded by an expenditure of \$26 billion or more for one single weapons modernization program.

It means that we must explore and help develop once again a common understanding of the requisites of deterrence in the nuclear age. We must ask ourselves whether a concept like "strategic superiority" has any real meaning under today's circumstances. And no matter how we answer that question, we must ask what role the MX missile plays in underwriting that concept, or any other strategic concept.

It means that we must explore what it is we seek in arms control and arms reduction agreements, and how best to accomplish our goals. We must ask ourselves about the costs and consequences of deploying any new weapon; about the validity of the so-called bargaining chip approach; about the likelihood that a short-term gain can result in a long-term loss; about whether a given deployment means closing a window or opening a new round of action and reaction which only drains more money away from hospitals, transportation, schools, and so forth.

It means that we must carefully weigh the question of the so-called window of vulnerability. What does

this term mean in the real world rather than in abstract analysis? What does it imply for the future of our strategic triad of land-based ICBM's, sea-based missiles, and manned bombers? Does it spell the end or prove the

strength of the triad?

It means that we must explore the nature of our nuclear guarantee to other nations as well as to our own. Does the policy of extended deterrence which backs up the NATO alliance require a new missile or a regeneration of European confidence in the American willingness to stand by its commitments? For that matter, is the policy itself worth evolving along the lines suggested by Gen. Bernard Rogers and others-away from our current emphasis on nuclear weapons and toward a greater emphasis on general purpose forces?

It means, finally, that we must examine whether the particular technical characteristics of the MX missile and its closely spaced basing system engender our confidence or raise our

doubts.

Senators will notice that I have mentioned last that which most often is mentioned first-the technical characteristics of this weapon system. That is because this level of analysis is appropriate only after we have examined the larger context, a context which reflects our understanding of security, of strategy, of diplomacy, or of arms control.

We had something approximating this kind of debate in 1969 when the ABM was considered. We had it again a few years later, when the Senate explored the SALT I Treaty and ultimately agreed to its adoption. But attempts since then have been cut short. We spent many hours preparing ourselves for a debate on the SALT II Treaty, but we never had that debate. And we have spent the better part of 10 years preparing for a full and final debate on the MX ICBM. We are now certain that we will have that debate. We can put to rest once and for all the questions we have examined individually and sporadically rather than collectively and thoroughly. We can move on to new business.

So let me repeat, whichever approach to this debate we ultimately adopt, we have succeeded in setting our agenda. That is most welcome because it is long overdue. As Churchill said after the battle of El Alamein:

This is not the end. It is not even the beginning of the end. But it is the end of the beginning.

I look forward to the end.

So I am grateful for the opportunity that Senator Hollings and Senator HATFIELD provided me with their resolution a month ago to address this subject.

I think a large part of the credit for the Jackson resolution that is before us and the action the House took is

due to the courage of the Senator from South Carolina and the Senator from Oregon in putting forth this proposal for the approval of this resolution

I thank you, Mr. President. Mr. STEVENS. Mr. President, I shall not take the time of the Senate.

I may have misled the Senator from Missouri slightly in one answer with regard to the amount of money that could be spent.

I may have misled Senator Eagleton in the answer I gave in saying that only \$215 million could be spent. It might be possible to spend more of the R&D money for the basing mode but it could not be spent for anything that was connected with full-scale engineering development or for any institution or permanent basing mode.

We are told that the estimate was about \$215 million, but if it ends up to spend more I would not want to be held to the \$215 million. It is not a limit in the Jackson amendment. That is the estimate that we had, but it is possible to spend more of that money under this language.

Mr. EAGLETON. I thank my colleague.

SEVERAL SENATORS. Vote.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Washington.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is

necessarily absent.

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 56, nays 42, as follows:

## NOT VOTING-2

Goldwater

So Mr. Jackson's amendment (UP No. 1486) (as modified) was agreed to.

Mr. TOWER. I move to reconsider the vote by which the amendment was agreed to.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, the parliamentary situation is now to approve the committee amendment, as amended, is that correct?

The VICE PRESIDENT. The Sena-

tor is correct.

Mr. HATFIELD. I so move.

The VICE PRESIDENT. Is there further debate?

Mr. HART. Parliamentary inquiry. The VICE PRESIDENT. The Sena-

tor will state it. Mr. HART. Mr. President, if the committee amendment is adopted, to what extent will that preclude further amendment of this section of the resolution?

The VICE PRESIDENT. The section of a resolution that is the subject of the committee amendment, as amended, may not be amended directly except by an amendment broader in scope that makes a substantive change in language that has not been the subject of an amendment.

Is that clear to the Senator?

Mr. HART. I think it is as clear to the Senator as it is to the Chair. [Laughter].

The VICE PRESIDENT. The question is on agreeing to the committee amendment on page 9, line 8.

The committee amendment on page

9, line 8, was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the committee amendment was agreed

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE AMENDMENT ON PAGE 15, LINE 4

Mr. HATFIELD. Mr. President, our next committee amendment, I believe, is the one on the matter of Labor-HHS, offered by the Senator from Virginia. He proposes to adopted the House level in lieu of the Senate level; is that correct?

The VICE PRESIDENT. The clerk will report the next committee amendment.

The legislative clerk read as follows: On page 15, line 4, strike "House", through and including "Center" on line 12, and insert the following:

H.R. 7205 as reported to the Senate on December 8, 1982, as if such Act had been enacted into law (but excluding, on page 46, lines 12 and 13 of that bill, the words "H.R. 3598 as passed the House on November 4, 1981").

• Mr. LEVIN. As I stand here this morning at 3:25, I just cannot believe what the Senate is doing. Here we are, on the legislative of a forced march passing almost a \$450 billion appropriation bill to fund most of the Government for the entire 1983 fiscal year, and no one can even pretend to know anymore than the broadest outlines of the bill. This bill came to the floor almost immediately after it was considered by the Senate Appropriations Committee, so we have not had any time to seriously analyze it. It is true that the House considered a version of this bill earlier in the week, but at that time we in the Senate were engaged in all night sessions on the highway bill, and Senators were devoting all of their attention to that bill.

Not only has the authorization process abdicated its responsibility to the appropriation committee, but the appropriations process itself has been once again perverted by combining 10 appropriations bills into one. We started down that road last year when there was a proposal to have the huge fiscal year 1982 continuing resolution run for the entire fiscal year. At that time I threatened a filibuster unless the continuing resolution had a midyear termination date. It is truly distressing how much my words then focused on the same problem which we confront right now. At that time I

said.

I intend to do what I can, as one individual, to stop this from happening, so that we can preserve the historic appropriations process in Congress, and not ship the purse down Pennsylvania Avenue to the White House.

Fortunately, for fiscal year 1982 we stopped at the brink and set a termination date of March 31. This morning, we seem about to go over the brink.

Not only is what we are doing here a travesty from the standpoint of legislative process, but it is fiscally outrageous to consider this bill as we are now. How can we sort out what is excessive from what is essential, if we do not even know the slightest details of what we are passing upon.

That is why I will vote against the committee amendment on the Labor-HHS appropriation bill, and why I intend to support the Pryor amendment to set a termination date of-

June 1.

We pride ourselves on being the most deliberative body in the world. Well, then let me ask, "What in the world do we think we are doing now, and how in the world can we pretend

to be deliberative?"•
Mr. HARRY F. BYRD, JR. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. HARRY F. BYRD, JR. As I understand it, the question at issue now is the Senate committee amendment to the House proposal; is that correct?

The VICE PRESIDENT. The Senator is correct.

Mr. HARRY F. BYRD, JR. May I address a question to the chairman of the committee: As the Senator from Virginia understands it, the Senate committee added approximately \$5 billion to the figure in the House bill, so the vote then would be as to whether to add the \$5 billion which would be in addition to the figure approved by the House?

Mr. HATFIELD. The Senator is cor-

Mr. HARRY F. BYRD, JR. Mr. President, I ask for the yeas and nays. The VICE PRESIDENT. Is there a sufficient second? There is a sufficient

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the committee amendment on page 15, line 4. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll. Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is

necessarily absent.

second.

# NOT VOTING-2

Glenn Goldwater

So the committee amendment on page 15, line 4 was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE AMENDMENT ON PAGE 18, LINE 25 Mr. HATFIELD. Mr. President,

what is the next amendment?

The PRESIDING OFFICER. The clerk will report the next committee amendment.

The legislative clerk read as follows: On page 18, line 25, beginning with the colon, strike through page 19, concluding with the word "amended" on line 8.

Mr. BUMPERS addressed the Chair. The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, for the Members of the body who are on the floor, this particular committee amendment strikes the House language that eliminated funding for the Clinch River breeder. For the first time in 12 years, since the Clinch River breeder was first put on the agenda, the House of Representatives voted to terminate it.

Mr. HATFIELD. Mr. President, will

the Senator yield?

Mr. BUMPERS. I would be happy to vield.

HATFIELD addressed the Mr. Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. STENNIS. Mr. President, may we have quiet.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. In consulting with the leaders of this amendment, it appears that it would be possible to ask unanimous consent for a time agreement, 15 minutes to a side.

The PRESIDING OFFICER. Is the Senator making that request?

Mr. HATFIELD. I am making that as a unanimous-consent request.

The PRESIDING OFFICER. there objection? The Chair hears none and it is so ordered.

Mr. HATFIELD. I thank the Senator.

Mr. BUMPERS. Mr. President, I thank the distinguished chairman.

We have voted on this a number of times. Everybody has heard all of the arguments.

The last time was in September and by a margin of one, the Senate agreed to continue funding for Clinch River. Now, this body has an opportunity to do something really worthwhile and help with the budget deficit all at the same time.

But just to rehash the sorry history of the Clinch River breeder, remember that in 1970 this 375-megawatt plant was scheduled to cost \$400 million, and out of that \$400 million the nuclear industry and the electrical utilities of this country were going to put up half the money. Twelve years later, the cost is estimated—and I will come back to that in just a moment—\$3.5 billion to \$8.6 billion; but the point is that we have put \$1.1 billion into Clinch River, and so far all we have to show for it is a few bulldozers down there in the past 2 months clearing off a site.

I remind the Members of this body that there are 10 to 20 light water reactors in this country that have been abandoned in various stages of construction because of terrible cost overruns and safety factors. The Clinch River breeder reactor will be the same, and scientists will tell you that the technology is already obsolete.

One other thing I want to point out is that this is designed to be a demonstration project.

But we are not demonstrating anything. Breeders are not that esoteric any more. The Russians have a breeder, the French have a breeder—and another one under construction—the Japanese have a breeder, the British have a breeder, and the Germans have a breeder. There is not anything unique about this idea. You might say, "Well, if it is so red hot for them, why shouldn't we continue with this one?"

The answer to that is twofold. No. 1, most of those countries that originally embarked very enthusiastically on a breeder program, almost all of them, except the French, have put their breeder reactors on the back burner. The Russians are not building any more, the Japanese are not building any more, the British are not building any more, the Germans are not, and even the French since Mitterand became the Prime Minister are inclined to put their breeder program on the back burner.

the back burner.

I remind the Members of this body that it has not been too many years ago since there was a raging debate on this floor with the same arguments. "Well, the British and the French are going to do it and they did it." They built the Concorde, and we did not, and the rest of it is history.

It has not been too many years ago since a lot of thoughtful people in this body said "let us not build that ABM system out in North Dakota because it will be obsolete the day it is finished," but by one vote in the Senate we appropriated \$6 billion—that would be the equivalent of \$20 billion today—built an ABM system, and we started dismantling it on the front end just before it was completed on the back

You see these two charts there I am displaying. The one on the left is one you saw about a week ago in the Washington Post, an ad paid for by the Edison Electric Institute. Who is

that? That is the National Association of Electrical Utilities. And they are telling you in that ad why it is so important to go with this new technology. "It is going to be the wave of the future."

What they do not tell you is that 12 years ago they made a contract with the Federal Government to put up 50 percent of the money to build this, when it was scheduled to cost \$400 million.

So far they have put up \$110 million of the \$1.1 billion that has been spent, and of the \$8.6 billion the GAO says this thing is going to cost to build and complete. Those members of the Edison Electric Institute who are so hot for this project do not intend to put another dime in additional money into this project. It is now Uncle Sugar's baby. If Uncle Sam does not put up the money, the breeder will never have \$1 more put into it.

When President Reagan came to power, he said our energy policy in the future is going to be long-term highrisk. The Government will invest in those long-term high-risk investments that industry cannot afford to make.

If the Edison Electric Institute thinks breeder technology is the wave of the future, why do they not commit their money to it?

That is the simple question.

When the breeder concept first came about in this country we thought we were facing a uranium shortage. There was even the suggestion that by 1990 we would see our last full fuel cycle running out of uranium. The assumption was that the demand for energy was going to be 7 percent a year increase, 7 percent a year. Last year demand in this country increased 1 percent. This year it has increased only 2 percent. And uranium seems to be flowing out of the ground everyplace, particularly Australia. There was even a suggestion at one point that we would have 1,200 light water reactors-this was an official U.S. estimate-1,200 light water reactors on line by the year 2000. We have about 72 going right now and all the rest of them have been abandoned.

Now I commend to you, if you have not seen it, an article a few weeks ago by David Freeman, Chairman of the TVA, who said nuclear power is fine. It is those reactors that scare him.

I am not even debating the safety factor here. I am not going to debate the dangers in the proliferation of plutonium.

What sense does it make for a country that is facing a \$200 billion deficit every year for the foreseeable future to be committed to a 375-megawatt pilot demonstration breeder reactor? That is \$23,000 per kilowatt in capital cost. You can build a coal-fired plant for \$1,000 a kilowatt. And what are we going to get out of it? Even Dr. Teller, who thinks service stations ought to

be pumping up plutonium, says this is a technological turkey. It is technologically unsound. It is economically unsound. It is absolute folly for us to continue this any longer.

If we do not kill it tonight, there might be an effort made in the future, but about 3 years from now the argument will be heard we have too much money invested to turn back. You know those arguments as well as I do. It is just like Lucy holding the ball for Charley Brown every September. Everybody knows she is going to pull it out from under him. If we vote to fund this tonight that is exactly where we are headed.

Mr. President, I reserve the remainder of my time.

I yield 2 minutes to the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I am pleased to cosponsor the amendment by the Senator from Arkansas to eliminate funds for construction of the Clinch River breeder reactor.

Clinch River was originally proposed in the 1960's when it appeared that demand for electricity would continue to increase rapidly exhausting our supply of uranium fuels at an early date. Under the circumstances foreseen in the 1960's, breeder reactors were expected to be a near-term economic necessity. Demand for electricity was growing at a rate of 7 percent per year. Each year orders for light water reactors increased. The world's supply of reasonably priced uranium fuel was projected to be exhausted by the turn of the century.

So the Federal Government entered into a partnership with the electric utility industry to build the Clinch River breeder reactor as a demonstration project. When the agreement was signed in 1972, the utility industry was committed to pay over one-half the expected cost of the project. But their commitment was limited to \$257 million. Cost overruns became the responsibility of the American taxpayer.

I have no quarrel with the decision to begin this effort. At the time it was made. I would have supported the inconditions vestment. But changed a geat deal since the late 1960's and early 1970's. Electricity demand has leveled off. Known uranium reserves have not declined, but have grown significantly. In fact, the price of uranium has been falling in recent months. There have been no new orders for light water reactors since 1978 and many, many reactors on order have been canceled. It is clear that electricity from nuclear energy will be a much smaller part of our future energy supply than was expected at the time that the decision to build the CRBR was made.

Breeder reactor technology is no longer a near-term economic proposi-

tion. It now appears that breeders could not serve economically in private utility markets until the year 2020 or beyond. Whether the technology built into Clinch River is obsolete by today's standards or not, it surely will be obsolete in 40 years when, and if, the private utility market becomes interested in breeders for the commercial production of electricity.

Mr. Presdient, the budget problems of the Federal Government are pressing on all sides. Millions of Americans are being asked to make sacrifices to put our eocnomic house in order. To deserve their support we must demonstrate that the budget decisions made here on the floor of the Senate are made with standards of reason and fairness applied to all items. Whatever reasons may at one time have supported the decision to build Clinch River. have now evaporated in the face of new energy realities. Fairness demands that we not go ahead with a project which has no possibility of benefiting the American taxpayers of this generation. The least we can do is to see that the funding for the reactor is eliminated from this continuing resolution.

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. Mr. President, will the Senator from Idaho yield to me 3 minutes?

Mr. McCLURE. Mr. President, I yield 3 minutes to the Senator from Tennessee

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I willingly agree to very brief time limitation.

As the Senator from Arkansas points out we have plowed this furrow a few times. There is no need for us at almost 4 o'clock in the morning to go over it in detail once more.

Mr. President, I would make only one point I would wish to contribute to this debate at this time.

Whether we like it or not people will look back on this Congress as they have looked back on every Congress and make some judgments on two things: One, how well we managed the affairs of the country today; and second, how well we could peer into the future and anticipate the needs of the Republic a year or a decade or a century from now.

It is in that second category, Mr. President, that we must now be concerned for this project.

I will acknowledge freely, as I have done so often in public, if a decision were before Congress tonight on whether to go forward with the breeder reactor technology as the base fuel cycle and the energy system for the future of the United States, I would not support that. We are not ready to do that. If the decision were to be made tonight that we are going to

whatever type, I would not support that.

But, Mr. President, I believe we have to do something for the future, and the breeder reactor technology will be needed not today or next year or even in the 1990's. This is an investment in our responsibility for the first decade of the next century, and when we reach that time and if we need a breeder reactor system, it will be 30 years too late to start, and every other industrial nation of consequence in the world will have gone forward with their stake, with their demonstration, with their little bet on whether or not they will need this technology in the first decade of the next century.

I believe we should continue that investment which we have already

begun.

Mr. President, perhaps this project should be reviewed extensively on the basis of future financing, on control of the project, on a number and range of other things that have changed since it was originally authorized, and I will support that. But, Mr. President, tonight on this continuing resolution is not the time to terminate a project that we perhaps will need and almost surely cannot afford to forgo in the discharge of our responsibility to see into the future.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

Mr. President, I rise in strong opposition to this amendment to delete funding for the Clinch River breeder reactor project. The Senate earlier this fall rejected a similar attempt. The issue has not changed. No new facts have come to light which have materially changed the goal which America set for itself 10 years ago. We believe it is essential that advanced breeder reactor technology be preserved for our country.

For 5 years, the Clinch River breeder project has been attacked with a variety of arguments for its termination. Each year, Congress has repulsed these arguments, and the plant today stands with 70 percent of components completed or on order and on-site construction continues apace. The arguments against completing this essential research and development facility are no more valid today than they have been in previous years. The American breeder reactor program is today at the point where the sensible next step is the engineering demonstration of a first large-scale breeder electric powerplant. reactor The CRBR is therefore appropriate and prudent in a carefully-timed, conservatively-paced engineering development program.

The Clinch River breeder reactor is not technologically outmoded or inherently unsafe, as some have argued. Repeated assessments by the General

build a string of breeder reactors of Accounting Office, most recently supported by their July 12 report, have found that among:

> A wide range of knowledgeable industry, government, and private individuals. . . . No one we talked with was able to provide us with any specific facts indicating that components or design features were obsolete.

> The continued keen interest of French. British. Japanese. and German breeder experts in aspects of the CRBR design makes clear that the technology is current, with a number of important design refinements and a fundamental advance in the core configuration developed in the past 4 years. In short, the Clinch River reactor is meant to be a technology development and demonstration facility, and the current design achieves that objective.

> Those who attack the project costs often do not mention that the final cost estimate for CRBR in early 1974, before contracts were let, was \$1.7 billion. Inflation has doubled all prices since 1974, so it is quite remarkable that the most recent cost estimate of \$3.6 billion exceeds inflation by only a few percentage points. Terminating the CRBR project today would leave us with nothing to show for a \$1.5 billion investment. The completion costs, on the other hand, assumptions, by the \$8 billion revenues from the sale of electricity over the life of the project. Meanwhile, in the shorter term, the project objectives as a research, development and demonstration activity will be fulfilled.

> The recent GAO report on project costs, contrary to impressions created in the media, substantially confirms and supports the \$3.6 billion DOE cost claims estimate. Exaggerated of project costs exceeding \$8 billion can be largely attributed to imputed interest on Federal debt, a factor which GAO notes is not normally associated with cost estimates for this or any other Federal expenditure.

> To those who argue that the nuclear industry should fund this project beyond their already substantial contributions, it must be pointed out that CRBR is subject to a licensing process which has never been completed for a breeder reactor, and which will undoubtedly be longer than that for conventional light water reactors. With the confused Federal policies of the last few years, the evolutionary licensing procedure that attaches to this new technology, and the precommercial scale of this technology demonstration facility, the private sector should not be expected to increase its contributions to this project. It is clearly a proper role for the Federal Government to complete the development of such new technologies to the point where a commercialization decision can be made by the utilities.

The suggestion that the United States might purchase French breeder technology does not recognize the problems that would be incurred in licensing the French breeder, which at this time would not meet U.S. standards. It is questionable whether the French would want to subject their technology to U.S. licensing standards because of potential upgrading and disruption in their own licensing and construction schedule that could result from U.S. scrutiny.

The international community has made its position clear on breeder reactor technology development. The international fuel cycle evaluation program in 1980 strongly supported rapid development of breeder technology, citing lower radiation exposure, less thermal pollution, and less waste for disposal. The LMFBR technology was judged to be no more prone to proliferation risk than other nuclear power reactor technology. The United States, France, Britain, Germany, Japan, Italy, and the U.S.S.R. have all repeatedly reaffirmed the necessity of maintaining the liquid metal fast breeder reactor option.

In view of the commitment this Nation has made and will continue to make in the LMFBR program, it would be sheer folly not to proceed, as has each of the major advanced industrial nations, with the construction of a technology demonstration facility in concert with our basic LMFBR program. The reason is plain: Both proponents and opponents agree that breeder reactors today, without the cost benefit gained by replication of a standardized plant, can generate electricity at a cost half the present cost of oil-generated electricity. No other inexhaustible energy system comes close to this achievement.

The liquid metal fast breeder reactor is the only known technology capable of supplying our electrical energy needs for the indefinite future, at a cost which does not greatly exceed the current cost of electricity generation. I therefore urge, once again, that this amendment to delete funds for this essential technology be rejected. I ask that you continue support of the U.S. breeder reactor program, and the Clinch River breeder reactor project.

Mr. President, let me make two or three brief points. Most of them have been made before and I will not be-

labor the subject.

First of all, the contention has been made that other governments are not going forward. The fact of the matter is other governments are going forward, not just the French, the British, the Japanese, the Germans are going forward; at the same time they are going forward with their programs they all expressed extreme interest in this particular project because they recognize that this project will advance the state of the art.

So let us not be led either to the conclusion that breeder reactors are out of phase in the entire world. As a matter of fact, they are not. They are more in phase most other places than the opponents would have you believe in the United States.

Second fact: The GAO report with respect to cost estimates does not sustain what the bar graph says of the opponents of this measure. They sustain the estimates that the Department of Energy has made that, as a matter of fact, it can be essentially completed for a differential of \$1.7 billion, about \$2 billion to complete the project, about \$300 million to cancel

the project.

Mr. President, we have \$1 billion worth of components either in position or on order that would be scrapped and totally worthless if we were to scrap it now, throwing away the investment we have, and we ought to be looking not at some inflated estimate of future costs, which are, as a matter of fact, different from any other methodology that has even been applied to the cost of any Federal project in order to try to make it look like the costs are running away, we ought to be looking at the cost to complete on standard estimates of cost as compared to the cost to terminate.

Look at that difference: \$1.7 billion is that difference, and say to ourselves. "What do we buy for that \$1.7 billion?" We buy the completion of a plant that has a market value in excess of that. We buy for that amount of money, \$1.7 billion additional, a plant that costs less than a standard light-water reactor, it costs less than a 1.000-megawatt coal-fired plant, it costs less than the coal liquefaction experimental plants that are going forward, it costs less than alternative technology.

So let us focus on what is real here when we make the argument about whether or not we ought to stop going forward, and the cost estimates that have been made by others are simply

inflated and false.

I hope people will look at some of the charts that are up there as well as those that have been up all evening. We just had a couple put up, and I want you to take a look at the official total costs of \$3.6 billion, expenditures to date of \$1.48 billion; the cost to complete of \$2.8 billion, and the cost to the taxpayers if terminated \$1.78 billion, with absolutely nothing to show for it. If that is good public policy I will eat my hat.

I want you to look at the other chart, if you will, for a moment, to look at what it is we have already bought and paid for and have on hand. Do we throw it to the junkyard if the opponents of this project have their way? Mr. President, this is not the time for the country to turn its back on developing technology. Almost ev-

eryone we talk to is looking at the problem of the economy of the United States, and they will say time after time after time, "Technology is where the United States must focus its efforts. Technology is where we will continue to lead the world. Technology is where we ought to be investing our money." And then they say, "Oh, but not this one. Oh, but not this one."

It seems to me we ought to recognize that the health of this country and its future economy depend upon our investment, prudent investment in tech-

nology, and this is one.

Would you design this plant the same way if you were to start it today? No; as a matter of fact, we do not today build 1970 automobiles. But this was designed a long time ago. It would have been completed a long time ago if it had not been for the artificial delays that have been imposed upon the proj-

Do not blame the cost escalation on the project when, as a matter of fact, it is the delays that have caused the major part of the cost escalation.

Mr. President, this is a good project, in my judgment and in the judgment of many others. It is not the boondoggle that some of our friends would have you believe it is. It ought to be completed and keep the United States in the technology game that will be so important to us in future years.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BUMPERS addressed the Chair. The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, in Science magazine of December 10, 1982, here is the starting paragraph:

Europe's enthusiasm for fast breeder nuclear reactors is rapidly running out of steam, faced with increased costs, decreased projections of electricity needs, and acrossthe-board delays in the construction of conventional light-water reactors on which a commercially viable fast breeder program would depend.

In both Britain and West Germany there is now serious talk, if not of abandoning fast breeder development completely, at least of putting a freeze on expansion plans until future needs can be perceived more clearly.

The story goes on. It covers every breeder in the United States. Science magazine is one of the most respected publications on this subject in the world.

Now, Mr. President, here is the State Department cable where the United Kingdom is saying that they also are putting nuclear reactors on the back burner, and it points out that this is going to slow down the cooperation between them and the United States on breeder technology.

There is another thing I want to point out. There is \$325 million in this budget completely aside from what we are talking about now for breeder research. We are not torpedoing all the research. There is \$325 million in here even if this committee amendment is

not adopted.

Mr. President, you see those two figures there on the chart. First, you see the 1982 figure of \$3.68 billion? That is the Department of Energy's estimate of what this breeder is going to cost but it does not include interest. The \$8.88 billion figure is GAO's estimate, and it does indeed include accrued interest, and Percy Brewington, who is project manager for the breeder, says that is a perfectly legitimate cost item.

Well, Mr. President, we have not lost anything by the components that the Senator from Idaho mentioned that have already been procured. They have been tested, we have learned something from them. It is not all lost.

All I am asking this body to do is to agree with the Department of Energy's own research advisory board. The Secretary wrote on August 13, 1981, to the Energy Research Advisory Board-and they have members on there from the major universities of the country, from Mobil Oil, Conoco Oil, other industrial companies in the country, and chemical companies. Where did they put breeder reactors in their response to the Secretary's request as to what ought to be the highest priority, the middle priority, and the lowest priori-

Here it is for all the world to see: the Department of Energy's own Advisory Board says:

Clinch River Breeder is the lowest priority.

They go on to say:

This is a decision that we do not have to make right now

If we do not have to make it, let us do our duty tonight and save the taxpayers of this country \$8.5 billion on something that is never going to fly.

I will not belabor the debate any further.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BUMPERS. That is the reason I will not belabor the debate any further.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who vields time?

Mr. McCLURE. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Idaho has 5 minutes and 51 seconds remaining.

#### CLINCH RIVER

Mr. SASSER. Mr. President, for 6 years I have stood on the floor of the Senate and spoken on behalf of the Clinch River breeder reactor project in Tennessee. I have supported Clinch River and I continue to support Clinch River, not merely because it is being built in my State, but because it is an energy option which should be developed.

Mr. President, contrary to popular opinion, Clinch River is no technological turkey. Clinch River is not obsolete. It is not old fashioned. It is the most technologically advanced breeder

design in the world.

Design is over 90 percent complete. Over 70 percent of the componentsvalued at over \$700 million have been purchased or are on order on fixedprice contracts. About half of these components have been delivered to the plantsite or to nearby locations. The licensing process is moving forward and site preparation has begun.

Over 250 persons are at work at the site building roads, a railroad spur,

and constructing buildings.

Mr. President, other nations are moving ahead with this technology. We must not step away from developing this technology. The French and the Soviet Union, in particular, are moving forward with an aggressive demonstration program. It would be a serious mistake if this Nation were to abdicate its legitimate role in this research to other countries.

This project has been delayed long enough. Let us provide this funding and continue this energy demonstra-

tion project.

Mr. HART. Mr. President, I join with Senator Bumpers in opposing the

committee amendment.

Two days ago, the House delivered to the Clinch River breeder reactor a potentially fatal blow by deleting funding for it from this continuing resolution. Now, the Senate must put the project out of its misery.

Astronomical cost overruns, decreasing growth in demand for electricity, and unfavorable economics justify killing this project once and for all.

The estimated costs for building the Clinch River breeder reactor have skyrocketed, anywhere from fourfold to thirteenfold, depending on the estimates. The cost overruns on this project exceed those that plague many of our weapons systems. In fact, the Federal Government has already spent \$1.2 billion on the project, yet not one piling has been sunk or 1 cubic foot of concrete poured.

The original 1971 cost estimate for the Clinch River breeder reactor was \$400 million—or \$960 million in today's dollars. An industry consortium of 753 utilities pledged to contribute \$257 million. Its share, at that time, represented more than 50 percent of the estimated cost.

During the past 10 years, DOE estimates of the project's cost have risen to \$3.6 billion. But the General Accounting Office (GAO) disputes the DOE figure as too low. It estimates the cost of construction at \$8.5 billion. a figure that includes several essential elements missing from the DOE estimates: The cost of the plutonium fuel for the reactor, the imputed interest to the Federal Government for financing, and the staff time used on the project.

Moreover, the GAO estimates Clinch River could actually lose an additional \$2.6 billion if operated for 25 years.

The Tennessee Valley Authority (TVA) has an option to purchase Clinch River after the 5-year demonstration period and operate it to generate electricity for its ratepayers. Yet, GAO says Clinch River will lose-not make-money. In other words, rather than TVA buying Clinch River from the Federal Government, the Federal Government would have to pay TVA to take Clinch River off its hands.

If TVA is foolish enough to buy Clinch River, it is a bad deal for TVA ratepayers. But, if we are foolish enough to provide further funding to build and operate Clinch River, it is a bad deal for this country. For, altogether, the project could saddle taxpayers with a bill for \$11.1 billion.

Mr. President, despite the massive increases in the project's construction and net operating costs, the industry's dollar contribution has not increased. Consequently, instead of sharing 50 percent of the cost, as originally planned, the industry now will share less than 10 percent, should the project go forward. And, to date, the industry has not even met its original \$257 million commitment.

If, as originally intended, this project is supposed to demonstrate the commercial viability of breeder reactors, why should not the private sector continue to bear its original 50 percent share of the costs? It should-if it truly believes in the commercial viability of breeder reactors. But, apparently, the private sector has its doubts: Early on, it secured an agreement that the Federal Government would pay for all costs exceeding the original 1971 estimate.

Others also have doubted whether breeder reactors, in general, and the Clinch River breeder reactor, in particular, could pass muster in the free market. David Stockman-besides his boss perhaps the most fervent supporter of the free market-described Clinch River as-

incompatible with our free-market approach to energy policy. The breeder cannot compete with existing nuclear technologies within the timeframe contemplated by its advocates without continuing massive subsi-

Stockman wrote that in 1977. And, as the estimated costs have spiraled, Clinch River has become even more incompatible with free market princiThe spiraling costs alone would not justify terminating the Clinch River breeder reactor if the project reaped countervailing economic benefits. But, breeder reactors do not make economic sense today. And, according to study after study, they will not make economic sense until the middle of the next century, if ever.

The reason is as simple as the law of supply and demand. Breeder reactors use plutonium-the raw material of nuclear weapons-to boil water and produce the steam that turns the turbines to generate electricity. Plutonium is an extremely expensive reactor fuel, extracted by a highly technical process from the spent uranium fuel rods discharged from conventional nuclear power reactors. The GAO estimates the plutonium fuel for the Clinch River breeder reactor could cost from \$23 to \$200 per gram. Thus, to supply Clinch River with the 6.2 million grams of plutonium required to fuel it for the 5-year demonstration period will cost between \$143 million and \$1.2 billion.

Because breeder reactors can use the plutonium left over from conventional reactor fuel and produce-or breedmore fuel than they consume many experts a decade ago saw them as the ideal way to extend our supposedly scarce uranium resources. But using plutonium in breeder reactors to generate electricity is like feeding cream to a cow to get milk. Only when the price of oats or hay exceeds the cost of producing cream would it make economic sense. Similarly, only when the price of uranium exceeds the cost of producing plutonium would breeder reactors make economic sense.

Today, the price of uranium would have to increase tenfold, from its current level of \$18 per pound, for breeder reactors to become economically justifiable. Yet, the proven uranium reserves in this country have doubled over the past 10 years. At the same time, the projected demand for uranium has drastically decreased as the growth in demand for nuclear power has declined. Consequently, the domestic uranium industry has tumbled into a severe depression that has thrown out of work over half of the Nation's 22,000 uranium miners—many in my own State of Colorado.

The domestic uranium industry has even tried to persuade the Congress to restrict imports of less expensive foreign uranium as a step toward restoring its economic health. Why should we now spend billions of dollars to develop an alternative to uranium fuel, when the domestic uranium industry verges on collapse? The question answers itself: Obviously, we should not.

If current economics do not justify use of the breeder as a uranium insurance policy, then adoption of alternative technology to the breeder reactor will make it even more economically unjustifiable.

Backfittable technology currently under development by the nuclear industry and the DOE could increase by 15 percent the uranium efficiency of existing nuclear powerplants. This technology could save ratepayers \$12.7 billion through the year 2000, according to the GAO. Yet, the DOE, with its skewed nuclear priorities, keeps trying to slash funding for research and development on this technology.

In addition to the uranium savings that would result from backfitting existing reactors, we can further reduce uranium consumption by up to 40 percent with a new generation of uranium-efficient, advanced converter reactors. A full-scale effort to develop these reactors as an alternative to breeder reactors would not only significantly extend our uranium resources but also give us a highly competitive, proliferation-resistant technology with which to capture our former share of the international nuclear market.

If, as many suggest, breeder reactors are the nuclear equivalent of the supersonic transport and the Concorde jets, then uranium-efficient, advanced reactors are the nuclear equivalent of the Boeing 757 and 767. If the administration truly wanted to help the failing domestic nuclear industry, it would reject the economic chicanery of those supporting the Clinch River breeder reactor and instead promote uranium-efficient advanced reactors, a product that can survive in the free market.

Mr. President, We have all heard the argument that breeder reactors will increase the risk of nuclear proliferation by leading us into a plutonium economy in which tons of weapons-grade material move in international commerce each year. Given that only 10 to 15 pounds of plutonium are necessary to build a crude atomic bomb, widespread use of breeder reactors will result in thousands of bombs worth of plutonium annually. And, separated plutonium is extremely difficult, if not impossible, to safeguard from theft or diversion for building bombs.

Mr. President, in a period of unacceptably high Federal dificits, declining growth in demand for electricity, and abundant supplies of uranium, the unfavorable economics alone should clinch the case against the Clinch River breeder reactor. But if not, the grim prospect of nuclear proliferation and nuclear terrorism should.

Mr. President, we must terminate now the Clinch River breeder reactor—and put this nuclear Rasputin to rest once and for all.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume. I, again, do not intend to belabor the subject. As the Senator from Tennessee has said, we have plowed this furrow many times before.

Let me repeat what I said previously. Foreign governments are interested in breeder technology and they are investing their own money in it. They are not investing as much as we are, but they are investing their own money in it.

I remember a few years ago, under the Carter administration, when Jim Schlesinger was the Secretary of Energy and somebody was asking about the breeder reactor. He said what I thought was flippant at the time but maybe not have been. He said, "Well, if we ever need a breeder, we can buy it from the French."

Mr. President, that is a commentary on where this country may well be headed, in an area where we have had technological preeminence from the beginning of the nuclear age in the peaceful use of the atom that was first inaugurated by President Eisenhower as a good spinoff of the awful age that had been entered in Hiroshima and Nagasaki.

Yes, there are peaceful uses for the atom. The Senator from Arkansas made some reference a moment ago about reduced expectation of the use, reduced projections for the use of energy in the future.

Of course, energy consumption is down today. You do not consume much energy in a factory that is closed down. And we know we have economic recession in this country and we also believe there will be economic resurgence. There may be a difference of opinion about how it will happen or when it will happen or under what circumstances it will happen, but I do not think there is anybody in this body who is going to sit here and say we are not going to have better economic times in the next 10, 15, 20, or 30 years. And, over that period of time, we will be looking at technology such as this to lead us toward the energy future that this country must have.

I keep puzzling to myself why it is we continue to shoot ourselves in the foot with respect to vulnerability of energy supplies. That "shoot yourself in the foot" is an old Western euphemism. You are supposed to picture some fumbling, bumbling idiot trying to get his six-shooter out of his holster and in pulling it out of his holster he shoots himself in the foot. This is not that kind of shooting yourself in the foot. This is where you hold your foot up and take dead aim and pull the trigger. It is not by accident, it is by design.

Why would we deliberately cripple ourselves with some kind of a masochistic design to increase our dependency upon imported oil? This country must, for itself and for the security of the future, continue to build energy resources for the future, and one of the energy resources for the future lies in

the development of nuclear technology, including the breeder reactor.

Mr. President, there are various forms of nuclear waste around this country that can be utilized if we have a breeder program at sometime in the future. Let me point to just one and its value, not because we are going to use it now but because it is there for the future.

When uranium is mined, it goes through the milling process that produces the yellow cake that goes on to enrichment that then goes on to fuel. After it has been mined and milled, that which does not go into the yellow cake goes into the storage drums as radioactive waste. We only take about 1.5 percent of the potential energy from uranium. We throw the rest of it away; a once-through fuel cycle that wastes over 98 percent of the potential.

But in that waste which is stored in 50-gallon drums around this country as a waste, there is potential energy if we have a breeder program. That potential energy, just in what we now have in this country, is worth \$25 trillion at today's oil prices. Now, that is not net. There is an expense to get it. But are you going to tell me that this Nation is so wealthy that we can afford to throw away an asset that is worth \$25 trillion because we refused to invest an additional \$1.7 billion in the continuation of the development and technology?

I say to my friends, that has to be the height of stupidity. This is a time for us to reaffirm our confidence in this Nation and the confidence in our ability to move forward in technology rather than say we are another knownothing age.

Mr. President, I hope that the committee amendment is approved. I think the yeas and nays have been ordered. I am prepared to yield back the remainder of my time and I do yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the committee amendment on page 18, line 25. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. HATFIELD. Mr. President, on this vote, I have a live pair with Senator GOLDWATER. If he were present and voting, he would vote "aye". If I were permitted to vote, I would vote "nay". I therefore withhold my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

I further announce that, if present and voting, the Senator from Ohio (Mr. GLENN) would vote "nay."

any other Senators in the Chamber wishing to vote?

The result was announced-yeas 49, navs 48, as follows:

[Rollcall Vote No. 426 Leg.]

#### YEAS-49

Abdnor	Hatch	Pressler

PRESENT AND GIVING A LIVE PAIR AS PREVIOUSLY RECORDED-1

Hatfield, against.

## NOT VOTING-2

Glenn Goldwater

So the committee amendment on page 18, line 25 was agreed to.

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE AMENDMENT ON PAGE 26, LINE 24 The VICE PRESIDENT. The Senator from Oregon is recognized.

Mr. HATFIELD. Mr. President, what is the next order of business?

The VICE PRESIDENT. The clerk will state the next committee amendment.

The assistant legislative clerk read as follows:

On page 26, line 24, strike out "March 15" and insert in lieu thereof "September 30".

Mr. HATFIELD. Mr. President, I have checked with the author of this amendment

Mr. PRYOR. Mr. President, there is no order.

The VICE PRESIDENT. The Senate will be in order. Senators are asked to take their seats.

Mr. HATFIELD. Madam President, I have checked with the author of this amendment and it is agreeable to pro-

The VICE PRESIDENT. Are there pound a unanimous-consent request for a half hour equally divided, 15 minutes to a side. Therefore, I ask unanimous consent to limit this amendment to one-half hour equally divided.

> The PRESIDING OFFICER (Mrs. HAWKINS). Is there objection? Without objection, it is so ordered.

Who yields time?

Mr. PRYOR. Madam President, I do not think I have submitted my amendment to the desk amending the committee amendment.

Mr. HATFIELD. May I ask the Senator a question?

Mr. PRYOR. Certainly, Madam President.

Mr. HATFIELD. Is it the intention of the Senator from Arkansas to debate the question on the basis of the committee's proposed September 30 date, or does the Senator plan to offer a substitute for that date?

Mr. PRYOR. I do plan to offer a substitute and am ready to send that substitute to the desk.

Mr. HATFIELD. I yield to the Senator for that purpose.

#### UP AMENDMENT NO. 1487

(Purpose: To change the termination date for availability of appropriations and funds pursuant to the resolution)

Mr. PRYOR. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator wish the time agreement to apply only to the substitute? Otherwise, the time will have to be yielded back before the substitute is in order.

Mr. HATFIELD. Madam President, I yield back the time on the previous amendment on my side.

Mr. PRYOR. I yield back my time.

The PRESIDING OFFICER. Without objection, there will be 30 minutes equally divided.

Mr. HATFIELD. Madam President, do I resubmit the request for a time agreement on the substitute?

The PRESIDING OFFICER. The Senator may.

Mr. HATFIELD. I ask unanimous consent that there be a limitation on the substitute of 30 minutes equally divided, 15 minutes to a side, with no amendments to be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it

is so ordered. The clerk will state the amendment. The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 1487.

On page 26, lines 24-25, strike "September 30" and insert in lieu thereof "June 1"

Mr. PRYOR. Madam President, what we have is a situation involving a \$425.8 billion appropriations bill. It is the largest bill that we will consider in this session of the Congress by far. It is most of the Federal budget. As we talk informally among ourselves, we all say, "My goodness, this is a terrible way to run the Senate. This is a terrible way to run the Congress."

We all sit back in the cloakrooms and say, "If I had run my business or my law firm, or whatever, as we run the Senate, I would have been bank-

rupt" and so forth.

Madam President, we have established in the past two decades a precedent. That precedent was dreamed up, I think, by some individual with a very ingenious mind. For the last 20 years we have had in this Congress 74 continuing resolutions; 85 percent of all the appropriations bills for the past 20 years have been passed after the start of the succeeding fiscal year. So we can see that this is not just a problem that we are faced with a few days before Christmas in 1982; this is a problem that has been building and getting worse for the past 20 years.

We have seen, 198 times, these bills and these appropriations not approved by the end of previous fiscal years and signed into law. We have seen, as I have stated, 74 continuing resolutions in the past 20 years. This, my colleagues, is by far the largest of all in

history.

I rise now to say that it is my belief that the continuing resolution concept is an abdication. It is an abdication of not only our opportunity, but duty, to look at each line of each appropriation bill, to dissect those appropriations bills deliberately, certainly, surely, and make a final adjudication. We all know this morning that that is not the case that we are dealing with and neither is that the environment in which we legislate.

Madam President, I commissioned an intern last summer to do a little work for me. I had a young lady by the name of Ann Roscopf who came and spent several hours trying to figure out what the Senate had done from January 1 until the last day of June of this year. I do not think it will come as any surprise to any of us that we spent one-third of all of our legislative time during that 6-month period in recesses and in quorum calls.

Well, maybe that, in itself, is not bad, but when we look at the composite picture, we see that an enormous

amount of time has been wasted.

What do we do? Here we are. We have worked now 3 nights very late and into the morning, and maybe this entire night, trying to adopt this appropriations bill, this monster bill that is most of our budget. Most of us actually do not know what is in it, nor are we going to have ample opportunity to debate its contents.

I know we are going to hear, let us go ahead and continue this over until September 30 as the committee has recommended. What I am recommending in this amendment is very meager. It says, no, let us not go to September 30 before we appropriate, as we should; let us go simply until June 1. That, at least, will not be appropriating money for the whole country, for the whole Federal Government for a period which would amount to an entire fiscal year.

The other concern I have—and I do not see the majority leader on the floor. I am not blaming him for mismanagement—but I do think that the country is very concerned when they see us working all night, all day, at the last of a session—a lameduck session—attempting to handle our business as we are doing it. It is an abdication, and all of us know it. We all might as well go ahead and admit it.

I know that people are saying, well, let us wait until September 30, because we are not going to have time to do it. Let us look and see what we are going

to do in January.

On January 3, we are all going to come back to Washington; we are going to hold up our hand; we shall start a new Congress; we shall be sworn in. Then what is going to happen? The next day, we are going to leave and we are going to close this place down. It is going to become a morgue for the next few weeks. No one is going to be here, no one is going to be looking at appropriation bills, no one is going to look at anything else except what we want to look at back in our home States or some far-away land.

I say to my friends, Madam President, we have got to somehow bring this process under control. My amendment simply moves the expiration date from September 30 as the committee recommends to the date of June 1. It is that simple. I hope I will have the support of my colleagues as we attempt to wrestle with a very, very serious problem.

Mr. HATFIELD. Madam President, I

yield myself 3 minutes.

Madam President, I cannot fault the description of the situation here that has just been offered by the Senator from Arkansas.

Let me say to the Senator from Arkansas that as chairman of the Appropriations Committee, there is no one I think who feels the frustration of this whole process more than I. I only recount the fact that this year Congress did not complete consideration of the first budget resolution until June 23. That was nearly 5 weeks beyond the statutory May 15 deadline.

Madam President, this left Congress in the very curious position of consuming 50 percent more legislative days in adopting a general budget plan than was left prior to the start of the fiscal year for implementing such a plan.

That is where we were.

I am not making this as a matter of criticism. I am merely saying these are the facts of the case. They put us in an intolerable timeframe in trying to act on a continuing resolution.

But this is not going to correct the problem that the Senator from Arkansas suggests. This is merely going to make more inefficient the administration of these programs. The agencies are going to be uncertain for how long a period and at what level of funding they should sustain these programs.

If we put a June 1 date on this, then we are going to be right back where we are now. We are going to be doing 1983 appropriation bills or a continuing resolution at a time when we should be addressing 1984. Do not put the Appropriations Committee into this same bind, for it will put the whole Senate in the bind we are in tonight. We are not going to salvage 1983. There is no way we are going to salvage that other than through a continuing resolution.

So let us move it clear through to September 30 as we have proposed. We then free up the whole process to move into the 1984 budget and appropriations process. Then by getting the budget resolution passed on time I can assure the Senator, the Senate Appropriations Committee will certainly move on time.

We were into June this year in the Senate for a budget resolution, and July before we saw an appropriations bill acted upon by the House. We on the Senate side had done our homework. We had held our hearings. We were ready to go and bring it right out here to the floor after marking it up in committee. But there was no reason we should mark up at that time until the House could act on a bill.

Consequently, all I can say to the Senator is that I join him in expressing the same kind of frustration on this procedure. But I really feel we are merely going to continue it by this action rather than expedite it.

Mr. PROXMIRE. Madam President, will the chairman yield?

Mr. HATFIELD. I am happy to yield.

Mr. PROXMIRE. In the chairman's judgment, if we do adopt the amendment offered by the Senator from Arkansas, what realistic possibility is there that the Senate would be able to act on any of these six appropriations bills before June 1? Would we have another continuing resolution in the judgment of the chairman, or would we be able to pass some or most of appropriations bills on the basis of our past experience?

Mr. HATFIELD. I would say to the Senator that what the Senate might be able to accomplish is only half of the picture. I think we could do our mechanics of this, but we have to again rely on the House of Representatives to act. I have no idea what the House would do. The House in the past has indicated that if we get into

this situation, they will tack on another continuing resolution.

Mr. PROXMIRE. My point was on the basis of our past experience, is it not true that these particular bills have such controversial matters in them that our experience has been that we cannot, we have not been able in the past to get appropriations bills passed once we have a continuing resolution going into the next year?

Mr. HATFIELD. Yes; I understand now more precisely the Senator's question. Let me cite the record. In the last 15 years there was only one bill, one bill, that was passed under similar circumstances after entering a new session of Congress.

Mr. PROXMIRE. Only one appro-

priation bill passed.

Mr. HATFIELD. Only one appropriation bill in the last 15 years under these similar circumstances. So the likelihood is very, very slight that we could act on these bills after we return.

Mr. STEVENS. Madam President,

will the Senator yield?

Mr. HATFIELD. I am happy to yield

to the Senator from Alaska.

Mr. STEVENS. I ask the Senator, is there any possibility, if we adopt the Senator's amendment, that we could have any flexibility in conference at all? Is it not true that if we leave the date there, the House has the other date, it is possible at least some of these bills can go to September 30, and we can negotiate our way out and at least have some of the bills not come back on us under the circumstance that we face where all of these bills from the House and Senate will die at the end of this session?

Mr. HATFIELD. The Senator is correct. We would be in a much more likely position of being able to have these bills acted upon and totally re-

moved from that situation.

Mr. STEVENS. Is it not also true, if you look at the supplementals, that the cost of Government has gone up because the supplementals that we have been asked for in the spring always are larger because we cannot get to them until late in the summer due to the fact that we are trying to work on bills for the same fiscal year that we are in when we are facing supplementals on those same bills and also trying to deal with the appropriations bills for the next fiscal year? So if the Senator's amendment passes, we will be back in the same position only worse than we are now. The only way out of this is to follow the Senator's leadership and try to get some of these bills through to September 30, at least some of them. If we adopt the Senator's amendment, we will have no flexibility at all with the House except between March and June. With the committee's amendment at least we have the chance of getting some of these 10 bills over to September 30 so

we do not have to fight them again halfway through the next fiscal year.

Mr. DOMENICI. Madam President, will the distinguished Senator yield 3 minutes to the Senator from New Mexico?

Mr. HATFIELD. I yield.

Mr. DOMENICI. Madam President, I rise to congratulate the Appropriations Committee. It is absolutely necessary that all of the problems cited by the distinguished Senator from Arkansas regarding continuing resolu-tions get resolved by the U.S. Congress. The best way to resolve it is precisely as recommended by this committee and the distinguished chairman, Senator HATFIELD. If anyone thinks we are going to do any better in terms of the specifics, in terms of the costs, in terms of meetings like this for continuing resolutions, by having this continuing resolution expire in June, it seems to the Senator from New Mexico that that is absolutely impossible. It is going to get worse, not better. If we could once and for all be finished and let the appropriators start with a clean slate, we would be in a marvelous situation in terms of having the bills here, having the time, and not being here at 5 o'clock in the morning, when the Government is going to close down. Every argument that he has cited in favor of his amendment strangely enough impresses the Senator from New Mexico in favor of the committee amendment.

The people want us to finish. They want to understand. They are never going to understand as long as we have one continuing resolution after another. They would like it to finish and hear the word appropriation again instead of continuing resolutions.

I can assure you, that every time we have gone with the continuing resolution with the idea that we are going to have an easier job when we actually get in appropriations bill, times have changed, people want more, everything else piles up and we never come in with any less money. I doubt if we have ever come in with anything that is more streamlined. We have the agencies sitting around wondering what their budgets are. If you are looking for efficiency it is not there. I can only say that the only thing better would be if the House of Representatives in conference would agree to this. Can you imagine what it would be like for this institution and for them over there to start next January and not have any continuing resolutions facing them? It appears to me that it would be one of the most remarkable accomplishments in the last 15 years. I know of the great concern of the Senator from Arkansas, but it seems to me that exactly what he wants to happen will probably happen only if the Appropriations Committee desire that we go on through a year actually comes out of conference. I hope the Senate

sends a message that that is what they would like to happen.

I thank the chairman.

Mr. SYMMS. Madam President, will the Senator from New Mexico vield?

Mr. DOMENICI. I think I have no time remaining.

Mr. HATFIELD. I yield to the Senator from Idaho.

Mr. SYMMS. I thank the Senator.

I would like to say to my good friend from Arkansas-and I discussed it with him yesterday, and I say again-I do not know how many managers and administrators I have talked to in the last several years of the different agencies of Government who have oftentimes told me:

If you fellows in the Congress would just give us a budget, even if it is a little less than what we asked for, but we know how much we are going to have, then we can work around the budget.

What the Senator is suggesting, it would appear to me, he ought to move it up to the 31st of January when we can then do this once a month. It makes it more uncertain for them, and I certainly agree with the leadership position that Senator HATFIELD has taken of let us get it behind us, put it up to next year and then start on the 1984 appropriations bills.

We are the laughing stock of America. Every time we run out of money we come down here and stay until midnight or 5 o'clock in the morning, whatever the case is, because we cannot get the business done. Why not set it out there? It just appears to me that what the Senator wants to accomplish that this only compounds the problem. I do not care if you talk to Forest Service people, BLM people, military people, educators, in any different Government function, they will always come back and tell you:

We would be better off if we had a budget that we could count on that was reliable and we do not always have this up in the air with the continuing resolution.

So it will be settled.

Mr. PRYOR. May I ask my friend from Idaho if I would be able to elicit his support for my amendment if I changed the date from June 1 to March 1? That was my original idea that I had discussed.

Mr. SYMMS. No, that is the point I am making. Then you would have to do it again, and it makes it more un-

But the point is in my opinion what your sincere point that you are making is you would be better off if you put it to September 30, 1984, and then we would at least not have the uncertainty that there will be no funding for this agency or that agency, and they close their doors and then reopen them, and have all the uncertainty, the unpredictability, which almost makes it impossible for any manager of any Government agency to at least give the taxpayers a fair shake for the money they spend, because you make it so difficult for those sincere, hardworking people to do a good job because they do not know what the plan has in store for them.

Mr. PRYOR. You talk about removing uncertainty, and I am talking about the corruption of the appropriations process. Some of my colleagues say, "Go home for Christmas, let this thing go to September 30, wipe the slate clean," and it sounds wonderful, beautiful, it is a magnificent concept. But the truth has been and it is very simple, that we are throwing in the towel and we are admitting that the system we have does not work.

I wish I were smart enough to make a recommendation. I know we have two very splendid former Members of this body, one from your side of the aisle and one from my side of the aisle, Senator Pearson and Senator Ribicoff, who are working on getting suggestions and trying to find a real constructive way that might serve as Moses leading us out of the wilderness, so to speak, because we are in a wilderness.

Mr. FORD. Mr. President, will the Senator yield?

Mr. PRYOR. I am delighted to yield. Mr. FORD. I will say to my distinguished friend from Arkansas that basically what we are talking about here now is a dilemma about financing the Federal Government and its functions.

For some time now there has been floating around a 2-year budget proposal. That 2-year budget proposal has the nomenclature to get us out of the dilemma we are in. It will give us the opportunity to have time to dissect the budget, as the distinguished Senator from Arkansas has stated earlier.

I would be very hopeful that all of those who are now saying that we want to clean the slate and just go ahead and do it, we are back in here again. We are back in here again and doing the same thing next year. If you had a 2-year period and had the pressure valve along the way to accommodate whatever problem you run into, I think the distinguished Senator from Arkansas would then accomplish the purpose he is looking for.

I could not help but inject that into the conversation here. I admire both sides of what you are trying to do, and there may be an answer flowing out of

Mr. PRYOR. I thank the Senator for his comment.

Mr. STENNIS. Mr. President, may I ask a question?

As I understand, the Senator from Arkansas proposes this year only, the current fiscal year, that we go over until next September 30; is that correct?

Mr. PRYOR. No; that is the recommendation of the Senate Appropriations Committee.

Mr. STENNIS. The Senator was favoring that position?

Mr. PRYOR. Mine would move the date from September 30 to June 1. My amendment would move that back so that we would see this continuing resolution expire and so we could attempt to appropriate, as we are charged to appropriate, under our existing and historic procedures.

Mr. STENNIS. If the Senator would yield to me for just 1 minute-

Mr. PRYOR. I would be happy to yield.

Mr. STENNIS. I have been thinking about this quite a bit in the last day or two, and under the schedule I will now be the ranking minority member of the Appropriations Committee next

We have now come to the point where we either have to have a continuing resolution or a debt ceiling or something special all the time. Go into another, and go back and have another round with a continuing resolution. It seems to be like-

Mr. PRYOR. Seventy-four times in

20 years.

Mr. STENNIS. We ought to try for a year. I am not exactly following you, I am trailing you. We ought to try for a year, and this year is already well through the year, and let this go for the 12-month period. I believe it is worth the experiment. I would not want to favor making it permanent now but just to see how it works for 1 year.

It is a very grave matter. We cannot get at the things in the normal way any more, the committees cannot,

Mr. LEVIN. Mr. President, will the Senator from Arkansas yield?

Mr. PRYOR. I would be happy to

Mr. LEVIN. Let me commend my friend from Arkansas for raising a very critical issue. It was raised in a similar manner on November 19, 1981. We had the same problem. We have the same problem. Somebody tried to turn what was supposed to be a temporary stopgap funding measure of limited duration-that is the definition, temporary stopgap measure of limited duration into the whole ball of wax, the whole budget. Ten appropriations bills, \$400 billion-plus, the defense appropriations bill, HHS, we were doing all of that in 24 hours, going through midnight.

We are told to clear the decks for the 1984 fiscal year budget. I think the price for our doing that is to abdicate our duty for the 1983 budget. We should not do that. We ought to have, we ought to get, another continuing resolution in January or February or March, get it out of the Appropriations Committee, take a week and discuss it right. Let us discuss it right. We cannot discuss this in 24 hours. The Defense appropriations bill is worth more than 24 hours. The priorities of this country are worth more than 24 hours, and yet we wrap it up in this ball of wax, and then we are told finally it is inefficient for the agencies to have this interim deadline. If that is the test, efficiency for the agencies, we are going to make the people's elected representatives an irrelevant factor. We cannot permit the Senate of the United States to become an irrelevancy, and that is what I am afraid we are going to do unless we adopt the Pryor amendment.

Mr. PRYOR. I thank the distinguished Senator from Michigan.

Mr. STENNIS. We are now beset by these interim periods when it comes to being a big scare that the Government is going to close down. Monday morning, if we do not settle this thing Saturday, watch Monday morning, the scare will be on, the telephones will be ringing, and it seems to me that that creates a lack of confidence in us, as to what are we doing or why are we not doing something.

Mr. PRYOR. I think the greatest lack of confidence, I might say to my friend from Mississippi, is when they see us not performing our duty. And we are not performing our duty when we abdicate this great power away and just throw in the towel and admit the system is broken down. We have to change it. I hope my colleagues will consider strongly adopting this amendment so that we will have an opportunity to appropriate this money.

The PRESIDING OFFICER (Mr. JEPSEN). The time of the Senator from Arkansas has expired.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I vield back the remainder of my time. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Gold-WATER) is necessarily absent.

I further announce that the Senator from Utah (Mr. HATCH) is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) would vote nay.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 24, nays 73, as follows:

[Rollcall Vote No. 427 Leg.]

YEAS-24

Burdick Byrd, Robert C. Boren Exon Bradley Cranston Heflin Bumpers Dixon Jackson

Kennedy Metzenbaum Riegle Mitchell Sarbanes Leahy Levin Pryor Sasser Matsunaga Randolph Zorinsky NAYS-73 Abdnor Garn Murkowski Andrews Gorton Nickles Armstrong Grassley Nunn Packwood Baker Hart Baucus Hatfield Pell Percy Bentsen Hawkins Boschwitz Hayakawa Pressler Proxmire Brady Heinz Helms Quayle Byrd. Harry F. Jr. Hollings Roth Cannon Huddleston Rudman Chafee Humphrey Schmitt Chiles Inouye Simpson Cochran Jensen Specter Cohen Johnston Stafford D'Amato Kassehaum Stennis Kasten Danforth Stevens DeConcini Lavalt Symms Thurmond Denton Long Dole Lugar Mathias Tower Domenici Tsongas Wallop Durenberger Mattingly Eagleton McClure Warner Melcher Weicker Ford Movnihan NOT VOTING-3 Goldwater Hatch Glenn

So Mr. PRYOR's amendment (UP No.

So Mr. Pryor's amendment (UP No 1487) was rejected.

Mr. HATFIELD. I move to reconsider the vote by which the amendment was rejected.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I should like to complete the last action of business. That is, since Senator Pryor's amendment was defeated, I move the adoption of the committee amendment.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the committee amendment on page 26, lines 24 and 25.

The committee amendment on page 26, lines 24 and 25 was agreed to.

ORDER OF BUSINESS

Mr. HATFIELD. Mr. President. I wish to outline for the Senate precisely where we are and what remains to be done.

We now have five more committee amendments—one relating to the Federal Trade Commission, on which the principals have agreed; I shall propound a unanimous-consent request for a time limitation of 30 minutes. An Ashbrook amendment on abortion, on which the principals have agreed to 20 minutes equally divided; one on a copyright amendment on which principals have agreed on a 20-minute time agreement; one on community development, on which there is no time agreement; and one to FEMA, on which there is no time agreement.

So far, I have had the following Senators indicate they wish to offer amendments: Senator Baucus, two amendments; Senator Dopp, one; Senator QUAYLE, two amendments; Senator HAWKINS, two; Senator PERCY, one;

Senator Thurmond, one; Senator DeConcini, one; Senator Moynihan, one; Senator Danforth, one; Senator Cranston, one; Senator Cannon, one; Senator Chafee, one.

Mr. LEVIN. I have one, Mr. President.

Mr. HATFIELD. Senator Pell, one; Senator Proxmire, two; Senator Levin, one; Senator Warner, one; Senator Gorton, one; Senator Boren, three; Senator Dixon, one; Senator Melcher, one; Senator Pryor, one; Senator Pressler, two; Senator Pressler, two; Senator Tower, one; Senator Domentici, one; Senator Helms, three.

Mr. President, I should like to propound a unanimous-consent request that we continue with these amendments and that we stack the votes on any that require a rollcall beginning at 10 o'clock. That would permit those Senators who do not have amendments to at least get some sleep. It would also require the Senators who do have amendments to be on deck ready to offer them as we move through this list.

Then it would provide the opportunity for the Senate to complete this work by noon, hopefully, so that we can go to conference at 1 o'clock.

Mr. STENNIS. If the Senator will yield on that, we start voting at 10 o'clock?

Mr. HATFIELD. We start voting at 10 o'clock on the amendments that have been acted upon and that require a rollcall. We would stack them to begin voting upon them at 10 o'clock.

Mr. STENNIS. If the Senator will yield, the Senator means once they have been debated, they will come up; then we shall vote?

Mr. HATFIELD. That is correct. Mr. PRYOR. Could we have 10-

Mr. PRYOR. Could we have 10minute votes on those?

Mr. HATFIELD. I would not include that at this point. I shall leave that to the leadership.

Mr. RUDMAN. Will the Senator yield?

Mr. HATFIELD. Yes, I yield.

Mr. RUDMAN. Mr. President, I would like to inquire whether it might be possible, in light of a number of things which the chairman is aware of, if this next item is taken up, as I expect it will be and disposed of in a fairly brief period of time—that is the FTC amendment. For a number of reasons, I would think, because of the number of undecided votes on this very important matter to the American people, we might not be through until 5:30, perhaps a little longer. I hope we have a vote at that time.

I would like at least to address the sleep possibilities of my colleagues.

Mr. HATFIELD. If I understand the Senator correctly, he is suggesting that we not ask for the unanimousconsent and start stacking the votes until after the FTC amendment has been voted upon?

Mr. RUDMAN. We can start propounding them now and take the next amendment after the FTC.

Mr. HATFIELD. Mr. President, I propound the unanimous-consent request that, following the action on the FTC amendment, we begin stacking the votes on any amendments that have been debated and that require a rollcall, beginning at 10 o'clock.

Mr. LONG. Reserving the right to object, I would like to ask the Senator a question.

Suppose on these amendments, one requires more debate than one anticipated so that we cannot conclude the debate on that one. Does this anticipate that that particular vote will not be stacked, that we would go to some other amendment and come back to that later on?

Mr. HATFIELD. That is correct, I would say we have a majority of these amendments that I have announced before we added the other ones from this recent floor action. We have on most of them a time agreement among the principals. I have not propounded any of those time agreement requests yet, but the principals have agreed to time limitations. So we ought to be able to move through all of those pretty well, I think, on rather short time limitations.

Mr. LONG. Where the Senators are willing to agree to limited debate or feel that they have debated enough, that is fine. But where some feel there is one that should be debated at length, that should not be voted on at 10 o'clock.

Mr. HATFIELD. The ones we would stack would be only those where debate has been completed or which would require a rollcall.

Mr. DECONCINI addressed the Chair.

Mr. DOLE. Mr. President, do we know what the amendments are? If there are any that affect the Finance Committee, we would have to stay and debate those. Is it safe for the Finance Committee to go home so we can get ready for the highway bill?

Mr. HATFIELD. I think it would be very desirable for the Finance Committee to have representation on the floor at all times, because I know a number of these have indicated that they have some relevance to the committee.

Mr. LONG. May I say to the Senator in that connection that those of us on the Finance Committee—I believe I speak for the chairman as well as myself—intend to pass a Finance Committee bill.

We do not intend to have Finance Committee bills passed on the appropriation bill. We are willing to offer Senators an opportunity to offer their amendment on this bill or some other bill, but we are not willing—it can be either on the gasoline tax bill or some other measure, but we are not willing to have the Appropriation Committee interfere with the work of the Finance Committee. And we are willing to stay here as long as it takes to see that that is not done.

Mr. HATFIELD. Let me say the Senator knows that the intent on the part of the chairman of the Appropriations Committee is not to intrude on the jurisdiction of the Finance Committee.

Mr. LONG. We have no problem in this regard, so far as I know, with the chairman of the Appropriations Committee. There was a time when it was not that way. But we have no problems with the chairman of the Appropriations Committee. He is willing to stay within the bounds of his committee jurisdiction and within the bounds of the law and the rules. But some of our colleagues have a bad habit of trying to take the Finance Committee bills and add them on top of the appropriations bills, and we think it is about time we stop that foolishness.

We had a Democratic caucus, and I am not going to say what the Senators might have said, but we have to stop this thing of taking amendments on other bills that have been passed, or in conference or on bills that have not yet been placed on the calendar and adding all those things on other bills on the theory that they would have a better chance somewhere else, because all that means is we will never get out of here.

We will not get out of here at Christmas. We will not get out of here at New Year's. We will just go until one session expires and start the next day and never get our business done. So we just do not want to be by-passed and we want to offer people an opportunity to vote. But I am here to say that if someone cannot get a vote on his tax amendment on a tax bill, he is not going to be able to get a vote on an appropriation bill. Some of us on the Finance Committee are here to see that that does not happen.

Mr. DECONCINI. Will the Senator from Oregon yield?

Mr. HATFIELD. I yield.

Mr. DECONCINI. Mr. President, I think there is a unanimous-consent request before the Chair, and reserving the right to object, I think the FTC amendment coming up is very important, but it is no more important than the Ashbrook amendment or the Levin amendment or the DeConcini amendment or anything else.

I ask the Senator from New Hampshire not to keep us here for his amendment, because his amendment is very important but so are all the other amendments that the chairman is attempting to stack at this time. I hope that he would allow it to be stacked along with all the rest.

Mr. HATFIELD. I would only comment that I am going to be here throughout the whole situation, so consequently it has no bearing on my convenience. But I am trying to accommodate as many Senators as possible. The Senator from New Hampshire asked for that. I was trying to accommodate him. I will try to accommodate any other Senator.

Mr. ZORINSKY. Mr. President, Reserving the right to object, I will have to object to any unanimous consent which would allow a time agreement on a Radio Marti amendment or the ability of a Radio Marti amendment to be added to any other amendment, because, as the majority leader is aware, I have been on and off filibustering that piece of legislation. I do not care if it does take until New Years; I am not going to provide any unanimousconsent request, for myself, without precluding Radio Marti amendments.

Mr. HATFIELD. I say to the Senator that we are most anxious to take up those amendments in priority with which we have time agreements. With the number that I look at here now, we are really going to be pressed to get through by noon.

I can assure the Senator that preference and priority will be given to those amendments that do have time agreements reached between the principals.

Mr. ZORINSKY. The chairman should not then hesitate in including in that unanimous-consent preclusion until after 10 o'clock or 11 o'clock of bringing that up.

Mr. HATFIELD. I would be reluctant to include that in the unanimousconsent agreement because I do not want to take any of these amendments in preference status or to in any way prejudice the amendments. I do not think that that would be appropriate.

Mr. ZORINSKY. Likewise, I feel that I would be prejudiced after 2 weeks of filibuster and I must object.

Mr. STEVENS. This does not say amendments will or will not be raised. It just said that if a vote is ordered, it will take place at 10 o'clock this morning. It does not give anyone any right to bring up an amendment. It does not give us any right to terminate debate. It does not change anything except we vote at 10.

Mr. ZORINSKY. If an amendment is brought up with a high priority, it would be amendable by a Radio Marti amendment, would it not?

Mr. STEVENS. That is right, but it is only the votes that are ordered between now and 10 o'clock that will commence at 10.

Mr. ZORINSKY. The problem is, I do not want the votes to occur ever. And once the amendment is on, they start at 10 o'clock, it is not going to help me very much.

Mr. HATFIELD. Mr. President, I withdraw my unanimous-consent agreement so that we can get on with

the business of taking care of these amendments.

I withdraw my request for unanimous consent to stack the votes at 10 o'clock

COMMITTEE AMENDMENT ON PAGE 57, LINE 15

Mr. HATFIELD. I ask the Chair to put the next amendment to the body.

The PRESIDING OFFICER. The request is withdrawn. The clerk will report the next amendment.

The legislative clerk read as follows: On page 57, line 15, insert a new section 141.

Mr. HATFIELD. Mr. President, the comanagers of the bill, Senator Prox-MIRE and I, will temporarily set aside the FTC amendment in order to provide a freestanding opportunity for the Senator from Idaho to offer an amendment undergirding this amendment.

The PRESIDING OFFICER. The manager has that right.

#### UP AMENDMENT NO. 1488

(Purpose: To temporarily limit, until an authorization bill is enacted, the expenditure of funds by the FTC against stateregulated professions.)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McClure) proposes an unprinted amendment numbered 1488.

Several Senators addressed the Chair.

Mr. METZENBAUM. Will the manager of the bill yield for a question?

Mr. McCLURE. Parliamentary inquiry, Mr. President.

Mr. METZENBAUM. Will the manager of the bill yield for a question?

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. McCLURE. Mr. President, has the amendment been reported?

The PRESIDING OFFICER. The amendment has been reported but not read.

Mr. McCLURE. Will the clerk read the amendment?

The PRESIDING OFFICER. The clerk will report.

Mr. MOYNIHAN. Mr. President, might we have order?

The PRESIDING OFFICER. The clerk is reporting the amendment.

The bill clerk resumed the reading of the amendment:

At the appropriate place in the bill insert the following:

SEC. . Until legislation authorizing the activities of the Federal Trade Commission is enacted into law, or until the expiration of this act, whichever comes first, none of the funds—

Mr. PROXMIRE. Will the Senator yield? Will the chairman of the Appropriations Committee yield for an inquiry?

Mr. HATFIELD. Yes.

Mr. PROXMIRE. The Senator asks unanimous consent, as I understand it, that this be a freestanding amendment?

The PRESIDING OFFICER. The amendment is being read.

Mr. HATFIELD. No.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Is

there objection?

Mr. HUDDLESTON. Objection.

The PRESIDING OFFICER. There is an objection. The clerk will continue to read.

The bill clerk resumed reading the amendment as follows:

appropriated by this act may be used by the FTC for the purpose of investigating, issuing any order concerning, promulgating any rule or regulation with respect to, or taking any other action (other than one that is already the subject of litigation in the courts of the United States on or before the date of enactment of this Resolution) against any State licensed and regulated profession (as that term would apply under the definition in 29 U.S.C. 162(12)) or the local, State or nonprofit membership association thereof.

Mr. McCLURE addressed the Chair. The PRESIDING OFFICER. The

Senator from Idaho.

Mr. FORD. Point of order, Mr. President. What is the time agreement on this amendment? No time agreement?

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. McCLURE. Mr. President, I do not know whether it is possible to get a time agreement on this amendment. The Senator from New Hampshire, who is the principal proponent of the amendment in the Appropriations Committee, has expressed a willingness to have a time agreement. The Senator from Idaho is willing to have a time agreement, and I do not know that the requirement of other Members might be. But I would be willing that it be a very brief one. I think everyone knows what the issue is, although I know the Senator from New Hampshire wants to make a statement and I have three or four other Senators who want to make a statement on my amendment.

Mr. RUDMAN. Will the Senator

yield?

Mr. McCLURE. Yes, I yield without

losing my right to the floor.

Mr. RUDMAN. Would the Senator from Idaho be willing to consider, knowing the rather complex parliamentary situations that now exist by virtue of the fact that this is now a freestanding amendment rather than a second-degree amendment, in light of that would the Senator from Idaho be willing to agree to a 30-minute time agreement equally divided only up unto a tabling motion, which I intend to make, and the time agreement ex-

piring at that point? Obviously, if that succeeds, that is the end of it. If it does not, then the ball game starts over again. Would the Senator be willing to agree to that?

Mr. McCLURE. I say to the Senator I am very willing to agree to that, but I yield to the Senator from Oregon.

Mr. PROXMIRE. When the Senator from New Hampshire says the ball game starts over, that means if the tabling motion fails, there is no time agreement on the McClure freestanding amendment?

Mr. RUDMAN. The Senator from

Wisconsin is precisely correct.

Mr. HATFIELD. Mr. President, I propound then a unanimous-consent request for a time agreement on the pending McClure amendment, 30 minutes to be equally divided and with the tabling motion to follow that period of depate.

Mr. ZORINSKY. Mr. President, reserving the right to object, would the Senator include in that unanimous consent that that amendment not be subject to further amendment?

Mr. METZENBAUM. Will the Senator further provide that if the tabling motion fails, there is unlimited debate

available?

Mr. PROXMIRE. We have done that.

Mr. METZENBAUM. I do not think the Senator said that.

Mr. HATFIELD. That is precisely what we said.

Mr. PROXMIRE. That is right.

Mr. METZENBAUM. Will the Chair restate what the unanimous-consent

request is?

The PRESIDING OFFICER. The unanimous-consent request was for 30 minutes of debate on the amendment equally divided, to be followed then by a motion to table; provided that if the motion to table fails, the amendment would remain pending without a time limitation.

Mr. METZENBAUM. That is fine.

Mr. ZORINSKY. Mr. President, would the Senator propound in addition that the amendment not be further amended?

Mr. HATFIELD. All right.

The request has been made that I amend my unanimous-consent request that it not be amendable, that this motion not be amendable.

Mr. RUDMAN. I have no objection

with that.

Mr. HATFIELD. Mr. President, I thank the Senator from New Hampshire.

I amend my unanimous-consent agreement to include the request of the Senator from Nebraska that the amendment is not amendable.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I thank the Chair. Mr. McCLURE. Mr. President, this amendment on behalf of myself and my colleague, Senator Melcher, would limit the expenditure of funds by the Federal Trade Commission for actions against the State regulated professions or their nonprofit membership associations until an authorization bill is enacted.

This amendment builds on the action taken Wednesday by the Appropriations Committee when they adopted an amendment offered by my colleague from New Hampshire, Senator RUDMAN. His amendment places a needed, and very welcome, restraint on the FTC's unwarranted incursions into the professional sphere. However, I am concerned that this committee action does not go far enough. It seems to me that many areas of legitimate professional activity would still be subject to the FTC's notorious fishing expeditions and disruptions. The committee amendment also does not protect professional associations and the beneficial, voluntary self-regulation that they promote.

For example under the Apropriations Committee amendment, the FTC could still challenge medical peer review activities. The Commission would be allowed to attack the codes of ethics of attorneys, doctors, dentists, nurses, engineers, and other professionals.

As I interpret the committee language, the FTC would still be able to attack a State's procedures for disciplining lawyers. The voluntary board certification system in medicine would still be subject to the Commission's meddlings. Cost containment activities undertaken by a variety of health professionals would be subject to FTC challenge. Certainly, in this time of rising health care costs, this Congress should not take any action that would prevent doctors, dentists, nurses, and others from coming to grips with this difficult problem.

I think we can all agree that the types of activities I have just mentioned are worthy and in the public interest. They should be allowed to continue unhindered. The committee language, while a useful first step, is too narrow to protect these worthwhile programs conducted in the public interest.

The amendment we offer now would be in addition to the language adopted by the committee. It would extend the protections already agreed upon. Our amendment is not a substitute for the committee language. Rather, it is a necessary, constructive addition to what has already been achieved.

I think it is important to note the closeness of the committee vote on this issue. The committee's language was adopted 15 to 14, a mere one-vote margin. That tells me that a substantial number of the members of the committee believe as I do—that we need to go farther in limiting the FTC. The restrictions already adopted are

useful, but we need to do more at least until the matter can be properly disposed of on the authorization bill.

Certainly that is a view shared by a majority of the members of the Commerce Committee. The FTC reauthorization bill they have reported would resolve the problem, but unfortunately has not yet been voted on. However, I urge adoption of our amendment as a way to implement, however temporarily, the will of that committee.

Our views on the need for greater limits on the FTC are also shared by the House of Representatives. On December 1, by a substantial vote of 254 to 155, the House amended their FTC reauthorization bill to place a moratorium on any new FTC actions against

the professions.

These actions by the Commerce Committee and the House amply demonstrate the desire of many in Congress to put a lid on the FTC's continued attacks on the professions. I believe it is time for the whole Senate to recognize that intent by adopting this amendment.

I should point out that this amendment is a limited one, certainly in comparison to the actions I have just cited. In fact it is really a middle ground between these actions and that of the Appropriations Committee.

Mr. President, I would like to make one final point about our amendment. I am sure we all agree that this FTC issue should be settled on the reauthorization this year. Hopefully, we will be able to conclude that effort early in the 98th Congress. In anticipation of that early work, the duration of our amendment would be only until the reauthorization is enacted or until the end of the continuing resolution, whichever comes first. Since this continuing will run until the end of the fiscal year, I think this proviso is needed to insure that there are no funding restrictions that might be inconsistent with the enacted authorization. Therefore, as soon as we finish the authorization bill, our amendment will no longer be in effect-even if the professions issue is not then disposed of.

In conclusion, let me say that think the unfair advantage the FTC has over the States and the professions they regulate has gone on long enough-especially when in August they even tried to interfere with a State requirement in Maine designed to hold down health care costs. I hope my colleagues will agree and will support our amendment.

The PRESIDING OFFICER. Who

yields time?

Mr. McCLURE. I yield 3 minutes to the Senator from Alaska (Mr. STE-VENS).

Mr. STEVENS. Mr. President, just briefly, I think the Senate should realize that until just 5 years ago professions of this country did not have the attention of the FTC that they have today. The reason was that traditionally this has been a field for the States.

In the period of time since the FTC has started to take jurisdiction, the States have gradually yielded to the Federal Government the regulation over some of the professions as the FTC has extended its jurisdiction.

I have taken the position and I think it is a valid one that the Federal Government should not extend this jurisdiction. It should insist that the States continue to regulate the professions as

they have in the past.

I have high regard for my friend from New Hampshire and he says "but they have not done so in some of these areas." So he wants to have a partial area of Federal jurisdiction through the FTC

Frankly, I tell you I see no reason to do it. We have situations where we now are expanding our Federal taxes so that we can continue to send more revenue sharing back to the States.

We have the situation where local governments and State governments are informing their people that they do not have to raise taxes as the Federal Government does. The main reason is because we have taken more and more of the State jurisdiction into Washington.

This is one place where we can draw the line and say that the procedures that existed in this country for over 200 years worked, the professions flourished, and they were subject to control by the State legislatures, by actions of the State because they knew there was no one in Washington who was going to do it for them.

If we allow the FTC to expand its jurisdiction now, the time will come when no State will pay any attention to its professions because the Federal Government will pay the bill.

To me it is a simple matter of saving the system worked before the FTC moved to take this jurisdiction, and we should insist that it continue to work and not allow the FTC to bring to Washington the power to regulate the professions of this country.

Mr. RUDMAN. Mr. President, I yield myself 5 minutes from my time.

Mr. President, I rise in opposition to the amendment by the Senator from Idaho and in support of the compromise amendment which I offered and Committee on Appropriations the agreed to.

President, the committee Mr. amendment would reserve to the States exclusive authority in those areas where they traditionally have exercised jurisdiction—the so-called quality of care issues. Specifically, it would prohibit the Federal Trade Commission from preempting State laws, or parts thereof, which establish "training, education, or experience requirements for professionals or the

permissible tasks and duties of professionals." These are areas in which the States have expertise and the FTC does not, and the FTC should not be in the business of questioning duly enacted State laws.

At the same time, the committee amendment would retain the FTC's authority over anticompetitive "commercial practices" or professionals, practices such as price fixing and boycotts. The FTC's authority in these types of actions is unchallenged as regards businesses. No sound reason at all has been advanced for arbitrarily immunizing from FTC scrutiny professionals who engage in such illegal acts.

The compromise proposal, Mr. President, differs from the earlier Broyhill-Florio amendment in that the socalled preemption override, which would have allowed the FTC to preempt any State law if it found that it did or might adversely affect competition, has been eliminated. A number of Senators were concerned that the override provision created a loophole which the FTC would exploit to second-guess appropriate State actions, a fear, I might add, that was not unfounded given some of the FTC's past actions.

In addition, the American Medical Association raised the concern that it would grant the FTC its largest expansion of regulatory authority since the Magnuson-Moss amendments of 1975 and 'law." "would go far beyond existing Accordingly, I responded to these concerns and dropped that sec-

tion of the compromise.

In contrast, the amendment advanced by the Senator from Idaho would totally eliminate FTC jurisdiction over the professions and their professional associations. The FTC would be prohibited from investigating and pursuing even the most clear-cut and egregious violations of antitrust and consumer protection law and would be forced to drop litigation now underway.

To understand what is at stake here. it is instructive to take a look at the cases the FTC has brought against professionals in the past:

- 1. Illegal threats by a town's only doctors to boycott the local hospital's emergency room if it recruited competing physicians to practice at the hospital.
  - 2. Advertising restrictions used to:
- a. Prevent doctors from advertising they accept medicaid or medicare assignment.
- b. Prevent doctors from advertising to the Hispanic community that they spoke Span-
- c. Drive a physician house-call services out of business.
- d. Prevent a church organization from running a low-cost cardiac stress clinic.
- 3. Price-fixing agreements where physicians agreed not to work below "usual" rates, thus preventing hospitals from reducing costs.
- 4. Boycotts of health maintenance organizations by physician groups by, for example,

excluding HMO doctors from hospitals or preventing them from obtaining malpractice

5. Boycotts of dental cost-containment programs developed by insurance, industry, and labor groups.

6. Illegal kickbacks from a major medical laboratory corporation to physicians.

7. Coercion to compel a State medicaid program to increase doctors' fees.

8. The Eyeglass I rule which permits the advertising of eyeglass prices and requires that prescriptions be released to consumers. This is the only instance in which the FTC has invalidated state laws relating to the professionals and it has led to a substantial reduction in the price of both eyeglasses and contact lenses, including a reduction in the average price of soft lenses from \$300 to \$100.

As you can see, Mr. President, these actions by the FTC have had nothing to do with the quality of care. The quality of treatment any patient received was not affected in any manner by these FTC actions. All that changed was the price the consumer had to pay.

All the change was that the price

was lower.

The American Medical Association has advanced the proposition that FTC authority over the professions is duplicative, that the U.S. Department of Justice and the State attorneys general have sufficient authority to take whatever actions are necessary. My response to that argument is direct.

First, the Justice Department has traditionally deferred to the FTC in this area, just as it has in the area of Robinson-Patman violations, and it has not brought a case relating to professionals in many years. It has neither the resources nor the expertise. There can be no greater emphasis of this than the fact that the last six Assistant Attorneys General in charge of the Department's Antitrust Division, including William Baxter, the incumbent, have opposed the complete ex-

emption for professionals.

As for the State attorneys general, the AMA has neglected to mention that 13 do not even have the legal authority to bring antitrust actions against professionals and 27 others have never done so, primarily for lack of resources. In my neighboring State of Maine, for example, the FTC is currently conducting a price-fixing investigation involving doctors. Prior to commencing the investigation, the FTC asked the attorney general of Maine if he would prefer to handle the case. He declined.

Yet, Mr. President, the most outrageous aspect to this line of argument that the AMA has advanced, and which shows just how arrogant professionals can sometimes be, is the fact that at the last AMA House of Delegates meeting, in June of this year, a resolution was adopted in support of a health care exemption from both Federal and State antitrust laws. Thus, the AMA has had the unmitigated gall

to come before the Congress requesting an exemption from FTC jurisdiction on the grounds the States can handle any existing problems while preparing to seek exemption from State jurisdiction at the same time. That kind of duplicity should not be rewarded.

Mr. President, it is interesting to hear what others have to say on this issue. The Wall Street Journal, not a liberal paper by any means, wrote:

[G]enerally, more power to the FTC has meant more punitive and unnecessary regulation. But this time the Commission is on the side of the markets. . . . A lot of what is going to be walking around disguised as decentralization or deregulation just may, when you take a closer look, turn out to be just the same old protectionism underneath.

conservative organizations such as the Heritage Foundation, the National Association of Attorneys General, and the Small Business Legislative Council have also criticized total exemption.

The administration opposes the amendment of the Senator from Idaho and supports the compromise as indi-

cated in statements by Vice President Bush, OMB Director Stockman, and HHS Secretary Schweiker. Additionally, all four Commissioners of the FTC

support my position.

Supporters also include the American Association of Retired Persons. Consumers Union of America, Congresswatch, the UAW, the United Steelworkers, the Food Marketing Institute, and virtually every health professional organization other than the AMA

Mr. President, I know we are trying to pass this continuing resolution and will conclude my remarks. But, one final point must be made. Roughly \$300 billion, representing 10 percent of the gross national product, was spent on health care in this country last year. The Federal Government is the Nation's single largest purchaser of health care, having spent about \$80 billion in fiscal 1982 alone. Under these circumstances, it is clear that the Federal Government must have the authority and means to combat illegal, anticompetitive practices by health care professionals. The FTC is the only Federal agency with that means and authority to do that. To argue that its authority to scrutinize such activities should be revoked is to abdicate a national responsibility and is nothing short of absurd.

The compromise proposal the Committee on Appropriations adopted is reasonable. It grants the States exclusive authority in those areas where it has been used and where they have expertise while preserving FTC jurisdiction in areas where it has traditionally acted. The amendment by the Senator from Idaho would place a limited class of people above the law and represents the worst type of narrow. special interest legislation. If adopted, it would prove that Adam Smith was probably correct when, 206 years ago. he observed:

People of same trade seldom meet together, even for merriment and diversion, but the conversation ends in a conspiracy against the public, or in some contrivance to raise prices.

I urge my colleagues' support of the compromise and their vote against the pending amendment.

Mr President, you have in front of you a letter from the Vice President of the United States who indicates the support of the administration.

I noticed something very interesting in the last week. For the first time in 20 years doctors are making house calls. They made house calls in the Dirksen Building, they made house calls in the Russell Building. They are so concerned about our health that the reception room is packed, with them, and I say we ought to give the American people a break.

As they trudged down the steps discouraged and disheartened because we did the right thing, as they get into their Mercedes and Porsches and drive back to their suites in the Madison, let us give the American people a break. Let us regulate those things which need regulation. Let us regulate anticompetitive practices. I thank the

Mr. EAGLETON. Mr. President, will

the Senator yield for 1 minute? Mr. RUDMAN, I yield 1 minute.

Mr. EAGLETON. I thank my col-

I think everyone in the Chamber knows that the fastest growing industry in America is health care in all of its ramifications. I am told it now consumes close to 10 percent of our gross national product.

Mr. President, I speak with at least some indirect authority on price-fixing in the health field. My brother is a doctor. He practiced radiology before he had a stroke. It was a well-know fact in the State of Missouri that radiologists established their prices in and among themselves. There was a uniform or standard charge agreed to among the profession for a GI series; a uniform charge agreed to among the profession for a chest X-ray, and so through the major medical speciality disciplines. The "boys" got together and said, "What are we going to charge this year for this particular procedure?"

If there is one area in this country where we need more competitionfree, open, fair competition-it is in the delivery of health care. If there is one area that needs the closest of scrutiny in terms of avoiding price-rigging it is the health care industry. It is the most noncompetitive big industry in

Finally, Mr. President, I must chuckle a bit at the notion that we should leave these matters up to "prudent State regulation." I am a former attorney general of Missouri and I know there is no likelihood that the States can or will do the kind of job that the FTC can and will do. The resources simply are not there to do the kind of job which needs to be done. Do not expect the medical profession or the Healing Arts Boards of the States to do the job. If you leave it up to the States, you are insuring the job will not be done.

Mr. RUDMAN. Mr. President, I yield 2 minutes to the Senator from

Oregon-3 minutes.

Mr. PACKWOOD. Mr. President, let me elaborate on what the Senator from New Hampshire has said about the things the FTC is trying to do and what they are not trying to do. They are not trying to tell doctors or lawyers or anybody else how to define themselves as professionals; to define how long they must go to college; or to tell a State who to certify for medical or law schools.

What we are trying to say is that henceforth ophthalmologists cannot withhold prescriptions from their patients, so that the patient can shop around and ask what their eyeglasses will cost. The FTC had to stop that practice. We are saying that people can practice dentistry, law, or medicine in retail stores if they choose to. The various professions have tried to

stop that.

In Broward County, Fla., they tried to say it was unethical if you advertised in the yellow pages that you spoke Spanish, which might be of some help to a possible number of patients who do not speak English. All we are trying to do is to subject the professions to the same rules when it comes to their practice of business; business, not their practice of medicine, the same rules to which everyone else is entitled.

If what the American Medical Association wants to achieve is achieved they will be followed by the other professions. Here are the AMA's draft laws. Indeed, Senator Rudman is right. Here is one they have for the Federal Government, and here is one they drafted for State governments to get them out from all possible regulations, and the lawyers will be right behind and the architects right behind.

We have seen a lot in terms of medical advance recently, but, my fellow Senators, there is indeed a triple bypass operation: bypass Congress and bypass the States and bypass the public, and that is what you are going to get if this amendment passes.

Mr. RUDMAN, I yield 2 minutes to the Senator from Ohio, keeping in mind we have a very limited time

agreement.

Mr. METZENBAUM. Mr. President, I commend the Senator from New Hampshire for coming forth with a compromise that I think may take us out of this very difficult situation. That is what the committee amendment is. The amendment now being offered by the Senator from Idaho would undo that compromise.

In my opinion, the compromise is not exactly where we ought to be because I believe we ought to make it very clear that the FTC as its jurisdiction with respect to the doctors, with respect to the lawyers, with respect the dentists. But in order to provide some method of handling that, the Senator from New Hampshire has come up with a formula that would leave the States with exclusive authority in those issues relating to the quality of care and licensing requirements, but it would preserve the FTC's ability to challenge boycotts, price-fixing, deceptive commercial practices in the health care and affected industries. I think that is a fair way out of this

I do not know whether it will be acceptable, and I am sure it is not acceptable to the AMA and the ADA, and maybe the ADA and their high-priced lobbyists, but I think it is a way of giving the public some measure of protection, and I hope we see fit to support the Senator from New Hampshire's motion to lay on the table.

I believe it is in the public's interest, and I believe it is in the spirit of making it possible for free competitive forces to work in the economy and not to permit some of the professions to

be exempt from the law.

Mr. RUDMAN. Mr. President, I yield 2 minutes to the Senator from Washington.

Mr. GORTON. I thank the Senator. Mr. President, I must express my strong opposition to the McClure amendment which would strip the Federal Trade Commission of any power to enforce the Nation's antitrust laws with respect to State-regulated "professionals," and would totally exempt professionals from the Federal laws against consumer fraud and deception. This exemption would clearly be contrary to the public interest: It would create a privileged class above the law; It would unnecessarily increase the costs of health and other professional services to all Americans; and it would ultimately limit the freedom of choice among professional services

Under the McClure amendment, the FTC would be prohibited from investigating even the most clear-cut and flagrant violations of the antitrust and consumer protection laws, simply because these violations were committed by licensed professionals. Price fixing, boycotts, kickbacks, fraud, and deception would be shielded from FTC challenge, even if the activities were totally unregulated by the State.

While the States have traditionally regulated certain aspects of the health

care professions, State regulation has been directed primarily at licensure requirements, scope of practice questions, and other quality of care issues. In contrast, the FTC has generally focused on restraints on the commercial aspects of professional practice, aspects unrelated to legitimate quality of care concerns and proper professional self-regulatory activities. This commercial conduct includes precisely the same type of activities engaged in by all businesses, for example debt collection, advertising, contracting for goods and services, and the determination of fee schedules, office locations, and hiring practices.

It is the illegal commercial aspects of professionals' activities which the FTC seeks to prevent. Since both professionals and nonprofessionals engage in the same kinds of commercial practices, there is no valid reason for arbitrarily immunizing from FTC scrutiny those professionals who engage in anticompetitive or deceptive practices.

Mr. President, the FTC has long been active in scrutinizing professional activities from both antitrust and consumer protection perspectives. None of these efforts is directed at interference by the Commission with the State licensing of professionals.

A closer look at the specific nature of the FTC's activities respecting professionals will illuminate this debate. The primary purpose of the Commissions' efforts has been to enhance competition and the informed consumer as the regulators of the market-place. In the professional area, as well as in other areas of the economy, the FTC has sought to remove restraints on the competitive process.

FTC antitrust cases, for example, have challenged the following types of conduct:

Boycotts of HMO's by physician groups—for example, excluding HMO doctors from hospitals, and preventing HMO doctors from getting malpractice insurance.

Coercion used to first, compel a State medicaid program to increase doctors' fees and to second, boycott a health insurance cost-containment program developed by automobile manufacturers and the UAW.

Price-fixing agreements where physicians agreed not to work below "usual" rates, thus preventing hospitals from reducing costs.

Illegal kickbacks involving physicians and a major medical laboratory corporation.

Illegal threats by a town's only doctors to boycott the local hospital's emergency room if it recruited competing physicians to practice at the hospital.

Suppression of truthful information—for example, ethical restrictions on advertising were used first, to prevent a church organization from running a low-cost cardiac stress clinic, second, to help drive a physician house-call service out of business, and third, to prevent senior citizens from learning which doctors accept medicare payments.

Illegal conspiracies preventing physicians from forming business partnerships with licensed nonphysicians such

as clinical psychologists.

Boycotts of cost-containment programs developed by insurers, industry, and labor to hold down dental costs.

FTC actions have also stopped fraudulent behavior by professionals. For example, the FTC has challenged:

Undisclosed health risks involved in a doctor's synthetic hair implant busi-

Deceptive advertising by a weight clinic that used a prescription drug never approved by the FDA as safe and effective for treatment of obesity.

The FTC has proceeded cautiously in examining whether and when professional regulation imposes substantial costs on consumers without providing any coutervailing benefits. Studies show that some restrictions on the business aspects of professional practice do not increase quality but do increase prices, restrict choices, and reduce availability of professional goods and services. For example:

Higher prescription drug prices resulted from State laws restricting price advertising. A 1975 study estimated that these regulations cost con-

sumers \$134 million in 1 year.

Higher prices for eyeglasses existed in States with regulations strictly limiting competition among optometrists. A 1975 study estimated that these regulations increased eyeglasses prices by 34 percent.

Mr. President, all of this FTC activity is clearly in the public interest, but would be prohibited by the McClure amendment. It is argued that it is only a temporary moratorium, merely barring the FTC from expending funds on law enforcement in the professions for the duration of the continuing resolution. But this would cause tremendous injury to consumers and to honest, law-abiding professionals and would abuse the congressional budget process.

A sweeping ban on use of FTC funds to investigate or prosecute law violations in the professions would:

Force immediate cancellation of over 20 antitrust and 12 consumer protection investigations, including alleged boycotts by physicians pressuring other doctors to stop working with nurse practitioners in rural health clinics; a possible physician conspiracy to boycott health maintenance organizations and cost-containment programs; and alleged false advertising claims by practitioners of laser beam facelifts.

Interfere with administration efforts broad-based coalition of health, proto restrain artifical increases in health fessional, business, consumer, and

care costs that are aggravating the Federal deficit and making it harder for Congress to fund needed health programs for the Nation's poor.

Stop dead two cases now before the Commission after trials in which administrative law judges found private physician and dentist organizations guilty of conspiring to obstruct cost-containment and raise prices.

Prevent the FTC from policing

Prevent the FTC from policing against abuses in scores of professions, including engineering, nursing, chiropractic, and psychology, which do not

want FTC oversight removed.

Mr. President, this issue becomes particularly momentous when seen in the light of the fact that the cost of health care is approaching \$300 billion annually. Last year, for the second year in a row, health care costs rose more than 15 percent, accounting for

nearly 10 percent of the GNP.

It is encouraging to see new and innovative ways of organizing, delivering, and financing health care services develop such as health maintenance organizations and individual practice associations. There are also many categories of health professionals-such as nurses, nurse midwives, nurse practitioners, and dental hygienists to name a few-who are educated, trained, and licensed by the States to perform certain medical services and who are able and willing to perform those services at lower costs for more people. These developments have been welcomed by consumers, but predictably resisted by some health care providers. When this resistance takes the form of violation of the Nation's antitrust laws, it cannot be tolerated. It is difficult to fathom, in these circumstances, how Congress can seriously consider removing these problems from the scrutiny of the agency of the Federal Government which has shown the most interest in finding creative and constructive solutions.

Mr. President, there have been a number of legislative proposals in the 97th Congress designed to promote free competition in the delivery of health care as a means of cost containment. These procompetition proposals are varied and have attracted great attention, but will have to await another Congress for serious consideration. But, the underlying concept represents the best hope for slowing the continuing rapid rise of health care costs: We must restructure the American health system in a direction away from regulation and toward a competitive free market. This is precisely the central theme of the FTC's activities respecting professionals. Keeping the Commission on the job is our best chance in this Congress to make any progress in this area.

Keeping the Commission on the job in this respect is the reason that a broad-based coalition of health, pro-

labor interests representing 21 million individuals, 34 national organizations and their 800 affiliated organizations has strongly opposed the blanket exemption represented by the McClure amendment. The health care professionals in this group, including nurses, psychologists, dental hygenists, chiropractors, and clinical laboratory practitioners, believe in the free enterprise system. They are not afraid to compete. The consumer groups and labor unions recognize that rising costs and lack of access to health care have become problems of crisis proportions. Retailers like chain drug stores and large department stores want to offer competitively priced health care goods and services to consumers. And, the Washington Business Groups on Health, as major consumers of medicare, recognize their strong interest in free competition in the health care marketplace.

Mr. President, advocates of the blanket exemption make a number of arguments which seem persuasive on their face. Closer scrutiny reveals, however, that these arguments are largely lacking in substance.

First, it is argued that the States and the Justice Department can adequately enforce the antitrust and consumer protection laws respecting the professions. Few States have the resources and expertise to address a problem of this magnitude, however. Thirteen States do not even have the antitrust authority to do so, and 27 States have never brought an action in this area. Recognizing these problems, the National Association of Attorneys General has twice in the last year passed resolutions strongly opposing an exemption for State-licensed professionals. The Attorneys General have recognized that the FTC is "uniquely equipped to evaluate the activities of professionals and their asso-

Although the FTC and the Department of Justice do share responsibility for enforcing the Federal antitrust laws, Justice has no authority over fraud and deceptive trade practices; the blanket exemption would totally eliminate Federal enforcement in those areas. Even in antitrust enforcement, Justice has historically not focused on the professions, leaving it to the recognized expertise of the FTC. This has led to a rare and bipartisan consensus in this subject: All four sitting FTC Commissioners and the chief antitrust enforcement official of the Department of Justice, as well as his six immediate predecessors, are unanimous in their opposition to the blanket exemption.

At the same time as they were making this argument that Justice and the States can take care of the problem, the AMA House of Delegates in June resolved to seek changes in the State antitrust laws and the Sherman and Clayton Acts. The AMA proposals in this regard would seriously weaken the ability of State attorneys general and the Justice Department to enforce these laws against professionals.

A second contention by proponents of the McClure amendment is that it is being offered in the name of deregulation. As one who has supported the administration's program to rid the country of excessive, unwarranted and inefficient regulations, I am here to say that this proposal is not part of that effort. It is the FTC's efforts which are deregulatory in nature. FTC Chairman Miller is a person who has spent virtually his entire career opposing Federal regulation. He puts the point this way:

The essence of deregulation is to have competition in the marketplace guide the allocation of resources rather than have such decisions made by an army of bureaucrats in Washington. Where antitrust and . . . FTC-type consumer protection regulation . . . come in is in making sure that competition in the marketplace does indeed live up to its full potential . . . (1)f people become convinced that effective market competition is not possible in the health care field, . . . we are going to witness an explosion of direct federal regulation that will make the 'naughty old FTC' pale in comparison.

Mr. President, this is why Vice President Bush, OMB Director Stockman and HHS Secretary Schweiker have stated repeatedly that the Reagan administration opposes the professions exemption. It is because the FTC's efforts are deregulatory in nature and help to free the market for health care and other professional services from unwarranted restraints on fair and open competition.

Mr. President, the final arguments of proponents of this exemption which I will address are the contention that FTC enforcement activities have fundamentally undermined the ability of States and professionals to insure the quality of care given to patients, and the related argument that FTC enforcement interferes with legitimate self-regulation by the professions, such as peer review programs and cost containment agreements. The facts simply do not bear out these contentions. The exclusive focus of FTC enforcement is the business or commercial practices of professionals. As I previously outlined in detail, the FTC has challenged illegal restraints of trade such as price fixing, boycotts, bans on truthful advertising, and the deceptive promotion of health care services. I fail to see how these cases can be construed as actions that lessen the quality of care.

The Commission has never overruled State licensing board decisions concerning the qualifications, education, or testing of State-licensed professionals. It has only sought to preempt State regulations on one occasion: The

1978 eyeglasses rule prohibited flat bans on commercial advertising by eye care specialists, conduct which the Supreme Court has also prohibited.

Mr. President, the FTC has never brought an action challenging the activities of a peer review board which seeks to set ethical or quality of care standards for its profession. The Commission's order in the AMA case expressly states that peer review is not restricted in any way, and the legality of peer review was never an issue in that case. Like other beneficial programs, peer review can occasionally be abused. Price-fixing conspiracies or coercive boycotts directed against health maintenance organizations should not gain immunity from the antitrust laws because they are labeled "peer review" or "self-regulation."

The FTC has also never prohibited or challenged physician or medical society participation in discussions with insurers concerned about containment of rising costs. When the Commission has taken action, is when medical and dental groups organized economic boycotts of State medicaid plans or insurers who tried to establish cost containment programs.

Mr. President, the committee amendment, proposed in the Appropriations Committee by the distinguished Senator from New Hampshire (Mr. Rudman), represents a reasonable compromise. It would prohibit the FTC from preempting State laws relating to the quality of care, scope of practice, and licensure requirements. These are the areas where the States have traditionally been preeminent. In this respect, the controversial preemption override, which the AMA argued gave the FTC new authority, has now been eliminated. But, the FTC would retain authority over the commercial and business practices of professionals-where the activities of professionals are analogous to other businesses. Quite frankly, this is the most that the AMA and other professional groups legitimately have a right to ask the Congress to provide. To go further and create a privileged class above the law, unnecessarily raising the cost of health care for all Americans, and ultimately limiting the freedom of choice among professional services, would clearly be contrary to the public inter-

What this amendment seeks to do is to take an entire group of professionals and say that no laws relating to consumer fraud and deceptive practices will apply to them under any circumstances. It violates the most fundamental rule of our society that we should never let any individual be a judge in his own case.

As someone who knows something about this subject, along with every other former attorney general in this body, I urge you to vote for the

1978 eyeglasses rule prohibited flat motion to table this McClure amendbans on commercial advertising by eye ment.

Mr. RUDMAN. Mr. President, I yield 30 seconds to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, earlier in the debate we heard that the medical profession was really doing such a good job in this whole area of competition. We in this body faced the issue of cost containment some 5 years ago, and it was defeated because we were going to leave the issue of competition to the medical profession. That has been one area where they really failed to lower their costs. That case has been made here well today. I think it is important for the membership to understand that the people leading the fight on this are three former attorneys general of States who have dealt with problems of competition in their States. I think that is an important lesson for us to listen to this morning. I strongly support the Senator from New Hampshire.

Mr. RUDMAN. Mr. President, may I inquire how much time we have left?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. CHAFEE. Mr. President, I want to commend the distinguished junior Senator from New Hampshire for his amendment.

I think the important thing that we have to remember is it does not apply to medical standards or legal standards, it applies to advertising and competition. I did note that in the American Medical News that the chairman of the American Medical News called for rigorous accreditation standards in order to offset the anticipated surplus of physicians in the next decade. I do not think that is something we want to accomplish.

Mr. President, I support the language reported by the Appropriations Committee with regard to the Federal Trade Commission's scrutiny of professionals, and I oppose the McClure amendment which would completely exempt professionls from FTC scrutiny.

Each of us here tonight should ask himself the following question: Is it in the best interest of the public to create a special class of business persons; that is, licensed professionals, to be excluded from FTC investigation of violations of antitrust and consumer protection laws? In my opinion it is not

I urge each of you to seriously consider the effect of exempting licensed professionals from FTC scrutiny. The FTC would be prohibited from bringing antitrust and consumer protection cases against professionals who engage in outright consumer fraud, price fixing agreements, and coercive practices. The FTC challenged the American Medical Association's restrictions on advertising, and as a result physi-

cians are now able to advertise useful information such as their ability to speak different languages, willingness to accept medicare or private insurance as payment in full, office hours, availability to make house calls, and other important information. If professionals and their ogranizations are exempted from FTC jurisdiction, the AMA could once again restrict adver-

tising by its members. An example of the type of activity which the FTC seeks to prevent is clearly evidenced in a November 26, 1982, issue of American Medical News, a publication of the American Medical Society. In that edition, the chairman of the Association of American Medical Colleges called for tougher accreditation standards as a means of limiting the number of medical students and offsetting the anticipated surplus of physicians in the next decade. A position such as this could be viewed as a violation of antitrust laws, and the FTC could conceivably bring suit. Would not all of us like to limit the supply of people in our professions in order to insure that the demand for our services would always be equal to or greater than our ability to supply them.

The FTC has no interest in passing judgment on the best standard of medical care in a community. Its interest in keeping professionals within its scrutiny is to insure that professional rules do not preclude them from competing in the marketplace.

Removing Federal jurisdiction over an economic activity such as the rendering of a professional service is good if it fosters competition; however, it is not good if it fosters a cartel. Past experience has shown that the temptation to restrict competition is too great to be ignored within a highly trained group of professionals, such as physicians.

I urge my colleagues to support the language as it stands and to defeat any effort to substitute language which would allow professionals and their associations to hold the public hostage to their whims.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCLURE. Mr. President, I yield 7 minutes to the Senator from Montana (Mr. Melcher).

Mr. MELCHER. Mr. President, it really does me a lot of good to hear several learned lawyers lambast another great profession—physicians. But what are these professions that are licensed by a State, or what are the related nonprofit association? Are there any engineers around? Surveyors? I know there is one geologist here. I know there is one geologist here. These are four of the licensed professions.

I am licensed in the State of Montana, license No. 200. It was granted to me by the Montana Veterinarian

Board in 1950 pursuant to the State law. It cost 25 bucks a year, too, to keep that license renewed.

I am also required to have 10 hours of seminars in veterinary medicine every year to keep it renewed, and I have to abide, if I am practicing, by applicable Montana law covering the practice of veterinary medicine. If I commit a felony, the license is cancelled automatically.

I also belong to the State association and to the national organization, and that costs me about another \$150 a year. You might say, "So what? What does that have to do with the FTC and their investigation?"

Well, a few years ago, the Federal Trade Commission carried on an investigation of practicing veterinarians. It was a long process. The Commission procedure required records, documentation, scores of pounds of papers and legal briefs and testimony. And what were they after? That was very vague, what they were after.

Finally, after a long period of time, it boiled down to two points, rather vaguely expressed: Why did veterinarians not advertise more, and why did they not write out prescriptions rather than dispense directly?

Mr. EAGLETON. Will the Senator yield for a question?

Mr. MELCHER. I will be delighted to yield after I get through and if I have some time.

What were the views of my patients? Well, let me give you a couple of examples.

First of all, Bossie, Carl Aask's cow. She needed a little service, a little post-parturient service. Bossie did not care one nickel's worth whether I advertised. And she did not care at all about me dispensing drugs. In fact, she rather resented it. but she did not want a prescription.

And Carl Aask did not either, because Carl Aask lives about 28 miles from Forsyth and he did not want to run into the drugstore after that prescription. And if I told him he had to, I would not have been invited there to dinner, and I always liked to eat at Mrs. Aask's table.

The second patient was Susie, a cocker spaniel that belonged to Kent Amo. Susie had a heart problem and she needed some digitalis. And she neither cared whether I advertised or dispensed directly that digitalis.

Was anybody hurt by this FTC investigation of veterinarians that went on and on and on to find out whether we advertised enough or dispensed directly? Well, I can tell you for sure it was not even noticed by Susie or Bossie. And, Kent Amo, the owner of Susie, did not care, and Carl Aask, the owner of Bossie, did not care.

So was there anything hurt? What were they after? Antitrust? A poor place to look—why did FTC investigators not spend their time and taxpayer's dollars on more obvious investigative needs? The investigation of veterinarians created a lot of havoc with my profession and the association that had to act on my behalf to give them all of that documentation over a course of months and months and bled the association in funds for legal fees.

Under the Clayton Act passed in Congress in 1913—that is the organic act of the FTC—and that act specifically did not direct, and that was Congress saying it, anyone in FTC to investigate these nonprofit associations for antitrust violations. In 1913 Congress also wisely enacted the Sherman Antitrust Act specifically delegating to the Justice Department the responsibility of investigating these nonprofit associations; including veterinarians, mind you, for any antitrust violation.

We do not need any more harassment by the FTC. What does the FTC say now as expressed in the Rudman amendment. "We have got a compromise. We are just going to come into States to investigate professions, but leave them alone on licensing procedures and State laws, but we will continue to do our thing rather than the Justice Department doing their thing on antitrust."

If there is any problem that my former patients have and my former clients have with antitrust, the Justice Department is available. And if Congress wants to change that, let Congress change it by directing antitrust inspections by FTC. That is a change in law and our amendment suggests that meanwhile, let us leave FTC and their tigers right here in Washington, not harassing the State or on other investigations but licensed professional associations which are closely covered under the varying circumstances of different States by State law.

The PRESIDING OFFICER (Mr. NICKLES). The Senator's time has expired.

Mr. McCLURE. Mr. President, I yield 2 minutes to the Senator from Kentucky (Mr. Ford).

Mr. FORD. I thank the distinguished Senator from Idaho.

Mr. President, I rise to speak in support of the amendment offered by Senators McClure and Melcher. I believe their amendment places necessary, additional limits on the authority the FTC exercises over the professions.

The action of the Appropriations Committee Wednesday was a welcome one. It is gratifying that the committee sees the need to restrict the Commission's activity in this area, and that is what they said. However, the committee language does not go far enough. There are still too many areas of legitimate professional endeavor, regulated and supervised by the States, which would be left open to the intrusion of the FTC.

We must remember that the Commerce Committee in May reported a reauthorization bill that clarifies that the FTC has no jurisdiction over State-regulated professions. That is out here. It is on the table now. Hopefully we can get it up. The House of Representatives on December 1 voted to place a moratorium on further Commission action in this area. The Senate Appropriations Committee language falls short of these actions. The McClure-Melcher amendment will put the Senate on record as supporting Senate Commerce Committee, the which is the Commission's authorizing committee, and the House in this area.

Mr. President, I have already said that I think the action of the Appropriations Committee is a worthwhile first step. But it is only a first step. We need to do more.

For example, the Appropriations Committee language would not protect local cost containment efforts by health providers. The McClure-Melcher amendment would.

The committe lanaguage would not protect professional associations' efforts at voluntary self-regulation. The McClure-Melcher amendment would.

The committee amendment does not protect medical peer review. The McClure-Melcher language does.

Mr. President, these few examples I have just cited point up the limitations of the Appropriations Committee's action. These examples are all worthwhile activities that I am sure we want to see continued. Yet they would all be subject to FTC attack if we do not expand upon what the committee has done.

I hope that the 98th Congress will quickly settle this issue by enacting a reauthorization bill for the FTC as early as possible. Then we can lay this issue to rest. But until that time, I think we must act to implement the intent of Congress to limit the FTC's jurisdiction over the professions.

The Appropriations Committee has shown us the way to move. Now let us take the needed additional steps. I urge you to support the McClure-Melcher amendment.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCLURE. Mr. President, I yield to the distinguished Senator from Wisconsin.

Mr. KASTEN. Mr. President, I rise to support the McClure amendment.

The substitute offered by Senator RUDMAN, and accepted narrowly by the Appropriations Committee would merely prohibit the FTC from prempting State licensure laws. This is a good first step, but it is not enough.

The FTC has not only sought to preempt State licensure laws, but other State laws regulating professionals as well That is the problem, and that is why we need to adopt the McClure language.

In its current investigations of the dental, optometric, and legal professions, the FTC is examining other State laws, such as those governing employment of professionals by profitmaking corporations and how professionals should operate branch offices.

All of these State laws are part of the comprehensive regulatory systems developed in the respective States. Reasonable people may disagree about the merits of any particular State law, but that is not the point. The point is that it is the States who have traditionally regulated professionals—rather than the FTC—who should make the ultimate decision.

The Rudman substitute leaves too much authority with the FTC to preempt State law, so I must oppose it.

I urge the Senate to support the McClure amendment.

Mr. HEINZ. Mr. President, I urge our colleagues to support Senator Rudman's motion to table Senator McClure's amendment to exempt the professions from Federal Trade Commission jurisdiction. Business practices related to services provided by professionals should be subject to the same rules that govern the marketplace behavior or other commercial interests. Providing an exemption for the professions creates a privileged class above the law and poorly serves the public interest.

The Federal Trade Commission's charge directs it to preserve the integrity of a free and competitive marketplace for all goods and services-including services rendered by professionals. The FTC's enforcement activity regarding professionals has been "deregulatory" and "procompetitive," not "regulatory." Exempting the professions from FTC authority could ultimately result in increased costs of health, legal, and other professional services to all Americans. At a time when the annual cost of health care is approaching \$300 billion representing 10 percent of the gross national product, and the Federal Government is the Nation's single largest purchaser of health care, insuring that the Federal Government has the authority to combat anticompetitive actions is of major national interest.

If the FTC loses authority over professionals, no Federal agency will have authority to stop deceptive advertising, consumer fraud or price fixing by professionals. The Department of Justice and other Federal agencies simply do not have the resources and expertise to assume this role. State enforcement agencies do not have the authority and resources to take the place of the FTC either. The National Association of Attorneys General, and the attorney general of my own State of

Pennsylvania, oppose the professions exemption.

The provision in the continuing resolution (H.J. Res. 631) regarding Federal Trade Commission jurisdiction over professionals addresses concerns that the FTC might intrude into professional practice or proper State jurisdiction. It eliminates FTC jurisdiction in those areas where the States traditionally have had exclusive jurisdiction—such as scope of practice, licensure requirements, and legitimate quality-of-care concerns. It does, however, retain FTC authority over the "commercial" practices of the professions.

The administration and a coalition of business, health, professional, and consumer groups support this provison, and oppose any move to exempt the professions from FTC authority. I ask that you join my colleagues and I in supporting Senator Rudman's motion to table this amendment which would arbitrarily immunize those few professionals who engage in violations of Federal antitrust law from FTC scrutiny.

Mr. LEVIN. Mr. President. I support the compromise amendment which adopted by the Appropriations Committee in its markup of the continuing resolution, regarding the FTC's jurisdiction over State licensed professionals. The compromise amendment strikes a fair balance between the legitimate need to insure that the FTC's authority does not encroach upon State laws governing licensure requirements or quality of care and the Commission's responsibility under the FTC Act to protect consumers from certain harmful anticompetitive business and commercial practices of professionals.

The amendment being offered by Senator McClure to the continuing resolution would carve out a blanket exemption for the professions from the regulatory and antitrust scrutiny of the FTC.

On May 29, 1982, I wrote to Chairman Miller regarding the Commission's activities affecting the dental professional and I also solicited his views on legislation restricting the Commission's antitrust and regulatory jurisdiction over the professions. In his July 15, 1982 response to me, Chairman Miller stated:

The Commission is unanimous in its opposition to special interest legislation that would grant to state-regulated professionals complete immunity from the Federal Trade Commission Act. The majority of the Commission's activities with respect to the professions have focused on conduct unrelated to state licensure. For example, our Bureau of Competition has brought cases to prevent attempts by physicians to fix prices, boycott other physicians who affiliate with Health Maintenance Organizations or boycott health insurers who attempt to institute cost-containment programs. None of these activities is the focus of state licensure, but

all would be immune from FTC scrutiny under the pending legislation.

Chairman Miller is a strong advocate of deregulation, but he considers this attempt to strip the Commission of its jurisdiction as one which will stifle competition rather than promote it.

I have been a strong advocate of legislation which is designed to provide increased opportunities for the Congress to exercise its oversight responsibilities over Government agencies to insure that regulations promulgated by the agencies are consistent with the intent of Congress. For example, my amendment to the FTC's authorization bill provides the Congress with authority to review FTC regulations before they take effect and to veto them if they do not reflect the will of Given such protection Congress. against Federal Trade Commission excesses, I believe it would be unwise to carve out an additional special blanket

protection for the professions.

Mr. President, if the Senate approves this amendment, it will send the wrong message to the public—a message that the Congress is willing to exempt certain groups of individuals from the laws which apply to everyone

else.

That perception of favoritism will undermine the professions and create a reaction to them which will create great problems for them.

Mr. McCLURE. Mr. President, I understand the Senator from New Hampshire is ready to move to table.

I do think the Senator misspoke himself. He got carried away by the rhetoric of his own remarks when he said it would interfere with the pend-

The amendment specifically says it does not. The record should be clear.

Second, what is it? It is a restriction on authority during the period of the CR or until the authorizing legislation passes. What has happened in both bodies? In both bodies the authorizing committee has voted for this restriction, and then a handful of people have refused to allow debate on the committee's action.

That is why we are here tonight. We should not be legislating here in this context, debating this issue in this context. The authorizing committee should have permitted their work to go forward on the floor. They have refused to do so because they did not have the votes in their own committee. That is why we are here.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCLURE. It is said that the Antitrust Division of the Department of Justice will not act. The only cases that have been brought have been brought by the Antitrust Division of the Justice Department. The FTC has not done a single one of them.

I hope the motion to table is defeat-

Mr. RUDMAN. Mr. President, I think the question has been discussed enough.

Mr. President, I do not get excited by my own rhetoric. I get excited when I see someone attempting to perform a frontal lobotomy on the free enterprise system, which is precisely what is going on here.

• Mr. DURENBERGER. Mr. President, the issue of FTC jurisdiction over the professions cannot be condensed into the simple slogans and hasty generalizations that we have all been hearing. It is not a matter of buying votes, exempting a privileged class, or threatening the very quality of patient care. These characterizations do not do justice to the complexity and importance of the issue. We must not let the intensity of emotions surrounding the debate cloud the real issues.

There seem to be a strong consensus among all parties on the value and need for enforcement of the antitrust laws applicable to the learned professions. The AMA, which is probably the strongest advocate for the exemption, testified that it does "not oppose the proper application of the antitrust law to the profession." The issue was what role, if any, the FTC should play in that process.

In the 4 years that I have served on the Health Subcommittee of the Finance Committee, I have seen the issue from both sides. I have seen the FTC effectively challenge boycotts, price fixing, the suppression of information, and illegal kickbacks. No conscientious observer would deny that these practices hurt choice, competition, consumers, and the health care system as a whole by fracturing the essential bond of public trust.

At the same time, I have seen the harm that can be done when an overzealous agency abuses its authority. In my home State of Minnesota I have seen the FTC abuse its subpoena power to obtain information. And I have seen the FTC undercut a very effective and responsible program of fee review by physicians. A program of undeniable value to the public was wiped out.

I believe that many of the problems with the FTC are people problems—problems stemming from the attitudes and approaches of the Commission's leadership and staff. I am generally not an advocate for making permanent changes in the structure of governmental agencies to cure temporary problems in the administration of those agencies. And I believe the administration of the FTC has improved. I ask that an exchange of correspondence with FTC Chairman Miller be included at this point.

The correspondence follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., December 13, 1982.

Mr. James C. Miller III, Chairman, Federal Trade Commission, Washington, D.C.

Dear Chairman Miller: As you know, I have a great many concerns about the role of the FTC in overseeing the professions. As a Minnesota Senator committed to increased choice and competition in the health care sector, I've seen the issue from both sides. I've seen the FTC effectively challenge boycotts, price fixing, and the suppression of information. There's no question in my mind that these practices hurt consumers and our entire health system by undermining public trust, choice, and competition.

At the same time, I've seen the harm that can be done when an overzealous agency abuses its authority and undercuts effective, responsible self-regulation. In my home state of Minnesota, I've seen the FTC abuse its subpoena power in obtaining information from a very competitive Health Maintenance Organization. And I've seen the FTC shut down a responsible program of fee review performed by our Foundation for Health Care Evaluation. A program which reduced fees to the public and kept fee-for-service physicians competitive was snuffed out.

With such a mixed report card it's not surprising that the issue of continued FTC jurisdiction over the professions generates such controversy. The uneven performance of the FTC makes careful examination of any proposed legislation essential.

I would very much appreciate your views on the following issues:

(1) Under what circumstances will the FTC interfere with the medical profession's efforts to review doctors' fees? When is fee review considered "price fixing" and when is it considered responsible self-regulation?

(2) The FTC Amendments of 1980 went a long way toward assuring a more reasonable subpoena-issuing authority. What further steps have been taken to control unnecessary and burdensome "fishing expeditions?"

(3) Health care cost coalitions are springing up in communities across the nation in an effort to contain rising medical costs. Will the FTC interfere in the responsible participation of medical societies?

(4) The fear or threat of FTC intervention stops many health professionals from participating in responsible self-review and self-regulation. What efforts is the FTC undertaking to improve the understanding of both professionals and the public as to what constitutes an acceptable practice?

(5) There is little disagreement that the FTC should *not* be permitted to use its authority to invalidate state laws which establish requirements or permissable duties of professionals. Are you prepared to support such legislative language?

The distrust and resentment of the FTC that many professionals feel is rooted in a remarkably inconsistent performance by the agency. I am generally not an advocate for making permanent changes in the structure of governmental agencies to cure temporary problems in the administration of those agencies. But I and many professionals across the country need evidence that the course of the FTC is straight, clear, and corrected, I look forward to your response.

Sincerely,

Dave Durenberger, U.S. Senator.

FEDERAL TRADE COMMISSION. Office of the Chairman, Washington, D.C., December 16, 1982.

Hon. DAVID DURENBERGER.

U.S. Senate,

Washington, D.C.

DEAR SENATOR DURENBERGER: Thank you very much for your letter of December 13, 1982 concerning the role of the FTC in overseeing the professions. I deeply appreciate this opportunity to respond directly to your request for my views on issues of concern to you in this area.

I share your concern that the FTC's actions must not only be sound in substance, but also must be undertaken with fairness and sensitivity so that the obligations of the law are clearly communicated without indiscriminate accusation or oppressive inquiry. In short, I welcome this opportunity to answer the five questions you have asked, and to assure you that the course the FTC is following in the health care area is "straight, clear and corrected."

(1) Under what circumstances will the FTC interfere with the medical profession's efforts to review doctors' fees? When is fee review considered "price-fixing" and when is it considered responsible self-regulations?

The FTC supports self-regulatory efforts within the medical profession to review doctors' fees for possibly excessive charges. Although the Commission's staff has in the past examined particular peer review programs in response to complaints from physicians and patients, the Commission has never challenged any peer review program. The FTC approves of peer review of fees by professional associations to aid in cost-containment and help patients resolve fee-related disputes with health professionals. This approval was recently stated in an official advisory opinion to the Iowa Dental Association. The Commission very definitely considers such programs responsible selfregulation.

As the Commission explained in its advisory opinion, peer review programs could be abused in ways that could create liability under the antitrust laws. Peer review programs should not be used as part of a scheme to collectively fix physicians' fees in the community, to discipline professionals for innovative practices, or to coerce insurance carriers to pay whatever fees a local professional society deems warranted. In no case would the Commission challenge a peer review self-regulatory program operated in good faith to serve the public interest.

(2) The FTC Amendments of 1980 went a long way toward assuring a more reasonable subpoena-issuing authority. What further steps have been taken to control unnecessary and burdensome "fishing expeditions?"

A variety of internal procedures have been adopted to insure that the FTC's investigative authority is properly exercised. Economists and often other experts are involved at the early stages of investigations, to insure that inquiries are justified by the facts, not just "official curiosity." We have tightened the evaluation process to prevent investigations from getting past the initial stages without receiving approval "from the The Commission's Bureau Directors now play a more active role in insuring that requests for information are neither burdensome nor unnecessarily broad. Special efforts are being made to explain the purpose and focus of investigations to recipients of subpoenas, civil investigative demands and inquiry letters, so that they may work together with Commission attorneys to resolve any problems that might arise in

connection with requests for information. Requests for investigative subpoenas are carefully scrutinized by the Commissioners. Furthermore, as you may be aware, the FTC reauthorization bill, S. 2499, would provide additional safeguards by applying the requirements for "civil investigative demands" to FTC antitrust investigations.

(3) Health care coalitions are springing up in communities across the nation in an effort to contain rising medical costs. Will the FTC interfere in the responsible participation of medical societies?

The Commission supports the development of health care coalitions as a potentially valuable means of helping contain rising medical costs. The FTC does not object to, and will not interfere with, responsible medical society participation in health care coalition activities. I have, for example, reviewed a list of potential coalition activities that was jointly suggested this last January by the American Medical Association, the American Hospital Association, the Blue Cross-Blue Shield Associathe Health Insurance Association of America, the Business Roundtable, and the AFI-CIO. In that long list of proposed coalition activities. I found no activity that the Commission would seek to prevent, nor any in which medical society participation would be improper. Of course, neither medical societies nor others should use coalition as forums for unlawful price-fixing, group boycotts or others illegal conspiracies in restraint of trade.

(4) The fear or threat of FTC intervention stops many health professionals from par-ticipating in responsible self-review and selfregulation. What efforts is the FTC undertaking to improve the understanding of both professionals and the public as to what constitutes an acceptable practice?

I have been extremely concerned by the widespread misunderstanding among physicians and other health professionals regarding the FTC's actions involving the professions. One of my major goals has been to remedy this by increasing our communicagroups, with professional both through speeches by myself and members of my staff and also through informal meetings with representatives of various professional associations.

Another important vehicle for clarifying the impact of the antitrust laws on activities of professionals is our advisory opinion procedure. As you may know, the Commission's Rules of Practice provide that interested parties may request advice on the legality of a proposed course of conduct. The Commission recently issued an advisory opinion to the Iowa Dental Association explaining that the association's proposed program for peer review of dental fees did not violate the antitrust laws. In speaking to professional groups, I encourage them to take advantage the advisory opinion procedure. course, staff attorneys are available to provide informal guidance as well.

Also, we seek when possible to work out voluntary understandings with professional associations who we learn may be engaging in unlawful restraints on competition. This avoids the need for formal law enforcement proceedings with their attendant adverse publicity, and helps keep the focus on what can be done and off accusations about who may have done something wrong in the past. We followed this less adversarial course recently when we closed an investigation of a state medical society after it undertook to rescind anticompetitive policies it had adopted in violation of the Commissions's order in the American Medical Association matter.

(5) There is little disagreement that the FTC should not be permitted to use its authority to invalidate state laws which establish requirements or permissible duties of professionals. Are you prepared to support such legislative language?

Yes, I wholeheartedly support Senator Rudman's language as approved by the Senate Appropriations Committee on December 15, because I believe that it will insure that the FTC will not invalidate state laws governing entry requirements into the professions or the permissible scope of practice of professionals. I also believe that the proposal made by Representative Broyhill would be effective in this regard. If Con-gress is unable to resolve this issue during the current session, I would be most eager to work with you and your colleagues next year in exploring these and other legislative alternatives that would prohibit the FTC from invalidating such state laws.

I hope the information I have provided here is useful to you. If we can provide any further information or materials explaining the Commission's activities or plans, please let me know.

Sincerely yours,

JAMES C. MILLER III,

Chairman

Mr. DURENBERGER. I recognize that the issue of FTC jurisdiction runs deeper than just the people involved. It involves the process too. There are legitimate questions raised about a process which gives an agency the power to be plaintiff, judge, and jury. And I am very sensitive to the fact that 2 years of congressional studies produced a bipartisan recommendation of the kind advocated by the Senator from Idaho.

Although I share many of the concerns of my colleagues about the FTC. I cannot support the all-or-nothing approach embodied in an exemption or moratorium.

First, the impact of any antitrust authority-whether it is the FTC, the Justice Department, or the State attorneys general—resides as much in its potential as a threat as it does in its actual actions. If we are going to strip the FTC of its authority, we must make sure everyone knows the responsibility for antitrust authority will be picked up elsewhere. To remove the FTC's jurisdiction in one fell swoop leaves the Justice Department and the States reeling. They have neither the resources nor the expertise to assume antitrust responsibility that quickly. The transfer of antitrust authority from the FTC, if it occurs, should proceed in a thoughtful and rational This kind of precipitous manner. action is irresponsible.

Second, we have not had an opportunity to discuss the full ramifications of an exemption or a moratorium. By addressing a complex authorization issue on a money bill, we do not have sufficient time to discuss the issues. For example, I am not at all convinced of the need to exempt all professions from FTC jurisdiction. We are not even sure who is included in that definition. much less what the impact of such a far-reaching exemption would be.

Finally, I have misgivings about any amendment which precludes all FTC oversight. To consider exemptions from antitrust activities is one thing; to bar all oversight-including fraud and deceptive advertising, over which Justice has no authority-is clearly unwarranted.

In short, although I do have misgivings about the FTC and its role in policing the professions, I feel strongly that this is not the time to make precipitous decisions. We must maintain the bond of public trust, and we must assure that the mantle of antitrust enforcement is not compromised.

Mr. PROXMIRE. Mr. President, the legitimate question before the Senate is: What should the scope of jurisdiction of the Federal Trade Commission be when State-licensed, State-certified

professionals are involved?

The answer of the Senate Appropriations Committee is to reserve to the States exclusive jurisdiction over professional questions and to reserve to the Federal Trade Commission jurisdiction over questions of unfair or deceptive business practices or acts by all individuals, regardless of their professional status.

The answer of Senator McClure and his supporters is that the Federal Trade Commission should have no jurisdiction over anyone who is designated a professional and that the States and the Justice Department can be trusted to meet all of these questions.

He could not be more wrong.

## THE RUDMAN SUBSTITUTE

The Rudman substitute, adopted by the Senate Appropriations Committee, is a fair, almost Solomonic decision, which reflects a long-recognized distinction between Federal and State roles.

The Rudman substitute reserves to the States those areas where they have the most expertise and have been the most active—the professional areas relating to quality of care, professionals' scope of practice and licen-

sure requirements.

By contrast, the nonprofessional commercial questions relating to unfair or deceptive business practices-boycotts, price fixing, fee schedules and the like-are reserved to the jurisdiction of the Federal Trade Commission, which has been the lead Federal agency in attempting to stop these activities which undermine a free market and competition.

THERE IS NO CASE FOR A BLANKET EXEMPTION

Mr. President, the supporters of the McClure amendment are telling us that the Senate Appropriations Committee did not go far enough, that nothing less than a complete exemption from the Federal Trade Commission's oversight will protect profession-

But, Mr. President, it is up to the supporters of this amendment to make their case for this exemption.

Over the years the Congress has occasionally granted limited exemptions to the antitrust authority of the Federal Trade Commission where a legitimate public interest is served but it is incumbent upon those who support such exemptions to make their case. This is even more true with this type of broad exemption.

But they have not made their case and instead attempted to confuse the

issue with half-truths. How?

First, by attempting to blur two distinct types of actions: "business pracand "professional credentialling." Organizations such as the American Medical Association have done their members a disservice by contributing to that effort and have unnecessarily created uncertainty in the minds of physicians and county medical societies where none should exist.

The actions of the Senate Appropriations Committee make it clear that there is a distinction between these two types of activities and that they each have an appropriate forum for resolution. This should remove any uncertainty that may still exist over FTC jurisdiction as a result of this misinformation campaign.

Second, the supporters of the broad exemption have attempted to turn the issue on its head by demanding to know how the actions of the Federal Trade Commission have lowered

health care prices.

Another smoke screen. It is not the responsibility of the Federal Trade Commission to lower health care prices although I believe that there is a strong body of evidence that FTC actions have lowered costs. The American Association of Retired Persons, consumer groups and even an investigative article by a Wall Street Journal reporter agreed that savings could be attributed to FTC actions. But that is beside the point.

The responsibility of the Federal Trade Commission is to protect consumers against unfair or deceptive business practices. That protection is essential and has never been conditioned on the reduction of the Consumer Price Index by even a fraction of a point. It is an action which stands on its own merit and the Senate needs

to reaffirm.

Third, they argue that this authority properly belongs with the States or

the Justice Department.

It is clear that the Justice Department has neither the staff nor the expertise nor the funds available to enable it to assume nationwide responsibility in this area. The Justice Department has always deferred to the Federal Trade Commission in this area, just as Congress intended when it provided the FTC with this author-

What then of the States? As has been pointed out earlier, 13 State attorneys general do not even have legal authority to bring antitrust actions and 27 attorneys general have never brought such an action.

#### WHAT WOULD BE THE IMPACT OF THIS AMENDMENT?

The implications of adopting this radical amendment are frightening.

First, tens of thousands of Americans would not be protected from unfair or deceptive business practices while they waited for their State attorneys general to be granted authority in this area, while they waited for those offices to acquire staff and expertise in this area and while they waited for the Justice Department to acquire the necessary staff and expertise to pick up the responsibilities of the Federal Trade Commission.

Second, as FTC Chairman James Miller III, a conservative economist, President Reagan's deregulation czar, has observed:

I'm an economist by trade. I've been involved in a couple of successful deregulation projects like trucking and airlines and I know what deregulation looks like. Believe me, this ain't the animal!

He goes on to note that it would create a privileged special class of individuals—some of the highest paid individuals in America—who would be exempt from the type of scrutiny to which any other type of business would be subjected.

Third, as the Wall Street Journal. the Reagan administration and the National Association of State Attorneys General have noted, this amendment could have the impact of artificially raising prices for services that

are already frightfully high.

WHO SUPPORTS THIS EXEMPTION? It is worth noting, Mr. President, why this exemption proposal is before us today. The credit goes to the American Medical Association.

They have mobilized their members to write all of us hundreds of letters in support of this exemption. Yet, in all of the mail that I have received no one but doctors, their spouses and their children have written me supporting this exemption.

Not one constituent unaffiliated with the medical profession has written me in favor of this exemption.

Not one

Not a nurse.

Not a senior citizen.

Not one consumer.

Not even a lawyer and lawyers would also be exempt under the McClure amendment.

Mr. President, I speak with no animosity toward the medical profession. My father was a general practitioner for 55 years. My daughter is a physician assistant and my son-in-law is a doctor. I know well the dedication of those in the medical profession but they have been misled regarding the wisdom of the McClure amendment and stand virtually alone in support of it.

By contrast, the opposition proves the proposition that politics makes strange bed fellows. President Reagan, Vice President Bush, FTC Chairman Miller, 40 consumer, labor, business, senior citizen, and professional organizations representing over 21 million members, the National Association of State Attorneys General, as well as such conservative organs as the Wall Street Journal and even such groups as the Republican Research Committee of the House of Representatives oppose the exemption.

The overwhelming public response is that this broad exemption is wrong: It is bad economics, bad politics and, most importantly, it is simply unfair.

The closing hours of this lameduck session are not the time to give cursory debate to such a sweeping, and, I think, radical proposal.

It is important that we make it clear that the Senate intends for all Americans to be treated fairly and by supporting the Rudman substitute we will provide the legitimate protection that the medical community deserves.

The PRESIDING OFFICER. All

time has expired.

Mr. RUDMAN. Mr. President, I move to lay on the table the McClure amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRISIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Idaho. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater) is necessarily absent.

I also announce that the Senator from Utah (Mr. HATCH) is absent due to illness.

I further announce that, if present and voting, the Senator from Utah (Mr. Hatch) would vote "nay".

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. Glenn) and the Senator from Louisiana (Mr. Long) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 59, nays 37, as follows:

[Rollcall Vote No. 428 Leg.]

YEAS-59

Abdnor Boschwitz Byrd,
Andrews Bradley Harry F., Jr.
Baker Brady Byrd, Robert C.

NOT VOTING-4

Glenn Hatch Goldwater Long

So the motion to lay on the table UP Amendment No. 1488 was agreed to.

Mr. RUDMAN. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, if I may, I would like to ask the distinguished subcommittee chairman a question in order to clarify the impact of the continuing resolution on the authority of the Federal Trade Commission.

Mr. WEICKER. I would be glad to answer the Senator's question.

Mr. KASTEN. Mr. President, on September 22, when the Appropriations Committee considered S. 2956, the State, Justice, Commerce appropriations bill, I offered, and the committee accepted, an amendment designed to extend the effectiveness of certain expiring provisions of the FTC Improvements Act of 1980.

These provisions place certain limitations on the FTC's authority with respect to paying public intervenor funding (Improvements Act section 10), commercial advertising (section 11), trademarks (section 18), agricultural cooperatives (section 20), and rulemaking (section 21, establishing legislative veto procedures).

These limitations were scheduled to expire on September 30, 1982. By reference to S. 2956, however, the continuing resolution extended these limitations to December 17. They must be extended again, however, in order to maintain the status quo while new FTC authorization legislation is being finalized.

Am I correct that the continuing resolution now before the Senate will operate to make my amendment effective for the duration of the resolution?

Mr. WEICKER. Yes, you are correct. The relevant provision of the continuing resolution is section 101(d). This section provides that programs and agencies falling within the State, Justice. Commerce appropriations bill will be funded "at a rate provided for operations and to the extent and in the manner provided for" in S. 2956. Since your language is contained in S. 2956, the continuing resolution adopts its terms by reference. Thus, taken together, House Joint Resolution 631 and S. 2956 will have the intended effect of continuing the effectiveness of the provisions you mention, as they were in effect on September 30, 1982, for the length of this continuing resolution.

Mr. KASTEN. I thank the Senator, and I appreciate his continued cooperation with this important issue.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Parliamentary inquiry. The question now falls back to the committee amendment on the FTC?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. I move its adoption. The PRESIDING OFFICER. Is

The PRESIDING OFFICER. Is there further debate on the committee amendment?

The committee amendment on page 57, line 15 was agreed to.

Mr. HATFIELD. Mr. President, before we move to the next committee amendment, I should like to yield momentarily to the Senator from Maryland to make a statement relating to one of the other committee amendments to be acted upon.

#### THE COPYRIGHT AMENDMENT

Mr. MATHIAS. Mr. President, I thank the Senator from Oregon. I think the Senate deserves a little good news at this hour.

The managers of the bill have been expecting that I might make a point of order on the Copyright Royalty Tribunal amendment.

It is an amendment that so clearly violates the rules that I am comfortable in leaving it to the conferees to take care of if there is any doubt about it.

I ask unanimous consent to have a letter from the Parliamentarian printed in the Record at this point.

With that, I will rest my case with the conferees being able to take care of it.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

OFFICE OF THE SECRETARY,

Washington, D.C., December 16, 1982.

Hon. Dennis DeConcini,

U.S. Senate,

Washington, D.C.

DEAR SENATOR DECONCINI: Rule XV, paragraph 5, states that: "It shall not be in order to consider any proposed committee amendment (other than a technical, clerical, or conforming amendment) which contains any significant matter not within the jurisdiction of the committee proposing such amendment."

The amendment, which I am enclosing, appears to be in violation of that rule in that under the precedents of the Senate, it is legislation on an appropriations bill and the Committee on Appropriations is specifically precluded by Rule XVI from reporting a bill containing amendments proposing new or general legislation. Thus it would appear that it is not within their jurisdiction to do so.

Sincerely.

our load at this moment.

ROBERT B. DOVE, Parliamentarian.

Mr. HATFIELD. I want to thank the Senator from Maryland for lightening

Mr. MATTINGLY. Mr. President, the Copyright Royalty Tribunal ruled on October 20, 1982, that an increase in royalties of 300 percent and more on distant signal programing would go into effect on January 1, 1983. This gave the cable telecommunications industry only 9 weeks in which to respond and adjust before being liable for the huge increase. The cable industry is being saddled with an increase in costs that will substantially impact its ability to expand its services to its customers, to add new customers and to maintain service to its existing subscribers.

The industry is not asking for a tax break or bailout. It is simply asking for a stay pending an appeal of the Copyright Royalty Tribunal ruling and a transition period to adjust. Other major rate increases approved by the Copyright Royalty Tribunal have been given a stay and a period of adjustment. This provision will only provide the same consideration to the cable industry.

My amendment would:

First, simply delay the effective date of the Copyright Royalty Tribunal's decision until the U.S. court of appeals rules on the cable appeal.

Second, not overturn the Copyright Royalty Tribunal ruling. If the rate increase is judged to be appropriate by the court of appeals, it would then take effect.

Third, not be necessary if the full Senate considers H.R. 5949, the cable copyright bill, before it receses this session, or the appeals court rules.

Although the rate is scheduled to go into effect January 1, 1983 an appeal will not be heard until the spring or summer. The court, in denying a stay, based its ruling on the finding that there would be no "irreparable damage" to the cable industry by not

granting a stay. That is a strict ruling that does not consider monetary loss, even major loss, irreparable. While that may be true in the strictest sense, I do not believe my colleagues would like to see the promising future growth of cable blocked from realizing its potential because of that decision. Again, we are talking about fairness. There are many interests that would like to see the bold experiment represented by the cable industry fail. Not on its merits, or open competition, but through such tactics as the Copyright Royalty Tribunal rate increase.

My amendment would not:

First. Dispute the FCC's recent decision to abolish either the "syndicated exclusivity rule" or the "distant signal limitation" ruling.

Second. Dispute that fees for signal carriage are in need of review.

On the other hand, though only 900 systems out of 4,500 are affected, these systems represent the vast majority of cable subscribers, and cable systems that are the cutting edge of this industry.

I ask my distinguished colleagues to vote for simple fairness and support

the committee position.

COMMITTEE AMENDMENT ON PAGE 58, LINE 4
Mr. HATFIELD. Mr. President, I
should now like to propound a unani-

mous-consent agreement.

Mr. President, the next committee amendment has to do with the Ashbrook amendment on abortion, and the principals of that amendment are the Senator from Alabama (Mr. Denton) and myself. I would propound at this time a unanimous-counsent agreement that this committee amendment be restricted to a 20-minute time agreement equally divided between the Senator from Alabama and myself.

The PRESIDING OFFICER. Is

there objection?

Mr. PROXMIRE. Mr. President, would the unanimous-consent agreement permit a second-degree amendment to be added?

Mr. HATFIELD. I would amend my request to not permit an amendment in the second degree to the amendment being proposed by the Senator from Alabama.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

The Chair hears none, and it is so ordered.

Mr. HATFIELD. Mr. President, I believe the clerk has to report this amendment.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

On page 58, line 4, insert a new section

SEC. 142. Notwithstanding any other provision of this joint resolution, the provisions of section 616 of H.R. 7158, the Treasury, Postal Service, and General Government

Appropriation Act, 1983, and section 614 of S. 2916, the Treasury, Postal Service, and General Government Appropriation Bill, 1983, shall not apply to funds appropriated or otherwise made available by this joint resolution.

Mr. HATFIELD. Mr. President, just for clarification, I did not hear the first part of the reading. This is commonly referred to as the Ashbrook amendment, is that correct?

The PRESIDING OFFICER. The

Senator is correct.

Mr. HATFIELD. I thank the Chair, and I yield the floor.

Mr. DENTON addressed the Chair. The PRESIDING OFFICER. The

Senator from Alabama.

Mr. DENTON. I should like to thank first the distinguished chairman of the Appropriations Committee for the kindness and fairness with which he arrived at the gentleman's agreement

by which we are proceeding.

My wish is to resolve a very simple question which could hardly provoke a

long emotional debate.

I wish to resolve that simple question, and I do not anticipate any motion or any effort to prolong the debate.

The simple facts are that the appropriate vehicles for the Ashbrook amendment; namely, the House and Senate versions of the Treasury Postal Service and continuing resolution for fiscal year 1983 do contain the so-called Ashbrook amendment. Both of those bills were reported from the respective Appropriations Committees in September 1982.

In 1981 the House passed the Ashbrook amendment by a vote of 253 to

162.

The provisions of the Ashbrook amendment are also contained in the current continuing resolution.

The Office of Personnel Management is indeed already implementing

these provisions.

The Senate has passed the Hyde amendment. So both Houses of Congress and all polls of public opinion have indicated clearly majority opinions to the effect that abortion should not be paid for with Federal funds at taxpayers' expense except in cases involving the life of the mother.

I would stress that the Ashbrook amendment in no way denies Federal employees the right to obtain or contract for coverage of abortion at their own expense through inexpensive riders in their own personal insurance policies.

Rejecting the amendment would merely withdraw the part of the 60percent Federal contribution that

would pay for abortions.

We are not talking about taking away any earned benefits. The Government share of medical care would remain constant for any contract offered in the future. The types of benefits offered by any particular health plan are not now nor have they ever been fixed

The Office of Personnel Management is authorized to exclude or include any benefits as it considers necessary or desirable.

In fact, currently benefits such as eyeglasses, dental care, and even routine pap smears to detect cervical cancer are excluded by some of the

most major carriers. We simply cannot continue, Mr. President, to allow the news media justifiably to accuse Congress of a double standard, a double standard of denying Federal funds for abortions for certain classes of ordinary citizens; namely. those receiving medicaid while at the same time permitting the use of Federal tax dollars for the abortions of another wealthier class of citizens, Federal employees.

I ask unanimous consent that a recent letter from Kenneth Duberstein, assistant to the President, which states "the Ashbrook amendment is in accord with the administration's position on abortion" be printed in the

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE. Washington, December 1, 1982. JOHN C. WILLKE, M.D.,

President, National Right to Life Commit-

tee, Inc., Washington, D.C.
DEAR DR. WILLKE: Thank you for your recent letter regarding the Ashbrook Amendment, which prohibits funding of nonlifesaving abortions under the Federal Employees Health Benefits (FEHB) program.

I appreciate your contacting me in this matter. As you know, the Ashbrook Amendment is in accordance with the Administration's position on abortion, and we strongly support its retention. I have taken the liberty of sharing your letter with the President's policy advisers to ensure that the concerns you have expressed receive close attention and consideration.

With best wishes.

Sincerely.

KENNETH M. DUBERSTEIN, Assistant to the President.

Mr. DENTON. I yield to the distinguished Senator from North Carolina. Mr. HELMS. Mr. President, I thank the Senator from Alabama.

Mr. President, I support the Ashbrook amendment. As the Senator from North Carolina has said so many times on this floor, we become a part of what we condone. Although some may argue that the issue on this amendment is not really abortion, I must respectfully disagree. It is about abortion; it is about the deliberate destruction of innocent human life. Even worse, it is about doing so with Federal tax dollars.

Mr. President, the Senator from North Carolina does not want to take up the time of the Senate in explaining his views further on this matter. I believe these views are well known. Let us go ahead and vote forthwith, and in the matter of the Ashbrook amendment let us agree with our colleagues in the House and accept this provision.

Mr. President. I ask unanimous consent that an outstanding article by a distinguished North Carolinian-R. V. Young, an English professor at North Carolina State University-be printed in the RECORD at the conclusion of my remarks. I commend his thoughts on abortion to the public and my colleagues in Congress.

There being no objection, the article was ordered to be printed in the RECORD, AS FOLLOWS:

TAKING CHOICE SERIOUSLY

(By R. V. Young)

Towards the close of Aldous Huxley's dystopian vision of a future world ruled by an omnicompetent technocratic state, there is an arresting exchange between the World Controller, Mustapha Mond, and John the Savage, a young man raised on a primitive 'reservation" outside the confines of the "Brave New World." The peculiar style of the Savage's remarks is in part explained by a stray copy of the "Complete Works" of Shakespeare which, along with a cultic religion based on Indian fertility rites and a degenerate Catholicism, has helped to shape his view of the world.

"Exposing what is mortal and unsure to all that fortune, death and danger dare even for an eggshell. Isn't there something in that?" he asked, looking up at Mustapha Mond. "Quite apart from God-though of course God would be a reason for it. Isn't there something in living dangerously?"

"There's great deal in it," the Controller replied, "Men and women must have their adrenals stimulated from time to time."

"What?" questioned the Savage, uncomprehending.

"It's one of the conditions of perfect health. That's why we've made the V.P.S. treatments compulsory."

"V.P.S.?"

"Violent Passion Surrogate. Regularly once a month. We flood the whole system with adrenalin. It's the complete physiological equivalent of fear and rage. All the tonic effects of murdering Desdemona and being murdered by Othello, without any of the inconveniences.

"But I like the inconveniences."

"We don't, said the Controller, "We prefer to do things comfortably."

"But I don't want comfort. I want God, I want poetry, I want real danger, I want goodness. I want sin."

"In fact," said Mustapha Mond, "you're claiming the right to be unhappy.'

"All right then," said the Savage defiantly, "I'm claiming the right to be unhappy."

"Not to mention the right to grow old and ugly and impotent; the right to have syphilis and cancer; the right to have too little to eat; the right to be lousy; the right to live in constant apprehension of what may happen tomorrow; the right to catch typhoid; the right to be tortured by unspeakable pains of every kind." There was a long silence.

"I claim them all," said the Savage at last. Mustapha Mond shrugged his shoulders. 'You're welcome," he said.1

Footnotes at end of article.

Of course it was not Huxley or the twentieth century which originated the opposition adumbrated here between freedom and hap-"Many there be that complain of piness. Divine Providence," says John Milton, "for suffering Adam to transgress; foolish tongues! When God gave him reason, He gave him freedom to choose, for reason is but choosing; he had been else a mere artifical Adam, such an Adam as he is in the motions." 2 Centuries before, Aristotle had reasoned out the paradox that a life of pleas-ure ("comfort" Mustapha Mond might call it) is less happy than a life of virtue requiring hardship and choice.3 The issue is today of pressing importance because, for the first time in his history, mankind may actually have within his reach the possibility of guaranteeing, at the cost of freedom and reason, a kind of happiness: the absence of pain, anxiety, and suffering; indulgence in various sensual and emotional, even certain intellectual, pleasures and gratifications. It may be that we truly stand on the edge of that abyss which C. S. Lewis has termed "The Abolition of Man." 4

The most spectacular symptom of this crisis is the current conflict over abortion. Proponents of abortion represent themselves as champions of freedom of choicepro-choice" is their preferred designation. Yet the justification of abortion requires a redefinition of human nature in such a way that genuine freedom and choice become impossible. The abortion mentality is utopian. Its goal is to eliminate all that is unpleasant, uncomfortable, and imperfect in human life. "It will become necessary and acceptable," said a 1970 editorial in "Cali-fornia Medicine," "to place relative rather than absolute values on such things as human lives, the use of scarce resources and the various elements which are to make up the quality of life or living." <sup>5</sup> The abortionist proposes a world of happiness and com-fort in which virtually every possibility of anxiety and suffering, ugliness and deformity, pain and loss, has been removed. In this air-tight, sterile world, uncluttered by the debris of history and sealed off from the pressures of contingency, perfectly free individuals will make absolutely free choices among a multitude of relative values. Obviously we are confronting a tissue of sheer contradiction. Proponents of abortion demand absolute free choice while under-mining the conditions in which authentic choice are possible and abolishing the personal responsibility which gives choice its significance.

#### WHAT IT MEANS TO CHOOSE

Let us begin by considering what it means to choose. It is a commonplace of moral philosophy to observe that free choice requires that the action of the choosing subject be undetermined by internal or external necessity. It is not so commonly recalled, howevthat choosing also requires that an agent's choice be capable of realization in actual consequences. "The object of choice being one of the things in our own power which is desired after deliberation," writes Aristotle, "choice will be deliberate desire of things in our own power." 5 The operative phrase for the present purpose is "things in our own power," to which the philosopher immediately adds that choice is "concerned with means" rather than ends. Choice is, then, the selection of means by which a rational agent, a person, enacts his will or realizes his intentions in the world he inhabits. It is the remarkable privilege of a spiritual creature that he is capable of transcending the apparently ineluctable material processes of the universe by selecting among various alternative and mutually exclusive possible courses of action.

As a result, the defining characteristic of a rational creature is his capacity for decisive action with substantial effects upon his world. This is an inestimable privilege and a fearful responsibility, because our choices affect others, even as their choice affect us. Were the world so made that others were immune from our good and evil," observes Rev. James V. Schall, S. J., "it would follow that we are intrinsically isolated, and not socially related in that unique area of choice wherein we decide how we shall utimately define who we are." Human freedom therefore, can never be absolute. Inevitably it is constrained, not only by one's own prior choices, but by the impinging choices of others. Paradoxically, for human beings to be free at all-for their choices to have import-their freedom must be realized within limitations. One can only choose what is possible; for a choice to be moral, it must acknowledge additional limitations which include, above all, the integrity of similarly unique rational creatures. Abortion, insofar as it purports to "terminate a pregnancy" without killing a human being, is the choice of what is impossible.

Among human beings pregnancy is vertually always the result of a choice. Even cases of forcible rape involve the choice of the rapist, and so even the pregnant victim of such a crime is subject, in an especially cruel mode, to the cost of living in a contingent universe in which the evil choices of others have real effects. But of course only a tiny-almost an infinitesimal-fraction of the more than one million abortions done each year in this country can claim even the tenuous justification that the woman did not choose the act of intercourse which resulted in her pregnancy. It is not impossible that there are girls, quite young, who have entered into sexual activity without fully appreciating its possible consequences; but it is doubtful that their number is nearly so great as enthusiasts for grade-school sex education would have us believe.

The fact is that most women who conceive children have freely chosen, with full knowledge of its potential outcome, the sexual relation which has resulted in pregnancy. Abortion is, then a choice whose precise purpose is to obviate the result of a previous choice. To be sure, there is nothing intrinsically evil in seeking to compensate for one's errors, but abortion is an especially deceitful and vicious means of solving problems by pretending they never existed. As the nortorious California Medicine editorial coolly phrases it, "it has been necessary to separate the idea of abortion from the idea of killing, which continues to be socially ab-horrent." Hence abortion is a very peculiar form of killing; in the typical murder the victim is usually the object of the murderer's greed, rage, or immediate fear. The woman who procures abortion, however, has no particular animus against the specific person in her womb; she does not want him dead as such. Rather, she wants him never to have existed at all. It is not that a certain individual is perceived by another as an obstacle to some good thing which the latter wishes to acquire or retain; it is the human existence per se of the newly begotten child which is perceived by his mother as an evil because she does not wish to be a mother. Although stories of female athletes who resort to abortion in order not to miss a tournament, or of women who weigh an-

other child against a vacation or a new car, are not unfamiliar, this narrowly-calculating attitude is not typical. Anyone who has addressed a college audience on this issue has undoubtedly heard from young women in the audience this objection, or something like it: "If I had a baby it would ruin my whole life." What such a young woman is unwilling to face is not the child as such, but the alteration in her own sense of identity or self-image. She is unwilling to accept a development in the reality of her situation which she has not planned, even though it is a known possible consequence of her own actions.

In this perspective it is not difficult to see why so many women seeking (or simply favoring) abortions do not think of themselves as murderers, and why they react so angrily to the imputation. Subjectively their intentions are wholly different from those of, say, a Mafia hitman or a drunken wife beater. And this consideration does not even take into account the various social and economic pressures and very real suffering often attendant upon unplanned pregnancies which unquestionably mitigate the moral guilt in many instances of abortion. Yet, notwithstanding the sympathy which must frequently be extended to women contemplating abortion, there is some basis for insisting that abortion is, from an ontologiperspective, worse than ordinary murder. St. Augustine explains that sin consists in preferring an inferior to a superior good; that is, in inordinate love.9 Abortion not only prefers the comfort, convenience, or advantage of the pregnant woman to the very life of her unborn child, a fundamentally good thing, but seeks to deny that the life ever existed. In this sense it is a radical denial not only of the worth of a specific life, but of the essential goodness of life itself and the Providential ordering of its procreation.

The woman who chooses abortion, therefore, is destroying the basis on which choice can be made. Rather than making amends for a mistaken prior choice, rather than accepting the abundant, gratuitous good available in any new life-even when conceived in illicit or distressing circumstances-she seeks instead not merely to evade the consequences of her action but to obliterate its existential reality. The choice of abortion is a meaningless choice-no choice at all-because its sole purpose is to render nugatory another choice. Abortion is the most obvious means by which we currently attempt, as individuals, to attain the "Brave New World," to benefit from "all the tonic effects of murdering Desdemona and being murdered by Othello, without any of the inconveniences.

The California Medicine editorial seems to suggest that "the very considerable semantic gymnastics which are required to rationalize abortion as anything but taking a human life"10 are aimed simply at removing the onus of homicide from this act. Doubtless remorse and a concommitant desire for legal and ethical justification constitute a powerful motivation for the various linguistic subterfuges adduced to conceal the true nature of abortion. Still, I am inclined to suspect that the various euphemisms for abortion are, ultimately, designed to conceal not only the abortion itself but the entire actuality to which the abortion is applied as a remedy. The many young women who have insisted to me-fiercely, even desperately-that abortion is "different" from infanticide, that a fetus is "not the same as a baby," are not, I think, overwhelmed by

guilt (in most instances the abortions are still, presumably, hypothetical), nor are they fiends bent on justifying murder. They are victims themselves—hapless collaborators in a pervasive conspiracy of self-indulgence and irresponsibility which suppresses truth and consequences alike, and promises that no decision is ever final.

'Nothing is at last sacred but the integrity of your own mind," wrote Ralph Waldo Emerson. "Absolve you to yourself, and you shall have the suffrage of the world." Along with Franklin, Emerson is America's cherished and platudinous prophet, and the result is the evil banality of situation ethics, which promises that anything is 'OK" if it is wanted with sufficient intensity: "It may be biologically human, but it's not human to me." I vividly remember these words, spat from the tight lights of a nursing student. "I think you're one hundred percent right," said the young man to whom I had just demonstrated that life begins at conception, "but I still disagree with you." What these wholly typical examples of contemporary logic have in common is their insistence that opinion need have no connection with reality, that (indeed) reality itself is shaped by the imperious force of subjective desires, rather than serving as a natural limit to desire. Quite lost is the wisdom of St. Thomas Aquinas: "Our choice is always concerned with our actions. Now whatever is done by us is possible to us. Therefore we must needs say that choice is only of possible things." 12 In a world where possibilities have no limits and choices no finality, choice itself is meaningless.

There is no small irony, then, in Time magazine's endorsement of "pro-choice advocates" at the close of a recent cover story, "The Battle over Abortion," 13 for the very label is a grotesque misnomer. The "choice" of abortion takes choice out of the realm of possibility into the realm of wish. The woman does not wish to be pregnant, to bear a child. Now this wish that things be other than they are can, superficially, be gratified. With an early suction abortion she need never see the child, never even feel him kick. It is easy, then, to believe that the child never existed, that the abortion was merely a "procedure," the "terminated" pregnancy merely a temporary condition unrelated to her own serious choice already consummated. Of course, this is pure evasion. Once a woman has conceived she is forever the mother of a child. As has often been observed, it is only a question of whether the baby will be born alive or dead, whether he will leave the womb whole or in

pieces.

Sometimes the evasion does not work. Another of my vivid memories is a young woman's explanation of why she had missed my freshman composition class for more than six weeks. She had become pregnant in her second semester at the University. The counseling service had (of course!) recommended an abortion. "It will be as if it never happened," she was told. "You needn't miss a class." But it had happened, and she knew it. She quit going to all of her classes because of shame and guilt over a "non-event" of which her teachers and classmates were unaware. Now she faced the prospect of going home and explaining to her family why she had failed all of her courses. Her parents had not been informed of the event: after all, it was to be as if it had never happened. I felt, and still feel, deep sympathy for this girl; but I believe that, in the long run, she is far more fortunate than many of her sisters who have gone back to class and accepted a "choice" which cast into oblivion not only the lives of their unborn children, but also the integrity and meaning of their own lives.

I have suggested that the abortion choice is not a valid choice at all, but a mockery of choice because it renders choice nugatory by denying its consequences. I would argue also that meaningless choices are destruc-tive of freedom, that the freedom to abort is, in fact, the prelude to slavery. Reality exists; choices do have consequences. We may make further choices which mitigate or amend those consequences, but we can never simply ignore them. Sooner or later they overtake us. The woman who seeks to evade the consequences of sexual activity through abortion barters away not only her offspring's, but her own birthright for a mess of emotional pottage. She who allows herself to be convinced that abortion is 'anything but the taking of a human life,' who permits herself to believe that there was never a baby there at all, has literally yielded up a portion of her soul. As John the Savage realizes in "Brave New World," freedom requires the "right to be unhappy, and anyone who will be happy at any price cannot be free. But to the extent that one freely yields up the freedom of his will-for comfort, pleasure, security-to that extent one diminishes his own humanity, because our human nature itself is defined by our freedom: not in a jejune political sense but in the radical sense that we can make choices which deliberately alter our relation to the world we inhabit. The serious, philosophical proponents of abortion are convinced that ordinary human beings must not be permitted such choices, and they are determined to redefine and reconstitute human nature to this end. Abortion is merely one weapon, albeit a very important one, in their arsenal.

There is no need to reiterate here the endless list of scientific evidence establishing the consensus (which Justice Blackmun was, incredibly, unable to locate in writing Roe, v. Wade) that maintains that a new human life originates at conception.14 What is worth considering are the arguments by means of which scientists, who are unwilling to lie, or fearful of doing so in a professional context, justify their promotion of abortion. In 1964 Columbia anthropologist Ashley Montagu wrote: "The basic fact is simple: life begins not at birth, but at conception"; and he went on to describe the "developing child" as "a living, striving, human being from the very beginning." 15 When Professor Montagu's pro-abortion stance was called into question in the light of such remarks in this book called, significantly enough, "Life Before Birth," he responded by asserting in a letter to the New York Times (March 3, 1967) that although "from the moment of conception the organism thus brought into being possesses all the potentialities for humanity in its genes and for that reason must be considered human . . . the embryo, fetus and newborn of the human species do not really become functionally human until humanized in the human socialization proc-

Let us for the moment prescind from Professor Montagu's distortion of his actual statements in "Life Before Birth," and from the fact that his Times formulation provides an explicit rationale for infanticide as well as for abortion at any stage in pregnancy. Let us instead set Professor Montagu's lucubrations beside a famous passage of the "Declaration of Independence," generally regarded as the charter of the American conception of human rights:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are life, Liberty, and the pursuit of Happiness . . ." 17

When Jefferson wrote "all men" he meant, of course, all human beings, and when he said they were equal he did not refer to talent, stength, intelligence, other endowments, but simply to the fact of their equal humanity. As Aristotle points out, substantial entities do not admit degree: "If a particular substance is 'man,' it will not be any more or less a man either than itself or any other man, in the way that one white thing is whiter than another, or one beautiful thing more beautiful than another." 18 When Jefferson says that all men are "endowed by their Creator with certain unalienable Rights," he attributes to each human being, merely by virtue of his humanity, certain innate or intrinsic rights which cannot be denied because he fails to measure up to a test of functionality. He can, presumably, forfeit his rights by violating those of another, but otherwise these natural rights are unconditional because they are an attribute of human nature. It will not. I trust, escape notice that Jefferson lists the right to life first.

Now Professor Montagu's efforts to weasel out of his admission that unborn children are human beings undermines the very basis for any natural rights at all. It is not enough simply to be human; in order to qualify for protection under the Montagu scheme, one must be "functionally" human. Obviously we are not endowed with "functionality" by our Creator, and we are not all equally functional. What is more, there is nothing very stable about such criteria: who is to say what constitutes functionality? Is a poet as functional as a steel worker? A nuclear physicist as a dairy farmer? Depending on whether man is to be regarded as a symbol-using animal, a tool-using animal, or a laughing animal, at his most functional (and hence most human) he might be college professor, carpenter, or comedian. Once functionality has been established as the standard by which the humanity of fetuses and infants can be denied there is no logical or moral basis for not applying the same

standard to the general population.
If Professor Montagu's views prevail. then, our human rights cannot be natural or innate; they can only be civil rights, for it is society which confers humanity itself since we are only "humanized in the human socialization process." There is no guarantee that the process will always be successful, that every adult of the species will be deemed sufficiently functional to merit human status. In any case, what society giveth, society taketh away. The Supreme Court decisions illustrate this melancholy fact in a striking way. Using a logic similar Montagu's, Justice Blackmun wrote: 'With respect to the State's important and legitimate interest in potential life, the 'compelling' point is at viability. This is so because the fetus then presumably has the capability of meaningful life outside the mother's womb." 19 For human beings to enjoy natural rights, there must be a publicly-acknowledged definition of human nature which enables a human being to be identified rationally. The allied sciences of genetics and microbiology have made this task easier than ever: there is a genetically human organism present from the moment an ovum produced by the female of the species is fused with a sperm produced by the

male. "Functional" and "meaningful," however, are not aspects of an individual organism, but describe instead the regard in which he is held by others. "Meaningful" in particular is an utterly meaningless term unless we specify, meaningful to whom? In Roe v. Wade the Supreme Court has produced a decision which is essentially totalitarian: it does not merely deny human rights to a certain class of human beings; it assumes the prerogative of conferring humanity itself. "We need not resolve the difficult question of when life begins," 20 writes Justice Blackmun, and on this basis he and six colleagues have arbitrarily decreed that (for now at least) it will begin at birth.

Philosophically, the most disquieting term in Professor Montagu's remarks is "potentialities for humanity," which finds an echo in Justice Blackmun's invocation of the cliché, "potential life." Logically, the phrase is absurd because it is not legitimate to call the fetus "potentially" anything unless one is prepared to say what he is actually; but, as Professor Montagu concedes, in genetic terms the fetus "must be considered human." He cannot at the same time be both potentially and actually human, and his humanity is potential only to the same extent that we are complexes of "human potentialities." As the Spanish philosopher Xavier Zubiri argues: "The person is the being of man. The person finds himself implanted in being 'in order to realize himself." Zubiri proceeds to explain that "realizing himself" means "having to elaborate his personality in life." 21

In other words, human life, throughout its course, is a matter of realizing potentialities; and no one ever succeeds in realizing or completing himself absolutely. It has always been a curious morality that argues for the legitimacy of killing unborn children because their human future lies before them. Even the heathen poet Ovid tells his mistress, who has attempted abortion, "Let the ripe fruit fall of its own accord. Suffer the new to grow. Life is no small reward for a little delay." 22 When the matter is closely scrutinized, it becomes clear that the term "potentially human" can be applied to us all. No one becomes human except in his acts; that is, our humanity, in any sense other than the purely biological (which abortionists insist upon disregarding), is not automatic or necessary. We do not necessarily attain it by becoming "viable," or being born, or starting school, or reaching the age when we can drive, or drink, or vote. Human life is precisely the activity of fulfilling human potentialities, of becoming human. Because the rational nature of human beings is defined by the capacity for free choice, it can be neither necessary nor absolute. "Hence, in its acts," writes Zubiri, "the living 'becomes' in reality that which it already was, and its being consists of 'arriving at' which is not physical or chronological, but metaphysical, and which includes even 'having arrived at.' "23 Human rights must, perforce, be grounded in simple biological (or genetic) humanness, because that is all that can be safely ascertained at any given point in any person's life. The right to life is, then, the right to the opportunity to realize one's human potential. The abortionists virtually demand that Jefferson's "pursuit of Happiness" become a right to happiness itself—as in the Planned Parenthood slogan, "Every child a wanted child"— before the right to life be granted. But the Greek sage Solon said that we must call no

man happy while he lives; the end of his life only will reveal if it were a happy one.24

It will be perceived that our discussion has come full circle: happiness and freedom again. For it is because persons are complexes of potentialities that they are free-free to make the choices that fulfill their lives in specific, concrete, and finite ways. Happiness, then, is necessarily limited—you cannot, as the old saying puts it, have your cake and eat it too. you cannot choose to have sexual intercourse and remain a virgin. a person who is not intimately involved with another. You cannot become pregnant without becoming still more deeply and intimately involved with yet another personanother pulsing, living bundle of human potential. Therefore, Zubiri can argue, "Freedom is only possible as freedom 'for,' not just as freedom 'from' . . ." 25 That is, our freedom itself is a condition of our finite nature and our situation in reality, which binds us to the limitations and consequences of our own choices.

What is more, in a contingent universe, a universe predetermined neither by Calvin's inscrutable deity nor by B. F. Skinner's alltoo-scrutable material environment, our choices are not merely decisive; they issue in consequences that are unpredictable, that are larger than we are. Never is this more true than when our choice is the sexual act. which may, beyond our immeidate intention or control, issue in a new human life, a new complex of possibilities with unforeseen consequences. "Thus, a kind of defiance, a challenge to every existing order," writes Rev. Schall, "is necessarily contained in the very birth of any human child." 26 The price of freedom, if I may alter a famous line, is eternal uncertainty. Freedon means risk, suffering, genuine evil; but it is also the only basis for true goodness and happiness,

as Fr. Schall explains: 'This implies, paradoxically, that a creature exists in the world who has disaster as a constitutive element in his very metaphysical make-up. The refusal to accept such a being, to accept this as an accurate description of man as a unique, new being capable of radical decision-or of such a God as his origin-is indeed behind much of the rejection of Christianity, which continues to insist on posing a freedom so full of risk that it threatens to jeopardize what seems most worthy and valuable. But without the possibility and actual existence of such a free creature, the absolute adventure, the seriousness, and unbounded joy that really lie behind creation would not be

possible." It is the rejection of this element of risk and uncertainty in the life of men and women that accounts for the shrill anxiety and incessant self-delusion of the abortion mentality. Attempts to rationalize abortion as a moral alternative to childbirth, or even to minimize its horror as a "necessary evil," inevitably entail a distortion of reality, indeed an attempt to repudiate human nature and the creature-status of human beings. Magda Denes makes this chillingly (though inadvertently) clear in the introduction to her personal and graphic account of the hideous obscenity of an abortion hospital:

"For in fact I am for abortions [she says] My rage throughout these pages is at the human predicament. At the finitude of our lives, at our nakedness, at the absurdity of perpetual ambivalence toward the terror of life and toward the horror of death." 28

Abortion is, then, a rebellion against the providentially ordained structure of human

life-against the unforeseen contingency which a baby poses to the tidy, comfortable worlds we may have planned or even constructed for ourselves.

Given their origin in a denial of the order of nature, it is not surprising that arguments favoring abortion rarely respect the données of reality. Judith Jarvis Thomson. professor of philosophy at M.I.T., asks one to imagine that he has been kidnapped and knocked unconscious by members of the Society of Music Lovers. Upon awakening he finds himself lying in bed with a famous violinist whose circulatory system has been routed through the kidneys of the kidnap victim. If the latter does not agree to lie in bed for nine months, allowing the comatose musician to make use of his kidneys, then the musician will die. This fanciful situation is offered as a reasonable analogy for pregnancy. Not content with such nonsense, Professor Thompson proceeds to berate those who believe in the sanctity of life for their refusal to make even hypothetical exceptions: "I suspect, in fact, that they would not make an exception for a case in which. miraculously enough, the pregnancy went on for nine years, or even the rest of the mother's life." <sup>29</sup> Even athesists, it would appear, will invoke the miraculous when it suits their purposes.

The argument from "what if" reaches it apotheosis with Michael Tooley:

'Suppose at some future time a chemical were to be discovered which when injected into the brain of a kitten would cause the kitten to develop into a cat possessing a brain of the sort possessed by humans, and consequently into a cat having all the psychological capabilities characteristic adult humans. Such cats would be able to think, to use language, and so on. Now it would surely be morally indefensible in such a situation to ascribe a serious right to life to members of the species homo sapiens without also ascribing it to the cats that have already undergone such a process of development: there would be no morally significant differences."30

Professor Tooley, who seems to think this an absolutely devastating scenario for rightto-life advocates, has evidently not read the "Narnia" series, where C. S. Lewis sets forth quite lucidly the proper relationship between human children and talking animals. In any case, anyone who did to ordinary garden-variety cats what abortionists do to unborn children would most likely be sent to an institution for the criminally insane. Whatever chemicals may be discovered in the future for the enhancement of the intellect, it is obvious that we possess already the capacity to debase it by willfully ignoring the nature of reality and the goodness of creation. One is reminded of Virgil's words to Dante as they enter the gates of hell: "Now we come to the place where I have told you / that you will see the wretched people / that have lost the good of the intellect." 31

The abortion mentality is utopian, and that, in turn, is necessarily totalitarian. Happiness cannot be guaranteed to free men and women. Freedom means, among other things, "the right to be unhappy," or at least the right to risk unhappiness. Only comfort, security, and a stale, sterile pleasure can be guaranteed, and then only to creatures of a far more diminished humanity than any unborn child, whose world lies all before him. The abortionists' choice" slogan is a lie based on a lie. It promises choices without consequences, and hence without meaning, by way of killing supposedly without victims. Proponents of abortion demand freedom, but they do not take freedom seriously. To be "free" of unwanted pregnancy, they lie about the nature of the unborn child and of their own actions. And of course it is only the truth that will set us free.
